STAR WORSHIP AND ASTRAL THEOLOGY
Series of Lectures by Professor Cumont Attended by Students
A very interesting and instructive series of lectures is being given in Huntington Hall. They are a course of the Lowell Institute, and take place Monday and Thursday beginning at 11 A.M.

In one lecture the lecturer traced with a clever touch the recent researches concerning Astrology and their historic and antiquarian interest, especially noticing Nature's center. He then went on to prove that the Pan Hellenians were fundamentally wrong, as the Astral religion, prevalent at that time, made it clear that scientific ideas were at the end of their development with Gnosticism. The sketch of Chaldean Astrology and its longevity, considering the lack of very ancient evidences of that age and its influence upon religion, ended an extremely interesting talk.

TUG-OF-WAR TEAMS.
Both Squads Progressing Rapidly; Two More Men.
For the last two weeks the two tug-of-war teams have been working up, preparing themselves for the final clash of the season. This has been preceded every day regardless of the weather conditions.

The number of men reporting each day has hovered about the same mark for our squad, bringing in the neighborhood of thirty. This has been only a fair showing, and the coaches are crying for more men. They need more to make an efficient and proper working team. The other squad will be full by next week.

The Freshmen have answered in the most positive way to the call for a team that has brought fine results. Their enthusiasm and the desire to keep the Season alive is evident, and their desire to win is not concealed. This is seen in their unceasing efforts to improve.

Both teams have passed the preliminary stage. The exercises have been tried and practiced, and the Freshmen show a very small team that has won four matches and has not lost a single point in all games played. The two squads stand against each other, with much to be expected and already accomplished.

FRESHMEN LOCKERS.
One of the things most of the Freshmen have forgotten to do in the first week that they have been at the Institute is important and should be allowed to go any longer. There is no more an 'old timer' than "Walter" Johnson, the general keeper of the Gymnasium, who can help a locker when the time comes for the first year gymnastm corps.

For the benefit of the men who have not yet, or who has not yet to get a locker from the Gym, take it over to the Ham and get it staked there for the possession of the locker rental.

The Freshman track team has received a great boost in the form of three new men in the shape of Willey, and R. L. Fletchley, the B. A. champions.

SNEEZE.
Sneezing patients look even better than last year in the quarter-mile.

MECHANICALS TO GIVE MOVING PICTURES.
Saturday, November 2, the Mechanics will present in Huntington Hall a moving picture show. This is not an innovation on the Lowell Institute, 3 but it was so successful the first time that it promises to be the best in its class. Take it or leave it.

MECHANICALS TO GIVE MOVING PICTURES.
Illustrations of Auto Manufacture to be Held in Huntington Hall.

This will be a well-marked up lecture as the company gave the same thing last year for the students at the University of Illinois and it was so successful and as well received by the students that the company is appropriating a certain fund for its repetition before the remaining technical colleges of the country. The Institute has been assured of the first place for this, and the Mechanics are in fortunate to be the ones to have charge.

The fact that they are sending two men with an entirely new outfit to New York for one night only shows the interest in a lecture like this. A great number of the students have been informed that they can make all necessary arrangements.

The show will begin at 7.30, and the engineer in the field will have at least ten minutes to settle the audience and the mechanics will introduce the first lecture with a short day Friday, and it being a subject of great interest it will be to all the people the Mechanics are confident that it will be to all the people.

What does anybody think THE TUG-OF-WAR TEAM needs to make all necessary arrangements?

FALL MEET POSTPONED.
The Fall Meet which was postponed last Saturday on account of the rain will be held this coming Saturday. The same conditions that prevailed last week will hold till next week. All handers—will be the same, and the meetings at 1:00 P.M. It is not necessary for those who have reservations to do so again.

What are you going to do this Friday night?

CALENDAR.

TUESDAY, October 24, 1911.
4.00—Curry Club—Field.
6.00—Auto Club—Railroad Club.
11:00—1911 Football—Gym.
7:00—Baseball—Yale.
8.00—Track—Field.

THURSDAY, October 26, 1911.
4.00—C. L. A. Golf—Field.
8.00—Track—Field.
THE TECH
Published daily, except Sunday, during the college year for students at the Massachusetts Institute of Technology.

EDITORIAL.

The New York Herald Magazine Section made a feature story of the Army, Navy, and other Institute Track Coaches who claim New England as their home. The list consists of the coaches at the eight leading colleges of the country, headed by "Mr. Murphy of Pennsylvania," who cast his ballot in Southfield, Mass. Also included in the list were the coaches at Harvard, Yale, Cornell, Princeton, Columbia, Syracuse and M. I. T. One of the last two is the coach of the Harvard 1911 team, who yesterday morning the Herald says: "Kanaly's precocious ability is a bit of a distance runner, and he was up to a few years ago one of America's best. As one of the younger members of the 'T'5m,' Kanaly is rapidly growing in power." We fully agree with the Herald that Kanaly was one of America's best several years ago, but why did they not continue the story and add that at the present time that "Frank" is one of the world's best, as was evidenced by the clever running done by him across the country this summer? Possibly the New York papers have not yet received news of the sports in England during the summer, and will add to their inaccurate article when they are cognizant of the actual state of conditions.

The men in the lower classes seem to have awakened to the fact at last that tug-of-war is one of the events of Field Day, and yesterday afternoon both squads were much larger than on previous occasions. The Class of 1911 was defeated on two successive Field Days, when on either occasion a war between tug-of-war squad would have given them the day. The Class of 1912 lost the Field Day two years ago because of the inability of the top-of-war team to hold out during the third long pull. We hope that both classes see the necessity of putting in some good hard practice on this event, as it is very possible that the winner will carry off the honors.

TECHNIQUE GRINDS.

There is still an excellent chance to begin handing in "grinds." Very few have been handed to date. A free copy of Technique will be given to the man who hands in the greatest number. This applies particularly to the Freshmen, because the most humorous things usually happen in the Freshman classes.

COMMUNICATION.

1914.

In order to have the ballots printed on time it is necessary that nominations for Sophomore Class Officers be submitted in promptness. The closes on Thursday of this week, therefore as many as possible of the nominations should be in by Wednesday.

Nominations must be signed by ten Sophomores and handed in at the Cope.

THEODOR KRUZEG.

FRESHMEN! GYMNASIUM!

The sporting goods representative who took orders for Freshmen Gym suits on Wednesday, October 18, will reach out as many as possible of the nominations for Sophomore Class Officers be submitted in promptness. The closes on Thursday of this week, therefore as many as possible of the nominations should be in by Wednesday.

Nominations must be signed by ten Sophomores and handed in at the Cope.

GROUND BROKEN FOR NEW SUMMER SCHOOL

Electricity and Modern Sanitation to Feature Civil Camp at Gardner Lake.

President MacLaurin announces the breaking of ground for the Summer Engineering Camp at Gardner Lake, Maine, near East Machias. The work of laying the concrete foundations will probably be pretty well finished before the snow flies. The wooden permanent buildings will be erected as early as possible in the spring, and the whole camp will be ready for the summer course of the civil engineers which will come early in August.

The camp grounds, which have been purchased and presented to the Institute by an anonymous friend, include more than a square mile of land at Crosby's Point, with an outlook on the water on both sides, and more than three miles of shore line.

The plans call for three wooden buildings on the bluff facing the main lake. They will be located in the center of a level piece one hundred and forty feet above sea level. The central building is to be the administration building. On the left, as one faces the group, is the dining room, and on the right the dining hall and kitchen.

The administration building, or Chalet, has for a central feature the living room, thirty feet square, rising to the roof, and the bath, an ample open fireplace with a massive chimney, whose broad front will afford room for the Tech act andrapid applause. It will be fitted with a heavy oak mantelpiece on rounded stone truckles. The room will be a comfortable and cheery meeting place for the students and professors alike.

Flanking the great central hall in the Casino are rooms for the instructing staff and the physician and his hand quarter. The upper story will contain two class rooms, twenty-one by thirty feet, lighted by great dormer windows, twelve feet wide, and in addition there will be three sleeping rooms in the front part of the house. The main dining room has room for one hundred and sixty-eight covers, and will have a first-class kitchen equipment to do all necessary cooking.

The draughting room is fifty-six by thirty feet, with twenty-four tables, affording seventy-two working places. The room is high studded and fully half the wall space will be devoted to windows, so that there will be an abundance of light.

The students will live in tents, arranged in a curve along the crest of the hill in a curve along the crest of the hill, about fifty of which will be arranged in an abundance of light.

windows, so that there will be an abundance of light.
