HARE AND HOUND RUN
AT NEWTON TODAY

First Trail To Be Short and the Pace Will Not Be Very Fast

The Hare and Hound Club will open the season this afternoon with a run at Newton. The Newton course is an easy one and if the run is the first of the season, the trail will be short and the pace easy. As usual, the men will have the use of the large New Y. M. C. A. with its swimming pool.

There are hare and hound runs which are very difficult to organize, the club, and to make the latter should take a little extra exercise out in the country, and it is hoped that a record number will take their turn.

The train will leave Trinity Place Station at 4:30 and the fare is twenty cents. Tickets should be secured from Chase Captain MacDonald at the train.

C. E. SOCIETY TRIP

Special Train to Conduct Men Through Cambridge Subway

On Saturday afternoon the Civil Engineering Society is to make a special train to conduct the members of the society to the work of the Cambridge subway. All men intending to take the trip must be in front of the Administration Building before 4:15 p.m.

For the last time the Harvard subway will be opened to the public on Saturday afternoon. It is to be sincerely hoped that the men who are really trying to take the trip will be procured from Chase Captain MacDonald at the train.

FIELD LOCKER KEYS

All the men who have locker keys are requested to see Mr. Hogue, the Groundkeeper, "Thill" Hines, at the Groundkeepers' Office, so that the men who will work out during the spring may have the use of the lockers. The locker room is complete. To Mr. Hogue the paper relative to the use of the locker room, and the reason ability, the relative importance of locker and their relative economic aspects.

FIELD DAY, 1912

As determined by the Faculty, Field Day, 1912, will be held on Friday, Nov. 9. This is a week later than last year, to correspond to the later date of the opening of the term.

Our congratulations are due to Professor Lewis and to the University of California.

COURSE IV ENGINEERS

HEAR CONCRETE EXPERT

Mr. Hogue, Graduate, Tells of the Failures in Reinforced Concrete

An interesting meeting was held by the Architectural Society last night, attended by a large representative audience of students and instructors of the department.

Professor Lewis, a member of the society, gave a resume of the lecture on the Quebec bridge disaster given by Professor Swan at Harvard. The talk was very concise and practical - economics. By Mr. Hogue he was assisted in the latter, and the points which appeared to the architectural engineer.

Mr. Hogue of the Concrete Engineering Committee, the speaker at the evening, then gave an informal talk on the economics of reinforced concrete for construction. The speaker graduated from the institute thirteen years ago, and has had two more terms. In great part, reminiscences of his experiences since graduation. He said that very often mistakes are fortunate. A rectification often proves better than a new plan, especially in the case of reinforced concrete.

The final point brought out was the relation of three words -judgment, experience, and knowledge. With knowledge alone may do something, but not when experience, other things may be performed. Topled off with the question of the engineering society, the paper completed its work.

THE TECH

PROFESSOR GUNN
APPOINTED EDITOR

Journal of Public Health Will Have Editor From the Institute.

Professor Selah M. Gunn, Assistant Professor of Biology at the Institute, has been appointed editor of the Journal of the American Public Health Association. Since beginning, in 1896, Professor Gunn has held positions on the Board of Health of Iowa and in the Iowa State University. He was also the health officer at Orange, N. J.

The Journal, which has been published for several years, became a monthly magazine January, 1911. Its first editor, Dr. Nell R. Richards, '19, was also a Tech man. Dr. Richards served on the Tech and on the Board of Health for 12 years.

COMMUNICATION.

We invite communications from all men in the Institute on important subjects. We take no responsibility for their sentiments and do not agree that they may come in, whether they are signed or not.

To the Editor of THE TECH:

The editorial in Tuesday's issue of the Tech on the report dealing with General Studies leads us to quote part of a talk I had in New York last week with one of the best known electrical engineers of that city. He is not a graduate of the Institute, but he has had so much experience and standing that he has been recently consulted by the President of his Alma Mater in regard to possible or advisable changes in courses of instruction. He remarked that he had been constantly shocked by the disadvantages under which engineers appeared in their interference with other people, and he regarded this as a profession.

"They can talk of nothing but making a better world, " he complained; "and they make a poor impression. When engineers are taught that they have nothing but shop, and nothing but shop. If you have a company of doctors or lawyers to offer them, they are likely all sorts of illnesses; they are interested in life all around, and they are learned about general matters. It is a business asset of tremendous value. I am convinced that the advantage of acquiring education must be less along the lines of special technical training than in the direction of more general culture. As it is, an engineer of first-rate professional ability gets crowded out by men who know much less of their business, but who are disliked less and make a better impression because they can meet politicians on their own ground. I do not pretend to be a judge of how far this statement is exact, but I am content to leave it to speak for itself. I look at it as a line of thought which is worth the attention of young men eager to equip themselves for a struggle which is sure to be hard, and in which things which they have overlooked in a too exclusive attention to obvious professional necessities will be shown to be more than they realize. It is, moreover, the opinion of a practical and successful man."

Aroo Bates.

SPKES.

Two Tech men are mentioned as candidates for the Olympic team. P. C. Brashear '13, and W. W. Diem '14, are in the list given out by the English branch of the A. A. U.

"Why not hold the N. E. I. A. cross-country over the Tech courses?" it may be suggested in the I. C. A. A. more years ago.

Cross-Country men are wondering if Larry Anderson has worn down his winter.

The baseball players are finding snow in the South.

PINK! That's our recipe for taking the bite out of good tobacco leaf. We hang the leaf in the warehouse for two years—then cure and subject it for six months before it is put out for sale. We call our product the Smoothest Tobacco.

One Piece Hammer in the New Model

If you ever use more than one nail in a hammer you will find our new single-piece model a revelation. It is the only hammer sold that is built up of one piece. Which makes it an ideal tool for the cabinet maker, handyman, or anyone else who uses tools. It is designed to give you the very best tool you can have. You will find it saves time and makes work easy.

CAMBRIDGE

Notice the number of Freshmen out for the Cross Country Team; we won't.

The Managing Board of THE TECH take pleasure in announcing the election of Lucius Henry Graham, '14, as President of his Alma Mater in recognition of his services and do not agree that they may come in, whether they are signed or not.

The answer to the second question should be in the affirmative. A student is entitled to give his opinion, he pays down a certain sum of money on entrance and then he is entitled to give the opinion of his mind.

The answer to the first question is right. The question is worth the attention of young men eager to equip themselves for a struggle which is sure to be hard, and in which things which they have overlooked in a too exclusive attention to obvious professional necessities will be shown to be more than they realize. It is, moreover, the opinion of a practical and successful man."

GOLF CLUB STARTED

A. E. Howlett, '13, Elected President—Plan to Secure Good Links.

Nearly a score of men gathered yesterday noon in 21 Rogers for the foundation of a new Institute golf club. A. E. Howlett, '13, who called the meeting, addressed the gathering on the prospects for a team and links. He said that the members of the faculty with whom he had consulted were in favor of the establishment of the sport. In regard to procuring suitable links, Mr. Howlett said he had visited two or three clubs and that further investigation would be made.

The meeting elected Mr. Howlett president of the club, as it was decided that it would be better to run the organization as a club that attempts to form a team. The formation of a team would exclude many men who might have misgivings about their own abilities. Two other men present said they were acquainted as golf clubs, and they are to investigate the practicability of using the links.

CONCERT LAST NIGHT.

Musical Clubs at West Newton Dance Afterward.

Last night the Musical Clubs gave a concert to a large and enthusiastic audience in West Newton that entered with particular interest in several of the new songs that the clubs have just added to their program. After the concert had been completed refreshments were served and the hall was cleared for dancing, for which most of the club members arrived after hearing of the fine time that those who remained Wednesday evening for the dance at the concert at Holmes.

HOCKEY ELECTIONS.

(Continued from Page 1.)

A good name for himself on the Purple team the preceding winter, and immediately won for himself a place on the rush line of the team. He made nail, and this year has an even better record, playing the position of rover in such a manner that he has a good rating of points to his credit.

The new assistant manager will be a man who has been a valuable student on the team all year, being used either on the defense or rush line. McLeod is also a strong member of the track team, having broken the Institute record with the distance of a throw of 115 feet 3 inches in the spring meet last April.

Of the men now on the Varsity squad there will be left as a nucleus for Captain Ranney's team: Hurhart, Stork, Bichl, Schmidt, Fletcher and MacLeod. Manager Ranney has also made arrangements so that there are a number of games already scheduled for the coming season.

LEWIS TO LEAVE.

(Continued from Page 1.)

California, Mr. L. Rosenblatt, who is an instructor at the Institute, has also accepted a position as instructor there.

Pittsburgh has won the intercollegiate swimming title with five victories and no defeats. Princeton is next and Yale third. During the year six records have been broken.

You should own a MOORE'S BEAK

It can be stored forever, anywhere, in pocket, pocket book, handbag, without crumbling. When the cap is on, the ink drawing in the ink, it will combine with any fluid on flow.

It will cover any kind of ink, even India Ink. To make it blacker, hold it in the sun 15 minutes.

It is the absolute favorite pen for all. No other pen gives such satisfaction on hands of all sort. This is the best Victorian Pen made.
