BOSTON TAKES FAST HOKEY GAME EASILY

"Doc" Sloan Scores Goals For Tech—Leslie and Hornblower Show Speed.

By a score of 6-2 the Boston Athletic Association registered a clean victory over the Varityck Hokey Team at the Arena Saturday night in a game that was fast and full of sensational developments from the start. Stucklen directed his team with an ability that made them one of the best of the dozen teams that were entered in the tournament. Stucklen has always been a first-class player and it was evident to all who watched the game that he was the star of the tournament.

The forwards showed lots of speed but were not as well on the defense as their opponents, and their few attempts at attack were not successful. However, the team was still able to hold their own in the game and to keep the ball away from their opponents. The TECH men were not as successful in this game as in the previous one, but they were still able to hold their own. The TECH men showed lots of speed and were able to get the ball away from the Boston team. The defense of the TECH men was not as good as that of the Boston team, but they were still able to hold their own in the game.

The game was played in a very fast-paced manner and was full of excitement. It was a great game to watch and was enjoyed by all who were present. The TECH men were able to hold their own in the game and were still able to score a goal, which was a nice surprise. The game was a great success and was enjoyed by all who were present. It was a great game to watch and was enjoyed by all who were present. The game was a great success and was enjoyed by all who were present.
CHINESE ENTERTAIN.

(Continued from Page 1.)

We will be on hand to take part in the next Chinese entertainment, which will probably come off next February.

T. P. Hei also won a great deal of applause by stories of his first experiences in this country. When Mr. Hei first came to this country it was in summer time, and he was wearing high shoes. Dealing a pair of low ones, he and his friend went to a shoe store in New York city. Mr. Hei could not find a pair to fit him, and the salesman, taking advantage of his ignorance of American fashions, sold him a pair of women's shoes with high heels. His appearance on Broadway resulted in a great deal of amusement to those present in the theater.

Slicers of Chinese scenery and maps explaining the situation in China were next shown, including pictures of the temples, bridges and the interior and exterior of the imperial palace.

Chinese songs were sung by Mr. Z. Y. Chow, and Mr. P. T. Teh held the closest attention of the audience with Chinese music, which was sung and played before the modern music was introduced into China.

The music and art of Mr. E. S. Li, the famous Chinese shuttle-cock game was also very interesting.

Chinese refreshments were served after the entertainment, and the revue broke up at a late hour. The entertainment was thoroughly enjoyed by all present, and everyone was of the opinion that it was the finest entertainment ever given in the Institute. In fact, it was so highly successful that the Chinese night in February is anxiously awaited by all.

HARVARD BEATS GREEN.

(Continued from Page 1.)

Bertram shows her utmost strength on the Harvard line and it never wavered; she used every thing possible in the line of play in the last few minutes of play without avail, and yet it seemed often that a turn of the luck toward her team could give them the game and a well-earned victory. She gave poor protection to her kickers but was down the field very much faster under the fall. Her ends, Captain Oakey and Dana, gave a fire exhibition of what to do and how to do it. She showed a greater ability, if it were possible, to follow the fall, and lost the game only because of the fact that in the defence, which is so absolutely necessary under the present rules, Harvard had a shade the better and also what proved to be very important also, Harvard showed more adaptability, more readiness to take advantage of the opportunities that were presented.

ENGLISH HIGH SCHOOL.

All Institute men who are old English High men are asked to be present at a meeting of the former class Club in the Union Wednesday afternoon this week. The meeting will be at 4 o'clock sharp, and should take but a few minutes if the men are on time.

There is some very important business to come up, and the following should make it a particular point to be present.

Macular Parker Company

CORRECT CLOTHES FOR STUDENTS made in our workshops on the premises and ready for immediate use. SUITS from $25.

FINE FURNISHING GOODS

400 WASHINGTON STREET

Special Announcement. Due to the removal of my Boston store to 336 Washington Street, I am offering a discount of 20 per cent. on all orders received from now on until the middle of December—a great opportunity for any one who appreciates good clothes. All my wools are of foreign texture.

Style and workmanship guaranteed of the best.

RAPID PROGRESS ON BIG KEOKUK DAM

New Features in Mounting the Wheels and Methods of Handling Water.

The developments of the enormous water power system on the Mississippi River, known as the Keokuk Dam, have been very rapid in the last few weeks, and the dam is rapidly beginning to show some of the features which will mark it for all time as the foremost work of one complete construction. This is the development which was very slightly touched upon by Diamond paper of his talk before the Civil Engineering Society a few weeks ago.

The sheer size of the works in the spillway section have been completed, and the rock foundation for the big power house has been cut and placed at a point where the concrete tubes for the water control can be put in place at a few at a time. These division tubes are arranged to take water at all points of periphery of the wheels so that the pressure and the resulting wear may be equalised in so far as possible. The water is to be admitted through four main entrance gates and then carried to the wheels through the new tubes.

The wheels themselves are to be vertical, fifteen and a half feet in diameter, and will be equipped with two sets of bearings, which will be interchangeable. One set will be of the standard roller type and the other will consist of discs running in, and separated by one-inch concrete expansion joints. The larger ribs of these two sets are again more than 7000 pounds when they are completed, of which one-third will be taken for the runners.

The velocity of the water has been set at seven feet per second at entrance, leaving the wheel with a nineteen-foot velocity, and being slowed down to about four feet per second when it finally leaves the house through the draft tubes.

The draft tubes, some of which are already being put in position, are cast in forty-eight-foot sections, and separate into two sets of beams, which are arranged to supply water at all points of the cross section. These division tubes for water control can be put in place, and when it finally leaves the house will consist of discs running in, and separated by one-inch concrete expansion joints. The larger ribs of these two sets are again more than 7000 pounds when they are completed, of which one-third will be taken for the runners.
