FITZGERALD TALKS TO PUBLIC SPEAKERS

Success in Engineering Work Depends Much Upon
Cheerfulness

Mr. Desmond Fitzgerald's remarks to the class in Public Speaking, Monday, were greatly appreciated by members of the section and by the few others who found it possible to attend. He spoke of his early experiences as an engineer, and of the qualities necessary for success in the profession. The engineer, said Mr. Fitzgerald, must expect frequently to be thrust into unpleasant conditions, and amongst men whose point of view is different from his. He thought it possible that the key to the problem is cheerfulness. The speech was well received, and considerable interest was shown in that important part of the engineer's work, which consists in dealing with men.

POP NIGHT PROGRAM.

Tech Songs and Light Opera Selections by Orchestra.

Friday's Pop Concert is on the high way to success. The program to be repeated, held last night in the Union, was as follows:

Page 1: Dear Old M. I. T.

Page 9: Naughty Marietta.

Page 11: Complete Soldier. (The Organ was not played at this selection.)

Page 11: Stein Song.

Besides these selections the Orchestra may be expected to intersperse the program with two or three more Tech songs.

THE M.I.X. PROBLEM.

Lecture by Romeau on Present Day Problem Today.

This afternoon, at 5 o'clock, the Lowell Institute lecture by Mr. Romeau, on "Problems of Preventative Medicine and Hygiene in the Harvard Medical School," will be held in the Union. Mr. Romeau was in charge of the "Epidemic Physical Phenomena of Sound," and in his lecture he will discuss the subject very thoroughly and fairly. The lecture is to be repeated tomorrow afternoon.

LARGE ATTENDANCE AT TRACK TEAM MEETING.

Outline of Season's Work Given by Captain, Coach, and Manager.

Indoor track work has started. The program which has been arranged for the track team consists of an early meeting last night at 5:30 p.m. in the Union, at which the team met to discuss the details of the season's work.

ARCH TOURS PROVE INTERESTING.

The first Lowell Institute lecture on Architectural Acoustics, which was given last evening by Prof. William C. Sabine, Dean of the Scientific School of Harvard, to a large audience, proved a very able and instructive discourse on the elementary physical phenomena of sound. The subject was "The Production and Propagation of Sound." Prof. Sabine is evidently well fitted to talk on this subject, owing to his extensive researches in this field, and particularly in the phenomena which have been conducted in the special researches sound phenomena in Cambridge. The lecture will follow principally the lines along which these experiments have been made, and will be a valuable addition to the scientific world.

SITE QUESTION STILL UNDECIDED.

Highway Committee Will Confer With City Solicitor—Meet Thursday.

Last night the Highway Committee of the Cambridge City Council decided to report on the closing of Amherst street until they had consulted with the City Solicitor about the wording and contents of the order. The reason for doing this in that hibernation period has never had any similar order to pass on, their activity having been confined to the acceptance of streets, so the closing of a street is a little out of their usual practice.

They propose to consult with the City Solicitor and will meet again Thursday evening to determine whether they shall report the order or not. The indications are that the committee are in favor of the subsidizing of the order, providing the closing of the streets.

The committee, however, has expressed the opinion that this year the Pan-Zone will not be held.

HOCKEY TEAMS OUT.

Few Colleges Have Favorable Conditions for Ice Practice.

Hockey practice has now started in several of the colleges but only a few teams are finding ice easy to play on. On account they have to content themselves with shooting practice and in putting men in good physical condition.

Fitchburg and Tech are fortunate in having the Arena to practice in very early in the season. Fitchburg has already more practice than the other teams will have had, Tech has had over fifty men out, several of whom has played on varsity and class teams. They will play no games until near Christmas.

Hockey teams will have a new risk and plenty of natural ice. A large crowd is out and much promising material has reported. Williams, as yet has only been able to hold a meeting on the board. This college will also have a new risk in playing. The controversy is that the Harvard and Tech are in favor of the subsidizing of the order, providing the closing of the streets.

CALENDR.

Tuesday, December 5th.

5:00—Lewell Lecture on "Mill—it's Highway and Traffic—Union.

Wednesday, December 6th.

4:15—Orchestra Rehearsal—Union.

6:00—Lecture by Prof. Davis—Union.

8:00—Lecture by Berlage on Architecture—Union.

Thursday, December 7th.

4:15—Fitchburg Women's Basketball—Union.

5:30—Finance Committee Meet—Union.

Friday, December 8th.

8:00—"Pop" Concert—Union.

9:30—Opera Society Rehearsal—Union.

9:30—Preparatory Men's Basketball—Rock Gym—Union.

12:00—Senior Portfolio Nominations—Dining Hall.

December 8th.

6:00—Senior Portfolio Nominations—Dining Hall.
To the Editor of THE TECH:

There is a large amount of work in progress today. The total amount of work that has been done so far has been so great that it is impossible to list them all in this column. However, I can assure you that the work is being done in a timely manner and the results will be published in the near future.

Sincerely,
E. W. Tarr

TEACHERS WANTED IN THE PHILIPPINES

Excellent Opportunities Offered to Men of Ordinary Ability.

A wonderful opportunity is being offered in the Philippines for young men whose desire it is to make their lives count in the bettering of human conditions.

There is an area as large as New York, New Jersey, and New England and practically going to waste in the Philippine islands because the people are not educated enough to see and take advantage of its productive possibilities. The 135,000 square miles will eventually yield rice, tobacco, abaca, coconut, sugar cane, rubber, and all fruits, the produce which the natives of these islands give to the world is practically nothing.

All that is needed to transform the Philippines from a burden to a great source of wealth to our country is the education of the Filipinos. There are at present one thousand American men under the leadership of Frank R. White instructing a small proportion of these people, and their results are marvelous. Five thousand schools have been started and the students are proving themselves to be physically and mentally active.

The fact that the most widely spoken language in the islands is English is very significant. Spain has been in the Philippines for over three centuries, but she has done almost nothing to better the conditions of the people. Since we have been in the islands our government and other organizations have introduced new opportunities, and the natives are availing themselves of them and they look to us for further help. It is, therefore, our duty to offer them the best possible advantages.

A call has been issued for young men who are interested in teaching as a profession for eighteen months. It is a hard vocation but it is full of interest and opportunity. The sanitary conditions are good and the school buildings are as good as our American ones.

Golf has been added to the list of sports at the University of California.

A total enrolment of 335 in the academic department and 50 in the medical department is shown by the Bowdoin College catalogue.

MEETING OF TRACK MEN

(Continued from Page 1.)

Talk on the methods to be used in practice this year. The team will practice four days a week, Monday, from 4 to 6 o'clock, and the afternoon of this day will be outside on the Irving Street Oval, rain or shine, also on Tuesdays, Thursdays and Saturdays in the Gym.

In the work the outsiders the men will need to have something to cover their legs and arms. A professional man will give the men a rub down in the order of the list that Mr. Randel will post and if the man is not on the list that needs special attention he will be given the latter by speaking to the Coach about it.

In speaking about the track work interfering with studies, he said: "I realize that studies come first, and if any man thinks that he can report regular on account of the less of time that should be put into the studying, I would rather he would not report at all than come out and show that the material is in the school and is unavailable."

Notifications of this meeting were sent out to 185 men and a large per cent of them showed up, but it is necessary to have every man that thinks he can run come out to make the track list records solid for another year.

.351 CALIBER

Self-Loading Rifle

As its name indicates, this rifle reloads itself, the recoil of the exploded cartridge doing the work. This places the complete control of the rifle under the trigger finger, which permits rapid shooting with great ease and accuracy. The .351 Caliber High-Power cartridge, has tremendous killing power, making it heavy enough for the largest game. Catalogue fully describing this rifle, "The Gun that shoots Through Steel," sent upon request.
