An excellent menu is offered, and this of his experiences in Pittsburgh and 6.30 o'clock. The society is fortunate Club next Monday night at 6.30
morning. Munch; this is not to be
missing out of many a slice of his time and will
times are worth reference. The mile
with Larry Hall in the 880, and the
third should be a pretty one between
Brown's best quarter-miler, in the 440
tape in the hundred and the two
lead Fred Burns, '15, of Brown, across
the fastest men of both teams are
races of the day. The times made by
the visitors, and the fight for honor,
defeated the Providence team, last
cinders for many weeks, and the team
Kanaly has had his men grinding the
several times breaking former rec
enti team has shown up well in the
later meeting of the representatives
of amateur clubs held Wednesday
night at Harvard. They wished to
see whether the Harvard Club would use its list with that being
prepared there.

At this meeting it was proposed that the I. T. club, the Harvard club, and the New England Wireless Association enter forces. The Association has been influential in the past in securing a reasonable protection of the interests of amateurs. Its membership is made up of some of the best of the colleges. To effect the consolidation of the clubs are sent

to a meeting to be held at Young's Hotel Monday night, at 7:45. The society
H. B. Richmond, '14, J. H. Ellis, '12,
and H. A. Wilcox, '14. If the Federation is formed it is to be called out the list of
amateur stations, for it will be better
doing so with any one of its members alone. It will approach the question of wireless legislation and some of the reasons of view. Instead of opposing every attempt at restraint the Federation
will endeavor to conciliate the
needs of the amateur as well as
of the governmental stations. The members of the I. T. society feel that any proposal should first pass through the hands of an author-
ity like Dr. Pender.
The membership in this Federation will be limited in much the same way as is that of the American Asso-
ciation of Electrical Engineers. It will
receive no financial support from the
societies, but only from its members.
The clubs will retain their individual
societies, but only from its members.
for secretary of that organization.

The New England Amateur Rowing
Association will arrange for a regatta
on the Charles on July Fourth.

The clubs' officers for 1912-1913 were announced. Two of the officers of the society at
the resignation of Gerald A. L. Kennard,
who has been the Publicity man of the Association this year, and
was introduced.

Mr. J. Carty, chief engineer of the American
Telephone and Telegraph Company,
Mr. Carty started out by saying that the
duties of the engineering staff of the Telephone Company was to maintain the proper working of the
telegraph, including policing, wiring
and office equipment. In order to
necessary to standardize first the operation
of the equipment and the use of office
equipment.

Affiliated with the American Tele-
phone and Telegraph Company there is
the A. T. C. Company, the Western Union and the Western Electric Com-
pany. The Telephone Company proper and 4,774,860 stations are
2,158,000 stations directly connected with
it, besides 681,000,000 of the A. T. C. Company, 129,000,000 of the Western Electric Company, making a total of 4,774,000 stations. There are 2,158,000 miles of wire in use and 10,146,000 miles of cable. If the lead
of the American Telephone Company
of 30,000 miles is accounted for by
water, enough to fence the entire New
Eng
area of over 2,000 acres. The
lead of the American Telephone Company
of 30,000 miles is accounted for by
water, enough to fence the entire New
England area of over 2,000 acres. There are 4,719,000 miles of conduct underground, 15,900 miles

English Prizes

Amounting to $200 Are Offered
to College Men.

Another opportunity is offered for this year to college students to compete for prizes that amounts to $200.

The announcement comes from the University of Chicago through Professor

Do you believe this is the right time to introduce a new product or service? Could you provide more details on the product or service you are promoting? How does it differ from existing ones? What market demand or need does it address? What are the potential benefits to users or customers? How does the new product or service fit into your overall business strategy or goals? What is the expected timeline for its release or launch? What resources and support will you need to successfully introduce and market this new product or service? How do you plan to measure its success or impact? What feedback or input from potential users or customers will you seek or consider before finalizing the product or service? How will you address any potential challenges or obstacles in its development or launch? How does this new product or service align with your company's values or mission statement? How does it support your company's long-term objectives or goals? What developments or trends in the market or industry might influence or impact the success or viability of this new product or service?
LAST T. C. A. SPEAKER OF YEAR YESTERDAY

Dr. Mark Addresses Large Audience on "Survival of Ethically Fittest."

The last of the course of Thursday noon lectures which have been conducted by the Technology Christian Association this year was delivered by Rev. C. E. Mark, pastor of the First Boston Baptist Church. Dr. Mark spoke on the subject, "The Survival of the Ethically Fittest."

The treatment of the subject was interesting but not conclusive. Rev. Mr. Mark referred briefly to the Titanic disaster in speaking of J. E. Bruce Ismay. He believes that the people and the press of the United States have not given the White Star manager a square deal. He is legally innocent, for the ship carried the required life saving devices and boats; neither is he morally at fault if he considered the commercial aspect of the question, said the speaker. He cited this example to show that even the most sublime theoretical, "The Survival of the Ethically Fittest" was in no way an exception to the theory, "The Survival of the Fittest."

The meeting was well attended and was announced that a talk similar to that which the T. C. A. has so successfully conducted this year will be given next season.

E. E. DINNER.

(Continued from Page 1.)

of underground cable, 204,000 miles of submarine cable, 234,000 miles of pole lines, and 12,240,000 poles. The valuation of the entire system is something over $897,000,000.

Up to this time all telegraph poles have been made of timber, chestnut being almost universally used. There is a possibility that reinforced concrete may be used in the future. Although at present the timber is much more economical in regards to durability, if not in initial cost.

The ideal and the dream of the engineers of the company is to secure universal service, that is, for a man to be able to be in Boston and after a reasonable time to talk to a person in San Francisco. The best that can be done at present is to talk between New York and Denver, and there is to be a decided gain, soon, however, as by the time the Panama Canal opens the system will be one that one can communicate from New York to San Francisco, and then it is to be only to be a short step to extend this so that a line of communication may be opened between Boston and the Pacific Coast.

Mr. Carty said: "In the course of twenty years or so there will probably be a population in the United States of close on 150,000,000, and if that is to be the case there will be about 30,000,000 telephone stations. It can then be seen that even should the growth of the company continue as stated above named figures, which is not at all likely, there will be continuous work for the engineers as the entire plant must be renewed at constant intervals.

The last word that I wish to leave with you is that I can emphasize the point of the president of the company, who in an address to the engineers told them that one of the greatest assets that an engineer can have is to be acquainted with the study of ethics and business law and that if success is to be attained the mind must be broadened by the acquaintance with subjects outside of a purely technical nature.

The Architectural Intercollegiate competition drawings have been moved on to Columbia this week.

Printype
THE ONLY WRITING MACHINE IN THE WORLD THAT SUCCESSFULLY TYPE-WRITES PRINT.
17 CENTS A DAY!

The Printype Oliver Typewriter which has crowded ten years of typewriter pro-
gress into the space of months, is now
offered to the public for 17 Cents a Day!

Offered at the same price as an or-
dinary typewriter—profitable to the
owner who may have the same by
applying to G. P. Capen, Manager of the TECH and buy good articles at cut prices.

For who does not see what it means to
make the world’s best volume of type-
print as readable as books or
magazines? The Printype Oliver Typewriter is beautifully equipped with
Beauti ful Book Type, such as is used on the world’s printing presses.

The Printype is distinguished by
marvellous clearness and beauty. It does away
with all previous type, just as the
old-style outlines type imposes. Printype
puts life and style and character into
typewritten correspondence. It makes
every letter, every word, every char-
acter “as plain as print.”

The complete story of Printype has
never been told. Here it is:

The Real Story of Printype

The idea from which “Printype” sprung results from the success of our
type experts in equipping a typewriter
used in our office to write the “Oliver
Typewriter” in our famous trade-
mark type just as the name appears on
the outside of the machines and in all
Oliver publicity.

The beautiful appearance and the
marvellous clearness of the reproduction of our “tongue” style-mark type, disclosed the possibilities of equipping The Oliver Typewriter to write the entire English language in shaded letters.

We worked for years on the plan and
finally succeeded in producing, for exclu-
sive use on the Oliver Typewriter, the
marvelous shaded letters and numbers
known to the world as “Printype.”

The Public’s Verdict

That the public is overwhelmingly in
favor of Printype is impressively shown by
this fact: Already over 75 per cent of our entire
output of Oliver Typewriters are “Printy-
es.”

The people are demanding Printype in preference to the old style type.

Within a year at the present rate, 50 per cent of our output will be “Printy-
es.”

Thus The Oliver Typewriter, which
first successfully introduced visible writ-
ing, is again in the front with another
revolutionary improvement—Printype, the
type that prints print.

To Corporations: The Oliver Typewriter issued exclusively by great com-
panies in all sections of the world. Our “17-Cents-a-Day” Desk is designed to
help that large class of typewriter buyers who want the same typewriter that
serves the great corporations, but prefer the easy system of purchase.
The Mayor want The Oliver Typewriter because it stands the test of the “largest
corporations.”

Meet “Printype”—You’ll Like It’s Looks
Ask for specimen letter and “17-Cents-a-Day” Plan.

Make the acquaintance of Printype, the reigning favorite of Typewriterdom. Ask for a letter written on The Oliver Typewriter, which
will introduce you to this beautiful new type. We
will also be pleased to forward the “17-Cents-a-
Day” Plan on request. Address Sales Department,
