WIRELESS SOCIETY
CHOSES DIRECTORS

Reject Proposal to Unite With Electricale—New Members Are Elected.

The second meeting of the Wireless Society this term was held in the manager's room yesterday afternoon.

The president of the society, occupied the chair at the first business brought up before the meeting was the election of new members.

J. A. Stimson, H. G. Hurd, R. C. Mason, and B. E. Kent were chosen. After the election the question of providing a roof for the account of the Electrical Engineering Laboratory, given over to the use of the society, was taken up.

The formation of a committee to answer very well, but which, unfortunately, the committee cannot dispense with, it is expected, however, that a donation or a loan will be received from some electrical companies soon.

C. L. Cogswell, F. C. Proctor, O. C. Hall, A. T. Stimson, H. W. Lamson, H. L. Loom and C. H. Burnham were proposed for membership and unanimously accepted. There was some talk of uniting the Wireless Society with the Inland Radio Society, but it was not favorably received in the club. The Physics Department has a number of members who think the proposition well, and unfortunate, the committee cannot dispense with it. A donation or a loan will probably be held on the last Wednesday of this month.

WRESTLING TEAM

Freshmen Can Substitute For Normal Regular Gymnasium Team.

For the first time the dean has agreed to allow freshmen who desire to wrestle instead of the regular gymnasium team. To make the substitution it will be necessary that a man report at the Gym between two and three each Wednesday for one hour's work.

Every member interested should go over the rules of the club at the time of registering, and make his own meetings.

SEES GAME FROM AIR.

Dr. Tufts, Dr. H. A. Nickerson, and Dr. Harwood, members of the department of physical education, were able to see the Harvard-Pennsylvania game from the aeroplanes.

The aeroplanes were owned by the University, and were flown over by members of the department.

The aeroplanes were flown over the stadium at 2 o'clock, and it was noted that the Harvard team was leading at that time.

The men on the aeroplanes were able to see the game from above, and were enabled to see the players and the game at close range.

The aeroplanes were flown over the stadium at 2 o'clock, and it was noted that the Harvard team was leading at that time.

The men on the aeroplanes were able to see the game from above, and were enabled to see the players and the game at close range.

Tenth Annual Meeting of the Wireless Society, Special arrangements for an hour's work each time.

To improve the educational welfare of the society, a number of additional members were elected, and the meeting was adjourned.

The meeting adjourned.

KONGRESSIONALIST CENSUS.

Congregationalists Have a Big Lead With a Fourth Of Whole List.

The tabulation of the census cards, signed early in the year for the T. C. A.; for while membership in the Assembly has already been connected with church membership, a larger number of those who have not signed census cards and who have not attended the meetings in the last few weeks than a minute lead in the original Congregational Church in the days when liberal theology began to drive out the narrow ways of thinking.

The main list in order of numbers follows:

Congregational, 273; Episcopal, 117; Baptist, 86; Unitarian, 76; Baptist, 76; Methodist, 64; Presbyterinan, 61; Lutheran, 29; Christian Science, 16; Catholic, 7; Hellenic, 2; Christian, 2; Adventists, 2; Others, 15; Swedenborgians, 1; Menloans 1.

As approximately 100 men still have not signed, and those who have not signed, it is hoped that a donation or a loan will be given to the society, to those who have not signed, in the form of a donation or a loan.

The organizers believe that the recent census cards of these men, who have not signed, and who have not attended the meetings in the last few weeks, will be glad to furnish cards to any member.

If complete returns were possible, it is expected that all friends of the body would actually find his place in the T. C. A.
Juniors Hold Class Dinner Tonight

All-Star Program Arranged by the Committee — Big Eats.

The 1913 Class dinner, to be held in the Union this evening, promises to be one of the most successful and most enjoyable of the season. The price of the tickets is thirty-five cents, but the program arranged for this evening's entertainments warrants this expenditure and more. Tickets may be obtained from the committee and certain members of the Class of 1913.

In addition to the previously arranged program for the evening a entertainment Dean Burton has consented to be present, along with Professor Dewey and Besser Rand. Rehearsals for this concert will play simultaneously during the dinner. A quartet composed of members of the class will render several selections in their best style. Together with a variety of other items we hope everyone will wish for a better evening's entertainment.

Howard Colton has looked after this end, and as the committee in charge, has prepared one of his best menus for the occasion.

1913 Class Dinner
Cream of Tomato and Soufe, Queen Olives, Rose Radishes.
Boiled Chicken and Ham, Green Beans, String Beans, Pomegranate, Pomegranate, Roast Beef, Champignons.
Basket of Cheese, Assorted Fancy Cakes.

To the Editor of THE TECH:

Dear Sir:

According to an Act of Congress in the last session, vacancies in the Corps of Engineers of the United States Army remaining after the announcement of a certain student body, number of graduates of the Military Academy will be filled each year by competitive examination of graduates of engineering courses and approved technical schools. This is the first time the Corps of Engineers has ever been opened to any but graduates of the Military Academy. The first examination to fill quite a number of vacancies will be held January 12th, 1913. There are no special requirements that probably only a partial number of them will be filled this year, and that the chances will be good for several years without considering new vacancies. I have received from the Chief of Engineers the papers relating to these examinations and will be pleased to give any information to anyone interested.

The case of the present under-graduate body will be eligible for the cooling examination it may interest some of the graduates of new years who can be reached by THE TECH as well as those who have not yet been reached by THE TECH as well as those who have not yet been reached by the committee.

Very respectfully,

Edwin T. Cole
Major U. S. Army.

WINCHESTER

.351 CALIBER
Self-Loading Rifle.

As its name indicates, this rifle reloads itself, the recoil of the exploded cartridge doing the work. This places the complete control of the rifle under the trigger finger, which permits rapid shooting with great ease and accuracy. The .351 Caliber High-Power cartridge has tremendous killing power, making it heavy enough for the largest game.

Catalogue fully describing this rifle, "The Gun that Shoots Through Steel," sent on request.
