INTER-COURSE RACE COMES SATURDAY

Course Two Seems to Have Best Chance, But Score Will Be Close.

The annual inter-course race will take place Saturday afternoon over the same course as was used last year. During the last ten years the race has become a firm foundation for a crew at the University, and will have a workout in the two weeks following the date for the race.

Next year matters of a closer organization and the desirability that several games can be played in one afternoon will be the primary questions to be decided upon. The clubs still will not be limited to those on the campus, but only the expenses of travel will be added to each team. It is expected that teams from Lawrence and other nearby towns will participate. The men from Tech are to make up a crew for the afternoon, and will have a workout in the two weeks following the race.

T. C. A. HEARS REV. ALLEN STOOLKALDE

Popular Boston Minister Speaks Before Large Gathering in Union.

"What's the Use?" was the subject of the talk given at the Christian Association meeting yesterday noon by Rev. Allan Stoddard. The large number of men present at the address was proof of the popularity with which Dr. Stoddard garnishes his talks. He is a pleasant topic to talk before the T. C. A. At the first meeting of the year, the proposition that "What's the Use?" is a question that the 'average' man asks himself, was discussed. "Then there is another frame of mind in which a fellow becomes discouraged. When one has been grinding along on what he considers the right line, and when some scum, who is unscrupulous, steps in, and, by his trickery slips ahead, one is attempted to doubt the justice of the world, and to say, 'What is the use of doing right when it keeps me from succeeding as well as that fellow?' This is false reasoning. The person who is not founded upon a rock will get his deserts. He may succeed at first, but only that, for in the end, he will be a fool, and not a happy one.

TECHNIQUE PROGRESS.

1913 Book Now on Press—Work of Board Nearing Completion.

The work on Technique, 1912, is rapidly coming to a close. In a little less than three weeks it will make its appearance at the annual rush on the furnaces of most of the various printing plants in the city. The work is now being sent to press, and the date for the appearance of the book is expected to be shortly.

BEAR HUNTING.

Tech Biologist Tells of Adventures in N. Brunswick Woods.

Last night William Lyons Under-

Rrker on Sanitary and Industri-

al Biology, gave a talk on "Adver-

tures of a Naturalist Photographer in the North Woods," before the Natural History Society at the Fogg Museum. His lecture was illustrated with many unusual slides, some of them taken under great difficulties, on his hunting trips in New Brunswick. He related several anecdotes about bears and their behavior when trapped, and told of the advantages that hunting bears offers to the amateur. The book is now on the press, and will be ready on the date for the annual rush on the furnaces of most of the various printing plants in the city.

MUSEUM OF FINE ARTS.

Docent Service to Be Held On Sunday, March 31, at 2.15.

The Museum of Fine Arts is to hold a Sunday docent service on March 31, at 2:15. Those interested are requested to report thereat.

CHESS MEETING TODAY.

Club Will Be Reorganized—Games Promised This Term.

All who are interested in chess will meet in the Union this afternoon at 4 o'clock, to discuss plans for the future. The move interest in the Chess Club, which has been inactive during the winter, is expected to be revived in the spring. The club's program for the remainder of the year will be the perfecting of a closer organization and the definite placing of material for the team next year. There is every possibility that several games can be ranged with other colleges to be played during the remainder of the term.

The University of California is troubled with the question of the impeachment of General Sherman. There is a certain amount of enthusiasm for maintaining the present administration, but the decision of the question is not expected for some time. The club is working on the line of preventing the impeachment of the present administration, and the final decision will be made at the next meeting.

8:00—Joint Night, Cosmopolitan Club—Union.

Applications for Show Tickets due.

SHOW APPLICATIONS MUST BE IN SATURDAY 5.00 P. M.
dinner had been so utterly changed to a religion that will appeal to men.

lews would have had either the time or the money to attend, but the question arises whether the fel-

tivities coming along so thickly now, when the time for the banquet arrived, give the men a lot of much-needed

IN CHARGE

WISDOM.

The decision of the members of the Institute Committee that it would be irresponsible to hold the All-Technology dinner in its amended form is about the wisest thing that could have been done under the circumstances. The fact that the plans of the proposed dinner had been so utterly changed from the original proposal, has been viewed with dissatisfaction by the great majority of the undergraduates. And, on this account, their support would have undoubtedly been lacking when the time for the banquet arrived. Then, again, with all the Institute fees being so high and the tuition costs increasing, the question arises whether the fel-

Union, at the dinner is secondary, and is planned merely because it is easier for students to come at 6:30 and stay after dinner to hear a few addresses, than to come back at 8 to a more formal meeting, which practically breaks up the entire evening.

as for the meeting, which, as I have said, is the object of the church, Christians cannot observe the annu-

ments and do not agree to print any that may come in, whether they are signed or not.

lives would have had either the time or the financial backing to support the idea.

We would suggest that next year's plans for the Christian Association are not the least thing ever have either the time or the financial backing to support the idea.

Amberton's baseball team will leave this week on its annual Southern trip. Ten games will be played, one of them with the fastest college teams of the South. We are playing a number of high-priced teams, and we are not going to lose.

LARGE NUMBER OF MEN OUT FOR TRACK TEAM

Coach Kanaly Has a Find Among Shot-Put Candidates—Few Pole Vaulters.

These bright, warm days that have brought out the rank and file of athletes in great numbers. The field is used more this year than ever before, and the interest shown in track athletics promises to make the coming meets the closest in years. All the speed runners are sprinting their distances in good time. German and Germania are fast cutting seconds from their 1st trials. The sprints, Wilson and Williams, are showing up remarkably well for a short time. There are also many new men from both the lower classes that promise to make points for their teams in the inter-class meets.

There seems to be a renewed interest in the weight and field events. More men than usual are vaulting their energy in the hammer and discus throw and the shot put. The latter now Pelletamens have shown up strong. A new man, Conway, discovered by Coach Kanaly, is the find in the shot put. He has improved remarkably in the last week till now he stands with the best of the puuters. Crowell and O'Brien are also among the best of the weight men. The pole vault and the broad jump are the least promising events, though there are several candidates out for both. The high jump will be easily taken care of by Dalymplop, Hall and Teeson.

POTASH FOUND IN U. S.

Lake in California Is Said to Contain Ten Million Tons.

Searching parties from the Bureau of Mines of the Department of Agriculture and from the Geological Survey have sent in promising reports about potash. These reports are founded on the fact that a potash deposit of apparent importance has been discovered at Borax or Searless Lake, in the northwestern corner of San Bernardino County, California. The lake contains brines which would last the country for between four and ten million tons, are, as represented, the lake contains an average of 6.78 per cent. of potassium oxide in solution. Because of the climatic conditions, it is thought that the action of the sun will evaporate the solution and leave a product which can be separated with comparatively little difficulty.

Methods of separating potash from brines are now under investigation by the Bureau of Mines.

It is estimated that the brine saturates and covers an area of at least eleven square miles. If these facts are as represented, the lake contains a pocket of a once much larger one, and is used more this year than ever before. The men who have found this brine report that it is used more this year than ever before.

Joint Meeting.

(Caused from page 1, col. 1) planning to have a big dinner in the Union about April 30, for which plans are rapidly maturing. Speakers will be secured for the evening and every one attending is promised an unusually good time. The officers intend to make this the best banquet of the year.

Lost—Technique, 1913, sign-up slips, numbered from 1433 to 1440, lost. If found please return to the Technique office at the Union. If these slips are not returned they will not be honored.
