VOL. XXXI. NO. 21

BOSTON, MASS., FRIDAY, OCTOBER 20, 1911

PRICE TWO CENTS

SECOND MEETING OF T. C. A. SUCCESSFUL

Mr. Lockrow of the Tremont Temple Brotherhood Speaks to Many Men.

The second meeting of the T. C. A. which was held in the Union yesterday was very largely attended by men of all the classes. Mr. Lockrow, the Director of the Tremont Temple Brotherhood, was the speaker, and his subject was: "What Is the Matter with the Churches?" He strayed a bit from his subject, and it might well have been called "The need that the church supplies."

He began his talk by a witty story about an old negro, upon whose tongue some one had sprinkled some quinine while he was sleeping with that member exposed. When he awoke he called for a doctor, exclaiming that he had "bust his gall." Mr. Lockrow applied it to himself, saying that anyone addressing a group of college men upon religion would need plenty of gall. He defined church, saying a church was not an institution for the development of social activities or for the dispensation of refreshments, neither was it a theological symposium. It is something to supply a certain need which every man has. Man was born a king and has been conqueror ever since, conquering everything except himself. That is what the church is for, to aid man to conquer himself.

He said college men are a great living example to all of the world and that we should strive therefore to not only benefit ourselves, but aid our fellow men.

He spoke of many men that made failures of life simply because they had "placed the emphasis of the church in the wrong place," not understanding its true mission.

Although he only talked for fifteen minutes, he spoke very much to the point. We owe our thanks to Dr. Talbot as well as to the T. C. A. for this speaker, and any man who didn't attend should redeem himself by attending every one of the future Thursday noon talks in the Union.

M. A. H. S. MEETING.

Hall and Paris Are Elected to Offices—Social Plans.

Yesterday afternoon, at 1.30, the M. A. H. S. Club held its first meeting in Room 27, Rogers, only a small percentage of the members being present. The first business to come before the meeting was the election of a member of the Executive Committee from the Freshman Class, to which office Mr. Hall was elected. As the Secretary-Treasurer had resigned it was necessary to provide another, and M. Paris, 1914, was elected to this office.

These preliminaries disposed of, the probability of holding a social meeting in the Union in the near future was discussed, and it was decided that if the men showed sufficient interest in it there would be a meeting. After a general discussion of plans the meeting adjourned at 6 o'clock.

Have you bought a razor yet? One of the kind that you buy up in the upper office of THE TECH.

MECHANICALS HOLD ROUSING DINNER

Over a Hundred Men Present and Much Enthusiasm in Evidence.

Last evening, at the Union, the Mechanical Engineering Society held its first meeting of the year with an attendance of over a hundred and twenty-five. After all the courses had been served and the cigars had been passed around the president of the society addressed the men. He first spoke of the conditions under which new men could become members, then told of the plans for the ensuing year. The usual excursions to the different plants about Boston will be taken by the men this year. These excursions last year proved exceedingly successful, as many as ninety men turning out for some of them, and it is hoped that this year they will be as successful and as interesting. Beside these excursions there will be meetings of the society, at which outside professional men will address the members.

A new idea has been started among the mechanical engineers which will be initiated on November 2. A moving picture show will be held in Huntington Hall on the evening of that date, to which the entire student body is invited. The subject of the pictures will be such as to interest all mechanical engineers. After the show the men will have a chance to discuss and ask questions.

The president then introduced the first speaker of the evening, Mr. Fred Low of New York, editor of "Power," who gave a short talk on "The Attractions of the Mechanical Engineering Field."

The second speaker was the witty Professor Riley, who entertained the men with an account of how an excursion upon an oil-carrying vessel, taken in order to study marine engines for a thesis, turned out to be an exciting and pleasant one month's vacation. The well-known Mr. Jack Armour of New York next entertained the men with an excellent series of humorous stories which caused a continual laugh for almost half an hour.

Finally Professor Miller, head of the Mechanical Engineering Department, took the floor. He spoke of the necessity of the fourth year men choosing the subject for their graduation thesis before the beginning of the second term so that they might start their research work at the very beginning of that term. He then outlined the new changes effected in the course, such as the increase in the study of the German language, the knowledge of which is most necessary for scientific men, especially mechanical engineers. He also mentioned the increase in the study of mathematics as applied to practical problems. These increases will be accompanied by a decrease in the studies which Professor Miller considers less important. The meeting then broke up with a rousing M. I. T. yell for Professor Miller.

Hann, the 1915 flyer, is a brother of the former Harvard football star.

The Freshman football team will be snappy this year but not as heavy as the 1914 bunch.

TECH NIGHT SEAT SALE PROGRESSING

Orchestra Nearly Sold Out But Freshmen Are Backward About Buying.

The Freshman class does not seem to realize that it is a custom for all the first year men to attend the theatre in a body on Field Day night. So far only about sixty seats have been sold to Freshmen, while the orchestra is already nearly sold out to the upperclassmen, and it is expected that what few seats are left will soon be taken. Perhaps it would be well to enlighten those who do not know what "Tech Night" is.

Field Day evening the two lower classes, a large number of upperclassmen and the members of the teams attend some theatre in a body. This event is known as "Tech Night." This year the Theatre Committee appointed by the Sophomore class has arranged to hold it at the Colonial Theatre, where "The Three Romeos," a musical comedy, will be the attraction. The Sophomores and upperclassmen have seats in the orchestra, and the Freshmen in the balcony. The boxes are given over to the teams. It is hoped that the Freshmen will hurry up and fill the balcony with their members.

Ticket slips, which have already been given out, will be redeemed next week in Rogers corridor for the tickets themselves.

WIRELESS MEETING.

Election of Officers and Plans for Station Installation.

The Wireless Society yesterday afternoon held a very important meeting. The first matter considered was the election of officers for this year. H. A. Affel, 1914, was elected President, and H. B. Richmond, 1914, Vice-president; J. H. Ellis, 1912, was elected Secretary to succeed P. L. Flansburg, who became Treasurer. The election of directors was postponed until the next meeting.

The proper fitting of a room for the apparatus was next considered, and a committee of the President and E. W. Mason, 1912, and S. W. Stanyon, 1914, is to report on the cost. The offer of the Departments of Physics and Electricity to loan certain apparatus as soon as suitable space is provided will be taken advantage of.

Formal monthly meetings will be held, and for these meetings prominent wireless experts will be obtained to speak. Men interested in the aims of the society and desiring to become members should immediately see one of the officers, as the best time to become a regular member is the present.

The man who put the iron washer in the peanut machine in Union corridor must be the "meanest man" in the Institute.

Do you want to write to some fair Dutchman over in Prag? Sounds like a lot of fun.

Some spunk in the Freshman football squad, when a man refuses to go out of the game with a broken collar bone. Better look out, Sophomores!!!

ARCHITECTURAL CLUB ATTENDS FIRST SMOKER

Professor Chandler Addresses An Appreciative Audience of Seventy-five Men.

The first smoker of the Architectural Society took place last evening, in 42 Pierce, and was in every way a success. It was, however, a sad occasion, for every one realized that Professor Chandler was there for the last time and was giving his last talk to the society as head of the department.

Professor Chandler's was the only talk of the evening and was most helpful and interesting. He urged the men to use great care in the selection of a firm with which to begin work after leaving school, stating that it is always wiser to work with the larger offices if possible, for although the first few years in a large office are very much of a routine sort, there is a great ultimate gain in breadth of aspect and acquaintance of possible clients. In this way a man may also gain experience in handling big buildings, progressing normally and naturally rather than having work thrust upon him for which he is not ready or which he is not capable of doing, which would be apt to be the case in a small office. He also urged the men to stay in an office for a sufficient length of time to really gain what they are there for. It is for lack of doing this very thing that is now filling the country with small architects who might have been big ones.

In telling of the advantages of European travel and study he urged the men to consider each city visited as a whole, to study the layout of buildings and the general masses in perspective rather than to bring home sketch books filled with little detail.

After the close of Professor Chandler's remarks, in which he stated that he was bringing his career as a teacher and an architect to a close, an old man, with many troubles that never happened, refreshments were served. The meeting was most interesting and enjoyable.

Friday, October 20, 1911.

1.00—Rifle Club—26 Rogers.

6.00—Civils' Dinner—Union.

Saturday, October 21, 1911.

2.00—Track Practice—Field.

3.00—Track Practice—Field.

FRIDAY, OCTOBER 20, 1911

What is the matter with the Churches? Was this question answered in your mind yesterday noon by Mr. Lockrow? Mr. Lockrow pointed out to the men why they needed the churches and why the churches needed them. It is doubtless true that at least eighty per cent. of the undergraduates pay very little attention to the religious advantages offered in the city, in fact most of them neglect them entirely, and in that way form habits which are very hard to get away from in later life. It surely cannot be a hardship to any of the men to spend an hour on each Sabbath day in some house of worship. Let us hope that the Institute men will take Mr. Lockrow's talk to heart and put a little religion into their system along with their scientific training.

If you should know of a man who became the head of his course at Tech a short ten years after his graduation do you not think that so progressive a man might be able to tell some interesting things? So do we!

Professor George Fillmore Swain, who talks at the Civil Engineering Society dinner in the Union this evening, graduated from the Institute in 1877. In 1887 he was put in full charge of the course in Civil Engineering. He has been "making good" ever since.

Enough said.

Have you ordered the Field Day Special of THE TECH? The edition will be limited. I suppose you know.

Wonder why the Freshman temporary football captain never showed up for practice. They will have a new one soon.

Did you know that the New Site Special gotten out by THE TECH beat the city newspapers by more than half an hour in getting on the

GLEE CLUB SHOWS GREAT PROMISE

Final Cut to Twenty Men Will Be Made Next Week—First Tenors Still Needed.

The Glee Club is well under way toward its final formation. At the first meeting about 70 men were present, which, according to Leader Robinson, is the largest squad ever out for the Technology Glee Club. At present there are about 37 candidates left. Next week the final cut will be made, after which the club will consist of 20 members and the leader.

Coach Lane still issues a call for first tenors, and a really good first tenor stands an excellent opportunity of making the club. With the exception of the lack of men for this part, the leader sees no reason why the club should not be one of the best for years.

At the rehearsal yesterday two songs were practiced, Scott's "Cannibal Song" and Park's "Obituaries." In a short time a final decision will be made as to the trips which the club will take.

C. E. DINNER TONIGHT.

Talk by Prof. Swain, Former Head of Department.

The Civil Engineering Society will hold its first dinner of the year tonight at 6.30 sharp in the Union. The chief speaker of the evening will be George Fillmore Swain, a graduate of Tech in the Class of 1877, and head of the Civil Engineering Department from 1887 to 1909.

Prof. Swain is at present at the head of the Civil Engineering Department of the Harvard Graduate School of Applied Science. He was the first man to be selected engineering expert by the Massachusetts Railroad Commission in 1887, was a member of the Boston Transit Commission from 1894 until the time that the commission ceased to exist, at one time Vice-President of the American Society of Civil Engineers, chairman of the Committee on Uniform Tests for Cement, a past president of the Society for the Promotion of Engineering Education and of the Boston Society of Civil Engineers, and at the present time is an active member of the National Conservation Commission, the Institution of Civil Engineers of London, and of the Society of Engineers and Architects of Hanover, Germany.

From this protracted series of facts one would be led to think that Prof. Swain was "quite some," and would make no mistake in so thinking. He is an expert in all branches of civil engineering, and beyond that has the reputation of being a most pleasing and interesting speaker. He speaks from the shoulder and his remarks are forceful and direct. The Civils expect an unprecedented attendance at this, their first dinner, for they are taking as assured the great popularity of Prof. Swain.

Hook Night has been scheduled for Friday, October 27, and this date is only nine days off. Only four entries have been made to date. It is up to the fellows to turn out stronger than this. The Entertainment Committee is willing and glad to do all in its power for those contributing to the entertainment, and it is also willing to chase up three-quarters of the stunts, but it wants at least one-fourth to be volunteered. So it is up to the fellows of the Institute to hand in their names at the Cage for the Entertainment Committee with a short description of their stunts, or see Mr. Weiss, 1913, or myself.

For Entertainment Committee,
F. H. ACHARD.

CROSS-COUNTRY TEAM ROUNDING INTO FORM

More Consistent Practice on the Part of New Men Absolutely Necessary.

The Cross-Country team is at present laboring under several disadvantages but is developing under Coach Kanaly into a well rounded team which may yet prove fast enough to uphold the reputation of Technology in this branch of sport. To do this the team must win either from Harvard or from Brown, preferably both, and then finish in second place at the big Intercollegiate race which will be held over the Country Club course in Brookline on November 25th.

At the beginning of the season, instead of finding six men of last year's team on hand, ex-Captain Watkins, Earl Ferry, Ralph Ferry, Cartwright, Van Alstine and Captain Benson, it was found that a new team had to be constructed around Earl Ferry, Cartwright and Benson.

To date, Cartwright has been below form, due to an attack of acute indigestion, and Benson has suffered several injuries which have slowed him up to a great extent. It is vitally necessary, therefore, that the new men come out and work, come out more regularly than they have as yet. The new men in fact are almost without exception the men who have reported irregularly for practice. This feature must be overcome absolutely. A training table has been established which is in every way satisfactory, but practically half of the candidates do not eat there at all.

Earl Ferry is now acting captain, and he finds the greatest difficulty in getting regular practice from the men, yet the opposite should be the case. Cross-Country at Technology is a major sport, and we stand high among colleges in it, but to maintain it we must have more interest in the work than certain men are displaying.

In the squad there are enough capable runners to develop an evenly balanced team which would prove an eye-opener to most every college in the country if they gave Coach Kanaly and Acting Captain Ferry a chance, therefore let every man start right now and report regularly.

It is not yet too late to develop a team with which we can retain the custom of beating Harvard, and can then revenge last year's defeat at the hands of Brown.

No one man can do it all. It requires the hearty interest and co-operation of the whole squad. Here is a chance for several new men to get the coveted "T," so report Monday and give the Coach to understand you are out for business, and then live up to it.

AERO CLUB MEETING.

The first meeting of the Aero Club was held Monday afternoon in the Union at 4.15, with only a small number present. The original purpose of the club has now somewhat altered, and it is now for underclassmen who desire experimental work.

The plans for this year include a meeting every two weeks which will be addressed either by a member of the club or a prominent engineer on some aeronautical subject. At the next meeting H. G. Thomas will talk on the "Stability of Aeroplanes."

Mr. Caldwell was elected secretary of the club unanimously. The dues of the club were decided on as \$1.00, an additional \$1.00 to be charged as an initiation fee. The next meeting of the club will be held in the Union one week from next Monday, and men interested in its aims are invited to attend.

Some class to those Soph posters, but we shouldn't think that Arlo Bates would like them very well.
