TRACK OUTLOOK DISCOURAGING

With the N. E. I. A. A. and Brown of Men's and Women's Track take a Stump.

Technology's track team has taken a Stump with the Brown dual meet. Less than two weeks off and the track team is getting ready to compete once more.

INTERCOLLEGIATE DRILL IN THE ARMORY TODAY

Seven Neighboring Schools Compete for Handsome Prizes.

The annual interscholastic drill competition under the auspices of the Freshman Investigation will take place in the Irvington Street Armory at 1 o'clock this afternoon. The neighboring schools have been invited to send squads of three to compete for the handsome trophy which will be given as a prize to the winning school.

MINERS MEET TONIGHT

Mr. G. L. Carpenter Will Speak on "The Work, Aim, and History of Mining Engineering".

Mr. Carpenter, a native of Pennsylvania, has spent much of his life in the mining industry and is especially well fitted for a talk on this subject. He is recognized as one of the best in the world. Mr. Carpenter is Professor of Mining Engineering at MIT and is a member of the American Society of Mining Engineers. He has been a speaker at many professional meetings and has written extensively on the subject.

WOODROW WILSON CLUB.

Tech Men Are Invited to Join Harvard Men in Campaigning.

A Woodrow Wilson Club, started by the Princeton graduates studying at Harvard, has been founded at Harvard by the under-graduates. The idea has been revived with enthusiasm by the students and the club now has a membership of three hundred and fifty. The purpose of the club is to stimulate the campaign in any way possible. The club plans to make the rounds of the Thermal Science Building and other places of interest to the club. The men who are interested in the club will be notified by the club officers.

ARCHITECTS' MEETING.

At 2 P. M., on Friday, April 30th, the Architectural Society will hold a business meeting at which the officers for the following academic year will be elected. It is probable that the plans for the joint meeting with the Architecture Engineering Society will be discussed.

NOTED VISITORS AT TECHNOLOGY

Professor Miller Entertains a Committee of German Scientists.

Professor K. Miller, of Technology, today and tomorrow entertains distinguished visitors when he receives the committee for the German Society of Natural Sciences. The committee, which has just returned from a tour of the United States, includes several of the most prominent scientists of Germany.

MRS. MARGARET STINSON DIES AT HER HOME

One of Best Known and Best Loved Institute Officers Passes Quietly Away.

Mrs. Margaret E. Stinson, for many years in charge of Institute laboratories and supplies, died at her home, 43 Whiting street, Dorchester, Sunday. Mrs. Stinson's connection with the Institute dates from its founding, and covers a period of forty-six years of continuous and efficient service to the Institute. She probably knew more Tech men during her long period of service than any single person from the campus.

ALUMNI COMMITTEE REPORTS BIG PROGRESS

Grads Respond Instantaneously to Call for New Institute.

One hundred and ten thousand dollars, subscribed by the Alumni of the Institute for equipment and other items, has been raised by the Alumni Committee. At the end of the first week, April 13th, twenty-five thousand dollars were mailed in Boston only Tuesday evening of last week, and since a large percentage of them were addressed to places two or three or more days distant, it is certain represents almost instantaneous gifts by many.

That this solicitation of six figures has been possible in so short a time is exceedingly gratifying to the committee, which hopes for a substantial response from the students. The chairman of the committee, Everett Morris, '85, in sending the quarterly report to the Alumni Associations to congratulate them on their good work and to assure them of the committee's contributions to their Alma Mater.

CALENDAR

In Charge of S. H. Tucker, 1914.

Wednesday, April 24.

5.00—Mining Engineering Society—Union.

Thursday, April 25.

1.20—T. C. A.—Union.

2.00—Architectural Society Meet.

8.00—Chemical Society—Union.
SOPHOMORE BASEBALL.

Team Plays Strong Dorchester High Nine Next Saturday.

Saturday afternoon the Sophomore baseball team goes up against the crack Dorchester High school nine. The School team is practically the same one that last year won the interscholastic championship of Greater Boston. This year they have made a start that promises to give them a position at the top of the flat. The Sophomores are suffering from the lack of practice, due to poor weather conditions. In the summer (this far) they have been defeated by opposite apparatus because of their failure to get together and develop consistent team work. The triple play which lost them the Rock Ridge game Saturday is indicative of their weakness.

In the coming game the first string players, Morrison, will not play, so the team is to appear in the Show performance at Malven. Without Morrison in the box, the manager does not expect to make a win out of the game, although the rest of the team has shown up fairly well in the recent games. Doce Swift will probably pitch and Storke will be at the other end of the battery.

L. PINKOS, College Tailor

announces the arrival of his complete line of Spring and Summer woolens which are now on display both at the Boston and Cambridge stores.

Please ask to see my "LONDON SPECIAL" Suits which I am making at $35.00.

These suits are made of Foreign woolens and are strictly custom made, in my own workrooms, by skilled tailors, and bear all the characteristics of much higher-priced suits.

Hanover, N. H.
ANNUAL MEET NEXT SATURDAY AT PENNSY
Michigan, Dartmouth and Penn seem to be favorites in special events.

Next Saturday will see collegiate athletics spring again into public notice. On this date the University of Pennsylvania holds its annual relay carnival, which will open a season of track meets during May, all of which will be held as preliminaries to the New England and the big intercollegiate clashes. This large meet enables the various coaches to give an idea of the strength of the players that will be sent later to the intercollegiate competitions. Moreover, it is expected that many men will come into notice with true Olympic style.

The list of events includes not only the relay races for the championships in the one, two and four-mile events, but also many special races, including the hundred and two-hundred-yard dashes, the hurdles and the field and weight events.

College stars from all over America have entered. Men from the University of Michigan have shown in no little way that they have a fine chance for many championships. Craig leading the list of men for the 220 and the quarter-mile, Hanavan and Hambleton, star of Michigan, will make strong opposition to Jones and Tourne of Cornell, in the half and two-mile, respectively. Sargent in the high jump, and Kocher in the shot-put, have nearly equalled present records. Dartmouth will send a like squad of men in Harmon, Marceau and Day for the mile; Olsen and Wilcox for the shorter dashes; Stewart, Donlin and Gardner for the 440 team.

In the weight and field events Dartmouth is well represented, Tilley and Hartsfield holding positions in the hammer throw. The former is the present intercollegiate champion in this event, while the latter has won first place in various meets. The shot-put is well supported in Englishmen, pep and Larence. Weight. In the pole vault, has been doing first class work recently, and Buck and Grisby have been doing 21 feet easily in the broad jump. Dartmouth is further strengthened by the intercollegiate high jumper, Surkill.

Harvard is well represented in her two distance men, Bunn and Jones. Penn has Miner, the creak quarter-mile runner, and Harvard has entered a new man, Tower, in the hundred-yard dash, who promises to be a find.

CHEMICAL SOCIETY.
Mr. R. S. Weston to Talk On Filtration Problems.

The Chemical Society will hold its next meeting in the Union on Friday, April 26. The first of the evening will be devoted to a business meeting, and nominations for next year's Chemical Society's officers will be due at that time. It has been decided that five names are necessary for a nomination, all of which are to be handed in to Secretary P. R. Law-rence.

After the business meeting the members are fortunate enough to have the privilege of an address by Mr. Robert S. Weston, who is an export filtration engineer, and has had much experience along that branch of engineering. He will talk on "The Filtration of Pittsburgh Water Supply."

Refreshments will be served at the close of the evening.

MRS. STINSON.
(Continued from Page 1.)
Her death will be sincerely mourned by the nine thousand Technology graduates scattered all over the world.

The burial services were held at her home yesterday.
