OUTLINES OF PROPOSED COURSE II CHANGES

Leaves Hours of Shop and Options
Time Given to More General Topics.

Yesterday the Mechanical Engineering Department sent to the Faculty its proposed list of changes in Course II. Professor Miller outlined these changes at the Junior dinner last evening. They are to be considered as generalizations, for as he explained the matter, comparatively few remain to be made, and the full value of their money, and that they should be friendly with the students have made with the Board, and told students that they should be friendly with their professors if they expect to get the full value of their money, and consult the Faculty members on any problems that may arise.

Larry Harlow was introduced, and he spoke of the Future, of Techniques. He gave a great outline of the progress of the book this year, and expressed on behalf of the business, the faculty, and the class, the thanks of the class to the committee.

At the close of the talk the class sang the old song of "Billy". The topaz song made a great hit, and the applause subsided President Peck introduced Professor Dewey. He began with a few humorous stories, and then turned to the serious part of his address.

He said that when the problem of introducing team play into modern work was set, the men were not yet in the prime of their individualism. The men who are now are the men who must go forth and develop this new spirit, and yet at the same time maintain their individuality. He extended a cordial invitation to all Tech men to make the Institute a home in New Hampshire, and closed with an appeal for the men not to concern

Mr. Gideon talks on ITALIAN VILLAS

Holds the Interest of a Large Audience Last Evening in Public Library

Mr. Benjamin Gideon, Instructor in Art, delivered his last lecture of the year in the auditorium of the Public Library, and held the interest of a large audience. The subject, "Italian Villas and Their Gardens," was ably presented and made the lecture very interesting.

Mr. Gideon has made a special study of the subject of Italian Villas, and although the material was partially taken from modern buildings, which were so well illustrated. The course of lectures, which were well illustrated. The course of lectures, which were well illustrated. The course of lectures, which were well illustrated. The course of lectures, which were well illustrated.
THE TECH

TALK IN UNION
BY DR. TUPPER

Many Learn About "The Great American Amalgamating Company."

A very impressive talk was given yesterday noon in the Union. The speaker was Dr. George W. Tupper, and his subject was "The Great American Amalgamating Company." The novel title drew many who had not heard Dr. Tupper before, and those who had heard him the last time that he was here needed no other inducement than his brilliant personality.

Although he spoke only ten minutes, he presented a subject which few people think about and which everyone should interest himself. He said that twenty-five years ago the people that came to America were all of the English-speaking races and understood our habits and the way that the American people live, so at that time there was no need for "The Amalgamating Company." Now from three to four millions of foreigners come over every year. They don't understand our language or our habits, in the country from which they come they have lived in an unoccupied territory where each man has plenty of room to live and breathe. When they come over here, owing to high rent and to the fact that they can't speak the language, they can't make enough money to enjoy the facilities of their wealthier brothers. Therefore they are as we find them today, in the thirty tenements of the North and West Ends. The unsanitary conditions that sometimes exist are neutralized in a measure by the fact that in their native country if any diseases were in existence among the people of one section they would not spread to other parts of the towns because the people live so much in the open air. When they come here and live in crowded areas, they lose sight of this fact, so it gives some work for the American Amalgamating Company. He concluded by calling the volunteers from the student body for work among the immigrants.

MECHANIC ARTS MEETING

Entertainment and Refreshments for Members in Union.

This evening is the first big night for the members of the Mechanic Arts Club, as they will hold a social meeting in the Union, with some entertainments and refreshments. The main affair will be a card party, to the winner of which will be awarded a Technology pennant. The club is determined to start on a policy of social activity this year in order to stimulate the waning interest of men from that preparatory school, and this is the first step to be taken. At this meeting the men will discuss the possibility of taking a section of the Thanksgiving football game, so that Tech may be together. The game is the big annual game with Dorchester High and it is usually more interesting for the M. A. H. Alumni in Tech to go in a body. Since the seats are usually all taken early in the season, the men must see one of the officials and sign up immediately.

BUSINESS DEPARTMENT

There will be a meeting of all men interested in the Business Department of THE TECH this afternoon at 5 o'clock. Everybody connected with the department should make it a point to be present at this time, as well as any who would like to get in. The time has been changed so that more of the men may come.

You'll need that
HEAVY OVERCOAT

For the Football Game
Order-Now and Don't Be Disappointed

C. F. HOVEY & CO.
BOSTON, MASS.

Men's Highest Grade Underwear
White and Natural Merino Shirts and Drawers in Fall and Winter Weights.

$1.00 per garment upward

Rooms 14 and 15 Telephone, Oxford 109
C. E. TRIP TODAY TO BERGER FACTORY

Two Parties Will Leave, at Two and Three O’clock, for Milton.

The first trip of the year to be taken by the Civil Engineering men will take place this afternoon. The complete works of the C. L. Berger & Sons, instrument manufacturers, will be inspected by the members of the C. E. Society, and several of the experienced experts of the company have consented to guide the men through the factory and give lectures on the mechanics and processes.

Two parties will make the trip, the first to leave for the works at 2 o’clock, under the direction of President Powell and A. W. Verence, 1912. A. G. Hanney, 1918, and J. J. Strachan, 1913, will show a second party through at 3 o’clock.

The factory may be reached by taking an Ashmont and Milton car to Williams street and walking north to No. 37. It is expected that a large number will take advantage of this opportunity to see how instruments are manufactured.

TECH SHOW BOOKS.

From the present indications Tech Show, 1912, is going to outrival anything ever before attempted in this line by the students of the Institute, and indeed bids fair to be the best college show ever presented in this part of the country. More interest has been shown so far than ever before, and the management feels encouraged by the fact that considerably more books were submitted than was expected. Three manually good ones have been chosen from the many turned in, and these will be thoroughly examined by Coach Sturges. The final selection will be announced as soon as possible.

The work in all departments of the Show is well under way, and if the present hearty interest shown by the undergraduates continues the Show will be one long to be remembered.

TECH SHOW CONTINUED FROM PAGE 1

give all and any plenty of work. The idea will be, however, to give the men work which shall take a certain amount of time each week so that they will not be allowed to let the Show interfere with the Institute work.

JUNIOR DINNER

Continued from page 1

trate their abilities, but to fraternize with all men who crossed their path. After the singing of the parody on “Solomon Levi” Buser Rand rose to speak. He promptly got back at Professor Dewey for his selections, much to the amusement of his audience. The burden of his talk was the new site and the Civil Engineering Summer School. The blue prints he showed of both places were much appreciated.

The Bursar’s talk the men joined in the “Dear Old M.I.T.” and the “Rolia Song,” when the meeting broke up, about 9:30.

Congratulations, Capt. Earl Ferry!

Sounds cold when you hear these hockey men talking about practice.

Have you got your tickets for the Winter Concert yet? They say they are going fast.

Here’s hoping that the basketball men make good with a vengeance. There are a lot out.

What do you think of our line of articles on the foreign question? Opportunities in Latin America, etc.

FRESHMEN!!

WANTED—Fifty Freshmen to come out for the non-scholarship players.

The meeting of the Theatrical Committee will be held in the Business Department of Tech Show, Nov. 12. All candidates apply at the Show Office, Room 6, Union, any day between 1:00 and 2:00 P. M. (37-40)

GENTLEMEN—I call to your attention that I will pay more for cast-off clothing than any one in my line of business. A trial will convince you. Send postcard to Max Keiser, 3 Bow street, or telephone Cambridge, Mass., 302. (21-366)

E. E. SOCIETY.

Meeting Postponed until Friday, November 15th.

The meeting of the Electrical Engineering Society, which had been previously scheduled for next Thursday, has been postponed to Friday, November 17.

The Society has secured for this occasion Mr. David Bader, the New Great Manager of the General Electric Company, who will give a lecture on the modern types of electric vehicles. He will first give us an idea of the different types, and then the different methods of installation which is to be taken up in detail. Each of these two divisions of the subject will be illustrated by stereopticon slides. In addition to the different types and installations of the vehicles, the usual uses to which they are put will be fully taken up, and interesting abuses of this point also being illustrated.

The meeting and lecture will appear illustrated by stereopticon slides. In addition to the different types and installations of the vehicles, the usual uses to which they are put will be fully taken up, and interesting abuses of this point also being illustrated.

Further announcements of plans for this meeting and lecture will appear later.
