

THE TECH

VOL. XXXI. NO. 154

BOSTON, MASS., FRIDAY, APRIL 26, 1912

PRICE TWO CENTS

PRESIDENTIAL STRAW BALLOT AT INSTITUTE

Nominations Printed in The Tech Tomorrow—Due at Lower Office Monday.

A ballot will be printed tomorrow in THE TECH to be used by the students for voting in the straw ballot indicating the sentiment regarding the choice of the next President of the United States. This ballot will carry the names of the prominent candidates of both the Republican and the Democratic parties, with a blank line to be filled in by the Socialist voters.

The casting of a straw ballot is a favorite method for the expression of general opinion on national elections in the colleges of the country. Already many of the colleges of the West and of the central part of the United States have taken this ballot with varying and interesting results. The canvassing of the Institute for the general opinion has been intentionally delayed until now, just before the Massachusetts Presidential pri-

(Continued on Page 2.)

GIVES BOOK PRIZE.

R. S. Peabody Offers Own Work For Church Tower Sketch.

By the generosity of Mr. Robert S. Peabody the students of the Architectural course are now entered in a sketching competition, for which there are three prizes, each consisting of a copy of his recent book, "An Architect's Sketch Book." Mr. Peabody is a life member of the corporation of the Institute, and during the years 1867 and 1868 was a special student in architecture here.

The subject of the competition is to be the New Old South Church Tower in Copley Square, and as much of the surroundings as the student chooses. The sketch is to be made in pencil only. The sketch must be made from the tower itself and not from a photograph or other illustration. Five o'clock Wednesday afternoon, May 1st, is the time limit of the problem.

A feature of this competition is that in awarding the prizes one will be reserved for the second year students, another for the third, and the third book for the fourth and fifth year students.

TECHNIQUE SIGN-UPS.

All Men Who Have Signed Must Call for Books Before May 4.

There are a considerable number of men who have signed up for Techniques and who have not yet called for their books. The affairs of the book must be closed up as soon as possible, and therefore the board wishes to make the announcement that books will not be reserved for men who have signed up and who do not call for them before Saturday, May 4th. The books may be obtained at the Technique office, Room C, at the Union, any noon before then between 1 and 2 o'clock. The board sincerely hopes that these men will call for their books, as they regard the signing up as a contract made in good faith.

UNUSUALLY FINE TALK BY RABBI LEVI

"The Function of Education" Is Explained at T. C. A. Meeting.

Rabbi Levi of Temple Israel spoke yesterday at the Christian Association meeting on the subject, "The Function of Education."

His talk was one of the ablest, most learned, and altogether most convincing that the crowd in the Union has heard for many a week, and received correspondingly careful attention from its auditors. He spoke not alone of the personal value to the man who has been given it of an education, but laid great stress upon the responsibility of an educated man to live up to his training. He said that no one ever admired a man who was a plodder or a ditch-digger when he knew that the ditch-digger was capable of better things, but was doing menial work because he wanted to do what happened to seem easiest.

He does not think, however, that the old adage, "Knowledge is power," is as true as is Emerson's version, "Knowledge is the key to power." But even then it is not knowledge that one should seek, but rather wisdom. For while the Bible extols knowledge it is significant that more frequently it is wisdom that one is told to seek.

The Rabbi mentioned Mr. Riis's saying that so long as the American flag floated above the public schools we need have no worry over the thousands of immigrants that annually seek our shores, because the schools are to be trusted to leaven the lumps between the races. Logically the higher schools and colleges should do this to an even larger extent.

Rabbi Levi mentioned several of the advantages that one would naturally think of as belonging to education, and reserved the purely cultural result to be spoken of last as the one that he considered most important.

"Finally," he said "education is never to be considered solely with reference to the individual, but is primarily for the benefit of, and at the expense of, society, and hence an educated man should use his faculties for society's advancement."

TECH BUTTONS COMING.

Bursar Rand Hears From Paris—Delivered in Two Weeks.

The Bursar, who has been in charge of the new Technology recognition button from the first, sends word that he has just received news from the makers in Paris that the consignment is ready for delivery. The Bursar expects the buttons to arrive in Boston in the course of about a fortnight, and they will immediately thereafter be for sale to the men who ordered them at the time it was decided to follow Major Cole's suggestion that we have them.

The Show men will soon be able to think of Tech Show, 1912, as a memory, but it will be a pleasant one for they have done their work well.

The Technique Electoral are to hold what will probably be its last meeting today, at which it will elect an Art Editor.

CHEMICAL SOCIETY WILL MEET IN UNION

"Filtration of the Pittsburgh Water Supply" to Be Explained.

The meeting of the Chemical Society, which takes place tonight in the Union at 8 o'clock, it is hoped, will be one of the most interesting that has been held by the society this year. Mr. R. S. Weston, '94, has consented to speak to the men on the "Filtration of the Pittsburgh Water Supply," a subject with which he is thoroughly acquainted.

Just at this time many of the country's most prominent engineers and biologists are spending their best efforts in advancing this important branch of science, and the officers of the society urge every man in the Institute who is in the least interested to attend the meeting, feeling certain that much of great value will be given out by Mr. Weston.

SOPHS MEET D. H. S.

Team Lacks Practice But Close Game Expected.

The Sophomore baseball team will play Dorchester High at the Dunbar avenue grounds tomorrow afternoon in what promises to be a close game. All the practice games scheduled with Mechanic Arts have been called off up to this time, and the team has played only two or three games with other high schools. This lack of practice handicaps the team somewhat, but Manager Gardiner thinks the chances for a victory good.

The men who will probably be sent out against Dorchester High are Storke, catcher; Swift or Harris, pitcher; Stewart, first base; Comber, second base; Mahony, third base; Gardiner, short-stop; Hardy, Page, Hughs and Long, outfielders.

FRESHMAN BASEBALL.

Last Practice This Afternoon at the Field.

The Freshman baseball team meets Tufts Seconds tomorrow afternoon at 3.30 at Tufts Oval in Medford. The last practice before the game will take place this afternoon at the Field and Captain McDevitt is anxious to have the entire squad together with any new candidates for pitcher and first base out for this practice.

According to the present schedule, this is the last game before the Freshman-Sophomore series, which begins on May 11th and is continued on May 15 and 18. The game scheduled with Brockton for May 1 has been cancelled.

This series with the Sophomores is the most important part of the season's schedule and the team is anticipating results that will be disagreeable for the second year men. Part of this hope is based on the rumor that a "dark horse" in the form of a new pitcher will report for practice next week.

The Technology Christian Association are to be congratulated on securing such an excellent speaker for Thursday's talk.

CIVIL ENGINEERS TO ELECT NEW OFFICERS

For President Miles E. Langley And Joseph J. Strachan Are Nominated.

The ballots for the Civil Engineering Society are now out and have been placed in the desks of the members in the drawing rooms, but all who did not receive them may secure them at the Cage. The ballots are due before 4 P. M. next Wednesday, May 1st, and may be left in Box 1, the Cage. The results of the election will be announced at the annual meeting at the City Club Wednesday evening.

The two men to be voted on for President are Miles E. Langley and Joseph J. Strachan, the present secretary of the society.

William A. Bryant, member of this year's Program Committee, and William R. Mattson, of the Class of 1913, treasurer, are the nominees for vice-president.

For treasurer, the names of Mr. Clarence W. Brett, the present assistant treasurer, and Mr. Edwin D. Pratt are on the ballot.

The office of assistant treasurer is evidently in need of some one with athletic tendencies, for both Leslie S. Hall and Arthur F. Peaslee are interested in that line, the former being Technology's star high jumper, and the latter the assistant track manager.

There are four names on the ballot for the Executive Committee, three of which are to be voted for. The names are: Frederick D. Murdock, Robert B. Nichols, the 1913 Class secretary and of the Prom Committee; Alfred G. Ranney, the present treasurer of the society, and Robert W. Weeks, business manager of the Tech Show.

Two men of the following three are to be chosen for the 1913 Program Committee: Jose M. Cadenas, Lester C. Gustin and Eugene L. McDonald. Two of the following three are also to be chosen for the 1914 Program Committee: Homer N. Calver, Edward C. Taylor of the Technique Electoral Committee, and on next year's Technique Board as Photograph Editor, and D. E. Van Volkenburgh, who is now the Advertising Manager of THE TECH.

The Harvard track team started a training table in the new Varsity club Tuesday. Work on the interior of the building is still unfinished, but will be completed in a few days, when the tables of the baseball and Freshman track teams will start.

John Paul Jones may not be seen at the Olympic trials in the Harvard Stadium. He is assured of a place on the team without a trial.

CALENDAR.

In Charge of S. H. Taylor, 1912.

Friday, April 26.

2.00—Architectural Society Meeting—42 Pierce.

8.00—Chemical Society—Union.

Saturday, April 27.

Freshmen vs. Tufts Second—Medford.

2.00—Tennis Meet with Brown—Providence.

THURSDAY, APRIL 25, 1912

THE TECH regrets exceedingly to announce the resignation of Lionel Henry Lehmaier from the position of Editor-in-Chief. Charles A. Cary, 1912, was elected to fill the vacancy.

AT THE FIELD.

Throughout the spring discouraging reports have reached our ears that the Field has presented a persistently deserted appearance, and that there was every indication of an almost entire lack of interest in athletic sports, especially track, on the part of Institute men. Fortunately those who took this state of affairs most to heart could vent their feelings by blaming the weather, and trusted that a change in that uncertain element would bring a great improvement.

Amid the omnipresent storm of protest against the tendency of Tech men to complacently shed all personal responsibility for the maintenance of any sort of Institute activity, we rejoice to announce that on yesterday afternoon the Field presented a spectacle of animated endeavor, mightily cheering to all who have followed the work there this spring. Furthermore, we refuse to believe that this display of enthusiasm will be checked by a return to frigid weather.

The mention of track to Tech men inevitably leads to recollection of the remarkable standard the Institute has ever maintained in that sport, even under conditions acknowledged as the hardest to be found in the college world. Perhaps it may occur to some that to these very conditions we owe much of our success. During every day of a man's course here it is brought home to him that he is working for and according to a definite purpose, that he has a hard battle to fight, and that he must be in the game from start to finish. As a result, when he goes out to the Field he carries that sentiment with him still, and shows a spirit in his play as in his work that has much to do with his success in winning laurels for his Alma Mater.

This same difficulty that a man here finds in getting the opportunity in the press of Institute work to devote his energies to athletic activities, beside engendering a healthful, purposeful spirit in his sports, also gives any one who can find such time a valuable training. To be able to map out his work, to definitely assign some certain period to athletic exercise, and to enjoy these periods in full realization of

SENIOR PORTFOLIO TO BE OUT ON MAY 10

Book Now at Printer's and Will Appear First at Senior Dinner.

Work on the Senior Portfolio is now completed, and the committee is enjoying a rest from its exertions, well satisfied with the results. They desire to express thanks to the class as a whole for its co-operation in making the book complete, to Mr. Hearn for the splendid photographs which he furnished, and to President Kebbon, to whom they are indebted for the attractive cover design.

Printing and binding is now under way at the University Press, Cambridge, and will be finished by May 10th, when the book is to appear at the Senior dinner. All those who have not as yet ordered a copy are strongly urged to do so at once, as the extra books ordered from the printer are limited.

The committee announces that any men desiring to keep their cuts may have the same for the small sum of fifty cents. As the regular price of these is \$1.25, it is plain that here is a rare opportunity to preserve one's likeness in copper. Orders will be taken by any member of the committee.

STRAW BALLOTS.

(Continued from Page 1.)

maries, when the feeling about the coming campaign and election is running high. Indeed, in one of the lectures yesterday, the mere incidental throwing on the screen of Colonel Roosevelt's picture, taken five years ago, precipitated a small political rally. Alternate storms of handclapping and hissing greeted the slide. In the foreground was the colonel's silk hat, which recalled his now famous "My hat is in the ring," and the students delightedly grasped the point. The real object of the showing of the picture was completely forgotten.

The ballot of THE TECH to be issued tomorrow will appear as follows:

On the ticket of the Republican party will be Theodore Roosevelt, William H. Taft, Albert P. Cummings, Robert M. La Follette.

The ticket of the Democratic party will contain the names of Woodrow Wilson, Champ Clark, Oscar Underwood and Judson Harmon.

There is usually some strong feeling for the Socialist candidates, therefore the ballot will contain a blank space where such choice may be indicated.

The ballots are due at 2.30 o'clock next Monday afternoon at the lower office of THE TECH. The polling box will be plainly marked.

WATERMAN GETS LETTER

Manager of Track Team Is Given "T" By Advisory Board.

The Advisory Council on Athletics has granted to Max Waterman, manager of the track and cross-country teams, a "T" in recognition of the meritorious way in which he has done his work in managing the two teams, and because they feel that it has merited this special commendation.

place of the usual political clubs is taken by a Good Government Club. Through this club the men are introduced to the problems of civic life, and they are able to discuss the merits of the various political candidates.

what they are worth and the returns they must yield, gives any man a truer perspective, a greater ability to weigh conflicting interests that cannot fail to figure in the broadest development.

LOWELL INSTITUTE.

First Meeting of the Kind in the Annals of School—Large Number Attend.

The members of the Class of 1913, in the Lowell Institute, held the first undergraduate dinner last evening in the Union that has ever been given in the history of the Institute, except for the regular Senior banquet just before graduation.

In the speakers, Prof. Charles F. Paik, Mr. E. H. Temple, and Mr. Royal Parkerson, of Lowell, the committee were especially fortunate, for all three gave the men much of value and were at the same time most interesting. Prof. Paik of the Mechanical Engineering Department of Technology is a director of the Lowell Institute for Industrial Foremen, and is for that reason in close touch with many of the students there. Mr. Parkerson is a prominent electrical engineer of Lowell, with the Lowell Light Company. Mr. Temple is president of the Lowell Institute Alumni.

Much credit is due the committee for the way in which the general details of the dinner were carried out. The following men acted: L. H. Cunningham, Chairman; W. L. Larry, D. N. Frazier, Secretary of the Class; S. C. Wolfson, F. J. Emery, J. F. Zorn, P. J. Walsh. It was most gratifying to have the function so well attended, for there were nearly eighty present, and it is hoped that a precedent has been established which will mean many more affairs of a social nature in the entire school.

WESTERN STARS AT PENN.

At Least Five Colleges Will Enter Athletes Saturday.

Western colleges are entering a great number of fast runners and record-holding athletes to compete against those of the east at the Penn relay games on this coming Saturday. Chicago, Illinois, Wisconsin, Minnesota and Michigan will be on hand with relay teams and individual stars. Wisconsin and Michigan are pitted against the fast eastern teams in the four-mile event, and Minnesota has entered the two-mile relay race. Chicago has listed in the mile relay and will have to compete against Cornell's crack quartet and the indoor championship team from Illinois.

Individual stars in the special events on the program will be a plenty. Michigan sends record holders in Craig, the quarter-miler; the two-milers, Hainbaugh and Hanavan, and Sargent, a high jumper. Illinois will send Case, the fast hurdler, and Murphy in the pole vault. Chicago has entered Coyle in the pole vault, Kuh in the hurdles and Manual for the shot-put. Wisconsin sends a champion in the indoor high jump, under the name of Wahl.

A COLLEGE FARM.

A novel idea has recently been originated by President Hibbon of Princeton University to enable students there to earn their way through college. The plan embraces the establishment of what is called the Princeton University Farm, where students who desire it may obtain work. Ploughing began last week. There will be steady work all summer, and it is calculated that students will be able to earn two dollars per day. The land will be tilled on a socialistic, democratic basis, the laborer obtaining the entire product of his toil.

The tract at present is ten acres in extent, but it will be increased as rapidly as students apply for work. The soil will be devoted to truck farming, and the crop will be sold to the college commons and to the various Princeton eating clubs. The idea has been adopted to rid Princeton of the name of being a home for the sons of rich men.
