

THE TECH

VOL. XXXI. NO. 15

BOSTON, MASS., SATURDAY, OCTOBER 14, 1911

PRICE TWO CENTS

SENIOR DINNER OFFICERS ANNOUNCED

Prof. Noyes, Dean Burton, Prof. Miller and Mr. Blachstein the Speakers.

At the Union, last night, more than a hundred of the members of the Senior class sat down together to one of Mr. Colton's best dinners. There were fine speeches and the announcements of the Senior Elections, all of which served to bring together one of the largest crowds ever at a Senior dinner.

The toothsome menu prepared by Mr. Colton follows:

Consomme Julienne.
Rolls. Radishes. Olives.
Baked Stuffed Haddock.
Roast Tenderloin of Beef with Mushrooms.
Mashed Potatoes. Green Peas.
Ice Cream and Cake.
Demi Tasse.

After the fellows had enjoyed the repast to the fullest extent, Mr. Schell, the chairman of the Election Committee, rose and said that the time had come for the announcement of the men who had been chosen by the class to guide it through its last and Senior year. The newly elected president is Mr. Harold Eric Kebbon of Boston: Class football (1) (2), Show principal (1) (2), Editor-in-Chief Technique (3).

The Vice-President is David Frye Benbow, of Reading, Pa., who was on the Institute Committee (2), and Business Manager of Technique (3).

The Secretary, Bates Torrey, of South Weymouth, has been: Football (1) (2), baseball (1) (2), Electoral Committee (2), Class Treasurer (3).

Rudolph H. Fox, the treasurer, is from Hartford, Conn. He has been on the Musical Clubs, Prom Committee and Class Secretary last year.

Of the Executive Committee members, John Hall is from Freehold, N. J. He is an ardent worker on the Technology Christian Association. Gerald Marcy Keith of Brooklyn, N. Y., has been on THE TECH for two years, leading to Editor-in-Chief. He is also a T. C. A. worker, being the present president.

The Institute Committee has for Senior representative Donald Earl Bent of Denver, Colo., and John Eddy Whittlessey of Newton Centre. Bent was Show principal (2), and Treasurer of Technique (3). Whittlessey was class football (1) (2), Manager (2), Show Chorus (1) (2) and Institute Committee Secretary (3).

On the Athletic Association the class has Earl E. and Ralph M. Ferry of Pittsfield, Mass. Both of these men have been identified with the Institute cross-country team throughout their course. Ralph Ferry is Secretary of the Mechanical Engineering Society and chase captain of the Hare and Hounds' Club.

President Kebbon announced as the first speaker of the evening Professor Arthur A. Noyes, ex-President of the Institute, and the present head of the Alumni Association. Dr. Noyes began by outlining the work of the Site Committee of the Corporation, and told of the several sites that were discussed, why each was in turn rejected and why the Cambridge site on the Charles River Esplanade was finally chosen. Professor Noyes said: "As announced exclusively in THE TECH Wednesday afternoon, the problem of the new site

PROF. F. W. CHANDLER RETIRES FROM SERVICE

After Over Twenty Years As Department Head, Retires Because of Health.

President MacLaurin of the Massachusetts Institute of Technology announces this morning that he has heard the resignation of Professor Francis W. Chandler, who for more than twenty years has been the head of the Architectural Department. The reason for the withdrawing is purely and simply on account of health, and it would have been penned two or three years ago but for the pleas of the students and the instructing staff. With an increasing handicap of deafness Professor Chandler finds that the strain of trying to hear is now injurious. Therefore, to the regret of everybody, he feels obliged to give up the work which he has carried forward so actively and energetically for nearly a quarter of a century.

For his official fulfillment the resignation requires the acceptance of the Executive Committee of the Institute, which, under the circumstances, can only regretfully be given, and it will be a surprise to nobody should Professor Chandler's name be retained on the rolls of the Institute as professor emeritus.

Only those whose profession is architecture and who realize the progress made in architecture and the education of the architect during the past twenty-three years can fully appreciate how successfully Professor Chandler has filled his position at the head of the course of architecture at Tech. Taking charge when the problems were still indeterminate and with a small number of students, he has built up a corps of instructors and an equipment which has made the school a leader in the architectural class, and his leadership has continued in competition with the largely increased number of schools of the past ten years, all with lower tuition and offering more attractive possibilities in the way of scholarships' aid and traveling scholarships.

Professor Chandler's experience of many years as a practicing architect, his constant touch with active work as an adviser in competitions, together with his natural ability for handling men and his appreciation of the difference between teaching and practice, have all contributed to the great success of the school under his management.

He has always held for maintaining a high standard of admission. Keeping abreast of the progress of architecture he has modified the course to keep it alive to modern conditions, and furthermore, he has always insisted upon maintaining that well-balanced relation between the aesthetic and cultural and the constructive aspects of the professional training, without which any school must become weak and one-sided.

As the head of the course it has been a part of his task to preserve harmony among his intrusting staff and bring out to the fullest extent their best efforts and work. Herein has come into play his human qualities—the real man. Always open-minded, considerate to the greatest degree, generous in giving credit when due, and in many ways making possible their advancement, he has developed

Continued on page 2, column 2

SUMMER SCHOOL OF CIVIL ENGINEERING

Site Has Been Selected and Construction Will Probably Commence in Spring.

All students in the engineering courses, and especially those in Course I, will undoubtedly be pleased to learn that the plans for a Summer School of Civil Engineering, which were outlined practically five years ago, have now been almost completed, and it is practically certain that construction will be commenced in the early spring. It is hoped that the equipment will be available for use in summer of 1912.

The Institute has previously conducted summer courses in these subjects at various places, notably, Lancaster and South Deerfield, Mass.; Schoharie and Keeseville, N. Y.; Delaware Water Gap, Pennsylvania; Lake Sunapee, N. H., and at Ellsworth, Cherryfield, Rangeley Lake, Machias and East Machias, Maine. However, these courses, consisting of surveying, field geology and hydraulic measurements, were merely optional, and were not taken advantage of by very many students.

These locations, however, were not entirely suitable and the department has felt for a long time that a summer school ought to be erected on a site more adapted to the purpose in view; and that courses in surveying, railroad location and hydraulic measurements should be given during a period of two months in the summer as a regular part of the engineering courses.

Obviously the site to be selected must be some distance away from railroads and towns, and yet not so far that the traveling expenses for students should prove excessive. It must be in a healthy location. The topography must be greatly diversified. Heavily wooded land and slight elevations for railroad work; a fairly large body of water for the work in hydraulics; a tidal stream when tidal observations might be taken; a river for stream measurements, at the same time capable of furnishing sufficient water power for lighting the camp and conducting hydraulic experiments.

It may easily be seen that the selection of a location to satisfy all the above conditions was no mean task. Topographic maps of New England were carefully and systematically studied, with the result that a site has been chosen upon Gardener Lake, near East Machias, Maine. East Machias is situated upon the Eastport line of the Maine Central Railroad, between Bangor and Eastport. A small steamer will be chartered to convey students to and from the camp if the number taking the course warrants the expense. The location chosen is an ideal one, being on a high and narrow ridge projecting out into the lake. The nights are invariably cool, even in summer; the air is sharp and bracing, and there are excellent opportunities for bathing and other healthful out-of-door recreations.

The establishment of this school has been made possible largely through the efforts of the committee and also different members of the civil engineering department, particularly Professor's Robbins, Allen, Spofford, Burton, Hosmer, Breed and Barrows. The negotiations for the purchase of the land have been carried on by Mr. Geo.

Continued on page 3, 2nd column

COSMOPOLITAN CLUB'S FIRST SMOKER TONIGHT

Fine List of Speakers, Also Music, Eats, and More Smoke.

The Cosmopolitan Club will hold its first meeting of the year tonight in the Union, at 8 o'clock. Refreshments will be served and the club is bound to maintain its already enviable reputation in this line. Mr. Eksbergian, leader of the Tech Orchestra, will provide music with a quartet of stringed instruments.

The smoker this evening will have a particularly fine list of speakers, among them being President R. C. MacLaurin, Mr. J. Beltram, United States Consul to Mexico, and Mr. M. N. Drew, formerly Superintendent of Customs for the Chinese government at Tien T sien.

All those foreign students who are not already members are particularly invited to attend this smoker, and likewise those American students who are interested in the objects and activities of the club. The meetings are strictly informal. The object of the Cosmopolitan Club is to promote good fellowship among the foreign students at the Institute. In the past they have succeeded remarkably well in this object, and the large attendance that the attractive program warrants is expected at the smoker this evening.

HARE AND HOUNDS RUN TODAY AT NEEDHAM

The weekly Hare and Hounds' run will be held at Needham this afternoon. The men are a little more experienced in the game than they were when school started, and a little faster pace will be set than in former runs, but a squad will be provided for even the slowest, and all will be welcome. The train will leave the Back Bay Station at 2.20 P. M. The N. Y. P. A. Club of Needham has tendered the use of their club house, with shower baths and lockers.

GLEE CLUB TRIALS.

These men report at the Union today at 1 P. M. for trials: C. L. Smith, J. B. Sheddon, R. G. Bergen, G. F. Cronmett, R. Russell, R. C. Doremus, K. C. Mason, S. W. Gurney, M. E. Hill, P. E. Jeffers, W. R. McEwen and W. E. Wentworth. The following report at 1.30 P. M.: C. W. Brett, Bulge, F. W. Blakely, R. O. Elcock, E. A. Feeson, C. W. Fry, F. F. Fulton, H. A. Morrison, G. B. Ott, A. M. Pederson, G. Shedd, P. Shedd, W. A. Snow, A. E. Wardwell, C. W. Harlett, R. S. Wright, P. G. Whitman.

CALENDAR.

Saturday, October 14, 1911.
2.00—Track Practice at the Field.
2.00—Class Relay Teams at the Field.
2.20—Hare and Hounds Run at Needham.
3.00—1914 vs. Somerville High, Football, at Somerville.
8.00—Cosmopolitan Club Meeting.
Monday, October 16, 1911.
3.00—Track Practice at the Field.
Monday, October 16, 1911.
4.00—Aero Club's First Meeting at the Union.
Tuesday, October 17, 1911.
3.00—Track Practice at the Field.

SATURDAY, OCTOBER 14, 1911

It is with great regret that the Institute learns of the resignation of Professor F. W. Chandler, head of the architectural department, and his retirement into private life. His loss personally will be no less keen than his undoubted loss educationally. In truth, at his hands education was ever inseparable from his kindly spirit and confidential personality. A power among men, he was a boy among boys and a student among students. His scholars were as his sons and indeed a rare father was he. Under his tutelage, the recipient of his instruction was made to feel that nothing was difficult—that a palace was as easily designed and executed as a hut—dependent only on the breadth of view and mental perspective. And it was this breadth of view and grandeur of perspective that Professor Chandler engendered and fostered.

Professor Chandler will ever retain the sincere regard of the Institute.

At the Senior dinner, last evening, Professor Noyes emphasized the point of the possibility of being able to exchange such courses with Harvard University as would be advantageous to the students and Faculty of each. Reading between the lines and taking into account the location of the "New Technology," one might be tempted to imagine a renewal of the discussion regarding the advisability of a combine of the two institutions of learning under one head. However, this seems hardly possible in view of the strong opposition of the Technology Alumni when the question was under discussion several years ago, and in addition to this President Maclaurin in his inaugural address expressed his views strongly against such a move.

The old and oft recurring difficulties arise again this year. Two conflicting dates of the Union on Friday evening and, "horrible dictum," they both had free feeds.

Continued from page 1

has been definitely settled and settled right.

"The location chosen contains about 49 acres, and is able to accommodate any reasonable growth of the Institute for years to come. It is remarkably easy of accessibility as a result of the New Cambridge Subway, and students coming in from the suburbs will waste less time than at present." He emphasized the amount of water front available, remarking that there was enough for every man in the Institute to stand in single file and watch the Tech crew row by. He remarked that there was a possibility of being able to exchange courses with our Cambridge contemporary, Harvard, to the mutual advantage of both. The Alumni will be expected to work for the Institute more than ever now that there will be something permanent and any improvements will no longer be of a permanent nature.

The next speaker introduced was Dean Burton. He congratulated the class on the results of the elections, particularly on the Secretary, who from his graduate work is the most important officer. The feeling that the Institute officials are not the born enemies of the undergraduates is probably beginning to be felt and will increase from now on. Professor Miller next spoke on the tremendous problems of building the new Tech, and brought out the possibilities of employing undergraduates from all branches. A new problem is to be set for Course 2 men in the near future; the design of a boiler house for the new Tech. Mr. Blachstein was introduced as being as familiar to Tech men as the Rogers Building. He complimented the class on having for President a man who would always be able to rise to every occasion at great length. At the conclusion of his witty remarks the meeting was adjourned with cheering.

Continued from page 1

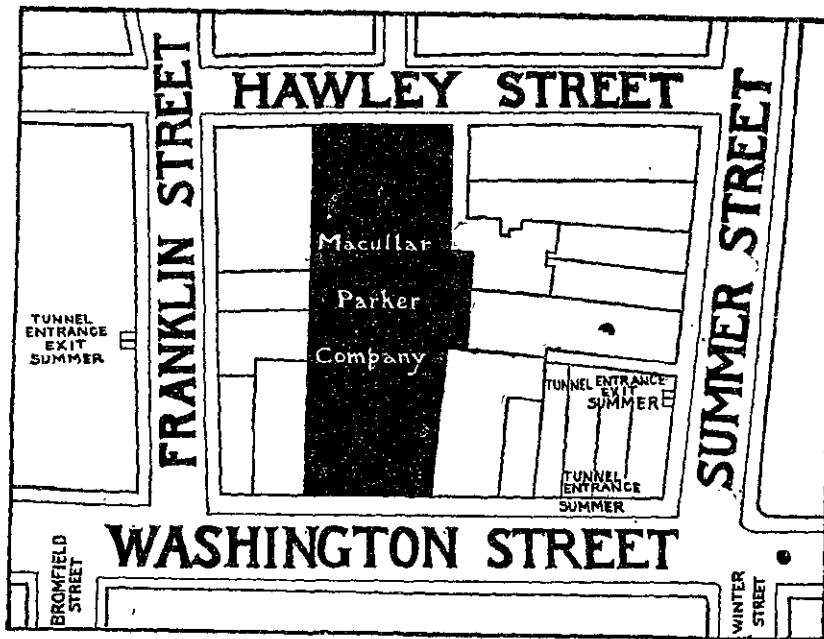

an esprit de corps in his instructors seldom found in a group of men whose temperaments and duties must differ radically.

His relations with the students can be most effectively expressed by their favorite name for him, "Pa Chandler." The new student, many miles from his home, must feel at home when Professor Chandler greets him, not only for the first time, but always after that. And it is to him that they come with their troubles while at the Institute, and afterwards, too, when their lack of experience always met with his sympathetic advice.

If an instructor ever deserved the privilege of laying down his work, Professor Chandler does so now. He leaves the first and pioneer school of architecture in this country well established and growing steadily. He carries with him the affection and best wishes of all his colleagues and of more than a thousand students who have come under his care. In giving his notice of the receipt of the letter of resignation, President Maclaurin emphasized these phases of Professor Chandler's work. He said: "We all of us regret that Professor Chandler feels he must resign, for it is true that the universally acknowledged success of the architectural department of the Institute has been very largely, in fact almost mainly due to him. The relations between this splendid man and the students, to whom he has been a firm friend, almost a father, has created a spirit of unity which has been an important factor to the development."

Suggestions for improvements in the Union—Caviar on the bill of fare every day but Monday. Give all the waiters puffs and French heels. Put Bobbie Colton in a dress suit. Also the Orchestra. Try the same stunt for the dinners (vide THE TECH of August 17).

MOORE'S
THE ORIGINAL NON-LEAKABLE
FOUNTAIN PEN

The easiest pen to fill.

One of the features which makes Moore's
an unquestionably superior pen is the ease
and rapidity with which it can be filled.
Simply remove the cap, drop the ink in
and the pen is ready for use — no inky
joints to unscrew.

Moore's is a very satisfactory pen to carry around
in your pocket or bag, because it does not afford the
slightest possibility for leakage. Remember also that
this pen never fails to write with the first stroke —
requires no shaking. Its ink flow is always free and
even.

Every Moore's Non-Leakable Fountain Pen carries
with it the most unconditional guarantee.

AERO CLUB PLANS

First Meeting Monday, Oct. 16.
4 O'clock at the Union.

After the successful work of last
year the Engineering Committee of
the Aero Club has decided to continue
its organization this term. The activi-
ties of the club will, however, be car-
ried along slightly different lines than
those followed up to the present.
Three thesis directly connected with
aeronautical work are now under way
and it will be the primary purpose of
the club to bring together the men
running these thesis, as well as to
have informal talks prepared on them.
The club will also ask its underclass
members to prepare similar talks that
interest in aeronautical research may
be stimulated. The gliders at the
aviation field will be at the disposal of
those members wishing to use the
gliding slope. All correspondence to
the club should be addressed to the
Aero Club Engineering Committee,
Cage.

1914 VS. SOMERVILLE.

Today, at 3 P. M., 1914 meets the
Somerville High School team in foot-
ball at Somerville. The lineup of both
teams follows:

- | | |
|---------------------|------------------------|
| 1914. | Somerville. |
| Hines, r. e. | r. e. Parks |
| Burnham, r. t. | r. t. Dearborn |
| Rouff, r. g. | r. g. Anderson, Palmer |
| Benjamin, c. | c. Cohen |
| Hardy, Moore, l. g. | l. g. York |
| Marsall, l. t. | l. t. Merrill |
| Henderson, l. e. | l. e. Townsend |
| Storke, q. b. | q. b. Whittaker |
| Wyant, l. h. b. | l. h. b. Dardis |
| Fox, r. h. b. | r. h. b. Allen |
| Van Etten, f. b. | f. b. Doane |

All of the class who intend to ac-
company and root for the team is to
meet on Rogers steps at 1.30. Sopho-
mores should have learned how much
good a little strenuous routing in the
right place does and the management
expects every Sophomore to show up
and get his voice in trim for Field
Day.
