In the mechanical laboratories of the University of Illinois the machine shops are placed on a commercial basis. The plant is manufacturing a two-cylinder gas engine in the industrial foundry and machine completely as assembled in the machine shops. It means time schedules and a thorough system of bookkeeping, exact costs will be calculated and tabulated. The men are given an opportunity to make each part of the engine, for they are transferred from one job to another frequently.

Mississippi Rises.

The Mississippi Valley is threatened with some of the worst floods in many years. The weather bureau predicts that the water will continue to rise for five days and that the country will be flooded for three weeks. The levees have already given away in several places, and many towns are twenty feet under water. The main embankments near the three cities have as yet remained intact, but they may give away at any moment. They are in a better condition than they have been for a long time, and this may avert more serious damage. The levees are stopped up by back water and in flowing through the streets.

An Illinois Central locomotive that was sent out to test the tracks at Tolton, Ky., fell through a break in the embankment further attacks of the water can be beaten off. Twenty lives have already been lost and three men were drowned. Fulton, Ky., fell through a crevasse and three men were drowned. The levees have already given way.

FRESHMEN PLAY FIRST GAME ON SATURDAY

Bad Weather Has Prevented Much Practice, and Team Is in Poor Shape

In the Freshman baseball meeting yesterday the players decided that, in spite of the lack of practice, the game with Medford on Saturday would be played as scheduled. As the lateness of dismissal from drill prevented their working at the Field, the men were asked to do a little irregular practice at the oval after the two-hour period at the Armory. This afternoon there will be some of the same work in front of the Lowell Building, and regular practice at the Field Friday.

The arrangements for the substitution of Thursday in place of Wednesday as a day for Freshman practice at the Field have not yet been completed. The players will be allowed one cut a week if the cut is occasionalized by the fact that weather prevents practice on the regular day.

NATURE PHOTOGRAPHS.

Charming National Park Scenes Shown in Public Library.

The collection of national park photographs exhibited by the Department of the Interior of the United States in the exhibition room of the Boston Public Library is one well calculated to convey an impression of the vastness and monumental grandeur of the national beauty spots on this country. The exhibit comprises a number of large photographs taken by various noted back-to-nature enthusiasts, and some of the pictures have been colored in oils with remarkable taste under the direct supervision of the photographer.

Included in this most interesting photographic reproduction of famous beauty spots of the United States are the Mammoth Hot Springs of the Yellowstone National Park, the Cascades of the Firehole River, the Great Falls of the Yellowstone River, a marvellously beautiful scene; the Golden Gate, Yosemite, Lake, the various rapids of the Yellowstone reservation, and the Oxnard Cliff. Among the photographs of the Glacier National Park, the Cascades of the Firehole River, the Great Falls of the Yellowstone River, a marvellously beautiful scene; the Golden Gate, Yosemite, Lake, the various rapids of the Yellowstone reservation, and the Oxnard Cliff. Among the photographs of the Glacier National Park, the Cascades of the Firehole River, the Great Falls of the Yellowstone River, a marvellously beautiful scene; the Golden Gate, Yosemite, Lake, the various rapids of the Yellowstone reservation, and the Oxnard Cliff. Among the photographs of the Glacier National Park, the Cascades of the Firehole River, the Great Falls of the Yellowstone River, a marvellously beautiful scene; the Golden Gate, Yosemite, Lake, the various rapids of the Yellowstone reservation, and the Oxnard Cliff.
