

THE TECH

VOL. XXXI. NO. 144

BOSTON, MASS., TUESDAY, APRIL 9, 1912

PRICE TWO CENTS

MAJ. COLE PRESENTS COLLECTION OF BOOKS

Union Shelves Now Well Filled
With Books of Several
Standard Authors.

The Technology Union has been fortunate to receive from Major Cole, head of the Military Science Department at the Institute, a large number of books as a start for a Union library.

The collection was delivered today and was found to have in it the works of many standard authors, among which are Balzac, Poe, Dickens, Meredith and Irving, which will be constantly at the disposal of the men.

The entire number has been sorted and catalogued, so that they may now be had at any time from the shelves at the right of the entrance to the living room, where they have been placed.

AERO CLUB MEETING.

Mr. Custer Will Speak On
"Centres of Pressure."

The Aero Club will hold another meeting Wednesday afternoon, and an unusually large attendance is expected by its officers. Among other interesting articles the thesis of Mr. Fales will be read, and following this Mr. Custer will give a discussion on "Centres of Pressure."

During the afternoon the officers for the coming year will be elected, and other important business will be transacted.

President Lehmaier makes the announcement that the Burgess Curtis Company is offering hydroplane flights at twenty-five dollars a flight, and as this will probably interest the club it will be brought up for discussion at this time.

All members of the club are earnestly requested to be present, and any others who are interested are cordially invited to come.

CREW PRACTICE.

Men Show Improvement Under
Steady Routine Work.

The crew has now settled down to steady routine work which is fast bringing the men into excellent condition. The few who reported yesterday worked under difficulties, due to the rough water. Within a few days Captain Gere expects to start the men on much longer rows.

All men on the first crew are to report as usual at 5 o'clock, and those on the second crew at 4 o'clock, except on Wednesdays, when the late drill hours keep the Freshmen in till 5 o'clock. All other members of the crew report at 5 o'clock.

The coach has been trying to arrange meets with other crews, but has not made any definite arrangements yet. However, he will probably have important news within a few days.

Ten candidates for places on the Harvard crew reported today when the training table opened at the new varsity club. Among the men was George von L. Meyer, Jr., son of the secretary of the navy, who is out for No. 2 position on the varsity eight.

EXTRA ASSESSMENTS FOR DANCE CANCELLED

Reception and Dinner Will Make
Senior Week a Jolly
One.

The Class Day Committee in their meeting yesterday afternoon instituted one of the most important advances in the development of Senior Week that has come about in some years, by the cancellation of all extra assessments for the Senior dance.

It was the opinion of the committee that as the class had in view the establishment of a Class Fund, the presentation of a class gift might well be dispensed with, and in accordance with its policy to make Senior Week a time of enjoyment for the largest possible percentage of the class, it felt that the funds hitherto spent for the class gift might well be expended in making the Senior dance an event which would be open to all of those who had paid their Senior week assessment, and withdraw all further charges.

Owing to the relatively larger number that will attend this function it was thought advisable to obtain more spacious accommodations than those offered at the Hotel Tuileries, and the large hall at the Hotel Somerset, in which the Junior Prom is annually held, has been spoken for, and, without doubt, will be used for this festivity.

The events of the evening will consist of a reception lasting about an hour, after which the dance will begin. A spread will be served during the latter part of the evening, followed by a continuation of the dance order.

It has been estimated that over eight hundred people will be in attendance at the reception, and as the ballroom can satisfactorily accommodate 250 couples, it is believed that no Tech man can complain of a crowded floor.

The expenses of such an evening will closely aggregate \$800, which will be a goodly part of the total fund allotted the committee for its expenditures, but the feeling is prevalent that such an unprecedented opportunity for the Class of Nineteen-Twelve to get together for one last jollification will make the cause a worthy one.

Another item which created favorable comment is the adoption of a system whereby all of the Seniors will be provided at the dinner with tags bearing the number which allots them their position in the line for the graduation announcement cards. It is felt that this innovation will do a great deal to discontinue the confusion which has always hitherto taken place at this time. The order of precedence will be given the committee by the Registrar, and no tags will be given out unless the corresponding tags are shown.

The revised program for the week is as follows:

(Continued to Page 3.)

TECHNIQUE ELECTIONS.

At a meeting of the Technique Electoral Committee, which occurred yesterday afternoon, Ralph D. Salisbury, of Chicago, was elected Society Editor of 1914 Technique. At next week's meeting the class statistician will be elected.

SOPHOMORE BALL TEAM PLAYS MECHANIC ARTS

First Practice Game to Be
Played at Fenway
Today.

Today the Sophomore baseball team will get its first real tryout of the season when it meets the crack Mechanic Arts High School nine. The game will be the first of a series of practice games to be held between the two teams during the next few weeks, and will take place at the Fenway grounds, back of the Art Museum.

As many candidates as possible will be given a tryout, and it is essential that all who possibly can should go. The men are to meet in the Union at 3 o'clock, and go from there to the High School on Belvidere street, where they will dress and take the short walk to the grounds.

Those who are expected to play in this game are the following: Comber, second base; Hender, Wetcomb, Pearly, first base; Gardner, Ober, short-stop; Mahoney, Hughes, third base; Hardy, Tirrell, Page, Dunn, field. The battery will consist of Page as pitcher probably, or possibly Sauer, and Stock at the receiving end.

The Mechanic Arts' battery will probably be made up of Moulton as pitcher, and Dempsey as catcher. The other men to be put in the field are: Shea, third base; Gleason, second base; Ralley, first base; Handy, short-stop; Mooney, I. F.; Menadeer, C. F., and Tarr, R. F.

Mechanic Arts has always been well represented in the baseball field, and should give the Sophs a hard fight for a victory. Nevertheless the manager expects that they will do a great deal better than the Freshmen did at Medford on Saturday, for although they have not played a real game as yet this season, they have several veterans in the field. The game will be well worth seeing, and as it is to be played here in the city, a good attendance is expected.

FRESHMAN SCHEDULE.

Saturday's Defeat Shows Need
of Practice.

The schedule for the Freshman ball team for this season has been arranged, and provides for games as follows:

Saturday, April 13: English High.

Saturday, April 20: Winchester High School.

Saturday, April 27: Tufts' 2nd Varsity.

Wednesday, May 1: Brockton.

Saturday, May 4: Open.

Saturday, May 11, 15, 18: Sophomore series.

All candidates who are on the team or in any way interested in the team are to report for practice surely today, as there are still plenty of places open. Last Saturday's game was a sad illustration of the necessity of early and steady practice, and only by the earnest co-operation of the Freshmen can they expect to turn out a winning team.

The famous inventor, Tesla, has recently perfected a small turbine motor that will develop 110 horse-power and yet the entire machine may be put into an ordinary hat box.

CATHOLIC CLUB DINNER TONIGHT

Future Plans to Be Discussed—
Father Cusick of Boston
College Is Speaker.

The final informal supper and meeting of the year will be held by the Catholic Club this evening in the Union at 6 o'clock. There is still a large amount of business left for further consideration from the meeting held in the Cathedral school on Palm Sunday. This, together with the reports of several committees, and the promise of a talk from Father Cusick, Professor of Chemistry at Boston College, the officers feel that a most interesting evening will be spent by all members.

Father Cusick, a member of the Society of Jesus, has kept in close contact with the scientific world through his professorship, and is a noted authority on many religio-scientific controversies. He is a graduate of Junsbruck, Germany, and has become a well known figure in general science. His position has brought him before the public many times, and his reputation as a speaker has long since been established. The committee assures the men that his talk will doubtless prove of vital interest to every Catholic at Technology.

ORCHESTRA.

Since it has now been definitely decided that the Orchestra will furnish at least two numbers at the Spring concert of the Musical Clubs, the members have settled down to two weeks of real conscientious work and are giving special effort to make their share in the evening's entertainment worthy. Two rehearsals are already scheduled for this week, one on Wednesday and another on Thursday afternoon, at 4 o'clock, and another will probably be held the last of the week.

ARCHITECTS' MEETING.

A short meeting of the Architectural Society will be held this afternoon in Room 42, Pierce Building. The meeting has been called to transact business of an important nature, and the officers hope that every member will make an effort to be present.

CALENDAR.

In Charge of S. H. Taylor, 1914.

Tuesday, April 9.

4.15—Banjo Club Rehearsal—Union.

MAJOR COLE'S GIFT.

The gift of Major Cole to the Union, consisting of several hundred books, is indeed most welcome and fills a long felt need. Comprising as it does the works of many standard authors, among which are those of Macaulay, Dickens, Poe, Meredith and Thackeray, some of the best English fiction is at once placed in the hands of the Institute men. Much of their leisure time is spent in the living room of the Union, where heretofore has been little fiction of a standard nature, and it is a fact beyond question that the presence of these works will lead to many more profitable half-hours than have been spent in the past. We are sure that we are expressing the wish of the Institute at large when we thank Major Cole most heartily.

PROF. ROTCH'S DEATH.

The sudden death of Professor A. Lawrence Rotch is a shock to the scientific world. He has been for years one of the ablest and most inspiring workers for true progress in many branches of science, and has given plentifully from his own purse for its advancement. In the establishment of the Blue Hill Observatory a great service has been accomplished for aviation, to say nothing of the invaluable data that has been given to meteorology. He will always be remembered as a pioneer in these two young branches of science.

JOHN HUDELSON DEAD.

John Huddelsen, the armorer of the South Armory, where the Institute battalion drills, died last Saturday afternoon from a stroke of apoplexy. He had served in the army since he was of age, and had been armorer for twenty years, having previously attained the rank of Sergeant-Major in the Coast Artillery Corps.

Before his death he was planning to coach the rifle team in their matches. He was well fitted for that position, for he was a member of the international rifle team that was never defeated on foreign soil. He was also on the Massachusetts State team that was not defeated for fourteen consecutive years, and was considered one of the best shots in the country.

WIRELESS SOCIETY TO HOLD MEETING SOON

Election of Officers Will Take Place—Important Matters to Be Discussed.

The Wireless Society will hold an important business meeting in the near future, at which a representative of the Clapp-Eastham Company, manufacturers of wireless apparatus, will speak on the work of the company and other things connected with wireless telegraphy. The society has not yet heard when it will be convenient for him to attend the meeting, thus no definite date can be announced at present.

The election of officers for the coming year will take place at this time. Elections should be held annually at this time, but in the last few years they have been put off until later for various reasons. The officers wish everyone to attend if possible.

BROWN VS. TECH.

Tennis Matches Will Soon Be Played.

The Technology tennis team is getting into shape to meet the Brown University players in the dual contest to be held in Providence on April 27.

This will be the first event of the season for the Brown men, but is expected that they will make a good showing, as their entire last year's squad is still in college.

These men are: Captain Scholze, Brown, Hood and Guild, and there are quite a number of promising men seen at the courts.

Brown defeated Tech at Longwood last year by a score of 8 to 1, but there are certain to be some close matches this year, and the team hopes to give the Brown squad a surprise.

The late Joseph Pulitzer left \$2,000,000 to Columbia for the purpose of establishing a school of journalism there.

Illinois Freshmen inaugurated a new precedent by giving a smoker. About 500 attended, and the crowd was entertained by vaudeville acts and witty speeches.

A movement is on foot at Pennsylvania to prohibit the wearing of all jewelry symbolic of the University, such as pins and buttonhole seals or watch fobs.

Every Chicago University student taking swimming for gymnasium credit will be compelled to spend at least twenty minutes a day in the pool.

The DePauw student council has submitted a resolution to the student body, characterizing the use of tobacco on the campus as a breach of the DePauw spirit, and recommending that it be treated as such.

With the galleries filled with female spectators and with Governor Marshall, of Indiana, looking on, the House 10-day decided against woman suffrage legislation for a year by the vote of 127 to 87.

Several of the Western colleges have had straw ballots on the national election. Roosevelt was elected at the Universities of Chicago, Syracuse, Colorado and Washington.

Arrangements have been made with Congressman Wedemeyer whereby the University of Michigan Senior engineers who left Ann Arbor, April 4, on the annual spring trip through the East, will meet President Taft. The President will grant them a short interview at the White House. The rest of the time in Washington will be spent in visiting the navy yards and in sight-seeing.

Back from the holidays

It takes off the rough edge of the "grind" to find the welcome package of Fatima Cigarettes.

With each package of Fatima you get a pennant coupon, 25 of which secure a handsome felt college pennant (12x32)—selection of 100.

**ARCHITECTS SUBMIT
EXCELLENT DESIGNS**

Intercollegiate Competition Results Will Be Announced Tomorrow.

The Intercollegiate Architectural competition has just come to a close and final judgment will be passed on the designs by April 10, when the results will be announced. In the Institute twenty-four men entered the preliminary contest in Class I, and twenty-two in Class II, the problems being a design for a Museum of Applied Science and a Riding Academy, respectively, and some very creditable drawings were submitted.

The Architectural Department of each school takes charge of the competition among its own students, but the final judgment is given by a jury consisting of a representative from every college entering the contest. The members of the jury, however, must not be members of the instructing staff. The department selects ten in each class from the large number of preliminary sketches submitted, which are sent to Harvard to be passed upon by a jury. The winner of Class I, which is open to fourth and fifth year men, receives a prize of \$90, while the third year man winning Class I receives a \$60 prize. As many other designs as are deemed worthy receive mention.

After the drawings have been on exhibition at Harvard for a week they will be shown in Pierce for the same length of time, and finally go the rounds of the other schools.

SENIOR DANCE.

(Continued from Page 1.)

Senior Dinner, Thursday, May 30th, 6.30 P. M.

Baccalaureate Sermon, Sunday, June 2nd, 4 P. M.

Class Day Exercises, June 3rd, 2.30 to 4 P. M.

Reception and Dance, June 3rd, 8 to 12.

Graduation Exercises, June 4th, 2.30 P. M.

President's Reception, June 4th, 4 P. M.

Pop Concert, June 4th, 8 P. M.

The democratic attitude of the committee was laudably shown when it was voted that the twenty-five members of this organization would sit in the audience with the other Seniors, instead of taking a place on the platform, as heretofore. Special provision will be made for the easy access of the speakers to the rostrum.

Last, but by no means least, the attention of the committee was called to the Class Dinner, which will be held at the Union about May first, for the purpose of informing the students at large of the details of Senior Week. This dinner will not evince itself as such, but will rather be a great mass meeting, at which every member of the class may hear the last word regarding directions and suggestions concerning the gathering places and time of convocation for the various exercises, and it is the earnest hope of the committee that everyone will avail himself of the opportunity of thus gaining that information which will lend smoothness and surety to the activities of graduation.

With the advent of June, the committee is confident that it can lay before the class the possibilities for a week of fun-making and general jollity of a sort which has hitherto never been presented to any graduating class at the Institute, for it feels assured that with this obvious effort to reduce the expenses of this event it will be upheld in its efforts by every member of the class.

At a recent meeting of the American Chemical Society, held in Indianapolis, Mr. J. N. Stephenson read a paper on the "History and Manufacture of Matches." Mr. Stephenson is an Institute graduate, 1909, from Course X, and is now an instructor at the Rose Polytechnic Institute.

ONE PIECE HAMMER IN THE NEW MODEL
Ithaca

IF you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached.

WE have cut out all cocking levers, bars, push rods, and hammer stirrups and cock the gun direct from toe of hammer.

OUR hammer travels less than half an inch, taking only 1-325 of a second to operate.

STOCKS are not cut away for hammers or lock plates and are dovetailed into frame to prevent splitting and spreading.

THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically fool-proof, and will last you a lifetime if you take care of it and a good many years if you don't.

CATALOG Free; 18 grades, \$17.75 net to \$400 list. OUR 14 lb. 20 bore is a hammer—be down-to-date and shoot one.
