THE TECH

VOL. XXXI. NO. 45
BOSTON, MASS., WEDNESDAY, NOVEMBER 15, 1911
PRICE TWO CENTS

ALL OUT FOR CROSS COUNTRY SEND-OFF

Every Tech Man Expected to Be At Back Bay Station At 10 O'clock

The cross-country team will leave back bay station at 10 o'clock. Not many of us can go to the race, but everybody can go to the station to wish them luck. Every fellow in the Institute is expected to be at back bay station at 10 o'clock. Put yourself out a little and let the team know that all Tech is behind them and that you have a lot of encouragement out of it. If you hate to be there you can get to the station in time and still get back for the next rendition.

A bunch of men are planning to go to Providence on the 10.3 train. Everybody who is going to go along and help to drive out the brownies at the finish.

The team will set off at a lot since the Harvard race and is now in the heat of condition. The order of finish of the Tech men is hard to pick, but the order of the Harvard race is likely to be the following: Edgerton, Wilde, S. Marceau will surely finish with the leaders. C. A. Cary, N. F. Yre and R. D. Bonney are chosen for the next place, but any of the other men could possibly beat them. Whatever the order at the finish may be, it is pretty certain that the first man from the Institute will be a member of the Tech team.

The results of the race will be reported to THE TECH by special report and passed on the bulletin board.

THOUSAND MEN.

"If I Were a Student Again," in the Union Thursday

Thursday noon the Christian Association will hold its weekly meeting in the Union. While the Engineering school of Boston University will speak on a subject that ought to be interesting to every engineering student, "If I Were a Student Again." Instead of being one he has reached a position that is certainly the goal of many an enthusiastic school man, and one from which he can view student affairs closely and authoritatively.

No one with a keen sense of the interesting is likely to miss this. A man of Gifford Hall fame for his connection with the University, but is at the same time one of the very pleasant and most interesting of student public speakers in Boston. A week ago last Sunday he was the principal speaker at the meeting of the Gideon Society in Tremont Temple where a large number of students of every hotel in Boston were to be placed in their guests' rooms. This week, Thursday, he will address the congregation in Edward Everett Hale's Church just before he comes here to speak to us in the Union at 1:30.

His address at Boston University was a very able one that attracted much favorable comment, and the whole idea of the trip is one of the greatest events of the kind that has occurred in the Engineering school. Many Tech men must have seen the procession in Copley square that was a part of the trip.

The meeting is sure to be a successful one. It is not conceivable that the Association wants a good crowd—"A Thousand Men in the Union.

FIRST YEAR BALLOT WELL FILLED AT LAST

Many Names Coming in at Last Minute Show Wide Range

After having run up to the last day with only two nomination papers on the ballot and a few last minute arrivals, it is a ballot that seems to be truly representative of the class, at least so far as a ballot on the very best that will be constitute.

Of the candidates for President, the file of THE TECH show that Hilgott has been temporary chairman of the class; Lynch was the tug-of-war captain and Barry was on the relay team.

For Vice-President, we find that Halley was the captain of the winning class football team, and Place was the tug-of-war captain. A temporary treasurer, seems to be interested in his position, for he is a classmate of the motion picture team. The file of THE TECH shows that he is a candidate for the position of Clerk.

Out of the Institute Committee there are eighty men for the Executive Committee. Of these, Mr. Belcher is trying for THE TECH, Crowell played a large part on the football team, and Livermore was on the tug-of-war team, as was Sabin.

The results of the Executive Committee are Murdock, member and manager of the football team, and Woodbridge, who was on the class Theatre Committee. Scully, the man who became famous in class history as quarter-back of the team, is running for the Athletic Association, as is Curtiss of the relay team, and MacNoy of the tug-of-war team. Svends and another tug-of-war man, is in the position of Clerk.

The ballots read as follows:

For President—C. B. Hilgott, H. P. Lofts, T. M. Ellis, W. Belcher, and T. J. Lofts.

For Vice-President—Howard Welthis, Henry Barstow, Will Willard, H. S. James, and R. A. Howe.

For Secretary—R. R. Lord, T. N. Tower, J. E. Williams, F. F. Paffo, J. A. Tobey, and P. M. Huggins.

For Treasurer—M. H. Dolton, A. W. Parker and W. W. Wall.

For Clerk—C. C. Coleman, W. A. Swind and G. R. Freeman.

The Junior chemists are finding out what is contained in Bitty kates.

THE JUNIOR CHEMISTS

The aeronauts are a live crowd with their phlegmatic theory and the Academy of Science is the phlegmatic theory, by the way.

There has been much a demand for students during the vacations by the leading reding plants, with which the companies will gladly pay for the special skill of the student. That there has been no necessity of holding a summer school in mining.

NATURAL RESOURCES MUST BE CONSERVED

Many Hear Fine Talk by Pres. Van Hise of University of Wisconsin.

A large audience was entertained in Huntington Hall last night by a discourse about the President of Wisconsin University, C. R. Van Hise. He covered the subject both ably and coherently that one felt keenly the desperate situation we must face. Before the committee that is appointed to conserve the resources of our country, the departments of agriculture and conservation. Natural resources are what we have to give to the world. The committee has been appointed to conserve our resources.

For the first time in history the Governors of all the States and the most prominent scientific men of the country were called together at Washington by President Roosevelt, for the purpose of getting a comprehensive understanding of the extent of our resources and the proper courses to be taken to conserve our resources.

The states are being conserving so much, that we are facing a great situation and that we have to rise to the occasion. The report that has come to us is that there is a great need of the measures that are being taken, so that we may save our resources for the future.

The speech was given by a man who is a great statesman and who has done much for the country. He is a man who has been able to give us the proper course to be taken in order to save our resources. He has been a great statesman and has done much for the country. He is a man who has been able to give us the proper course to be taken in order to save our resources.

The speech was given by a man who is a great statesman and who has done much for the country. He is a man who has been able to give us the proper course to be taken in order to save our resources.

The Electrical Engineering Society

are arranging for a meeting on next

Friday evening, when there will be

given a talk on Electrical Vehicles.
This topic is of common interest,
and there is always the question
presented whether or not it will replace
the gasoline car in general use. Mr.
H. F. Thomson, of the E. E. depart-
ment, has been performing research
work on electric vehicles since the
beginning of this year, and has per-
haps have something to say on this
subject as well as the speaker of the
evening.

Mr. Thomson’s work was
made possible through a fund placed
at the disposal of the Institute for
that purpose by the “Electrical
Company.”

Everyone is invited to this meeting,
and it is hoped that a large number
of students will avail themselves of
the opportunity to get the results of
the latest research on this sub-
ject.

About one thousand feet of
moving pictures will be available, and
this will be a good inducement to
many of the members.

THE TECH, BOSTON, MASS., NOVEMBER 16, 1911
EXTRA PRACTICE FOR HOCKEY MEN TONIGHT

Preparation For First Game Is Showing Possibilities of Strong Team.

From the present outlook Tech will be represented by a strong team on the ice this winter. The squad is made up of many veterans, and with a great wealth of other material among the candidates there ought to be no trouble in developing a well-balanced team. Practice is well under way and the men are beginning to come up to form. The practice at the Arena is being supplemented by other work, assembling the men in the Union and instructing them through blackboard talks. The men who are going to adopt a style of play which was used with considerable success by a crack hockey team at last fall’s big game, will be very important practices because the first game is so close at hand, and every man should be sure and show up on both days.

The hockey team will play their first game Saturday evening, November 28, with the B. A. A. hockey team, and it is expected to be a hard game. It will, however, not only be a source of good practice, but also of instruction, for the B. A. A. uses practically the same style of play that Tech will adopt this winter. For this reason Captain Strobe wishes to have every man do his best on Friday afternoon at 5 o'clock and another on Thursday at 6 o'clock. These are very important practices because the first game is so close at hand, and every man should be sure and show up on both days.

The practice yesterday afternoon was very fast and the squad made an excellent showing, so that things are very promising for a good team. There are many strong men on the squad, including Ranney, Burhust, Storke, who were on last year’s team; Stuchler, who played on the Dartmouth hockey team, and Lange, Eichhorn and Yeomans, who made up the last year’s squad. The following men are appearing for practice: Wood, Ward, Hall, Fletcher, Foster, Barker, Wood, Lane, Whittlessey, Thomas, Rogers, Casalin, Sculli, Sculli, Davidson, Coffin, Lieb, Alexander, Hopkins.

SOCOR GAINS FAVOR.

Cornell Makes Game an Inter-Collegiate Sport.

Soccer has been gaining great popularity in the East and has recently been made an intercollegiate activity at Cornell. Here the game will be made particularly attractive this year by assigning two men from the Varsity squad to each college to act as coaches. With the experience of the Varsity men to aid them in their training it is expected that the improvement in the knowledge of the finer points of the game will result in a much greater interest in it.

Being a sport designed especially to interest those who have not the inclination or the physical stamina necessary for the more strenuous games, none of the Varsity men will be allowed to play in the intercollegiate matches. It is planned to make it a non-specialized sport, one that can be played and enjoyed by the ordinary student. The attitude which soccer was received at Cornell was so favorable as to surprise its most ardent adherents.

COMMUNICATION.
To the Editor of THE TECH: I am not a Harvard man, and therefore "my withers are unwrung," neither by the result of the game Saturday or the report in Monday's issue of THE TECH. I have under- stood, however, that THE TECH claims to be non-partisan, and I there- fore take the liberty to remark that it is a violation of neutrality to publish an article so full of strong per- sonal feeling. I may add that it is hardly politic, as the Harvard men who are readers of THE TECH are, and have a right to be, much offended by the loss of the report.

Very truly,
Arlo Bates.
