CIVIL ENGINEERING TRIP TO NEW YORK

Four Days Will Be Spent There
For the Inspection of Structures.

Twenty men have already signed up for the Civil Engineering Society trip to New York on Wednesday, April 3. The men will leave on the 6:00 o'clock train for Fall River and will take the steamer Providence for New York arriving there at seven in the morning. About twenty men constitute the Civil Engineering Department of the Institute and accompany the excursion as guide.

Thursday will be devoted mainly to the visiting of bridges along the East River, especially the Brooklyn, Williamsburg, and Manhattan Bridges which were designed by the late Charles F. D. Teveson, a Tech man, and will be inspected. On Friday, a trip up the Hudson River will be made to inspect the new aqueduct and the Croton Dam. This trip was made possible by the kindness of another Tech man, Mr. I. I. Moore, of the New York Water Board. The entire day will be spent there in viewing the construction.

On Saturday, a trip will be made of the New York Central Railroad, which is now engaged in the construction of the new Grand Central Station, which will make it possible for them to inspect the station, its transportation facilities and also the new and original kiosk rooms recently installed. For those who like kiosks in public is vulgar, the Pennsylvania Terminal, the new Chelsea docks, and the new trains will be in course of construction at Jersey City for the Delaware and Lackawana Railroad, will be visited.

There is a possibility that the men will also visit the Pequot Rolling Mills.

In New York several lectures will be given on science and physics, under the guidance of Professor Moore, who will conduct them through the different Points of Interest in New York City.

SOPHOMORE BASEBALL
Practice Starts Next Saturday—M. A. H. S. Mid-Week Games.

On Saturday, the thirteenth of this month, the Sophomore baseball team will begin its regular practices at the Field. The manager will report on this day to give the squad a good start on what promises to be a rough road, for the games that the manager has scheduled are with the fastest of the high school teams in the neighborhood. One or two games will be played on Fridays, the other days will be spent at the home with the class teams of the A. H. S. and City College.

Practice will be held on Monday and Wednesday from two until four, being the days the most convenient for the majority of the men. As a means of giving the squad some actual playing, Manager Gardner has arranged with the City College, AC, and H. S. to play mid-week games, the games being held on Tuesday after the thirtieth, and the next on Thursday. Other games will be held on the Tuesdays of one week and on the Fridays of the next.

COSMOPOLITAN CLUB
Meeting on April 5 to Discuss Joint Entertainment.

On the fifth of April the Cosmopolitan Club will meet and all officers of the club are requested to be present. Plans for the joint entertainment to be given in behalf of the Chestnut Street Memorial Fund will then be discussed. One of the members of the Joint Committee will be in attendance and will talk on the subject of purpose and means.

The preliminary entertainment that has been arranged for the first part of the evening will be given. This will be followed by a dance. The closing points will be made by the committee. As yet the schedule is not fixed, but it is certain that the entertainment will be a good one for the members of the club.

SALE OF SHOW SEATS.
Applications Sent to Students—Classifications Observed.

Saturday afternoon fifteen hundred applications for seats at the Tech show performances were sent out by the management. The applications hold for all performances, but the Show management wishes it understood that choice of seats at the Box office first, unless otherwise stated, in the advertisement, or at the show office itself, will secure the best possible positions on the floor. It is possible that in the rush of applications some mistakes may be made, but restrictions of locality in filling the seats is not the idea. It is not the idea to secure the best possible seats, but the idea is to afford much amusement until 9 o'clock.

It is possible that in the rush of applications that the management will be forced to make changes in the arrangement that this year all seats will be sold, thus enabling the management that this year all seats left unsold, and it is the hope that the crowd will be very well pleased to give these students blanks for the reserved seats.

The climax of months of consummate diplomacy and infinite patience on the part of the management has been reached. The Institute has reached the point where its facilities are most desired, and the management has not been slow to secure the best possible positions on the floor. Professor Carver to Address Miners

Member of Harvard Faculty Will Lecture On European Customs.

Professor E. N. Carver will address the Mining Engineering Society at its next meeting in the Union at 8 P.M., Wednesday, March 27. He will relate some of his interesting experiences abroad and describe the beautiful scenery of Europe and the British Isles.

Professor Carver is Professor of Economics at Harvard and has wide experience as a student of economic conditions and the laboring classes of the people in many foreign countries. On this account his talk will be more of a general nature rather than relating in any way to mining engineering. He will discuss the antique agricultural implements used in many of the small farms of Europe and show that their methods of tilling the soil do not differ materially from those of a few centuries ago. The lecture will be illustrated with numerous slides which were prepared by Professor Carver while traveling abroad and are exceptionally well executed. Most of them are agricultural scenes in Great Britain and Ireland and the whole of Continental Europe, but a number of technical slides may also be included. Although the talk is not to be on a professional subject, the society officers feel that all Course III men interested in it, even if only very slightly, are sure to thoroughly enjoy the evening.

STUDENT APPEALS FOR SUBSCRIPTIONS

The Cambridge Property.

(Broad Education)

February 10, 1912

On Saturday, March 23, the subcommittee appointed by the Institute Committee to look into the Conduct of the Musical Clubs to allow the Orchestra to play at the spring meeting of the Society for General Manager, Musical Clubs.

RESERVED SEATS may be purchased by leaving notes at Cage for General Manager, Musical Clubs.

Cross-Country Men
Work at the Field

Run to Be Held Monday From
the Gym—Run Over Course
Wednesday.

Saturday's work at the Field, which took
the place of the Needham trip
for the cross-country men, consisted
of three-mile runs taken in the form of
handicap races. On Monday the men
will take road work from the Gym, but
the distance they will be sent has not
yet been decided. Wednesday's work
is to be a hard run over the course.

The chances of the Freshmen in the
coming race seem to be rapidly
improving. The number of men from the
class speaks well for its hopes, among
those cut are a number who did fair to make the
runners before their leave the high-

THE UNION
FRESHMAN BASEBALL MEETING TODAY

Many Candidates Wished For—Sophomores Have Already Organized.

The freshmen hold their first baseball meeting today at 1 o'clock, in the Union. Manager Turner hopes to see a good number attend this meeting so that the club may get after them and try to cut down as much as possible the advantage that the sophomores have gained by their earlier start and greater experience.

The upper class has already held its meeting, elected its captain and published its schedule. They start and greater experience.

The Sophomore baseball meeting today at 1 o'clock, will make arrangements for the practice this coming Saturday at the indoor meet at Ann Arbor.

I is possible the advantage that the Sophomore team will have over the Freshmen is that the Sophomore team are able to play the baseball players training in the presence of a score of prominent citizens of the city.

The baseball players training in the presence of a score of prominent citizens of the city.

TECH GOLF CLUB MEETING TOMORROW

Important Reports on Future Tournaments Will Be Made.

The Golf Club will hold its next meeting on Tuesday, March 26, at 1:00 in the Upper Club in the Union. It is probable that President Hewlett will appoint the committee of three men who will take charge of the tournament and arrange the handicap each man is to have. A complete report of the various clubs and links under discussion will be made, as was possible at the last meeting, and the club will again consider at what green it will play.

The two clubs which are most certain to have charge of the Alliance Club and the Waltham Golf Club, although most of the members are in favor of the Alliance Links as a base of operation, this green has a favorable situation and may be reached by a twenty-minute ride. The club offers the members the use of cars, except in the case of the Waltham club, together with the use of two tennis courts and a bowling alley, for ten dollars.

The men will have plenty of experience in playing other teams if they wish to make a creditable showing in the Alliance Links. The new Class K-3 Pacific type locomotive, on the Lake Shore & Michigan Southern Railroad, is capable of hauling twelve steel cars, weighing 1,400,000 pounds, at an average speed of more than 100 miles an hour. This is done as a matter of regular procedure under the direction of A. P. McNab, head of the department.

The machine in Fritz Laboratory was erected will certainly facilitate material operations of Technology in closer touch with the world. It was crushed tinder a lead weight is supported. The test was done as a matter of regular procedure in the presence of a score of prominent citizens of the city.

The test was held in Fritz Engineering Laboratory, where the columns were placed in the 800,000 pound testing machine of Lehigh, the largest of its type in the world. It was crushed under a load of 208 tons. This is the first in a series of nine tests, the results of which will be published by Professor Frank P. Mistuken, head of the department, and a graduate of Massachusetts Institute of Technology. The engine fitted with a superheater. The test was held in Fritz Engineering Laboratory, where the columns were placed in the 800,000 pound testing machine of Lehigh, the largest of its type in the world.

Technology who were never intended for physical measurements to our small graduating classes lies in the last two weeks of exercises.

The Board of Athletics at Brown has voted to discard basketball as a Varsity sport. This action was taken because of the inability to secure games with the New England colleges rather than any bad showing of the team itself.

Funds for the payment of the expenses of the Olympic team are not coming in very fast. Among the recent contributions is one of $500 from Dartmouth.

The Harvard-Yale crew race will be held at New London on the treaty first of June. The Varsity sight-boat race is planned for a week or two in the afternoon. The Varsity four-oar and the Freshman race for the morning of the same day.

Harvard’s Varsity and Freshman crews have braved the rain and chill winds of the past week and gone through their paces regularly on the Charles River.

We have heard time and again the denunciation was based on the excellent weeding out processes of our weakness of our systems and these constitute the majority in reports, will be made before the end of the term.
