The Chemical Society held its annual banquet last night at the Copley Square Hotel. The society, which consists of Officers of the year present had finished the dinner, President Hugo Hansen announced the results of the election of officers for the coming year. C. H. Albee, '18, a member of the Dining Room Committee, is the new president; H. O. Stockman, librarian, and H. H. Hovey, secretary, and H. Regener, treasurer. For the Program Committee, two men, Mr. S. S. and W. G. Forrester, were chosen. Professor Talbot then took the opportunity to speak to the men on the changes that are being made in Course V and X. He said that both of these courses, especially that of Chemical Engineering, had grown so rapidly that he was going to shift the programs in mechanism more closely, so that its graduates can meet the increasing demand for research chemists. Another important topic of the evening will be the introduction of a compulsory course in Qualitative Analysis during the summer of the Freshman year. This course will close, in five weeks, and will be given without any extra tuition charge. Qualitative Analysis will occupy the second year, and the extra time gained will be divided among the years. This process will get more shop work, and the mechanical engineering drawing will follow the courses in mechanism more closely. During both of the terms of the fourth year a new course in Chemical Engineering will be introduced. Optics will have three terms' work in the experimental problems in general, theoretical and organic chemistry in preparation for research problems. After Professor Talbot had requested the men to change their addresses and positions, the members were entertained to a dinner at the University Club. They sang "That Dilly Dilly" and several more songs. The meeting broke up with a regular M. I. T.

The American Marathon team should be able to clean up anything in Sweden, Denmark, Norway, Sociaicists and Maddie running, the distance men of the other teams do not seem to have a poor chance of winning.

The weather. Forecast for Boston and vicinity: Wednesday fair: moderate westernly winds.

Calendar.

In Charge of S. H. Taylor, 1914.

Wednesday, May 15.

8.00—Mining Engineering Society—Union.

Thursday, May 16.

4.00—Election of Officers for Cosmpolitan Club.

3.00—Battalion Inspection—South Armory.

4.15—Cosmopolitan Club—Elections of Officers—Union.

2.00—Prize Drill—North Armory.
The drill scheduled for Wednesday, May 15, will, on account of the annual inspection, be postponed to Thursday afternoon, May 16, at 5 P.M. All first-year exercises scheduled for Thursday afternoon will be held Wednesday.

W. HUMPHREYS, Registrar.

FACULTY NOTICE.

In accordance with the rule of the Faculty thesis is to be handed to the Secretary of the Faculty not later than Monday, May 20, 1912.

My office will be open from 8:30 A.M. until 5 P.M. on that day.

A. L. MERRILL, Secretary.

FACULTY NOTICE.

Physical Laboratory—Second Year, Courses VI and VII.

Attention is called to the fact that a final record of "F" in Phys. Lab., 178, may be removed only by passing satisfactorily the final (condition) examination in Phys. Lab. Recitations, in addition to completing later work in the Laboratory as may be necessary in individual cases.

PROF. SEDGWICK BACK FROM PHILADELPHIA

Biological Department Has Many Representatives in Public Positions.

Professor William T. Sedgwick, head of the Biological department, has just returned from a meeting of the American Philosophical Society of Philadelphia, the oldest scientific association in the country and one of the most classic. His subject was "Is Typhoid Fever a Rural Disease?" Professor Sedgwick has been gathering facts that show that the country places have had a reputation far worse than belongs to them, and that it is the thickly populated places that show the most sickness.

Dr. Sedgwick also examined the house fly from the stigma of being the carrier of typhoid. He said, "It is not true that the house fly is the disseminator of typhoid fever germs, but rather, the disease is spread through the food and water supplies.

The Philadelphia meeting was essentially one of Institute men, for other authorities who discussed the subject were G. R. Taylor, '96-'01, of Scranton, Penn., and J. S. MacNutt, '08, health officer of Orange, N. J. Professor Sedgwick's department has recently furnished a number of officers of public health, appointments being made from both the undergraduate and from the graduates. Members of the department say that there are not men enough to fill all the applications the department receives. President Macaulay stated on his Western trip that Technology could supply only about half the demands of the state, and that there are not men enough to fill all the applications the department receives.

Another recent appointment from Professor Sedgwick's department is J. R. Harrington, who is to be special assistant in the department of sanitation engineers will be assistant. C. B. Wells, a graduate of Technology, '82, in the health office of Montclair, N. J., and L. M. Matthews, a special student in the department as expert in charge of a portion of the mosquito work of the same city. In the same work, L. J. Harrigan of Montclair, N. J., and L. M. Matthews.

The Philadelphia meeting was essentially one of Institute men, for other authorities who discussed the subject were G. R. Taylor, '96-'01, of Scranton, Penn., and J. S. MacNutt, '08, health officer of Orange, N. J. Professor Sedgwick's department has recently furnished a number of officers of public health, appointments being made from both the undergraduate and from the graduates. Members of the department say that there are not men enough to fill all the applications the department receives. President Macaulay stated on his Western trip that Technology could supply only about half the demands made upon it for public health.

This statement is borne out by the appointment of F. M. Osborne, now a graduate student at Tech, as assistant to the health officer of Montclair, N. J., and L. M. Matthews, a special student in the department as expert in charge of a portion of the mosquito work of the same city. In the same work, L. J. Harrigan of the Tech sanitary engineers will be assistant. C. B. Wells, a graduate of Technology, '82, in the health office of Montclair, N. J., and L. M. Matthews, a special student in the department as expert in charge of a portion of the mosquito work of the same city.

FIRST YEAR.
All first year men can obtain their Physical Training Charts by applying at the Dean's office.
A. T. BURTON
In charge of the Department of Physical Training.

PRECISION OF MEASUREMENTS.
At the request of a number of students who failed to hand in problems in Precision of Measurements at the assigned time, a second set of problems has been posted in Room 16, which if solved and handed in on or before Saturday, May 18, will remove the mark of D (deficient) which will otherwise be returned with the record on the term work and final examination.

FACULTY NOTICE.
The last exercises in the Physical Laboratories, Rooms 15 and 16, Walker, will be on Saturday, May 18. The laboratories will be open, for consultation only, between 16 and 1, Wednesday, May 22, Thursday, May 23, and Saturday, May 25. Students having reports returned for correction should, if possible, hand them back corrected before the laboratory closes. No report will be accepted after Saturday, May 25.
The new Tech button, a neat little buttonhole insignia in cardinal and gray silk, has come from Paris. Already many of these buttons are to be seen about the Institute.

No Holes for 6 months in your Hose
If there should be, you get a new pair, and all for the same price as the ones that only wear one day before they must be darned.

TECH MEN IN SHAPE
FOR BIG TRACK MEET

Good Times Expected in
Running Events—Weight Throw-
ers Lacking.

Fifteen track men left at 5:30
this morning for Springfield in
fine shape to give the best per-
former in each event a first place. The weight men of the
New Hampshire college will probably
win the meet for them, as they have
the best men in New England. Their
distance men will further help their
chances.

Although Tech will be handicapped by the lack of weight men, Coach
Kathy has developed men in the run-
ning events, who will give the fastest
runners in New England a hard race
for first place. A. Wilson, '14, will be
baffled only, but H. S. Willits, '14, can be depended on to
make a good showing. On the 200
and 300 yards.

T. H. Guething, '14, looks to be
the fastest quarter-miler en-
tered, and is expected to have
an easy time. But his old time

THETECH

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 16, 1911, at the post-office at Boston, Mass., under the Act of March 3, 1879.

Subscription, 25¢ per year. Advance service, 1¢ per copy. Subscriptions within the Boston Post Free, for the rest of the United States and Canada, must be accompanied by postage at the rate of 5¢ per copy.

Printed by Rolfe, 47 Columbus Ave.
FRIDAY, MAY 17, 1912

CO-OPERATION.

With this issue THE TECH concludes its labors for the year. In many respects it has been one of the most prosperous years of its history, and especially that the present prospects are promising for increased future prosperity and usefulness.

The prime object of the existence of THE TECH is the part it plays in unifying undergraduate interests. No other activity in the Institute enjoys such opportunities, nor is it more bound to the same obligations. We wish to thank all who have worked with us and feel the weight of our responsiblilities. But we also desire to feel the support of the student body, and we feel that it is absolutely impossible for us to fulfill our purpose in opposition to the quarters of the undergraduate men, but to cooperate in bringing about a more wholesome and a stronger graduate spirit.

It is regrettable that in the past the attitude assumed by THE TECH towards its paper may have been a fault for some of the late difficulties. We now maintain that THE TECH is determined to remove any such tendencies in order that we may be fairly useful and enjoyable to the full capacity of the Institute and enable the strongest men to work in the Student Associations, and the debating society.

EDITORIAL PRIZE.

We are glad to announce that the Delta Epilson, the Honorary Journalists' Society, will give a prize of five dollars next year for the best paper in a series of editorials published in THE TECH. We regard this as a great step in the right direction and have no doubt that it will result in a marked advance in the quality of this department of the paper.

MINERS' ELECTIONS.

Professor Richards Telis of his Trip to Mining Colleges.

Prof. Richards, head of the Department of Mining Engineering, addressed the Mining Engineer Society at its last meeting, with his Western Trip and inspection of other Mining Colleges as his subject. He said that the Technology plant could be favorably compared with that of the western college mining equipment and that it was a pleasure to many. In conclusion he emphasized the importance of mining engineers and gave many interesting anecdotes.

SMOKE POSTPONED.

The smoker of the Electrical Engineering Society, scheduled to take place in the Union at 7:30 last night has been indefinitely postponed. The junior or sophomore class appeared in due season, but the men having the smoker in charge thought that it was not enough to warrant preparing the refreshments which they had planned to serve. The music was, however, which was a pleasant hour with Tech songs and stories over the fire, provided by the society. The loyal members then departed, a little disappointed at the outcome of the evening, but the men have decided to hold another smoker in charge of the Union.

BATTALION REVIEW.

Freshmen Go Through Manoeuvre Before U. S. A. Inspecor.

Yesterday afternoon in the Armory the Freshman Battalion was reviewed by the colors of the battalion. At 3:45 the companies passed in review before the government inspector.

THE TECH NORTHFIELD DELEGATION PLANNED.

Annual Conference Will be Held On Banks of R. Connecticut in June.

This year, for the first time, the Technology Christian Association is planning to send a delegation to the Northfield Student Conference, which meets at East Northfield, Mass., from June 21 to July 1. One or two Tech men have attended past conferences, but now Tech representatives are.

The spirit of Northfield is the spirit of the open-minded and active Christian. It stands for a full development of all the powers of every college man as a means of bringing Christian religion to meet the needs of men.

The time is propitious for study, recreation, and social intercourse; the mornings and evenings are taken up entirely to recreation, baseball, tennis, swimming and walks in the hills of the Connecticut valley.

There are two regular meetings each evening, one informal and out-door, the other in the auditorium. Just as in the Conference gatherers on Round Top for the Life Work of the Morning, which the discussion is apt to look back upon as the best of a host of good things. The delegations sit facing the Connecticut valley and river just as the sun sets, and usually remain until darkness. The talks are short, and designed to be valuable in helping the men change his profession. The other evening service is in the nature of a church service with a minister and sermon, and is held in the Auditorium. Later the separate delegations often meet for their private discussions.

There are various classes, among them a series for the men who expect to occupy positions of leadership in the Student Associations, and the T. C. A. is especially hoping that some of the men here will attend so that they can carry on the work in the Institute with lively enthusiasm and successfully than will be possible otherwise.

The list of speakers includes men of national and world-wide reputations. Among them will be the Rev. D. N. Calms of Aberdeen, Robert E. Lee, A. M. Webster and Prof. H. R. Mott, of the Catholic University.

The joint session of the Tech and the T. C. A. will lead to further details of the conference to anyone interested, and Ralph B. Kennard, '13, or R. F. Bar- end, '14, will supply information about the evening meetings.

The annual conference will be held on banks of the Connecticut river in June. It stands for a full development of all the powers of every college man as a means of bringing Christian religion to meet the needs of men.
BIOLOGICAL MEETING.

Electtion of Officers—Important Amendment Adopted.

The Biological Society held a meeting in 59 Pierce, Thursday afternoon, at which officers for the coming year were elected. The matter of changing the name of the society to the Biological or the Biol-Sanitary Society was brought up before the members. After a spirited discussion, which was with difficulty kept within the bounds of parliamentary procedure, a committee was appointed to look into the matter and report upon it at the next meeting.

An amendment to elect the officers for a term of one year, instead of half a year, as heretofore, was passed. Under this amendment the officers for the ensuing year are as follows: R. M. Tolman, '13, Course XI, President; H. L. Calvert, '14, Course XI, Secretary-Treasurer; S. S. Schneider, '14, Course VII, Assistant Secretary-Treasurer. They took office immediately, and began their good work by collecting dues from all present.

BUSINESS LAW EXAMS. (Continued from Page 1, Col. 1.)

1. What is a partnership?
2. What is meant by the right of eminent domain?
3. A bought for immediate delivery an unusual amount of goods from B on 60 days' credit, and two days after the receipt of the goods made an assignment for the benefit of his creditors. An examination of A's books showed that he was insolvent and had been insolvent for some months. The term of credit not having expired B asks your advice. What should he do and what must he prove in order to succeed?
4. The purchasing of a large corporation about to buy a large quantity of goods solicited bids from different persons; two bids were exactly the same and were lower than all the other bids. Each of these two bidders informed the purchasing agent that the bids represented the lowest possible price at which they would sell, but one of the bidders offered the purchasing agent $500 as a personal present if his firm's bid was accepted. $500 paid. To whom does the $500 belong and why? If not, why not? (a) Would the owner of the painting? If so, who? If not, why not? (b) Would the owner of the painting? If so, who? If not, why not? (c) Would the owner of the painting? If so, who? If not, why not?
5. A's coachman was desirous of keeping within the statutes, but not at a regular crossing. In A liable for the injury? If so, why, and if not, why not?

ANNUAL DINNER OF K.S.

Interesting Speeches and Plans For Next Year.

The K.S. held its annual dinner last Wednesday evening in the Copley Square Hotel, about forty active and associate members being present. Professor Robert S. Williams served as toastmaster, and among the speakers were Professor Arthur A. Noyes, Professor William H. Walker, the new head of the chemical engineering course; Frederic R. Knowles, Dr. John F. Norton, Professor Warren (Continued on Page 4.)

Summer School
(Continued from Page 1.)

Summer School tools and apparatus. The exercises are highly educational; they are designed to teach the knowledge of the use of tools together with the theory and practice of the principles which underlie the Mechanical Arts. The training, discipline and practice that may be acquired in these systematic courses are truly wonderful, and conclusively prove that the best way to learn art is to begin with a regular course of instruction. The training is drawn up into a narrow compass.

Battalion Review.

Major Cole, and Cadet Major Taff, reviewing officers. Following this, each captain took his company out on the floor, and several platoons moved to the rear for inspection. After the companies had been inspected the Battalion was drawn up into a narrow compass. The exercises were then dismissed.

THE TECH DINNER.
(Continued from Page 5)

E. H. Cowles, Professor Henry Pay and Professor James F. Norris, of Simmons College. Letters of regret were read from many of the associated members who were unable to be present at the dinner.

Plans are now maturing for the formation of an Alumni association, with branches in Boston, New York and other centres where several of the K. S. men may be located. Plans are also being laid for the house which the society expects to have in Cambridge, and a register of the society, which will contain the addresses of about three hundred members, is soon to be published.
