HOCKEY TEAM LOSES TO INTERCOLONIALS

Canadian Players Show Too Much Speed on Skates—Little Team Work.

Fast skating on the part of the Intercolonials and bad luck in missing several seeming sure shots combined to defeat the Tech team at the Arena Saturday by a score of 6 to 2. The Tech team played almost exclusively a defensive game, and Ranney was kept busy blocking the frequent shots. He got the hard ones all right, but went out of the cage several times and then the opposing team scored most of their points.

Skilton was the star of the game. By his fast skating he often eluded the whole Tech team for a shot at their goal. He shot the first goal in the first three minutes of play. He shot three other goals during the game. Small and McKinnon also played well.

The Tech defense was very good in spots but was often drawn all over the ice, leaving the approach to the goal open. Eichorn played well at point and his football training served him well in meeting the Intercolonial players, who were disposed to rough it.

The game opened with a rush and Skilton and Stucklin caged goals in a very few minutes, but after that no goals were made until the close of the period, when a Tech man stopped the puck in front of his goal, and it glanced off his stick and slipped in. Near the end of the period Sloan was hit in the face and this spoiled his playing for a while.

The second period was almost as fast as the first and the Tech team was soon tired out. The Intercolonial men shot four goals in succession before Sloan got the puck and added one to the Tech score. The play became so rough that Small and Stucklin were put out of the game for a minute each. In the last two minutes Hurlbutt made the third Tech score.

An immense cheering section of ten men did their best to make some noise but they sounded rather weak in a building as large as the Arena. However, this was much better than nothing, and perhaps before the next game the fellows will wake up and find that there is a Tech hockey team.

The lineup:
Storke, l. w. l. w. Whitten
Sloan, c. c. Telford
Yearance (MacLeod) r. w.
r. w. Foote (McKinnon)
Hurlbutt, f. f. Doe
Stucklin, c. p. c. p. Small
Eichorn, p. p. Skilton.
Ranney, g. g. Bray
Referee, Norfolk. Umpire, Davenport.
Goals: Skilton four, Stucklin, Sloan, Doe, Whitten.

Dartmouth is to have a new skating rink west of the gymnasium which will enable the hockey team to get to work earlier than usual this year.

The Scientific School was authorized to announce a five years' course leading to the degree of Metallurgical Engineer. Proposed changes in entrance requirements were accepted which will allow a slight increase of subjects of entrance examinations in science and for the possible substitution of a good knowledge of modern languages for Latin.

CASTLES IN SPAIN TITLE OF NEW SHOW

Authors of Last Year's Show Are Again Chosen—Many at Dinner.

"Castles in Spain" is the title of the Tech Show, 1912, and W. J. Seligman and E. C. Case, the authors of the last Show, are again named as the successful writers of the new one. This information was given out at the annual Komme's dinner held in the Union Saturday evening. The dinner was very well attended. One of the largest crowds that ever attended a Show dinner was on hand to listen to the largest number of speakers that have ever sat at a table in the Union dining room.

H. L. Woshling, the general manager of the Show, acted as toastmaster and performed the duties in a very agreeable manner. During the progress of the meal he called on H. S. Wanson, the writer of "Dear Old M.

WELLESLEY J. SELIGMAN, 1912.

Co-author Tech Show.

I. T., to lead in singing it, and the room echoed with the Institute song.

The first speaker was the Dean, who spoke shortly on the merits of the Show in helping the singing of Tech songs and in the writing out of new ones. He mentioned especially the work of Frederick Field Bullard, the "grand old man" who gave his life in order to lead the alumni in the singing at one of the reunions. He was the author of the Stein Song, which, although essentially a Tech song, has become famous all the world over.

M. L. Emerson, manager of the Scientific King, one of the early shows, gave an account of the help to men in after life that the Show gives, and also its promotion of good fellowship and experience.

All the speakers, including E. H. Schell, of last year's board, Professor Jackson, the authors of the new Show, Coach Sanger, K. D. Fernstrom, who came as the chaperone of the young ladies who were present; Dolly
(Continued to Page 4.)

CAPTAIN NYE WINS HANDICAP RACE AGAIN

Wilkins and Cary Take the Other Two Cups—Fast Time Made.

Captain Alfred F. Nye, 1914, of the cross-country team, was again the victor in the handicap cross-country race which was held over the new course in Wakefield Saturday afternoon. Captain Nye not only won the first prize, but also the time prize, and as the ruling had been made this year that one man could only accept one cup, he was given the time prize, and the next men to finish, C. H. Wilkins, 1914, and C. A. Cary, 1912, were given the cups for first and second place, respectively.

The weather was perfect and the course was in fine condition. Fifteen men were on hand and promptly at 3 o'clock Coach Kanaly started off F. H. Achard, 1913, the limit man. The other men were started off within a few seconds of each other, the winner starting 25 seconds ahead of the scratch man, Gale C. Shedd. Shedd ran well but could not pick up the big lead the mark men got on him, and finished seventh, but had the third best actual time.

Bonney, 1913, and Lee, 1914, ran the closest race of the day, each one leaving a minute before the scratch man and finishing within a second of each other, Lee coming in first. L. E. Best, 1915, took the lead in the early part of the race but lost his way and ran off the course about 300 yards. However, he ran a good race and finished just behind Shedd.

The course is a stiff one and the men were pretty well fagged out when they came in. Starting in front of the Y. M. C. A. building it followed the road for about a mile when it strikes into the woods. Very little road running comes in till the last mile, when the runners emerge from the woods and strike the road leading to the common, where the race finishes in front of the band stand.

The seven miles around Lake Quantuck at the Bear Hill Golf Club, where the napewitt leads over the golf links of
(Continued to Page 2, Col. 2.)

SENIOR PORTFOLIO.

Nominations For This Committee Open All This Week.

Senior Portfolio nominations are open this morning, and the papers, signed by ten voters of the class, may be left at the Cage for the Executive Committee of the class at any time during the week. All papers must be in before 6 o'clock Saturday night, December the 9th.

This is an announcement that the members of the Senior class will recognize as one of importance. The Portfolio is a book which every member of the Class of 1912 will have as a reminder of his friends and classmates, and it requires some good men on the committee to get it out in the right shape. It is the first of the indications of the nearness of the end Commencement, and like every other step toward that end, the men of the class will consider deeply the men whom they nominate and finally vote onto this important committee.

HIGHWAY COM. OF CAMBRIDGE MEETS

Fate of New Site Decided Tonight—Beal Tells of Expense.

It is expected that the Committee on Highways appointed by the Cambridge City Council will meet tonight and make a final decision on their report to the Council relative to the granting of the Institute's request that Amherst street be declared closed. The petition was referred to this committee November 21, and since that date they have discussed the matter and even taken a trip to view the site. Contrary to the original expectations they made no report last Wednesday, but the report is expected tomorrow night.

In regard to the new site, Mr. H. W. Beal, corporation counsel of the Institute, made several statements, reviewing the items of expense that loom so large in the eyes of the City Council. In the first place, if Amherst street be discontinued the city would lose about \$4900. But to resurface the street would cost in the neighborhood of \$9000, and that portion of the street running through the site is in great need of resurfacing. In regard to the street closing and its effect on teaming, Mr. Beal said "Ames street might be continued to the Boulevard, and as the Boulevard is double, the inner side could be used for heavy teaming if the Park Committee will grant the request. From interviews with members of this committee I think they are favorable, and by this means the interior land would be open to teams, which is what the manufacturers desire. In regard to Vassar street we suggest that the city wait until there is a more definite need for it, and when the time arrives it is probable that the Institute will furnish the necessary land."

Considering the view taken that the city will lose \$15,000 yearly in taxes, it must also be reserved that the restrictions now on the land are nearly prohibitive. Mr. Beal outlined the development of the land. "In 1893, when
(Continued to Page 3, Col. 2.)

TRACK MEETING TODAY.

Coach Will Tell Plans for Indoor Season.

All men who are in any way interested in track will meet in the Union at 4.15 today. The indoor track season starts this week, and this meeting is for the purpose of arousing interest in the track team and to get the men started right.

Coach Kanaly, Manager Waterman and Captain Drymple will talk about indoor track in general, and R. C. Thomson will speak about the relay. It is hoped that a big crowd will be out and give the track season a good start.

CALENDAR.

Monday, December 4.
9.00—Open Exercise—Public Speaking—23 Walker—Desmond Fitzgerald.
4.00—1915 Basketball—Union.
5.00—Basketball Practice—Gym.
8.00—Lecture on Architectural Acoustics—Huntington Hall.

ALL TRACK MEN! 4.15 P. M. TODAY!

Captain-elect Nye certainly showed his teammates on the Cross-Country team that they had made the logical choice for a leader of next year's team when he ran away with the race Saturday afternoon, winning first place as well as the best actual time. Under his supervision the team of next year should make a fine showing and give Cornell "a run for their money."

It seemed too bad that after the fine race run by Cary that he should sprain a tendon in his foot and lose a race that he had almost won in the final sprint. Nye and Cary certainly ran the best races of the entire list of entries and deserved the honors.

Vose and Seligman are to be congratulated for the second year in succession as the successful winners of the annual competition for the Tech Show Book. Two years ago Vose was the author with C. A. Stewart of the "Queen of the Cannibal Isles," so he has the added honor of being the only man who ever in the history of Tech Show wrote three books. The prospects look bright with the return of Coach Sanger, as well as that of Vose and Seligman as authors. With such experienced leaders, "Castles in Spain" should uphold the reputation of "Tech Show" as the best college production in the country.

POP CONCERT FRIDAY.

Orchestra's First Concert to Be Held in the Union.

On Friday, December 8, at 8 P. M., the annual Pop concert will take place in the Union. The tickets for this event can be obtained from any of the members of the Orchestra or at the Cage. The price of the tickets is to be fifteen cents, which will include refreshments. Mr. Colton will have charge of the latter, and promises to serve the usual list of good things. This is the Orchestra's first concert of the year and many good pieces which are being practiced daily are to be on the program for the occasion. The full program will be published shortly in THE TECH. The evening will end with the singing of all the old Tech songs.

AMERICAN COACHES LEAD THE WORLD

Athletes Trained Under Their Eyes Should Win Next Olympic Games.

England's greatest athletes admit that they have little chance to win over the representatives of the United States at the Olympic games at Stockholm, Sweden, next summer. The great reason for this state of affairs is that the American athletes, from their youth up, are developed by a coaching system that is without an equal anywhere. England has no coaches of any consequence, while there are many men on this side of the Atlantic famous for their skill in developing star athletes.

To what great extent coaching enters into the success of the stars of the present day is evident from a few examples. John Paul Jones, the great Cornell runner, who holds the intercollegiate cross-country championship and the world's amateur mile record of 4.15 2-5, was "discovered" by John Moakley. When he went to college he was in poor health and had to be dragged out for track, and if Moakley had not seen the possibilities of the raw runner and kept after him, Jones would have stopped running in disgust. When Mike Murphy went back to Penn this last time he found there a youth named Haskins, who was good for about 4.40 in the mile; after working with him three weeks Mike had that same Haskins turning out a mile in 4.28 consistently.

And so it has been the general rule that most of the star athletes of the day have been accidentally discovered by and developed under the watchful eye of America's famous coaches when the men neither knew themselves that they had any exceptional ability nor had given any indications of it. For this reason especially the American athletes promise to be the winners at the Olympic games next summer, and add to the already brilliant list of American victories in international competition.

SECOND LIEUTENANT.

A. M. Jones, 1913, of Quincy, Successful in Exam.

A. M. Jones, who was a Sophomore last year in Course VI, has been appointed a second lieutenant in the regular army, under the provision that civilians who pass satisfactory examinations might be appointed to positions of second lieutenant.

Jones was one of one hundred and fifty candidates, and among them he was almost the only undergraduate, the rest being largely graduates of some colleges. He was successful in the examination and received his appointment, and is now in Quincy awaiting assignment by the War Department.

CROSS-COUNTRY.

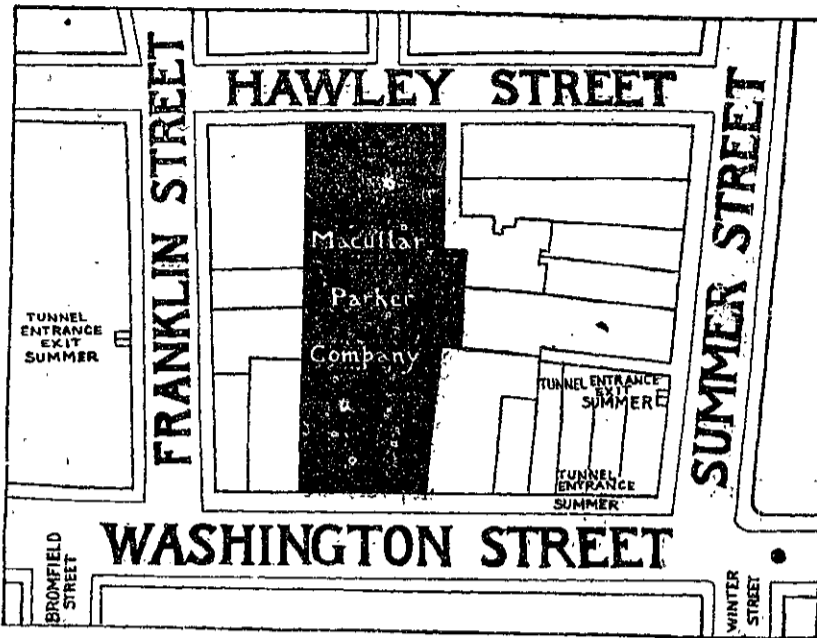

(Continued from Page 1.)

runners get the hardest up-hill work. The lake is in sight during most of the run and as the course just circles around it the men have little chance of going very far astray.

The order of finish with the handicap and times was as follows:

	Hand.	Elapsed Times	Actual Times
Nye 25	47.11	41.36
Wilkins 2.00	47.39	43.39
Cary 50	47.42	42.32
Lee 1.00	47.45	42.45
Bonney 1.00	47.46	42.46
Wall 1.50	47.57	43.47
Shedd Scratch	48.39	42.39
Rest 4.45	49.00	47.45
Magee 3.15	49.10	46.16
Peaslee 2.45	50.10	46.55
Lovell 4.45	50.30	49.15
Loveland 4.30	51.29	49.29
Gurney 4.00	51.45	50.15
Brett 4.00	53.17	51.17
Achard 6.00	53.58	53.58

PLAN FOR RECEPTION.

Rev. Dr. Mann to Be Host of
Tech Brotherhood Wed. Eve.

On Wednesday evening a dinner was held at the Tech Club by the Brotherhood of St. Andrew. Final plans were made as to the reception to be given at the new Trinity Parish House on St. James avenue.

The reception is to be held on Wednesday evening, December 6, and will start at 8 o'clock. It is to be entirely informal. Refreshments will be served to all and a most enjoyable time is promised to everyone. Invitation cards are to be sent to all the men whose names the Brotherhood have now; but it is to be distinctly understood that all men in any way connected with the Episcopal church are cordially invited, whether they receive cards or not. The Rev. Dr. Mann will be the host, and he will probably say a few words of welcome in behalf of Trinity Church.

BEALE ON "NEW SITE."

(Continued from Page 1.)

I first came to Cambridge (he is a Harvard man) that land was only mud-flats and ponds. The city began to fill in this really waste land, but when the job had been completed and the Charles River Embankment Company started its development, the city had restrictions placed on the kind and value of the buildings. Only dwelling houses may be erected and they must cost \$5000 exclusive of the cost of land. If they are apartment houses the cost must be at least \$3000 per apartment. Furthermore, no livery or building of mechanical construction can be erected. Not only this, but they are limited as to height."

The reasons that these restrictions are really prohibitive are the following, as outlined by Mr. Beal: In the first place there are factories on two sides of the plot. This would probably drive away people who would be willing to pay the amount that the city demands the buildings shall cost, as people able to pay that much would prefer a location less commercial in aspect and surroundings. This would leave the persons most likely to desire residence there to the operatives and mechanics in the factories. But it is most probable that these men would be unable to spend the required amount on building a house as their incomes are in general too small. This leaves the population of that land still unsettled, since nobody desires the land with its great restrictions. The first failure of the Riverbank enterprise was cited by Mr. Beal as a possible example.

"For the site some population is needed that will be centered about itself, some such that not too many outside daily trips in rush hours need be taken. The Institute is an ideal realization of this centered population." Besides this the Institute will make a fine approach to the city and be a development of the waterfront for all time. These advantages to Cambridge have been previously cited, but there is one that has not been put forward. This is the advantage to the city government of Cambridge, which will in many cases, as suggested by President MacLaurin, desire advice on professional subjects. The department heads of the Institute will in many cases be glad to assist the Cambridge men as they have the Boston men in the past. If the committee decides to report tomorrow, Tuesday evening will see the question of the new site definitely settled.

W. D. Crowell, general manager of the Queen Aeroplane Company, New York city, and Robert Yates of Passaic, N. J., have been at Worcester Polytechnic Institute overseeing a number of aeroplane propeller tests conducted by Professor D. La Gallup.

FRESHMAN BASKETBALL.

All Those Interested Should At-
tend Meeting in Union.

This afternoon, in the Union, at 4
P. M., there will be held a meeting,
which will be of importance to a large
number of Freshmen. All those inter-
ested in basketball are requested to
be present. A manager for the 1915
basketball team is to be elected by
the candidates who attend this first
meeting. In a short time a captain
will also be chosen from among the
men who attend practice regularly.

Anybody in the Freshman class who
has played the game should show up,
as the class team is rather late in
getting started this year. As soon as
the days and the time for practice are
determined upon they will be an-
nounced so everybody can get to work
and turn out a good five. It is cus-
tomary to arrange a good schedule
with many of the High Schools and
Prep Schools in the vicinity, ending
up with the regular three-game series
with the Sophomores at the end of the
season.
