MAJ. COLE PRESENTS
COLLECTION OF BOOKS
UNION SHELVES NOW WELL FILLED
With Books of Several Standard Authors.

The Technology Union has been fortunate to receive from Maj. Cole, head of the Military Science Department at the Institute, a large number of books as a start for a Union library.

The collection was delivered today and was found to be in the works of many standard authors, among which are on the first floor Dickens, Melville, and Irving, which will be accessible at the left of the entrance.

The number of books is so large that a catalogue, so that they may not be lost is being prepared at the right of the entrance to the Union, where they have been placed.

AERO CLUB MEETING.
MR. CUSTER WILL SPEAK ON
"CENTRES OF PRESSURE."

The Aero Club will hold another meeting Wednesday afternoon, and all members, even those not attending as a regular member is expected to attend, will be met by its officers. Among other interesting articles the theme of Mr. Custer will probably be his paper on "Centres of Pressure". During the afternoon the officers for the coming year will be elected, and all important business will be transacted.

President Lehmaner makes the announcement that the Burgess Curriculum is offering higher flights at twenty-five dollars a flight, and as this will probably interest the majority of the members, the committee has been formed for its expenditure.

All those who are interested are cordially invited to come.

CATHOLIC CLUB DINNER TONIGHT

Future Plans to Be Discussed—Father Cusick of Boston College is Speaker.

The formal supper and meeting of the year will be held at the Catholic Club this evening at 6 o'clock. There is still a large amount of business left for further consideration from the meeting held in the Catholic Chapel on Sunday. This, together with the reports of social committees, and the promise of a talk from Father Cusick, President of the Catholic College, will no doubt make the officers feel that a most interesting evening will be spent by all members.

Father Cusick, a member of the Society of Jesus, has had extensive contact with the scientific world through his professorship, and is a noted authority on many religious-science controversies. He is a graduate of brown University, and has become a well known figure in general science. His position has brought him before the public many times, and his reputation as a speaker has long since been established. The committee assures the men that this talk will be a beautiful innovation in the Catholic Club at Technology.

ORCHESTRA.

Since it has now been definitely decided that the Orchestra will furnish the music at the formal supper of the Architectural Society, the members have settled down to two weeks of real conscientious work and are giving special effort to make their share in the evening's entertainment worthy. Two rehearsals are already scheduled for this week, one on Wednesday afternoon, at 4 o'clock, and another on Friday afternoon, at 5 o'clock, and another probably will be held the last of the week.

ARCHITECTS' MEETING.

A short meeting of the Architectural Society will be held this afternoon in Room 1021. The meeting has been called to transact business of an important nature, and the officers hope that every member will make an effort to be present.

CALENDAR.

In Charge of H. C. Taylor, 1914.

Tuesday, April 9.

4:15—Inagural Club Rehearsal—Union.
3:00—Architectural Club Dinner—Union.

Wednesday, April 10.

6:00—Club Dinner—Union.

Thursday, April 11.

1:30—T. C. A. Talk—Union.

Saturday, April 13.

1:30—Business Meeting—Lower Office.

UNION, CATHOLIC CLUB, 6:00 P.M., TO-NIGHT.

EXTRA ASSESSMENTS FOR DANCE CANCELLED.

Reception and Dinner Will Make Senior Week a Jolly One.

The Class Day Committee in their meeting yesterday afternoon instructed the committee in the development of Senior Week in all its phases. At the meeting a number of suggestions were made which were accepted and acted upon promptly.

It was the opinion of the committee that as the class had in view the establishment of a Classicism dinner it was thought advisable to give more attention to the Senior Week as a whole, and to give it a better place in the calendar of events, in all the extra events for the Senior dinner.

The Class Day Committee has now settled down to steady routine work which will bring the men into excellent condition as few will report the past week worked under difficulties, due to the Great War. Within a few days Capt. Cusick expects to start the men on much longer hours.

The Officers' meetings are to report as usual at 8 o'clock, and those on the faculty are to meet at 7 o'clock, except on Wednesdays, when the late drill hours keep the Freshmen in till 6 and at any other members of the drill report at 5 o'clock.

The coach has been trying to arrange meets with other clubs, but has not made any definite arrangements yet. However, he will probably have important news within a few days.

TEN candidates for places on the Harvard crew reported today when the committee met at the new varsity club. Among the men was George Ash, the son of Mr. Squier, of the secretary of the inury, who is out for No. 2 position on the varsity eight.

SOPHOMORE BALL TEAM PLAYS MECHANIC ARTS.

First Practice Game to Be Played at Fenway Today.

Today the Sophomore baseball team will get its first real tryout of the season when it meets the crack Mechanic Arts High School nine. The team will be the first of a series of practice games to be held between the two teams during the next few weeks, and will take place at the Fenway grounds, back of the Art Museum.

As many candidates as possible will be given a tryout, and it is essential that all the possible candidates go.

The men are to meet in the Union at 12 o'clock, and go from there to the High School on Belvidere street, where they will dress and take the train to the grounds.

Those who are expected to play in this game are the following: Hiss, Wagoner, Ford, Major, Flinn, Kellum, T. W. Smith, and Nafziger.

The Mechanical nine will probably be made up of the following: Urion, W. B. Smith, Young, Van Houten, and Dempsey as catchers. The other men to put in the field arc: Shea, chub base; McGraw, second base; Bailey, first base; Hardry, short stop; Munn, 1st f.; Meader, f., and Tarry, r.f.

Mechanical Arts has always been well represented in the baseball field, and should give the Sophas a hard fight for a victory. Nevertheless, the manager expects that they will do a great deal better than the Freshmen did at Medford on Saturday, for although they have not played a real game yet this season, they have several veterans in the field. The Mechanical team will probably be well worth seeing and as it is to be played here in the city, a good attendance is expected.

FRESHMAN SCHEDULE.

Saturday's Defeat Shows Need of Practice.

The schedule for the Freshman baseball team for this season has been arranged, and provides for games as follows:

Saturday, April 13: English High. Saturday, April 20: Winchester High School.

All candidates who are on the team or in any way interested in the team are to report for practice surely by day, as there are still plenty of places open. Last Saturday's game was a fine illustration of the necessity of steady practice, and only by the earnest co-operation of the Freshmen can they expect to turn out a winning team.

The famous inventor, Tesla, has recently perfected a small turbine motor for automobiles which will develop 110 horsepower and yet the entire machine may be put into an ordinary box car.
WIRELESS SOCIETY TO HOLD MEETING SOON

Election of Officers Will Take Place—Important Matters to Be Discussed.

The Wireless Society will hold an important business meeting in the near future, at which a representative of the Claypool-Rushmore Company, manufacturers of wireless apparatus, will speak on the work of the company and other things connected with wireless telegraphy. The society has not yet heard when it will be convenient for him to attend the meeting, but no definite date can be announced at present.

The election of officers for the coming year will take place at this time. Elections should be held annually at this time, but in the last few years they have been put off until later for various reasons. The officers wish everyone to attend if possible.

BROWN VS. TECH.

Tennis Matches Will Soon Be Played.

The Technology tennis team is getting into shape now to meet the Brown University players in the dual contests to be held in Providence on April 27. This will be the first season of the season for the Brown men, but it is expected that they will make a good showing, as their entire last year's squad is still in college.

These men are: Captain Scholz, Brown, Hood and Guild, and there are quite a number of promising men seen at the courts.

Brown defeated Tech at Longwood last year by a score of 3 to 1, but there is certainly to be some close matches this year, and the team hopes to give the Brown squad a surprise.

The late Joseph Pulitzer left $2,000,000 to Columbia for the purpose of establishing a school of journalism there.

Illinois Freshmen inaugurated a new precedent by giving a smoker. About 500 attended, and the crowd was entertained by vaudeville acts and witty speeches.

A movement is on foot at Pennsylvania to prohibit the wearing of all jewelry symbolic of the University, such as pins and buttonhole seals or watch chains.

Every Chicago University student taking swimming for gymnastic credit will be compelled to spend at least twenty minutes a day in the pool.

The DePauw student council has submitted a resolution to the student body, characterizing the use of tobacco on the campus as a breach of the DePauw spirit, and recommending that it be treated as such.

With the galleries filled with female spectators and with Governor Marshall, of Indiana, looking on, the House to-day debated again woman suffrage legislation for a year by the vote of 127 to 87.

Several of the Western colleges have had straw ballots on the national election. Roosevelt was elected a second time by a majority of 3 to 1, and the student council at the University of Chicago, Syracuses, Colorado and Washington.

Arrangements have been made with two professors who left Ann Arbor, April 4, on the annual spring trip through Colorado and Washington. The President will speak at Colorado and the University players in the dual contest.

MAJOR COLE'S GIFT.

The gift of Major Cole to the Union, consisting of several hundred books, is indeed most welcome and fills a long felt need. Consisting as it does of the works of many standard authors, among those are those of Macaulay, Dickens, Poe, Meredith and Thackeray, a part of the best English fiction is at once placed in the hands of the Institute men. Much of their leisure time is spent in the living room of the Union, where heretofore has been little fiction of a standard nature. It is a fact beyond question that the presence of these works will lead to many more probable half-houses than have been spent in the past. We are sure that we are expressing the wish of the Institute at large when we hail Major Cole most heartily.

PROF. ROTCH'S DEATH.

The sudden death of Professor A. Lawrence Rotch is a shock to the scientific world. He has been for forty years one of the ablest and most influential men in many branches of science, and has given painstakingly from his own purse for its advancement. In the establishment of the Blue Hill Observatory a great service has been accomplished for aviation, to say nothing of the invaluable data that has been given to meteorology. He will always be remembered as a pioneer in these two young branches of science.

JOHN HUDDELSON DEAD.

John Huddelson, the armorer of the South Armory, which the Institute battalion drills, died last Saturday afternoon from a stroke of apoplexy. He had served in the army since he was of age, and had been armorer for twenty years, having previously at-
ARCHITECTS SUBMIT EXCELLENT DESIGNS

Intercollegiate Competition Results Will Be Announced Tomorrow.

The Intercollegiate Architectural competition has just come to a close and final judgment will be made on the designs by April 10, when the results will be announced. In the Institute twenty-four men entered the preliminary contest in Class I, and twenty-six in Class II, the problems being a design for a Museum of Applied Science and a Riding Academy, respectively, and some very creditable drawings were submitted.

The Architectural Department of each school takes charge of the competition among its own students, but the final judgment is given by a jury consisting of a representative from every college entering the contest. The members of the jury, however, must not be members of the instructing staff. The department selects ten in each class from the large number of preliminary sketches submitted, which are sent to Harvard to be passed upon by a jury. The winner of Class I, open to fourth and fifth year men, receives a prize of $600, while the third year man winning Class II receives a $50 prize. As many other designs as are deemed worthy receive mention.

After the drawings have been on exhibition at Harvard for a week, they will be shown in Pierce for a longer length of time, and finally go to the hands of the other schools.

SENIOR DANCE.
(Continued from Page 2.)
Senior Dinner, Thursday, May 30th, 6:30 P. M.
Baccalaureate Service, Sunday, June 2nd, 4 P. M.
Class Day Exercises, June 3rd, 2:30 to 4 P. M.
Reception and Dance, June 3rd, 9 to 12.
Graduation Exercises, June 4th, 2:30 P. M.
President's Reception, June 4th, 4 P. M.
Pop Concert, June 4th, 8 P. M.

The democratic attitude of the committee was lavishly shown when it was voted that the twenty-five members of this organization would sit in the audience with the other Seniors, instead of taking a place on the platform in form, as heretofore. Special provision will be made for the easy access of the students to the platform.

Last, but by no means least, the attention of the committee was called to the Class Dinner, which will be held at the Union about May first, for the purpose of informing the gathering of the details of Senior Week. This dinner will not shrink itself as such, but will rather be a great mass meeting, at which every member of the class may hear the last suggestions concerning the gathering places and time of convocation for the various exercises, and it is the keen hope of the committee that everyone may avail himself of the opportunity of thus gaining that information which will lend smoothness and unity to the activities of graduation.

With the advent of June, the committee is confident that it can lay before the class the possibilities for a weak of fun-making and general jollity of a sort which has hitherto never been presented to any graduate class at the Institute, for it feels assured that with this obvious effort to reduce the expenses of this event it will be upheld in its efforts by every member of the class.

At a recent meeting of the American Chemical Society, held in Indianapolis, Mr. J. N. Stephenson presented a paper on the "History and Manufacture of Matches," Mr. Stephenson is an Institute graduate, 1909, from the College of Science, and is now an instructor at the Rose Polytechnic Institute.
