SECOND MEETING OF T. C. A. SUCCESSFUL

Mr. Lockrow of the Tremont Temple Brotherhood speaks to Many Men.

The second meeting of the T. C. A. which was held in the Union yesterday was very largely attended by men of all the classes. Mr. Lockrow, the Director of the Tremont Temple Brotherhood, was the speaker, and his subject was: "What is the Matter with the Churches?" He strayed a bit from his subject, and it might well have been called "The need that new men could become members, thus held in the T. C. A.

He began his talk by a witty story about a young negro, upon whose former name one but God knows. When asked while he was sleeping with his mouth open he answered: "I was sleeping with my tongue some one had sprinkled some quinine while he was sleeping with his mouth open and now I have been called "The need that new men could become members," which outside professional men will be useful in aiding the Freshmen in the first term so that they might start their work in the second term in a proper way.

These preliminaries disposed of, the Rev. Mr. Lockrow, of the Union and the near corner was chosen as the place for the meeting, and it was decided that if the meeting had lasted one hour interest in it there would be a good attendance. After the meeting the plans the meeting adjourned at 4 o'clock.

MECHANICALS HOLD ROUSING DINNER

Over a Hundred Men Present and Much Enthusiasm in Evidence.

Late afternoon, at the Union, the Mechanic Engineering Society held its first meeting of the year with an attendance of over a hundred and twenty-five. After all the business had been passed the charts had been cleared and the president of the society addressed the men. He first spoke of the conditions under which new members could be accepted, and then of the plans for the ensuing year. The matter of increasing the different sizes about Boston will be taken up by the men this year. These excursions last year proved exceedingly successful, as many as ninety men turned out for some of them, and it is hoped that this year they will be even more successful. Inside those excursions there will be a picture show held in Huntington Hall on the evening of that date, to which outside professional men will be welcome.

The second speaker was the witty Professor Miller, who gave a short talk on "The Universities and the Picture." He pointed out that the universities and the picture the men will have a chance to discuss and ask questions.

Finally Professor Miller, head of the Mechanical Engineering Department, took the floor. He spoke of the necessity of the fourth year men choosing the subject for their graduation thesis before the beginning of the second term so that they might start their research work at the very beginning of that term. He then outlined the new changes effected in the course, such as the increase in the number of the larger number of courses and the knowledge of which is necessary for admission to professional schools. He also mentioned the increase in the number of the larger number of courses and the knowledge of which is necessary for admission to professional schools. He also mentioned the increase in the day men one of the largest and most important.

Finally the meeting adjourned.

The Freshman class does not seem to realize that it is a custom for all the first year men to attend the Theatre in a box on Field Night. So far only about sixty students have been sold to Fresmen, while the orchestra is already nearly sold out to the upperclassmen, and it is expected that most few seats are left will soon be taken. Perhaps it would be well in euilibrium those who do not know what "Tech Night" is.

Field Day is over and the two classes who are to organize this grand event are beginning to prepare for the end. The dormitories are getting ready for the event, and it is hoped that the Freshmen will have a chance to discuss and ask questions.

The Sophomore and upperclassmen have seats in the orchestra, and the Freshmen in the balcony. The box seats are given over to the women. It is hoped that the Freshmen will hurry up and fill the boxes with their members.

The C.T.C., which already has about a hundred members, will meet next week in a gymnasium for the tickets themselves.

ARCHITECTURAL CLUB ATTENDS FIRST SMOKER

Professor Chandler Addresses An Appreciative Audience of Seventy-five Men.

The first smoker of the Architectural Society took place last evening, in 42 Pierce, and was in every way bold and enjoyable. He regretted the men to newsmen that in the selection of a man with which to begin work after leaving school, was always to be given first to whom he was not ready or who is not capable of doing, as this is not the case in a small office. He also hoped that they would not yet have work thrust upon him for which he is not ready or which he is not capable of doing, as this is not the case in a small office. He also hoped that they would not yet have work thrust upon him for which he is not ready or which he is not capable of doing, as this is not the case in a small office. He also hoped that they would not yet have work thrust upon him for which he is not ready or which he is not capable of doing, as this is not the case in a small office. He also hoped that they would not yet have work thrust upon him for which he is not ready or which he is not capable of doing, as this is not the case in a small office. The C.T.C., which already has about a hundred members, will meet next week in a gymnasium for the tickets themselves.
GLEE CLUB SHOWS GREAT PROMISE

Final Cut to Twenty Men Will Be Made Next Week—First Tenors Still Needed.

The Glee Club is well under way toward its final formation. At the first meeting about seven men were present, which, according to President Robinson, is the largest crowd out for the Tech Glee Club. At present there are about 27 candidates left. Next week the final cut will be made, after which the club will consist of 20 members and the leader.

Coach Lace still issues a call for first tenors, and a really good first tenor stands an excellent opportunity of making the club. With the exception of the luck of men for this past, the leader sees no reason why the club should not be one of the best for years.

At the rehearsal yesterday two songs were practiced, Scott's "Can-"nical Song" and Park's "Observations," in a short time a final decision will be made as to the trip which the club will take.

Friday, October 20, 1911

What is the matter with the Church? Was this question an
excited in your mind yesterday by
Mr. Lockrow? Mr. Lockrow
pointed out to the men why they
attended the churches and why the
churches needed them. It is doubly
true that at least eighty per cent of
the undergraduates pay very little
attention to the religious advantages
offered in the church. In fact most of
them neglect them entirely, and in
that way form habits which are very
hard to get away from in later life.
It surely cannot be a hardship to any
churches, which, according to Leader
Robinson, is the largest squad ever out for the Tech Glee Club. At present there are about 27 candidates left. Next week the final cut will be made, after which the club will consist of 20 members and the leader.

Coach Lace still issues a call for first tenors, and a really good first tenor stands an excellent opportunity of making the club. With the exception of the luck of men for this past, the leader sees no reason why the club should not be one of the best for years.

C. E. DINNER TONIGHT.

Talk by Prof. Swain, Former Head of Department.

The Civil Engineering Society will hold its first dinner of the year
night at 6:30 sharp in the Union. The
chief speaker of the evening will be
George Fillmore Swain, a graduate of Tech in the Class of 1877, and head of the Civil Engineering Department from 1892 to 1909.

Prof. Swain is present at the
head of the Civil Engineering Depart-
ment of the Harrod Graduate
School of Applied Science. He was the
first man to be selected engineering expert
by the Massachusetts Railroad Com-
mission in 1887, was a member of the
Boston Transl Union for over a
quarter of a century, and head of the
Civil Engineering Department from 1892 to 1909.

CROSS-COUNTRY TEAM ROUNDED INTO FORM

More Consistent Practice on the Part of New Men Absolutely Necessary.

The Cross-Country team is in present form under several disadvantages last week developing under Coach Kanaly into a well-rounded team which may yet prove fast enough to uphold the reputation of Technology in this branch of sport. To do this the team must win either from Harvard or from Brown, preferably both, and then finish in second place at the big intercollegiate race which will be held over the Country Club course in Brookline on November 29th.

At the beginning of the season, instead of finding six men of last year's team on hand, ex-Captain Watkins, Earl Perry, Ralph Perry, Cartwright, Van Alstine and Captain Benson, it was found that a new team had to be constructed around Earl Perry, Cartwright and Benson.

To date, Cartwright has been below form, due to an attack of acute indigestion and illness has suffered several injuries which have slowed him up to a great extent. It is vitally necessary, therefore, that the new men come out and work, and come out more regularly than they have yet. The new men in fact are almost without exception the men who have reported irregularly for practice. This feature must be overcome absolutely.

A training table has been established which is in every way satisfactory, but practically half of the candidates do not eat there at all.

Earl Perry is now acting captain, and he finds the greatest difficulty in getting regular practice from the men, yet the opposite is the case. Cross-Country at Technology is a major sport, and we stand high among colleges in it, but to maintain it must be more interest in the work than certain men are displaying.

In the squad there are enough capable runners to develop an evenly balanced team which would prove an eye-opener to most every college in the country if they can get Coach Kanaly and Acting Captain Perry a chance, therefore let every man start right now and report regularly.

It is not yet too late to develop a team with which we can compete with the custom of beating Harvard, and can then return next year's defeat at the hands of Brown.

No one man can do it all. It requires the hearty interest and cooperation of the whole squad. Here is a chance for several new men to get the coveted "T," so report Monday and give the Coach to understand you are out for business, and then live up to it.

AERO CLUB MEETING.

The first meeting of the A.E.O. Club was held Monday afternoon in the Union at 4:15, with only a small number present. The original purpose of the club has now somewhat altered, and it is now for underclassmen who desire experimental work.

The plans for this year include a "Stability of Aeronautics" lecture by Mr. Caldwell, and a meeting in the "Stability of Airplanes" lecture by Mr. Thomas, will take the place of the meeting of the club on the "Stability of Airplanes." The meeting of the club will be held at 4:30 in the Union, and from next Monday on it will meet every week.

A meeting of the club will be held on the Union at 4:30 next Monday for all interested in its aims and invited to attend.

Some classes to those Roph posters, but we shouldn't think that Ailer fans would like them very well.
