PRICE TWO CENTS

FRESHMEN TO MEET ENGLISH HIGH

Last Important Practice at the Field Tomorrow Afternoon.

The Freshman baseball team will have important practice at the Field tomorrow, and as this is the last practice that the team will have before playing English High on Saturday afternoon, it is very important that every candidate should be there.

The team has still a rather weak battery and several more candidates are wanted to go out for pitcher, as well as for first base and short-stop. Most of the men have played on other teams before coming here, and there is no reason why, with sufficient practice, the nine should not improve greatly.

Bauer, who pitched at Medford Saturday, and McIntyre, who fielded, both played on the team at Spring Hill College. Franks, Captain McDevitt and Scully have all played on other teams, and promise to increase the batting average of the nine.

English High is reported as having a strong team, and as our men have had very little practice, the high school has the advantage. However, a close game is anticipated, and the team is expected to do a great deal better than at Medford last week.

CIVIL MEETING.

Many Votes of Thanks Passed by Men on Return From Trip.

At a meeting of the Civil Engineers, yesterday afternoon, the president announced that the annual banquet will be held May 1st, at the City Club. The speakers will be Lieutenant-Governor Luce, Charles T. Main, '76, past president of the Boston Society of Civil Engineers, and Everett Morss, '85, a member of the Executive Committee of the Corporation. The tickets will be out the latter part of the week.

After Mr. Eddy's talk the men gave a vote of thanks on behalf of the men who made the trip to New York to J. W. Nelson, who entertained them at their first breakfast; to Guy Shaffer, the architect of the Woolworth Building, who piloted them over it, and to J. Waldo Smith, of the New York Board of Water Supply. The men also expressed their appreciation of the many services that both Professor L. E. Moore and D. J. McGrath, the genial "red-headed" manager of the party, performed for them, by passing a vote of thanks.

ARCH. ENGINEERS.

The members of the Architectural Engineering Society feel that they are most fortunate in having an opportunity to hear of some of the engineering problems of the new Woolworth Building in New York. A meeting has been called for Friday evening, April 12th, in 42 Pierce, when Mr. Guy M. Shaffer, '10, will give an address on this subject.

The rifle club expects to meet the Mass. Aggies, at present the intercollegiate rifle champions.

Have you seen the Freshmen doing six feet six on the pole vault at the Field?

MUSICAL CLUBS GIVE FINE ENTERTAINMENT

Combined Clubs Played Before Roxbury Masons Last Evening.

Last night the Musical Clubs gave one of the best concerts which they have yet presented before a gathering of Masons numbering over two hundred and fifty. The occasion was "Ladies' Night" at the Lafayette Lodge of Roxbury, of which Professor Vogel is at present Grand Master.

The members went out early, and before giving their share in the evening's entertainment sat down to one of those delicious banquets for which the Masons are justly noted. The concert commenced promptly at half-past eight, and lasted for nearly an hour and a half. The program was an exceptionally fine one and contained several of the new numbers which are to be presented at the Spring concert next Wednesday night. The efforts of the Glee Club were especially appreciated, and the fellows were forced to respond to several encores.

At the close of the entertainment, at 10 o'clock, the floor was cleared, and dancing was enjoyed until shortly after midnight, while in one of the large side rooms whist tables were provided for those who did not care to participate in the dancing.

The men said that the floor deserved its reputation as the finest in the country, and but few availed themselves of the opportunity to play whist. The general opinion was that the affair was the swellest one that the Musical Clubs have ever attended. The program was as follows:

- The New Era March,
- Mandolin Club.
- Under the Southern Moonlight,
- Glee Club.
- A Black Coquette,
- Banjo Club.
- The Romance of a Rose,
- Mandolin Club.
- What the Chimney Sang,
- Glee Club.
- The Boatman's Song,
- Mandolin Club.
- Lancashire Clogs,
- Banjo Club.
- Stein Song,
- Combined Clubs.

Besides this musical program Mr. Briggs read several selections, which were greatly appreciated.

NEW WATER COLORS.

Robinson, '08, Exhibits Recent European Work in Pierce.

Today an exhibition of water color work by Mr. F. J. Robinson, '08, will open in the display room of the Architectural Department, on the fourth floor of Pierce Building. The work consists of measured drawings and a large number of sketches done by Mr. Robinson while on a visit to Europe lasting a year and a half. He has also, since his graduation, been connected with the office of Guy Lowell, the designer of the Museum of Fine Arts in the Fenway.

There seems to be enough teas during Senior Week to keep any men from being thirsty.

About time for the Tech pins to arrive.

EFFECT OF SEWERS ON A CITY'S DEATH RATE

Point Emphasized by Mr. Eddy in Talk Before Civils Yesterday.

Fifty men were present yesterday afternoon at 4 o'clock, in 11 Engineering B, to hear Mr. Harrison P. Eddy speak of the sewerage system in Louisville, Kentucky. In 1906 the State Legislature of Kentucky appointed a commission of five men to supervise the construction of a new sewerage system in Louisville. The conditions in that city were very bad with respect to sewerage disposal, both because of the lack of proper means for getting rid of it and because of the apathy on the part of the inhabitants. As a result the cooperative body of five let out a contract for the building of 40 miles of sewer to the firm of Metcalf & Eddy.

The men in charge of this task included three Tech men, the chief engineer and two of the resident engineers. The work of constructing the forty miles of sewer presented many points of difficulty and the job has only just been completed. Included in this work was also the laying of several miles of lateral drains.

The slides presented illustrated the different types of sewer construction and gave a general idea of the nature of the work. The results of the installing of the sewers were discussed by Mr. Eddy in a novel manner. He gave statistics of the death rate in Louisville before and after the laying of the sewers, and the decrease was, to say the least, marvelous. But even more wonderful than this was the comparison between the death rates in Louisville and those in other large cities, for that of the former is surprisingly low.

AERO CLUB MEETING.

A Few Members Hear Talk On Propeller Testing.

The Aero Club had a meeting yesterday afternoon, at which the following officers for the year 1912-1913 were elected: For the Engineering Committee, L. L. Custer, '13; E. C. Paul, '14, Secretary, and O. R. Outtersen, '15. For Treasurer, Thomas. The men also heard an address on "Testing Outfits for Propellers," in which the speaker described the various machines that men from the time of Langley to the present day have used to determine the efficiency of their propellers. He had many finely executed drawings to help make his points clear. The meeting was not as well attended as those in charge of the affair had expected.

At the meeting the men appointed a committee to inspect the club's gliders, and to report on their condition at the next meeting, which will probably be held in about three weeks.

TRIP BY BIOLOGICALS.

Saturday afternoon the Biological Society will make a trip to Buzzy Institute, leaving the Union at 2.15. This Institute is the laboratory which makes all the vaccines for the Massachusetts State Board of Health. At the laboratory the Biologicals will be given an illustrated talk by the Director in charge.

NINETEEN-THREE HAS REUNION HERE

Members Hear Talk on "The Oxy-Acetylene Blowpipe" After Dinner.

The class of 1903, after having enjoyed a dinner in the upper room of the Union, listened to an interesting talk on "The Acetylene Blowpipe" last evening, in 6 Lowell. A member of the class, Mr. Kershaw, the Eastern manager of the Linde Air Products Co., spoke on the use of the oxy-acetylene blowpipe, and then gave a demonstration of its use.

The blowpipe is used for the cutting of iron and steel in destructive work. It accomplishes this end by raising the temperature of the part of the metal to be worked on to between 6000 and 6500 degrees Fahrenheit, and then directing a stream of pure oxygen under heavy pressure through the oxy-acetylene flame onto it. The cutting is accomplished by the oxidation of the iron, the heavy pressure of the gas blowing away the oxide formed. Another type of the pipe which gives only the oxy-acetylene flame and does not supply extra oxygen is used for welding. Mr. Kershaw spoke of the use of the cutting blowpipe on the wreckage of the Quebec bridge over the St. Lawrence, when this wreckage was cleared away after the bridge disaster. The work was done in mid-winter, under such conditions that the operators were forced to wrap the acetylene generator in steam coils to prevent its freezing. The work was further interfered with by the heavy coating of rust which had been formed, and of course prevented further oxidation.

Mr. Kershaw had charge of the work of cutting away the wreckage on the Maine with this apparatus during the process of raising, and had a number of anecdotes to tell. He spoke of the experience of one man who in opening a passage with the blowpipe played the flame on a twelve-inch shell, but was fortunate enough to discover it before it received the direct benefit of the heat.

In the exhibition of the work of the cutting blowpipe which followed, a four-inch iron plate was rapidly cut in two. It is claimed with a pipe no larger than the one used last night a plate ten and a half inches thick can be cut. Mr. Kershaw had many interesting photographs of the Maine which were shown after the talk.

The Musical Clubs seemed to enjoy the "best floor in the country."

Princeton won the intercollegiate water polo championship by defeating the University of Illinois, the Western champions, by a score of 3 to 1. They also won the swimming meet by a score of 51 to 34.

CALENDAR.

In Charge of S. H. Taylor, 1914.

Thursday, April 11.

1.30—T. C. A. Talk—Union.

THURSDAY, APRIL 11, 1912

AN ANSWER.

The communication which we print in this morning's issue is a very complete proof of the truth of our editorial yesterday. The attempt at clearing the House Committee from blame has only intensified our belief in the idea that they have been running things in a slipshod manner.

Our correspondent claims that the House Committee was not notified of the arrival of the gift by the Senior President. The unfairness of this attack may be judged when it is known that President Kebbon has had a catalogued list of the books made at the expense of much time and inconvenience, and intends to present the same to the Union Committee today.

Then another point arises. Our correspondent says that the books were placed on the shelves by those making up the lists, and on the shelves nearest the door at that. The House Committee had sufficient experience to anticipate the natural results of such an action and would have done nothing so rash. Now, with this remarkable fund of experience that the communicant claims for the committee, we ask why should those books still be reposing on the same shelves near the door?

The fact undoubtedly remains that if the House Committee had been equal to the duties of their office they would have known of the gift in ample time to devise a scheme for the checking of the books in question.

The remainder of the letter is a complete agreement with the views stated in our editorial, and we thank the writer for his clemency in deigning to fall in with our ideas on the subject.

CRITICISM.

THE TECH has come in for a great deal of criticism lately on account of the policy of its editorial column. We have been accused of blackening the school in the eyes of the outside world and generally damaging the reputation of the Institute.

The absurdity of the charge makes it almost unworthy of criticism, but we would like to say that the policy of THE TECH is to further the interests of Technology, and if a deed needs scathing criticism it will get it whether certain parties in our midst object to it or not. Every school has its defects, and these have undoubtedly to be remedied. In a college where the men are given opportunities of meeting in masses frequently these matters can be talked over, but here at the Institute the only way to apprise men of the real facts of any incident is to publish it in THE TECH. As a student organization it is up to us to do our best by the student body, and if we can show up any unclean work we intend to do it without further apology.

DR. W. A. TUFTS WILL SPEAK BEFORE T. C. A.

Pastor of Presbyterian Church Here Today in Union At 1.30 O'clock.

Today the speaker at the noon meeting will be the Rev. William A. Tufts, who is the pastor of the First Presbyterian Church.

His subject is to be "The Man Behind the Gun," which he has chosen himself, and is prepared to make a most practical and helpful one for every one who hears him today. His ability as a speaker and leader in other ways became known to people in Boston before his appearance here in his present church, and it was because of his fine reputation that he was offered the pastorate. His success in building up an influential church that before had not amounted to much, fully justified all expectations and showed that a man of such a calibre as his can bring success to an undertaking that did not look very promising.

A man that can accomplish so much in his church in a short time will have many interesting things to tell the members, and the Association hopes that a big crowd will be in the Union at half-past one to listen to him speak about the "Man Behind the Gun."

COMMUNICATION.

(We invite communications from all men in the Institute on important subjects. We take no responsibility for their sentiments and do not agree to print any that may come in, whether they are signed or not.)

To the Editor of THE TECH:

I want to protest against your remarks concerning the House Committee in Wednesday's issue of THE TECH.

The House Committee learned indirectly of Major Cole's gift through the columns of your paper and from other sources. President Kebbon of the Institute Committee made the arrangements to have the books listed on the afternoon they were received, but I believe no member of the House Committee was asked to be present, or even told about it. The books were placed on the shelves by those making up the lists, and on the shelves nearest the door at that. The House Committee has had sufficient experience to anticipate the natural results of such action and would have done nothing so rash.

It is indeed to be regretted that we have at the Institute any one with such a small idea of decency as to take books given under these or any other conditions. It would go hard with any such persons caught, as I have heard remarks which bode ill for any dishonest man found in this vicinity. One man had a book in the dining room at lunch Tuesday, but I believe that more than one book has been taken from the building, of which there is no record.

Oliver D. Powell.

SPIKES

The Red Sox won from Harvard by a score of 2 to 0.

Harvard football men are being put through scrimmages in the Spring practice this year.

Five Boston boys won in the amateur boxing championships held in Mechanics' Hall.

Fordham won from Georgetown by a score of 8 to 7.

Velvet

THE SMOOTHEST TOBACCO

10^c Full Two Ounce Tins

A REAL timber-topper this Velvet! It has hung from the timbers of the warehouse for over two years. This is to get rid of the leaf harshness—only time and patience can annihilate the "bite" in tobacco. Velvet is perfect mellowness—a flavor delightfully good—superbly smooth. Sometimes when you are at the dealer's ask for "Velvet" and take a chance! It's only by comparison that Velvet is the smoothest!

SPAULDING & MERRICK
CHICAGO

ONE PIECE HAMMER IN THE NEW MODEL

Ithaca

IF you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached.

WE have cut out all cocking levers, bars, push rods, and hammer stirrups and cock the gun direct from toe of hammer.

OUR hammer travels less than half an inch, taking only 1-625 of a second to operate.

STOCKS are not cut away for hammers or lock plates and are dovetailed into frame to prevent splitting and spreading.

THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically fool-proof, and will last you a lifetime if you take care of it and a good many years if you don't.

CATALOG Free; 13 grades, \$17.75 net to \$400 list. OUR 5 1/4 lb. 20 bore is a hummer—be down-to-date and shoot one.

TECH UNION

CATHOLICS PLAN FOR ANNUAL ELECTIONS

Nominations Due Soon—Election Results to Be Announced At Big Banquet.

In the business meeting which the Catholic Club held Tuesday evening, after the talk by Father Cusick, the president was asked to appoint a committee to make all arrangements for the banquet of May 8th. The committee on the Club Tea of Junior Week reported that all arrangements had been completed, that two rooms at the Hotel Brunswick had been reserved, and that thirty-five men had already signed up. There will be an orchestra of four pieces for one hour, and two or three ladies will pour tea from 4.30 to 6.30.

The president is to appoint a committee to receive all nominations, to have ballots printed, and to count the latter, so that the results may be announced before the banquet. The nominations must be signed by ten members of the club, and left at the Cage for the committee. The ballots signed by those members who have paid their dues must be in by 4 o'clock on the day of the banquet.

ARCHITECTS PLAN TEA.

Will Receive On One Afternoon During Prom Week.

At the business meeting of the Architectural Society, which was held yesterday afternoon in Pierce Building, it was decided that the society give a tea at some convenient time during Junior Week. No definite date has yet been set, for the reason that the officers hope to arrange for several special features which will probably determine the day.

A majority of the members were present and much enthusiasm was shown, which the men feel points to as successful a function as has heretofore been given.

INSTITUTE COMMITTEE.

A regular meeting of the Institute Committee was held yesterday afternoon in Room 8, Eng. C. It was voted that no courtesies, such as the giving of Techniques for Show tickets, or Show tickets for Prom tickets, be exchanged between the different activities.

A definite ruling was made that the points of Musical Club men, not officers, who are in the Show, be computed to ten. The official "T" can be worn only by men who have a right to wear them under the A. A. ruling.

MANY OUT FOR GOLF.

Twenty men have reported for the golf team squad and have been actively practising at the Wollaston golf links during the last week. The arrangement at present is that each man may obtain the use of the links for the afternoon on payment of fifty cents. By special permission the players may use the grounds on Saturday mornings until 12 o'clock only. The links are not open to the men at all on Sundays.

SOPHOMORE BASEBALL.

The Sophomore ball tossers are going to have an important practise at the Field this afternoon at 4 o'clock. This practise, at which there will probably be a scrub game, will in a measure decide the men that will take part in the game with Beverly High School, at Beverly, on Saturday afternoon. Manager Gardiner asks that all the candidates be present so that numbers will facilitate the picking of the initial team.

Lawson Robertson, of the I. A. A. C., has been appointed assistant coach of the American Olympic team.
