RELAY TEAMS HAVE CLOSED SEASON

Men of Both Squads Do Fine Individual Work; Good Material Left.

In reviewing the past Relay season it is unfortunate that the results are not better for Technology than they are, but, considering the fact that both teams were bolstered by unlikely candidates, it may be safe to say that more auspicious conditions would have resulted in a more successful season, for the teams were by no means slow, there having been several men whose time we are looking forward to hearing this year.

A strong and well-balanced team was left from teams of the preceding years, with Benson, Bolton, Munch and Wyman forming the nucleus of the one-mile squad, and Munch on the one-mile team.

ELECTROLYSIS

At 4 o'clock this afternoon, in 31, the demonstration of the subject, "Wealth and Inequality." Dr. O. P. Gifford delivered fine lecture and pointed out several important points in the subject.

POSTER COMPETITION

Prize Poster Decided Upon—Dances Ordered Out March 25.

At a meeting of the Prom Committee yesterday afternoon the prize poster was decided upon, the subjects being made for its reproduction. The successful artist is P. J. which is due to the President Maclaurin.

HARE AND HOUNDS' RUN

Should Be Successful—Good Attendance Expected.

The Hare and Hounds Club has had its posters on the bulletin boards for several days. Those who took the Needham run in the fall will remember it as an exceptionally good course. The club entertained the members of the Institute, Richard C. Mac- laurin, to whom so much is due.

FAST SOPHOMORE TEAM MAKES CLEAN SWEEP

Brilliant Playing, Supported by Nice Work on the Part of All.

Last Saturday night the Sophomore basketball team finished one of the most successful seasons in the history of basketball at the Institute. The team played a strong schedule of nine games and came out victorious in all of them.

DO NOT WASTE TIME.

Dr. O. P. Gifford Delivered Fine Talk in Union.

Yesterday, Dr. O. P. Gifford spoke in the Union on the subject, "Wealth and Inequality." He mentioned several points that have been in the news lately, and emphasized the fact that it is not possible to get a monopoly in; no one can own everything, and of which one does own all there is. The father of the prodigal son was the man at the head of great undertakings. Crowds never save, young people never are inclined to, but the man who does is in who is ready for an opportunity when it comes.

DORRANCE ELECTED EDITOR-IN-CHIEF

Committee Elected to Arrange for Competition for Art Editor.

The 1912 Technique Editorial Committee has announced the election of Arthur C. Dorrance of Detroit, Mich., as Editor-in-Chief. Dorrance was Vice-President of the Freshman class last year, and was also on the class theatre committee. He ran on the 1912 ticket which bore the name of the Field Day record last fall. He is a Sigma Alpha Epsilon man.

HUNT. HALL; STUDENT CELEBRATION: 4.00 P. M.

President Maclaurin to Speak at Official Demonstration of Student Appreciation.

President Maclaurin will speak this afternoon in Huntington Hall, at 4 o'clock, at the big student mass meeting which has been called for the undergraduates' deep appreciation.

Pleasant Entertainment Planned—Victoria Secured.

The Mechanics Art High School orchestra might hold its second concert of the year. The success of the first concert was due to the efforts of the orchestra. The program will consist of a card-game, the winners of which will receive Technology favors. This feature has always proved a success at the club entertainments.

Electrolysis Lecture.

At 4 o'clock this afternoon in 21, Professor Goodwin will begin a series of lectures on the subject of Electrolysis. This course of lectures is optional and open to the Seniors, Juniors and Sophomores. Although the subject is a difficult one, the subject is one which would warrant a large attendance.

MONSTER MASS MEETING IN HUNT. HALL AT 4 P. M.

President Maclaurin to Speak at Official Demonstration of Student Appreciation.

Monday night the members of the Institute, Richard C. Mac- laurin, to whom so much is due.

FOOTBALL: MARCH 14, 1912

PRICE TWO CENTS
CONVOCATION.

The mass meeting to be held this afternoon in Huntington Hall is an affair which every man should attend. We have no enough of these gatherings, and there has never been one before with the motive that this has behind it. These convocations give us an opportunity to refute the charge that science men are often brought against by Technology men, namely, that they have no college spirit. We were able to conduct this meeting in our last, held a few weeks ago, on the occasion of the unveiling of Mr. Rogers' portrait.

Let us all get together, then, this afternoon so purely to do our best our benefit the way Technology men have appreciated his magnificent gift; but also to strengthen the feeling between man and man which is surely and most cementing us into one great brotherhood.

TECHNICAL EDUCATION.

The ancient controversy between the Classical and Technical schools as to which is in the higher branches of the tree of practical use in the business world has been continued for much discussion lately in the daily papers; it might be interesting to give part of an interview granted by Thomas Alva Edison, America's greatest scientist, to a reporter of the "Yale News." We quote from the edition of the 12th instant. In regard to his personal experience with college men, Mr. Edison said:

"I have had greater experience with graduates of the Massachusetts Institute of Technology than with those at Harvard or Yale, and have had at one time, thirty of them in my employ. And let me say right here that I would employ almost any graduate of that institution who came to me, and would not argue about whether his salary should be $15, $20 or $25 per week at the outset. All these things we can save by simple mechanical means that take to account of the wish of the thing used, but if our own waste energy is to be turned to its best use we must make the effort individually, no heavenly power can succeed unless we are willing to help.

RELAY SEASON CLOSED.

(Continued from Page 1.)

Two mile team entered their first contest and was undoubtedly the best that had been put forth for some time. However, both went down to defeat. The cradle Cornell runners winning the two-mile, and Syracuse taking the mile in exceptionally fast time.

Notwithstanding the unfortunate results which they had suffered both prepared to go against Harvard at the Armory meet in Providence on February 22. During the interval the practice was severe and the men were in the best form for the contest. Harvard entered the best team that she ever had. Germania, Palmer, Mem- cans and Rhydun in the two-mile and Thompson, Gauching, Bolton and Ben-son in the shorter relay, represented Technology. Both contests were one-sided and Harvard romped away at the finish.

The defeats were by no means ignominious.

SPECIAL DISCOUNT TO TECH MEN

A. G. MORSE, Tailor

FABRICS for SPRING and SUMMER uses are ready for your inspection at my new store at 105 and 109, Phillips Building. These fabrics were produced in this country and the quality is equal to the best imported.

We proffer the editor and staff of the "Yale News" our congratulations on the broad and fair-minded policy of their paper.

C. F. Hovey & Co.

The Boston branch of the A. S. M. E. will hold a meeting at 8 o'clock next Friday evening in the Edison building, 39 Boylston street, to which all persons. 21 men are invited. Prof. E. P. Miller and Mr. A. F. Burt will discuss a paper written by them on "The Discharge Capacity of Poppet Safety Valves."

Mr. Carhart is a representative of the Crosby Safety Valve and Steam Appliance Manufacturing Co., which is engaged in the manufacture of these valves. The poppet safety valve was invented over 60 years ago, but did not come into general use until about 30 years later. The Crosby Company was the basic patent of this invention. Last year, Prof. Miller, in charge of course in mineral and metallic industries, increased the regular cotton crop, which shipped up to Europe, it returns and is sold as wool. All these things we can save by simple mechanical means that take to account of the wish of the thing used, but if our own waste energy is to be turned to its best use we must make the effort individually, no heavenly power can succeed unless we are willing to help.

C. E. SOCIETY TO MAKE TRIP TO NEW YORK

Railroads and Tunnels to be Inspected—Sail Up Hudson Planned.

On Wednesday night, April 2nd, the Civil Engineering Society is to make its most important trip of the year, that is, to New York. The society will go by way of the Pass River Line, and three days will be spent in the big city.

In order that the men may thoroughly inspect and familiarize themselves with the railroad system there, two days are to be spent in looking over bridges, railroad stations, tunnels, etc. In addition to the pleasure and value afforded by this opportunity of seeing personally New York's railway system, the society is to make a trip up the Hudson to the big Croton Dam, where an entire day is to be spent. This will be a very interesting side trip, and will give variety to the occasion. The society is to be congratulated on securing Professor L. E. More to accompany it, and take charge of the party.

The headquarters during the entire stay are to be at the Hotel Cambridge, from which all trips will start. As there are numerous arrangements to be made, it is absolutely essential that all fellows intending to make the trip sign up on the sheets posted in the drawing rooms at once.

Much interest is being manifested in the trip by the Course I, men, and as this travel from the general run of things is one of the most unique in the history of the society, it is expected that practically all the members will want to share in the good time, and also secure the valuable experience made possible by this trip.

SOPH BASKETBALL

(Continued from Page 1)

of a fast man at guard. During the half of the season that Price played he was one of the fastest men on the floor. Henderson, an extra man for center, and Fox, a substitute guard, showed up fairly strong and in another year ought to round into first class shape. Bryant, who played in Price's place for the rest of the year, is a good, hard worker, and in the games he played always had his eye on the ball.

The remarkable success the Sophomore team had is due, no doubt, to their excellent team work. This, coupled with their good passing, was largely responsible for the victories they obtained over some strong teams they met. The team opened its schedule with Bridgewater Normal on December 9th, and won by the close score of 22-19. In the first four games they played the total points scored by the Sophomores was 133, and by their opponents 69, showing the closeness of the games. When the five defeated the strong Phillips Academy team, 15 to 14, it was playing in top notch form and showed some "speed." The last four games of the season were walk-overs for the 1914 men. They took the Freshman series by the scores of 99-34 and 56-11, and North Abington Y. M. C. A. met defeat at their hands with 48-15 and 41-59 scores.

If basketball is a recognized major sport, you all the men on this year's Sophomore team will be out for the first team and will, no doubt, add to the students some good basketball.

The Yale gym team beat Princeton by one point. H. Kegs of Yale was the high score man, winning eight points. Yale won in the last event, Princeton being in the lead up to that time.

The Union Committee has made a decisive step. Costs may now be checked in the dining room.

SENIORS, YOU CAN RUN AN OLIVER IF THE FRESHMEN HEELERS ON THE TECH can. They all-like it- so will you

It is cheaper to hire an Oliver than a stenographer — and you will get more satisfactory results on your thesis.

You can RENT the Number 5 Model Oliver for twenty consecutive months then it will belong to you; or you can rent the No. 3 Model Oliver with a stand from month to month for $8.00 per month.
