ANNUAL BANQUET OF CHEM. SOCIETY COMING

Election of Officers and a Good Time Planned for Tuesday Evening.

The Chemical Society is to hold its annual banquet next Tuesday night at the Copley Square Hotel. This will be the last meeting of the year, and the officers intend to make it an example of what the society can and will do next year. Not only the men who are already members of the society, but others who have not yet joined are expected to be present Tuesday night.

The entertainment committee has secured two men from Keith's circuit who will try to keep every one in the best of humor after the dinner. The committee expects to have one or perhaps two live speakers, to remind the men of the more pleasant side of the past year and the year they are starting. It is planned to make this banquet a model. A few of the newly elected officers can become acquainted with the men who have chosen the society. To the Sophomores it will afford an opportunity to become acquainted with each other and with next year's initiates, and to present the repertory of all the members in gaining for the Chemical Society its proper standing among the societies at the Institute.

Tickets for the banquet can be obtained in the laboratories from the officers and the members of the committee in charge of the banquet.

C. T. MAIN TO SPEAK.

Will Address Mechnicals On May Thirteenth.

The Mechanical Engineering Society will meet on Monday, May 13, in room 16 of the Engineering Building, Dr. Charles T. Main, '76, speak on "Commercial Electric Uses of Power Plants." The meeting will take place at 8 p.m. and it will be the last of the year. A large number of men are expected to be there.

Dr. Main is a mechanical engineer in the employ of the General Electric Company, which is engaged in power plant construction. Examples of his work are to be seen all over the country. In New England he has designed the Wood Mills in Lawrence and the River Mills in South Lawrence. In Montana he has developed water power to the extent of 50,000 horse-power, which is distributed to neighboring towns a distance of over 125 miles. President Macfarlin said that men like Dr. Main have given the Institute the reputation that it has.

Mr. Main has spoken before numerous Institute assemblies this winter, and his topics and manner of speaking have met with approval from most of his hearers. The topic that he has chosen for this talk in entirely different from any other that he has offered this year, in that it will be purely technical.

The Olympic swimming trials, which were held at the schools at Trustees' Island, June 1st, have been postponed to a later date. The schools are likely to be held just before the team starts for Sweden.

ROBERT W. WEEKS
GENERAL MANAGER

Business Manager of Tech Show to Direct Next Year's Production.

Robert W. Weeks, who has been the business manager of the Show this year, has been chosen general manager of Tech Show, 1913. Weeks comes from Washington, where he was active in the Western High School of the city. He was one of the editors of the school paper, on the ditching team and first lieutenant of the Cadet Corps.

Here at the Institute he has aided the cross-country squad in all its activities. He played on the 1912 football team, was a member of the Class Nomination Committee, ran on "Castles in Spain," and has been a member of the Finance Committee, acting as its secretary.

His work on the Show this year has met with a success that is almost unfailingly, as the final report of "Castles in Spain," about to be made public, shows. The business manager's duties this year included the selection of a council, the procuring of arrangements for the program, and the direction of all theatre and trip arrangements. The report of the Finance Committee, given in another column, indicates that Tech Show is financially the biggest activity at the Institute. With a manager who has already had so intimate an acquaintance with the show management, the other men connected with Tech Show, 1913, are confident that the success of last year's production is already assured.

Entries for the Olympic trials, for some reason of other, have come in rather slowly, and in many cases it has been necessary to send out urgent appeals to athletes to send in their blanks. The blanks have been distributed to all the prominent athlet- ees, but they must be returned before May 31, or the name that will stand no show of being entered.

It is hard to realize that $25,000 were handled by the student activities during the last year.

T. C. A. MEETING
MONDAY NOON

Work of New Freshman Advisors Committee Will Be Explained.

The Christian Association will meet on Monday to explain and discuss the work of the new committee of Freshman Advisors that will be a part of the Association's activities next year.

The meeting will be in the small room of the Union at 1.30 o'clock.

The committee has already been elected. Ralph Lynch is chairman, and about forty men have already agreed to cooperate with the Institute as the final report of the Faculty's Activities for 1912-1913, was read.

It was the opinion of the meeting that student support of athletics would be increased if the Advisory Committee would make public its monthly receipts and expenditure through the Finance Committee, and that the 1913-1914 budget be co-operative, with the approval of the committee.

The Association feels that the work of the committee is likely to increase the number of freshmen next year at the Institute. The mention of the name of a committee can more often be mentioned.

The three activities handling the largest amounts of money were Tech Show, appearing $8000 income; THE TECH, $4500, and Technique, $4000. It was expected that the accounts of all activities has been correctly kept, and that there will be an increase in the number of students shown.

A letter from Maj. Briggs, express- ing his hearty co-operation with the plan of the committee in regard to the financial and the activities' activities' activities.

LAST MEETING OF MINING SOCIETY

Professor Richards to Address Miners in Union Next Wednesday.

The Mining Engineering Society will hold its last meeting of the year in the Union at 8 o'clock, Wednesday, May 15. Professor George H. Richards, in charge of Course III, and honorary president of the society, has been assured as the speaker for the evening, and his address will be of especial interest, as the coming year will be elected, and those serving at the time will have the opportunity of congratulating him on his timely presence.

Professor Richards has yet not announced his subject, but it will undoubtedly be very interesting, as his former ones have been.

Professor Richards has been teaching in the Institute since 1899, when he was instructor in assaying and qualitative analysis. He was awarded the title of Professor of Mining Engineering and Metallurgy in 1894. He has also been prominent in the profession outside of Technology, having been president of the American Institute of Mining Engineers, and is now an honorary member of that association and of the Mining, Metallurgical and Chemical Society of South Africa.

WIRELESS MEN TO MEET.

Officers For Coming Year to Be Elected This Afternoon.

Tomorrow afternoon the Wireless Society will hold its last meeting of the year in 11 East B. The officers of the society want every member to be present at this meeting, as the coming year will be held. Instead of the regular business there will be an attempt made to talk upon the report of the delegates who went to the meeting at Young's Hotel Wednesday, and the matter of the relation of the same to some recently proposed legislation will be brought up, so that the society may express its opinion to the legislative committee of the New England Wireless Society. "According to the latest news from some societies that are doing high tension thesis work in the east, the members were told that they will not be able to use the room."

CHEM. NOMINATIONS.

Albee and Richter Candidates For President.

The Chemical Society nominations have been made and are to be voted on before next Tuesday noon. The election will be followed at the society dinner that evening.

Two nominations have been made for each position, except the Program Committee, for which three nominations have been made. The ballots read as follows:

THESIS

NECKWEAR

English Foulard Bell-Wing Ties. Each

English Foulard Reversible Four-in-Hand Ties. Each

Men's Full-Fashioned Silk Half Hose in black and plain colors. Per pair, 30c; large assortments, 50c. We have the largest assortment of Novelty Designs At. per pair $1.50 and $2.00.

SOPHIS VS FRESHMEN
TODAY AT THE FIELD

Former Has Best Record Year
But Latte Has Been Strengthened.

Tomorrow at the field, the first
battalion versus the Sophomores
will be held between the Sophomores
and Freshmen. The former have made
an excellent showing this year, and in
the games played to date they have
made a better record than the Fresh-
men. The underclassmen, however,
advocate many good reasons for their
poor showing in the earlier part of
the season, and claim that they have
made up for their lack of practice at
that time, which was due to the
bad weather.

The first base position, which has
been the weak spot on the Freshmen
team, has been filled successfully by
Moreo, and Captain McVeigh says
that the infield is now stronger than
that of any of the opponents whom
the team will be facing. The batter
points to the result of Saturday's game,
when the Freshmen defeated the
opponents, 6-2, as an indication of the
improved playing, and he says that
his team is ready to go, and that
they are a team to be feared.

The probable lineups will be as fol-
loows:

Freshmen.
S. O. Smith, 1st.;
Franklin, 3rd.;
Gardiner Morse, 2d.;
Bryant McDonald, LF.;
Duffy, SS.;
Reed, CF.;
W. H. Cottle, RF.

It is probable that the Sophomore
team will be composed of the follow-
ing:

Sophomores.
Sunny, 1st.;
Franklin, 3rd.;
Gardiner Morse, 2d.;
Bryant McDonald, LF.;
Duffy, SS.;
Reed, CF.;
W. H. Cottle, RF.

RIFLE MATCH TODAY.

The Rifle team will compete for
Intercollegiate Championship.

The rifle team will be one of the
first to shoot in the Intercollegiate
match at Waltham today, and will
probably be joined by other of the
other teams which will shoot during
the next few weeks. Considering the
excellent showing which the men
have made during the season, the
team seems to have a very good
place, for the only other teams
can compare with the Sophomores.
Good records are from the Massa-
setsctts Agricultural College and the
University of Iowa.

The Tech team will consist of
Williams, Rustell, Stewart, Haslam,
Gardon, and "Cassatt or Wardwell. The
present intercollegiate record for 100
shots is 379, and with each man shooting at his best, the
probability is that the team will exceed this score today.

CHEMICAL BALLOTS OUT.

Yesterday copies of the ballots of
the Chemical Society were distributed
to as many of the members as could
be found in the laboratory, but
ballots are to be filled out and left
as early as possible, for the ballots
will be received at the office of the
Society at the time when the ballots
are to be held. The ballots are to be sent in the mail with the
names of three ballots, provided for
the purposes of the election. The
results of the election may be received
by any one of the members of the
Society in confidence.

TECHNOLOGY WINS MEET WITH B. A. A.

In Practice Meet Tech Wins Seven Firsts and German Beats Mile Record.

Technology completely overwhelmed
B. A. A. athletes in a practice meet
sponsored by the B. A. A. last night
at 6:30 o'clock, and with the hundred
and fifty men present, the affair was
a great success.

H. E. Kebbon, President of the
B. A. A., and extensive program was
opened with the speeches of the event
with a summary of the events which
will take place in Senior Week and
in which he requested that the
men give their support. He then
summarized the events which will
take place in Senior Week and
in which he requested that the
men give their support. He then
called upon representatives of the
various committees to give the
details of the function which
will be in charge.

R. W. Hooper, chairman of the
Senior Portovtio Committee,
announced that the close of Senior
Week, during which the portfolios will be distributed.

He said that he regretted to state that due to the limited edition
of the book all of the Seniors who de-

signate to receive copies will not be able to do so,
but that all of the men who

designate to receive copies will be able to do so.

He then announced that the Baccalaureate sermon will
be given on Sunday, June 2nd, in Trinity Church, by Rev. W. F. Massey,
the Chairman of the Tech-Commit-

tee, C. H. Carpenter, of the commit-
tee in charge of the sermon, gave also

THE TECH, BOSTON, MASS., MAY 11, 1912

THE SUMMER JOB.

Among the multitude of classifications into which men of wit and wisdom have divided humanity it has been suggested that there are two kinds of men: one-half are always looking for a job, and the other half running away from it. We hope that the author of this does not seriously think that he means mathematical half; however, he may never have had a visit to Tech.

To the Seniors the question of a job is of such acute nature that we dare not run the danger of creating an explosion by any unfortunate slippary. Therefore we will allow those perplexed persons to solve their own riddles; the best advice we can offer is that they read "Life" at least once a week, to obtain pecuniary aid and valuable experience from working during the summer. But there must be a preparatory undergraduate who plan to obtain pecuniary aid and valuable experience during the summer vacation, and to them we would address our remarks.

It is well known that a varying proportion of those finding employment in the summer are solicited in practical work in preference to returning to the Institute. That is in some measure to be expected, for Tech is undeniably not the proper place for many men who are struggling through their curriculum, and it is right that if they find their studies better satisfied in regard to both present and future prospects for practical work, there is where they should stay.

To make this choice wisely, however, requires more foresight and judgment than most young men are likely to have; furthermore, as a general rule, the problem is presented in its hardest forms to the man who are not the best capable of a wise decision, and he who seeks nothing more than the skill of the artisan is likely to yield too much thorough and efficient training in practice. On the other hand, the ex-student who can grasp an idea of the working out of industrial concerns has had many years of experience. The leadership, seen in an Institute course his opportunity for the breadth of training, and the length of time spent in practical work, is there where they should stay.

The emblem of the Architectural Engineers have arrived sooner than the Technology badges. According to reports, many men prefer to continue in the practical work rather than complete their Institute course at all. The enthusiasm and sympathy that go so far toward determining our ability to push a project to the finish are often left open to be filled from their next year. Two men were recently hired by the Freshmen in the Institute, having an income of three thousand dollars and duties more than THIS TECH. As the following report shows, the Board of Directors will much to do before its work and accounts are finally closed.

RECORD OF FINANCIAL STANDING ISSUED

Business Department of Show Makes Public Sources of Profit.

Today the Tech Show, 1912, issues its report of financial standing. The Show is the largest activity, financial, in the Institute, having an income of three thousand five hundred dollars more than THIS TECH. As the following report shows, the Board of Directors will much to do before its work and accounts are finally closed.

WIRELESS MEETING.
(Continued from Page 1, Col. 4.)

should at any time misrepresented the official conditions.

The election of officers then took place. Mr. H. A. Affel was unanimously re-elected. The other officers were: H. R. Richmond, re-elected Treasurer; H. G. Gordon, Secretary; H. W. Lassen, treasurer, and P. A. Flansburg, O. C. Hall and J. C. Barnes, members of the Board of Directors. There was some discussion as to whether the Board of Directors should be elected now or at the first of next year. It was finally decided to elect three members now so that Tech would not delay in the society in October, as has been the case heretofore. In order to give the Freshmen some control of the society, one position on the board was left open to be filled from their number next fall. Two men were also voted into the society.

The smoothest tobacco

FROM Kick-off to Touch-down Velvet is pre-eminent the popular pipe preference! The two years aging in the leaf gives Velvet a maturer taste in these days. Time only can produce the smoothness and the full flavor of this tobacco, and it takes it to get rid of your old foe, the bad taste! Velvet—mellow and smooth, will unquestionably please you. All dealers. Don't hesitate!

NEW TECHNOLOGY.

Electrical Engineering Department Planning for Needs.

During Junior Prom Week Professor Lawrence and Lawes of the Electrical Engineering department made an extensive trip through many of the large institutions of learning in the East in the interests of the New Technology. They were looking for such structures which were constructed by the electrical departments of these institutions as it might be possible to incorporate in the plans for the new buildings at Cambridge.

The party visited the Rensselaer Polytechnic Institute at Troy, the school of the General Electric Company at Schenectady, Ohio State University at Columbus, the new Carnegie schools at Pittsburgh, and the University of Pittsburgh. They then went to Washington to visit the Bureau of Standards; then to Philadelphia, to the engineering department of the University of Pennsylvania, and lastly to Princeton, to see the new building of the Physics Department.

The visitors found that at most of the places where they stopped the buildings were new. At Troy, where they spent their first Sunday, the mechanical and electrical engineering departments were housed in the same building, one in each wing. The same combined use of one building was also noted at the Ohio State University. At the technical schools at Pittsburgh the engineering departments were placed near one another about a campus.

B. A. A. MEET.

(Continued from Page 1, Col. 2.)

The two dashes and the hurdle race were close and good times were made. Wilkins beat out O’Hara in the hundred by about two yards, in 10 5-5 seconds, and in the two-twenty he easily led Pratt and Foster. In the remarkable time of 22 5-5 seconds, the race was held around the last half of the lap, the straightaway being too muddy. In the other dash, the high hurdles, Huff and High came over the last hurdle together, but Huff’s sprint brought him the race in 10 3-5 seconds.

C. T. O. was organized by McLeod in the broad jump with a jump of 20 feet 8 1-2 inches, followed by Alt with a leap of 19 feet 10 1-2 inches. Osgood of B. A. A. took third.

The summary:

100-yard dash—Won by Wilkins, T.; second, O’Hara, B. A. A.; third, Russell, B. A. A. Time, 10 3-5 seconds.

120-yard hurdles—Won by Wilkins, T.; second, Bylund, T.; third, Hill, T. Time, 2 minutes 1 5-5 seconds.

100-yard dash—Won by Wilkins, T.; second, Pratt, B. A. A.; third, Foster, B. A. A. Time, 10 5-5 seconds.

440-yard dash—Won by Osgood, B. A. A.; second, Halbin, B. A. A.; third, Osgood, B. A. A. Time, 4 minutes 27 seconds.

100-yard dash—Won by McLeod, T.; second, Alt, T.; third, Foster, T. Time, 10 3-5 seconds.

The entries for the New England Intercollegiate Athletic Association meet were published today. The Technology entries are among the strongest of any of the 35 colleges entered. The outlook is bright for the way in which the track team will measure up in the B. A. A. meet tomorrow.

Due to the fact that the other colleges who have entered in the rifle tournament will not hold their trial shots for two weeks, the results of the Tech trials which will be held today are to be kept secret.
L. PINKOS, College Tailor
announces the arrival of his complete line of spring and summer suits which are now on display at his Boston and Cambridge stores.

"Please ask to see my 'BYDON SPECIAL.' Suits which I am selling at $35.00

Those suits are made of foreign wool and are strictly custom made, in my own workshop, by skilled tailors, and have all the characteristics of much higher-priced suits...."

Outdoor Work
We have a lot of it to do this summer for our these popular magazines—EVERYDOAY,
THE DELINEATOR, and ADVENTURE.
We prefer to have college men do this work.
YOU can make handsome, or sufficient, working
hours, if you can get up early and take it
off. Two or more men may work together.
