CHEMICAL SOCIETY TO MEET THIS EVENING.

Course XI, Petition to be Voted on—Lecture on Asbestos.

This evening the Chemical Society will hold its meeting in Room 22, Walker Building, and not, as was originally scheduled, in the Union.

One of the principal matters to come before the meeting at that time will be the petition which has been submitted by members of Course XI. Up to this time the Sanitary Engineers have had no society of their own, and, since their course is more or less closely allied with the courses in Civil and Chemical Engineering, and also with those in Chemistry and Biology, there has been considerable doubt as to whether the line so closely followed by the Sanitary Engineers might most properly be eligible. A petition has been recently submitted by members of this course for admission to the Chemical Society. The society will vote on this petition this evening.

When the business of the meeting has been disposed of, Professor Norton will give a lecture on "Some Refractory Materials" as a special reference to asbestos board as such a substitute. Professor Norton has made a special study of asbestos.

Saturday, November 22, 1911.

At the end of the lecture refreshments will be served. The enthusiasm displayed at the meeting held last Wednesday evening promises well for tonight's lecture. Resummary the page, 25 Walker, instead of the Union.

E. H. S. MEN TO MEET.

Sophomore Practice Begun—Freshmen Will Start Soon.

Last Friday the Sophomores held their first regular basketball practice. Opinions of the men who witnessed the practice are divided, and it appears that some must show up as the first regular game is less than a month off. Each player on last year's freshman team was on hand, and several of the men who played on last year's Freshman team with great success were on hand, and several of the men who played on last year's Freshman team with great success were also on hand. Capt. Comber's "daring" outside record is probably the best of the team, and it is expected that at least three good men will be on the floor from 5 till 6, and on Thursdays, 1:30 p.m.

Sophomore Practice, which has progressed so well up to this time, has to discontinue its practice just in order to get in a few men who don't appreciate the crisis which is at hand to fail to show up at this meeting.

BASKETBALL PRACTICE.

Varsity and Sophomore Teams.

During the past week the Varsity basketball team has been getting in some good work. They have been toching and passing, passed well, and are developing a good floor game, but is not so good at shooting. In the guard position, Freedman is showing up well, place in the team promptly at 4 o'clock. The purpose of this meeting is to recognize the E. H. S. Club. There are a number of men in the Institute who are anxious to see the club put on a footing again, and there is no reason why this cannot be accomplished. If the men would put on a shirt and support the club. Therefore it is necessary for everyone interested to be in the Union tomorrow afternoon at 4 o'clock.

JUNIOR CLASS MEETING.

Since the number of members of each class constitutes the Athletic Association, and this has been decreased from two to five, a meeting of the Class of 1913 will be held Thursday, November 27, to decide whether a telegram amendment shall be made which shall add the name of one to the Executive Committee of the class. This meeting will be held at the close of the political economy lecture in Huntington Hall, Thursday. All members of the class interested as it is a question of vital importance.

Fate of Orchestra Decided—B. E. at 4:30
The appearance of the notices posted on the bulletin boards in Boston and the Union is abominable. The lettering and general appearance of the notices would not do credit to a primary school pupil, and there is certainly no excuse for men in a school such as a complete course in free-hand lettering is given to every member of the Freshman Class. If the activities cannot get posters that look fairly respectable let them advertise in some other manner, and above all, spell correctly, as it certainly looks bad to the outside person to see a class meeting notice posted with the word "Amendment" spelled with an "A.

Is the Gym team to die a natural death this spring? One might assume that the "Fencing Team of a few years ago?" The surprising lack of material re-

communications should be addressed to the management.

THE FEMALE OF THE SPECIES

A Tech Man's Comment.
When Kipling took his pen in hand and wrote his latest rhymes,
He must have known that comment would arise from time to time,
For he knew his thought was strong—
—that 'twould raise an awkward wall.

That the female of the species is more deadly than the male.
When our greatest English poet wrote his latest bright idea,
He little thought that parodies would spring up far and near—
That refutations, arguments would greet his simple tale—
How the female of the species is more deadly than the male.

But such is, and far and wide have been arguments
That seek to give the hookoo to our poet's latest stunts.
Now the ladies are offended, so they clam him "tooth and nail."
Since the female of the species is more deadly than the male.

Now a certain lady writer, not so many weeks ago,
And not from Boston, wrote a poem just to show
That our poet "had the whiplash in the face of womankind,"
And his poem was the product of a "cringing," "vomited" mind.

And her poem, it was deadly, as you know, if you have read,
And I guess she thought she hit our poet promptly on the head.
For she showed that men are good for nothing—useful—not a bit,
And she used to good advantage all her satire and her wit.

But soon another tried it and his' poem was very different grooves,
And each has done his running in a very different groove.
We leave it to the reader—What's the moral of it?
Is the female of the species much more deadly than the male?

It won't leak

You should own a moore's

Because

It can be sent anywhere, anywhere, in pictures or looks, in a box. At any rate, in the end, it all comes to the same thing.

When the cap is on, the pen resting in the box, expectant, idle. It still continues with its own flow as if not a year has been lost in the progress of the tip's living. It comes up to the standards of such men as the Fiji, the India Drawing Pen, the Boston Art School. It is made of gleaming brass to fit.

It has a steel retractor to fit, which comes with the box, on the side of the case. It is the art in the deep space of the carrying case, and the ballpoint, out of sight. This pen contains all the contents of one of our most complete fountain pens. It is the best fountain pen you can buy.
