SHOW DEPARTMENTS
MAKE FINE PROGRESS

Rehearsals Every Day This Week—Principals and Chorus the Best Ever.

Rapid progress is now being made in the Stage Department of Tech Show, 1912. Rehearsals are being held every day, and Coach Eugene Sanger has several times expressed his approval of the way the men are taking hold of their parts. According to Stage Manager Thayer, the chorus, in all probability, will be picked this afternoon. Many new men, together with those of last year's chorus, have made the number of competitors this year larger than ever before. At present there are about 60 men out for the chorus, and the final cut will reduce that number to 35. The principals rehearsed last Saturday afternoon and rehearsals will be held every day this week.

Work in the other two departments is likewise progressing. The four-page pamphlets have been sent out by the Publicity Department to Smith and Amherst Colleges, and it is expected that by this means larger audiences will be had at Northampton.

Work in the Business Department has been so great this year that it has been necessary to select three Freshmen assistants instead of two, as was done last year. Manager Woehling has recently been in New York giving a demonstration of the system for giving a performance in that city. Up to this time, however, no definite arrangements have been made.

M. A. H. S. CLUB MEETING

Second Meeting of Year to Be Held in Union Friday.

On Friday, March 15, 1912, at 7.30 o'clock, the Junior and Senior School Club of M. A. H. S. will hold their second meeting in the music room of the Union. The meeting will be devoted essentially to a social nature and a very pleasant program has been arranged. It will commence with the reading of the strophes which will receive Tech Society, an entertainment consisting of vocal and instrumental selections. A number of the members are candidates for the Tech Show, and they are to give a number of sketches for the detection of the members.

At 9.30 o'clock the meeting is adjourned and the members are invited to join the faculty and students at the Y. M. C. A. for a midnight social. The program is as follows:

MINING SOCIETY

Special Lecture on "Australia" to Be Given Wednesday.

At eight o'clock Wednesday evening, March 13, the Mining Society will hold a meeting in the Union. The lecturer, Dr. W. H. Lehman, will deliver a lecture on "Australia," laying special emphasis upon the wonderful mineral possibilities that continent contains.

Mr. Lehman has secured for this paper a full collection of lantern slides from the Lord High Commissioner for Australia. These slides were sent from London especially for the use of the society, and since they are to be used in connection with the lecture, all members are admitted free of charge.

The lecturer of the evening came from the Institute of Science, University of Sydney, one of the largest schools in Australia. He is a special lecturer in the Mining Engineering Course.

HARE AND HOUND RUN AT NEWTON SATURDAY

Five-Mile Course Laid Around Golf Links — Coach Kanaly Speaks to Men.

The Hare and Hound Club held its first race Saturday noon on Saturday. The course started at the Y. M. C. A. gym and ended at the Newton golf links, and after five miles of running through the woods and field ended at the starting point. The special feature of the course was the number of hills encountered. The runners probably did more climbing in the course of the run than they have done since they began their Saturday runs at the opening of the school year.

The hare laid a number of successful illusions which kept the leaders busy picking out the right course and gave the slower men a chance to keep up. A rather easy pace was set by the leaders, somewhat increasing towards the finish. The winning time was five minutes and forty seconds, a little by the muddy condition of the course.

After the run Coach Kanaly spoke to the fellows, touching on the 1914-1915 season's prospects and the necessity of having the members present. He warned the Sophomores that the conditions which have produced on these runs endangered the chances of scoring a team victory this year, and recommended the team to concentrate on the event of the race. While it is the duty of Tech men to men, he added. He calls them to set an example to other men on this, the opening saturday.

An electrically driven machine which divides dough into 15,000 rolls an hour has recently been installed in a New York bakery.

COURSE I MEN BUSY
WITH THESIS WORK

Experiments With Concrete Deal With Its Constructive Properties.

Thesis work is coming in for a large part of the efforts of many of the Course I men. Two of the men are continuing their thesis work of last year in the study of concrete. Two other students are making determinations of the parting-strengths of an angle of concrete. They are making concrete specimens of various natures in order to find the effect of all possible combinations of the ingredients on the strength of the paste.

Other students of the department are performing similar tests with the record that our team through a hard season. The team is being frozen at different times after being mixed to determine the effect of this treatment on the strength.

Another feature of the work is the testing of the supporting power of small areas under a distributed load. To distribute the load evenly over the top of the arch, sand fillers are being used.

COURSE I TRIP.

(Continued from Page 1, Col. 2.)

forms are similarly constructed, as well as having the modern "safety" corners, and can be flushed when necessary to clear them.

The car barn and machine shop also came in for their share of inspection. All the cars were brought to the shop and their electrical equipment installed there. These cars were specially constructed for this subway, being about seventy feet long by nine and a half feet wide. With an ordinary load they weight about seven tons and have been equipped with 200 horse-power motors.

The section of the subway from Park Street to the river was built by the Boston Transit Commission and the rest in Cambridge by the Boston Elevated Company. The later section is leased to the city of Cambridge. Mr. H. F. Bowville and R. R. Springer, also Tech men, were the designing engineers of the construction work.

RIFLE CLUB MEETING.

Tomorrow at 1 o'clock the Varsity Rifle Club will hold a meeting in the utmost importance in Rogers 26. It is hoped that the man will attend, since that called for all the fire arms useless since there was not a quorum present. The first order of business is such as to require immediate attention.

The club has fared excellently since its organization, having won its two matches easily, the first against Brookline High and the second with Company F, of the 6th Regiment, M. V. M.

Heraldry, the art of designing and making coats of arms, is being revived as an art form with the increasing interest in heraldic design. It is often used as a decorative element in various designs, from heraldic emblems on clothing to heraldic patterns in architecture and textiles. The revival of heraldry is not only artistic, but also serves as a way to connect with the past and the history of families and organizations. The study of heraldry involves understanding the symbolism of various elements used in coats of arms and the rules governing their design. This image represents a page from a book or document containing information about heraldry, the history of heraldry, and possibly instructions or designs for creating heraldic elements. The text appears to be a mix of Gothic and calligraphic styles, which are often associated with heraldic art. The use of diferent fonts and sizes, along with the incorporation of ornamental elements, creates a visually appealing and intricate design that reflects the complexity of heraldic traditions.
