UNUSUALLY FINE TALK BY RABBI LEVI

Rabbi Levi of Temple Israel spoke yesterday at the Christian Association meeting on the subject, "The Function of Education." He said that books will not be reserved for noon, May 1st, is the time limit of the sketching competition, for which there is no call for them before Saturday, May 4th. The books may be obtained from the makers in Paris that the ditch-digger was capable of his training. He said that no one ever admired a man who was a good or a ditch-digger when he knew that the ditch-digger was capable of was to attend the meeting, feeling certain that a great deal of prize value will be given out by Mr. Weston.

GIVES BOOK PRIZE.

R. S. Peabody Offers Own Work For Church Tower Sketch.

By the generosity of Mr. Robert S. Peabody the students of the Architectural School are not offered in a sketching competition, for which there are three prizes, each consisting of a copy of Mr. Peabody's work, "Peabody's Church Tower Sketch." Mr. Peabody is a life member of the corporation of the Institute, and during the years 1867 and 1868 was a special student to his training. He said that no one ever admired a man who was a good or a ditch-digger when he knew that the ditch-digger was capable of was to attend the meeting, feeling certain that a great deal of prize value will be given out by Mr. Weston.

SOPHS MEET D. H. S.

Team Lacks Practice But Closes Game Expected.

The Sophomore baseball team will play Dorchester High at the Dunbar Avenue ground tomorrow afternoon in what promises to be a close game. Twenty-one sophomores are on the ballot. This lack of practice handicaps the team somewhat, but Manager Gardner thinks the chances for a victory good.

FRESHMAN BASEBALL.

Last Practice This Afternoon at the Field.

The Freshman Baseball team meets Tufts tomorrow afternoon at 3.00 at Tufts College in Medford. The last practice before the game will take place this afternoon at the Field and Captain McDevitt is anxious to have the entire squad together with any new candidates for pitcher and first base out for this practice.

CHEMICAL SOCIETY WILL MEET IN UNION

"Filtration of the Pittsburgh Water Supply" to Be Explained.

The meeting of the Chemical Society, which takes place tomorrow, is the most interesting, that has been held by the society this year.

RABBI LEVI DELIVERS DIGEST″S TALK.

"The Function of Education."

The Rabbi mentioned Mr. Riis's sayings about what the function of education should be. He did not think, however, that the old adage, "Knowledge is power," was as true as Emerson's words of wisdom, "Knowledge is the key to power." But even then it is not knowledge that one should seek, but rather wisdom.

CIVIL ENGINEERS TO ELECT NEW OFFICERS

For President Miles E. Langley And Joseph J. Strachan Are Nominated.

The ballots for the Civil Engineer section are now out and have been placed in the desks of the members in the drawing rooms, but all who did not receive them may secure them at the Cage. The ballots are due before 4 P. M. next Wednesday, May 8th, and may be left in Box 1, the Cage. The office of assistant treasurer is evidently in need of some one with athletic tendencies, for both Leslie R. Hall and Arthur M. Hoad were elected in that line, the former being Technology's star hitch jumper, and the latter the Captain of the track man.

There are four names on the ballot for the Executive Committee, three of which are to be chosen for the 1913 Program Committee, and William R. Matson, of the Class of 1913, treasurer, is the nominee for vice-president.

For treasurer, the names of Mr. Clarence W. Brett, the present assistant treasurer, and Mr. Edwin D. Prutt are on the ballot.
THE TECH, BOSTON, MASS., APRIL 26, 1912

SENIOR PORTFOLIO
TO BE OUT ON MAY 10
Book Now at Printer's and Will Appear First at Senior Dinner.

Work on the Senior Portfolio is now completed, and the committee in charge is joying a rest from its exertions, well satisfied with the results. They desire to express thanks to the class and a whole for its cooperation in making the book complete, to all, Henry for the splendid photographs which he furnished, and to President Hobbs, in whose hands they are now placed, for the transitive cover design.

Printing and binding is now underway at the University Press, Cambridge, and will be finished by May 10, when it is expected to appear at the Senior dinner. All those who have not yet ordered a copy may place their orders immediately, and the committee are glad to strongly urge to do so at once, as the extra books ordered from the printer are limited.

The committee announces that any men desiring to keep their cuts may have the same for the small sum of fifty cents. As the regular price of those is $1.25, it is plain that here is a rare opportunity to preserve one's business in copper. Orders will be taken by any member of the committee.

STRAW BALLOTS.
(Continued from Page 1.)

Throughout the spring discouraging reports were received regarding the prospects of election. The Field has presented a persistently discouraging atmosphere, and there was every indication of an imminent failure. Lack of interest in athletic sports, especially track, on the part of Institute men, fortunately those who took this state of affairs upon heart could vent their feelings by blaming the weather, and trusted that a change in that uncertain element would bring a great improvement.

The management's storm of protest against the tendency of Tech men to incompletely fulfill all personal responsibilities for the advancement of any sort of Institute activity, we recapitulate. The announcement was made that the Field presented a spectacle of animated endeavor, mightily chagrined to see all who have failed in the work they this spring. Furthermore, we desire to believe that this display of enthusiasm will be checked by a return to frigid weather.

The track of Tech men inevitably tends to recollection of the remarkable standard the Institute has always maintained in that sport, even under conditions acknowledged as the hardest to be found in the college world. Perhaps it may occur to some that in these very conditions we owe much of our success. During every day of mark's campaign here it is brought to their attention that he is working and for and according to a definite purpose. He has a hard battle to fight, and that he must be in the game to fight. As a result, when he comes to the Field he carries that sentiment with him still, and also a spirit of determination which is in his work that has much to do with his getting the winning laurels for his Alma Mater.
