PRICE TWO CENTS

PROF. REISNER TALKS ON EGYPTIAN CUSTOMS

Very Interesting Lecture Given
On Relics of Ancient
Dynasties.

Yesterday afternoon, at 5 P. M., in Huntington Hall, Professor George A. Reisner delivered the fourth of a series of eight lectures on Egypt. The lectures began on October 17 and are held Tuesday and Friday afternoons, from 4 to 5 o'clock P. M.

Professor Reisner, who, with a party, has been traveling through Egypt and the Oriental countries, spoke of the tribes and customs of that country.

The country, in the period of the dynasties, was divided into tribes of the Northern and Southern Kingdoms. The superiority of weapons among the tribes of the North led to a union of the confederates of the two kingdoms.

In the first dynasty and during the pre-dynastic age there were no signs for letters or syllables, but during the later dynasties a method of writing was invented which was used by the administrators and courts.

Professor Reisner illustrated his lecture by a very interesting and instructive series of slides showing the carved pottery and stone vessels which were very skillfully decorated by the natives for the benefit of the royal family.

During the course of time the natives developed art, architecture and agriculture. The architecture of today has been developed from the designs of the mud-brick houses which were inhabited by the Egyptians during the early dynasties.

An interesting series of photographs which were thrown upon the screen illustrated the manner in which the early Egyptians buried their dead. The bodies were laid in large mud-brick vaults, sometimes in copper caskets, surrounded by a number of stone vessels and pottery which were skillfully decorated, and by means of some event gave the date of burial. These stone vessels were carved with pictures of animals and court scenes. Copper chisels and axes, besides numerous flint stones, sometimes encased in gold and finely decorated, were also found in the old cemeteries. These relics carry us back to 4500 B. C.

Professor Reisner will give his next lecture at 5 P. M. next Tuesday in Huntington Hall. The doors are open at 4.30 P. M. The admission to these lectures is free and tickets may be obtained at the Registrar's office.

ELECTRICALS' TRIP.

Visit New Installations of Cambridge Electric Light Co.

Yesterday noon, at 1.30, the Electrical Society left the Institute on its first excursion this season. They were accompanied by several of the professors and instructors of the electrical courses, and by some students of steam engineering who were interested in the trip.

They visited the plant of the Cambridge Electric Light and Power Company, where some new types of ap-

BOSTON SOCIETY OF ARCHITECTS' BANQUET

Professor Chandler Guest of
Honor—Recipient of Many
Gifts.

The banquet given by the Boston Society of Architects in honor of Professor Chandler was indeed a great success. A great many of Professor Chandler's most intimate friends were there, and representatives of almost every organization with which he has ever been associated in a professional way, each bringing nothing but praise for his great accomplishment and gratitude for his help and ever-ready interest in every good work.

At the end of the excellent banquet President R. Clifton Sturgis, of the Boston Society of Architects, spoke most encouragingly of the great future of Technology in every branch of science and particularly of what the architectural department is doing toward improving general architectural standards in this country. He then introduced President Maclaurin, who, with characteristic wit and earnestness, outlined Professor Chandler's career at the Institute. He said that Professor Chandler had come to Technology as early as 1869 as an assistant to Professor Ware, had then resigned, and after practicing for over twenty years had returned as head of the department with just the proper combination of qualities for becoming the exceedingly successful teacher that he now is, for with his practical experience, coupled with the desire to instill into all with whom he came in contact a true appreciation of architecture, he was able to dignify the department and make it at once a school with a purpose. President Maclaurin said that Professor Chandler had indeed made a symphony concert of the department in the harmony that had prevailed for the years that he had charge there.

In the absence of President Lowell of Harvard, who is in Chicago, Professor Warren of the Harvard Architectural School, brought good wishes and congratulations to Professor Chandler on behalf of Harvard University as a whole, and more particularly the department of architecture, for his excellent work in Technology and for maintaining its architectural department in the front rank of architectural schools.

President Sturgis then called upon Professor Lared of the Pennsylvania Architectural School, who praised Professor Chandler in the highest terms. He stated that he wished to express his personal gratitude to him for his great help in aiding and advising the department in Pennsylvania, which, he said, considers Technology as a sort of older sister of all architectural schools in the country, and is most significant of its leader.

Mr. Robert S. Peabody was the next speaker, and as a most intimate friend and colleague of Professor Chandler, told most interesting of his early life. He told of his bravery as a soldier in the Civil War, and of his big-heartedness and many qualities which endeared him to all of his schoolmates and business associates. He said that he had known Professor Chandler under many conditions and in many

TRIP THROUGH SPAIN WELL RECEIVED

Seth K. Humphrey's Talk Starts
Union Entertainments
For Year.

Before a small gathering in the Union Mr. Humphrey, of the Technology Club, last night gave a talk on a "Trip Through Spain." This talk was substituted for Hook Night, which had been called off because of insufficient entries, and Mr. Humphrey was very kind to come under the circumstances. The talk was illustrated with slides from photographs taken by Mr. Humphrey on his last trip.

The talk began with a short discussion of the history of the country, the speaker pointing out the various influences that had affected its architecture—the Romans, Visigoths and Mohammedan Moors. The landing from the voyage over, during which a stop was made at the Azores, was at Gibraltar. The peculiar neutral zone surrounding the fortress was spoken of. The itinerary led from Gibraltar to the quaint town of Ronda, where the characteristics of the architecture were pointed out, and the picturesque houses and people described. He spoke also of the customs of the people and said that they were generally a long way behind the time. Their use of burros and humans as pack carriers was evidenced, and the primitive railway systems, whose speeds vary from an excursion for flower pickers to 25 miles per hour down grade, were shown.

The tour then went on to Seville, where the cathedral was of the greatest importance, and there several photos of the royal family were shown, though unfortunately none of the King. Cordova was the next point of interest, and it was in connection with this city that pictures of the gypsy quarters were shown, as well as one of the milk wagons in use—that is, the burros and dirty cans used as such. In Madrid he showed pictures of the palace, and spoke of its wonderful art gallery that surpasses that of all cities with the possible exception of St. Petersburg.

The last stop was made in Grenada, the city of most interest to tourists, for here is the wonderful and beautiful Alhambra, the ancient palace of the Moors. Many views of the interiors of this enchanting building were shown, and especially its very ornate interior decoration was pointed out, it being essentially barbaric in kind, since there was no plain spaces to relieve the eye.

The speaker closed his remarks by a comparison of the meteoric growth and progress of the United States with the slow development of Spain, but ventured to predict that Spain might exist for many more centuries. The audience was very appreciative of the speaker's efforts, and the meeting broke up at 9 o'clock.

FRESHMAN TRACK TEAM.

As all the fellows of the Freshman track squad did not remain Thursday after the time trials, the election for captain was postponed. It will be held in the Union Monday, at 1 o'clock, and all the members of the squad are requested to be present.

ALL READY FOR THE FALL HANDICAP MEET

Long Entry List and Liberal
Handicaps Insures an
Interesting Meet.

The Fall Handicap Meet, which was postponed last Saturday, will be held at the athletic field this afternoon at 2.30 o'clock. The same handicaps as made for last week will hold today. Handicaps not announced will be given on the Field. All men should be on the Field or in the dressing rooms at the scheduled time so that the events will not be delayed.

A number of new entries have been received since the books were reopened, and now the various events are well filled up. The other men after learning their handicaps have worked all the harder to overcome any faults and to increase their speed. On account of this the races may be expected to furnish more excitement than a week ago. The times made by the Freshmen in the relay trials seem to indicate that they will have a few struggles all to themselves. Entries will be received on the Field before the meet, and Coach Kanaly desires all men picked for the relay teams or taking outdoor gymnasium work to enter in one or more events.

1914 FOOTBALL TODAY.

The Sophomore football team is scheduled to play the Lawrence Academy eleven this afternoon at Groton. The fast Groton team was defeated by the Academy men, so that the latter will probably be a tough proposition. The Sophs, however, hope to make at least a good showing if they cannot win. The following men have been picked out for the squad:

Backs—Bryant, Fox, Merrill, Sterke, Williams.

Ends—Henderson, Morrison, Mackintee, Hines.

Tackles—Brown, Burnham, Duffield, Shaw, Crowell.

Guards—Hardy, Ruoff, Moore.

Centers—Morgan, Benjamin.

The train leaves the North Station at 12.30.

COURSE I NEWS.

There are now more students in the fourth year graduate work of Course I than in any previous year in the history of the course at the Institute. This increase in numbers has made it necessary to tear down Professor Russell's office to give more room to the drawing rooms, a new office being built in the Museum for Professor Russell.

Professor Spofford's new book on civil engineering, entitled "The Theory of Structures," is now in general use.

Typewriters are humming in the Technique office.

CALENDAR.

Saturday, October 28, 1911.

2.30—Fall Handicap Meet.

Brown vs. Tech, Tennis—Longwood.

Tuesday, October 31, 1911.

4.15—Mandolin Club Rehearsal.

THIS AFTERNOON! TECH FIELD! FALL MEET!

 Associates—T. L. Davis, 1913.
 E. W. Mann, 1914.

The person who cheated the peanut slot machine out of a cent has evidently taken to heart the advice offered in this column, together with that of the Bursar in a later issue, in regard to returning his ill-gotten gains. In an interview with the slot machine we find that he redeemed the iron washer which he used in lieu of good money, not only at the face value of the goods received, but tenfold.

We feel elated to think that possibly he has taken a turn for the good in life, due entirely to a petty incident bringing in only an iron washer and a slot machine. We hope that there will never be any further occasion to bring up the matter of dishonesty among the students at the Institute.

The word and honor of every man who links his name with that of the Institute of Technology should be absolutely irreproachable.

The attendance of only a dozen or so at Mr. Humphrey's talk last evening is truly a disgrace to the name of Technology. Mr. Humphrey is a man of well known ability in discourse on foreign travel, and his acceptance of the Entertainment Committee's request to come when Hook Night had become an impossibility because of lack of interest bespeaks his deep feeling for the students and he deserved better appreciation than was shown.

If the students do not care to have any entertainments at all they should say so at once, and not seriously inconvenience any more persons by asking them to address a "Technology gathering." The committee declares that unless more men desire entertainments and will attend them there is no need of its existence. Its stand is well taken.

The Cross-Country Team will need the support of every undergraduate next Friday, when they will run against Harvard. It will mean a good deal to the members of the team to have the cheers of their classmates behind them when they are taking the final sprint around the track at the Field.

The team as chosen the day before yesterday seems to be remarkably

well balanced, even more so than last year, when five Tech men finished in consecutive order. This year there seems to be a little talent of the degree which might be called stars, but it is hoped that by keeping the men well bunched that the team work will overcome any possible advantage Harvard may have because of individual stars.

Let every one turn out at the Field with his voice in the best condition and "Cheer for Victory."

TUG-OF-WAR TEAMS.

Both Managers Report Not Enough Men Out.

Yesterday afternoon the Sophomore Tug-of-War Team held their election for captain and counter. The following men were nominated for the former position: Assel, Busby, Gould, Haywood and Owen. Two votes were necessary, and resulted finally in the election of Assel. McEwen was elected counter. During the past week between thirty and forty men have been coming out to practice. Manager Fiske desires to see more men cut, especially heavy men, as the number is not large enough to pick a team from at present. Judging from the weighing-in yesterday, a good many positions on the Sophomore team will have to be filled by light men. Dwyer, 1913, and Ferguson, 1912, have charge of the coaching and are doing good work with the material they have, which is not as abundant as the Freshman material. Manager Fiske desires to announce that all those who did not have their strength test should report at the Gym today between 12 and 1 o'clock and take it.

A large number of Freshmen have reported for practice this week, but more are needed. As a provisional team will not be picked until Tuesday, there is still a chance for anyone to obtain a position on the team if they will come out and work for it.

Two Juniors, Crowell and Carlson, volunteered to coach the team, and have been getting good work out of the men. They also make the same announcement as the Sophomore coaches—more men wanted. Lately the Freshmen have been having more men out than 1913, and judging from their ability to work hard, it looks pretty black for 1914. Elections will be held for captain and counter. It is up to everyone to turn out for the Tug-of-War Team, since this event often decides Field Day.

MANDOLIN CLUB.

Thursday Rehearsals to Be Held in Lowell Building.

There was some confusion on Thursday, owing to the fact that the Mandolin Club rehearsal was held in 26 L instead of the Union, and as a result nearly one-half of the members were late. In order to avoid a repetition of this all members should take note of the fact that in the future the Tuesday rehearsals will be held in the Union and Thursday rehearsals in 26 L. This change has been made necessary by the fact that the Glee Club practices in the Union on Thursday, and the two clubs conflict.

ELECTRICALS' TRIP.

Continued on page 1

paratus were of especial interest. The beauty of the new and up-to-date switch board attracted considerable admiration. There were other recent constructions and modern improvements which made the trip instructive as well as interesting.

The interest of the engineers centered about a new low pressure steam turbine which has been recently installed, and about the water tube boilers which are provided with an ingenious firing device.

The party returned to Boston hungry and tired but nevertheless satisfied that their afternoon had been well spent.

ARCHITECTS' BANQUET

Continued from page 1

places, but that he had never known him to be anything but a modest, helpful, manly man. In closing he said that it is great to be modest; it is great to be a good architect; it is great to have made the Institute the foremost architectural school in the country, and to be sought after by all for advice, but it is far greater to have a big and overpowering love for all mankind.

On account of his poor health Professor Despradelle was unable to attend the banquet, and in his absence Mr. Howard Walker expressed the deep regret of the Faculty of the architectural department on the departure of the man who had so long been their most earnest guide and helpful associate. Mr. Walker then read and presented him with an illuminated expression of regret on vellum, and later read a letter from Professor Despradelle which had nothing but praise for the work of Professor Chandler.

Representing the graduates, J. H. Parker sang and presented a song written by Stanley Parker, which contained words of earnest appreciation for what he had done for them.

President Harkness of the Technology Architectural Society then stated that the undergraduates would most of all miss Professor Chandler's kind and helpful advice, and as a slight token of their respect and esteem presented a loving cup.

Prof. Chandler was by this time almost overcome and stated that he thought all of these things that were being said must belong to some other person, for they were wholly unknown to him. It appeared, however, that only a start had been made as to the honors that were to come, for after Mr. A. W. Longfellow read an address praising him as a business associate and chief, and Mr. Arthur G. Everett of the Boston Society of Architects had read a paper of praise and gratitude, Mr. Newhall, president of the Boston Architectural Club, announced that he had been made an honorary member of the club, an honor that has only been given by this club six times before. President Sturgis then presented him with a watch, the gift of the Boston Society of Architects, and stated that a medal had been founded for fifth year students in Technology architectural department in the name of Francis W. Chandler.

Professor Chandler was pleased beyond all measure by these many honors, but stated again that he could not see how he deserved so much. He was most pleased with the fifth year scholars, and said that it would mean much to him to know that the fifth year men would now have this competitive prize.

The banquet was adjourned with a rousing "We are happy" by the Tech men present.

A small Peck but full measure.

The Sophomore relay trials were very slow, and the Freshmen have a good chance to take this event.

Tennis team is all picked, but matches don't seem to be all played off.

Bartolich is bigger this year than ever; two companies have nearly 100 men and no spectators yet!

Considerable noise at the Freshman class meeting Thursday. Notice Hand and Foot?

Have you heard of the "Amen Corner" in the Holland House, New York, where all the "old coves" get together and talk as they would be expected to, and talk as they would be expected to? A new innovation, look for the "Amen Corner" in the Union Dining Room.

Velvet
THE SMOOTHEST TOBACCO

EVERY freshman wants to start right. Put him next to Velvet—the college smoke. It's the real, time-matured

tobacco with a smooth, delightful flavor—a taste that never palls on you—doesn't burn hot.

Velvet is superb tobacco—aged two years—an ideal smoke. Today—tomorrow—whenever you do smoke it, that day will bring you a new version of pipe pleasure. You will become a Velveterian. Just keep it in mind. At all dealers.
