

THE TECH

VOL. XXXI. NO. 135

BOSTON, MASS., FRIDAY, MARCH 29, 1912

PRICE TWO CENTS

MECHANICALS AND CIVILS TO MEET

M. E. Society Also Has Extensive Plans For Last Few Weeks of Year.

A joint meeting has been planned by the Civil and Mechanical Engineering Societies to be held in 6 Lowell at 4.15, Wednesday, April 3. Mr. James W. Nelson will give a talk on "High-Pressure Hydrostatic Machinery" which will be illustrated with numerous lantern slides. All men in either course I or II, whether members of the societies or not, are given a cordial invitation to attend.

The M. E. Society has various other plans for the near future as well as a general outline of next year's work. The last trip this year will probably be one through the plant of the Waltham Watch Company and will be taken shortly after the joint meeting with the Civils. Near the last of April, Mr. R. R. Heuter, an instructor in the department, will tell the men of his interesting experience while in Germany, and at a subsequent meeting the society will be addressed by one of the students. The subject is expected to be some phase of the thesis work being carried on in the Mechanical Engineering Department, but as the Seniors are unusually busy just now, this matter has not yet been definitely decided. The plans for next year are to include trips to large manufacturing plants and engineering projects of general interest. A larger number of students than formerly will speak at the meetings, very few of which will be for the purpose of transacting business. Next year matters of business will be settled in the spare time just before lectures.

All the professional societies are (Continued on Page 3.)

CREW OBTAINS SHELL.

First Tryout in Eight-Oared Shell This Afternoon.

Yesterday the crew realized its long cherished wish of possessing an eight-oared shell. It was purchased from the Harvard Rowing Association, and was brought down the river last night after practice by crew candidates who rowed up to the Harvard boathouse for it.

The first real tryout in the new shell will take place this afternoon, and the following men are to be sure to report for this purpose: Sweet, Werlich, Short, Cleverly, Perin, Howkins, Hale and Gere. These men will make up a crew for the afternoon, and Coach O'Leary will occupy the coxswain's seat and instruct the men.

All the regular men are to report and will have a workout in the two four-oared shells, with a slim chance of getting in the eight.

At present the prospects for the crew are extremely good, and there is every reason to believe that in a couple of years Technology will make a name for itself in the races at Poughkeepsie. It is especially gratifying to the crew management that so many Freshmen have reported for the work, as it is their purpose to lay a firm foundation for a crew at the Institute.

INTER-COURSE RACE COMES SATURDAY

Course Two Seems to Have Best Chance, But Score Will Be Close.

The annual Inter-course race will take place Saturday afternoon over the Tech course. The teams are very evenly matched, and the score will be close. Courses 6 and 1 have had the best cross-country men for many years, but they are not strong this spring. The Mechanicals seem to be about the strongest, as they have H. S. Wilkins, '14, and A. F. Peaslee, '14, both of whom should place.

The Miners have C. S. Lee, '14, who will probably place in the first four. A. F. Nye, who is entered for Course four, will give this team a show if they can produce a few other men. E. Hill, C. Lovell, M. Magee, F. Wall and L. Best, of the Freshman class, will help the scores of the courses with which they elect to run. Hill looks good for one of the first places.

Entry books have been placed in the Union, the Gym and at the Field. Each man entering should put his class and course with his name, so that the numbers of the teams may be decided.

TECHNIQUE PROGRESS.

1913 Book Now on Press—Work of Board Nearing Completion.

The work on Technique, 1913, is rapidly coming to a close. In a little less than three weeks it will make its appearance at the annual rush on the sixteenth of April, at 12.20 o'clock.

The book is now on the press, and the work on it is being rushed so that everything will be ready on the date of issue. The end of the work for the members of the Board is already in sight, and practically all that remains to be done is selling the books and collecting from the advertisers.

BEAR HUNTING.

Tech Biologist Tells of Adventures in N. Brunswick Woods.

Last night William Lyman Underwood, lecturer on Sanitary and Industrial Biology, gave a talk on "Adventures of a Naturalist Photographer in the North Woods," before the Natural History Society at the Fogg Museum. His lecture was illustrated with many unusual slides, some of them taken under great difficulties, on his hunting trips in New Brunswick. He related several anecdotes about bears and their behavior when trapped, and told of the advantages that hunting with the camera has over hunting with a gun.

Members of the mechanical and electrical engineering departments of the University of Maine are now in Boston on a week's trip of inspection. Today they will visit the Milk Street Exchange of the New England Telephone Co. and the Quincy Market Refrigeration and Cold Storage Warehouse. Tomorrow they go to the Fore River ship yards.

T. C. A. HEARS REV. ALLEN STOCKDALE

Popular Boston Minister Speaks Before Large Gathering in Union.

"What's the Use?" was the subject of the talk given at the Technology Christian Association meeting yesterday noon by Rev. Allan Stockdale. The large number of men present at the address was proof of the popularity with which Dr. Stockdale gained at his previous talk before the T. C. A. at the first meeting of the year.

"The question that a man asks himself," said the speaker, "when he is physically and mentally tired out is, 'What's the Use?' Now this brings us to a very important point in the art of right living, the preservation of one's health of body and mind.

"It is a scientific fact that a man can do the same amount of work, and do it better, in five hours when his brain and body are fresh, than he can accomplish in eight hours with a fatigued body and mind. Is it not, then, expedient that a man keep careful watch over all those things which have to do with his physical well-being, and thereby not only increase his efficiency, but guard against that dangerous state of mind which leads a man to sigh, 'Oh, what's the use?'"

"There is another frame of mind in which a fellow becomes discouraged. When one has been grinding hard on what he considers the right thing, and when someone else, who is unscrupulous, steps in, and, by his trickery slips ahead, one is attempted to doubt the justice of the world and to say, 'What is the use of doing right when it keeps me from succeeding as that man has?' This is false reasoning. The person who is not founded upon a rock will get his deserts. He may go ahead of his competitors temporarily, but, like the sky-rocket which shines brightly for an instant, he is bound to have an insignificant and certain end."

Mr. Talbot, Secretary of the Christian Association, announced that the speaker for next Thursday would be Dean Burton.

CHESS MEETING TODAY.

Club Will Be Reorganized—Games Promised This Term.

All who are interested in chess will meet in the Union this afternoon at 4 o'clock, to discuss plans for the future. The purpose of the meeting is to revive interest in the Chess Club, which has been inactive during the last few months.

The club's program for the remainder of the year will be the perfecting of a closer organization and the development of material for a strong team next year. There is every possibility that several games can be arranged with other colleges to be played during the remainder of the term.

The University of California is troubled with the question of the importance of General Studies. The claim of classics for a more important place on the college curriculum is meeting with approval there.

TOMORROW LAST DAY FOR PROM SIGN-UPS

Last Few Places Must Be Filled By Saturday Noon—Dance Orders Out Soon.

The Prom Committee will give the men only two more chances to sign up for the Junior Prom. Their representative will be in the Union this noon from 1 to 2 o'clock, and tomorrow from 12 to 1 o'clock, when the books will be closed. This year the committee has been so successful in obtaining sign-ups that it is planning to spend much money on floral decorations for the hall.

During the week of April first the dance orders and the invitations can be obtained in the Union from the members of the committee at the noon hour.

The committee has been far more successful this year in running the preliminaries than any committee of former years. The fact that the financial affairs have been satisfactorily settled this early date gives promise of the most successful Prom ever held.

MUSEUM OF FINE ARTS.

Docent Service to Be Held On Sunday, March 31, at 2.15.

The Museum of Fine Arts is to hold a Sunday Docent service on March 31, which, as usual, will be free to all.

At 2.15 P. M. Dr. L. Melano will speak in the lecture hall on "The Incas" (Bolivia and Peru). At 3 o'clock, under the auspices of the Department of Chinese and Japanese Art, Mr. Langdon Warner will conduct a circuit through the galleries. The Department of Egyptian Art has secured Mr. Joseph Lindon Smith to speak on "Egyptian Excavations," and he will begin his lecture in the Mastaba Gallery at 3.45 P. M. Any Techmen who are interested will be welcome at all these talks.

SHOW TICKET NOTICE.

The Tech Show, 1912, authorities have stated that no applications for seats will be accepted at a date later than Saturday, at 5 o'clock. The applications should be sent to the Show Office, or left at the Cage addressed to Tech Show, 1912.

Harry Adams of Worcester has been chosen to referee at the N. E. I. C. A. A. meet in May. He has officiated in this capacity for the past 20 years.

CALENDAR.

In Charge of S. H. Taylor, 1914.

Friday, March 29.

1.20—News Board Meeting—Lower Office.

4.00—Chess Club—Union.

4.15—Glee Club Rehearsal with Coach—Union.

5.00—New Jersey Men—Union.

Saturday, March 30.

1.00—Last Chance to Sign for Prom—Union.

2.35—Hare and Hounds' Run—Back Bay.

8.00—Joint Night, Cosmopolitan Club—Union.

Applications for Show Tickets due.

SHOW APPLICATIONS MUST BE IN SATURDAY 5.00 P. M.

RELIGION.

That the practical side of religion is more appealing in its character to present day people, than the theoretical side, is well illustrated by the success which has attended the efforts of the Technology Christian Association of officials during the school year, now nearing its end.

Previous to this year ours was an Association merely in name. It certainly held meetings, but they were always very poorly attended, and we left them feeling that something was lacking. The impetus and invigoration of manly belief were not present.

What a change this year has shown us; the noon meetings in the Union always have a large attendance and the talks are of a nature that interests us—in spite of ourselves. The men who have spoken couched whatever they had to say in such practical similes and metaphors that their arguments invariably left a strong impression on our minds.

Common sense, and a belief in one's own powers of doing good, are the essentials of a modern religion; and we congratulate the Christian Association not only for its excellent year's work, but also for its sagacity in realizing the attributes necessary to a religion that will appeal to men.

WISDOM.

The decision of the members of the Institute Committee that it would be inadvisable to hold the All-Technology dinner in its amended form is about the wisest thing that could have been done under the circumstances. The fact that the plans of the proposed dinner had been so utterly changed from those originally proposed, has been viewed with dissatisfaction by the majority of the undergraduates; and, on this account, their support would have undoubtedly been lacking when the time for the banquet arrived. Then, again, with all the Institute festivities coming along so thickly now, the question arises whether the fellows would have had either the time or the financial backing to support the affair.

We would suggest that next year's Institute Committee keep this idea in mind and run a genuine undergraduate dinner early in the school year. There is no reason why the affair should not be the largest thing ever held at Technology, and end by becoming one of our most popular annual functions.

COMMUNICATION.

(We invite communications from all men in the Institute on important subjects. We take no responsibility for their sentiments and do not agree to print any that may come in, whether they are signed or not.)

To the Editor of THE TECH:
 Dear Sir:—

The "Well Wisher," whose letter appeared in Wednesday's TECH, seems to be unduly alarmed over the dinner which the T. C. A. is arranging for Friday, April 5. In the first place let me state that it is not an "Annual Banquet"; it is not in any sense a jollification. The affair is primarily a meeting for all Tech men who are interested in any form of Social Service; the dinner is secondary, and is planned merely because it is easier for students to come at 6.30 and stay after dinner to hear a few addresses than to come back at 8 to a more formal meeting, which practically breaks up the entire evening.

It did not occur to those in charge until too late that the date chosen is Good Friday. This date was decided upon because it was one of the only two when President Maclaurin could speak for us; he is an extremely busy man and we were glad to adapt our plans to suit his convenience. I should not have planned purposely for a dinner on Good Friday, for while personally I can see no possible objection to such an observance of the day, I have the highest respect for the views of any who disagree with me. I can only say that we have no intention of urging any who cannot conscientiously do so to attend the dinner. If they care to come in afterwards to hear the addresses they will be most heartily welcome.

As for the meeting, which, as I have said, is the object of the affair, if Christians cannot observe the anniversary of the day when Christ died by discussing Social Service,—making plans to help the men and women whom He died to save,—then I say it is time for the Christian Church to close its doors and give way to other organizations which will do this great work. It is because the Church is "on its job" that the Technology Christian Association plans to spend part of Good Friday finding out how we can help, and that the pastor of a Christian Church in the city of Boston plans to tell us what the Church is doing.

As to the superstition which formed the bulk of the communication under discussion, that does not need our attention. I cannot believe that any Tech man, "in these tolerant days," would give any serious thought to such ideas.

Respectfully,
 L. R. Talbot,
 Secretary, T. C. A.

Amherst's baseball team will leave this week on its annual Southern trip. Ten games will be played, one of them with the fastest college teams of the South, and the last with Columbia University in New York. The trip will give the men a lot of much-needed outdoor work and will put them in good shape for the regular season which follows soon after.

Manager Brown of the Brown University tennis team has completed the schedule for the coming season. The team from M. I. T. is the first one on the schedule, coming on Saturday, April 27. There will be two meets every week until the New England Lawn Tennis Association meet at Longwood, which is the closing one on the schedule.

**LARGE NUMBER OF MEN
OUT FOR TRACK TEAM**

Coach Kanaly Has a Find Among
Shot-Put Candidates—Few
Pole Vaulters.

These bright, warm days just passed have brought out the rank and file of athletes in great numbers. The Field is used more this year than ever before, and the interest shown in track athletics promises to make the coming meets the closest in years. All the speed runners are sprinting their distances in good time. Guething, Bylund and Germain are fast cutting seconds from their first trials. The sprinters, Wilson and Wilkins, are showing up remarkably well for so short a time. There are also many new men from both the lower classes that promise to make points for their teams in the inter-class meets.

There seems to be a renewed interest in the weight and field events. More men than usual are venting their energy in the hammer and discus throw and the shot-put. In the latter several Freshmen have shown up strong. A new man, Conway, discovered by Coach Kanaly, is the find in the shot-put. He has improved remarkably in the last week till now he stands with the best of the putters. Crowell and O'Brien are also among the best of the weight men. The pole vault and the broad jump are the least promising events, though there are several candidates out for both. The high jump will be easily taken care of by Dalrymple, Hall and Teeson.

POTASH FOUND IN U. S.

Lake in California Is Said to Con-
tain Ten Million Tons.

Searching parties from the Bureau of Soils of the Department of Agriculture and from the Geological Survey have sent in promising reports about the results of their search for potash. These reports are founded on the fact that a potash deposit of apparently great importance has been discovered at Borax or Searless Lake, in the northwestern corner of San Bernardino County, California.

This lake is the last remaining pocket of a once much larger one, and after various private parties had analyzed the brine contained in it, and found the results significant, the Geological Survey and the Bureau of Soils sent representatives to the deposits, who found that the brine contained an average of 6.78 per cent. of potassium oxide in solution. Because of the climatic conditions, it is thought that the action of the sun will evaporate the solution and leave a product which can be separated with comparatively little difficulty. Methods of separating potash from brines are now under investigation by the Bureau of Soils.

It is estimated that the brine saturated salt body is at least 60 feet thick and covers an area of at least eleven square miles. If these facts are, as represented, the lake contains between four and ten million tons, which would last the country for about thirty years at its present rate of consumption.

JOINT MEETING.

(Continued from Page 1, Col. 1.)
planning to have a big dinner in the Union about April 24, for which plans are rapidly maturing. Speakers will be secured for the evening and every one attending is promised an unusually good time. The officers intend to make this the best banquet of the year.

LOST—Technique, 1913, sign-up slips, numbered from 1433 to 1440, inclusive. If found please return to the Technique office at the Union. If these slips are not returned they will not be honored. (135-6t)
