Amateurs in Legislation Use New System—Far Ahead of All Others.

Talk about amateurs in the lobby, the Tech people have put the finest machine in the Legislature which has been seen this year. The Tech men in charge of the campaign to get $1,000,000 out of the State went right to the root of things. They started a big card index with the name of every legislator on it and his address. On these same cards they had written down the names of his father, brothers, sisters, cousins and aunts, and in any case where there was any affiliation with Tech it was carefully noted.

Then the sounding began. Every past member of the Legislature who had been a Tech man or who had gone to Tech for scholarship or anyone, was pulled into line and given a certain block of men to look after and an obligation to make daily reports in writing.

As a result, almost before the Legislature opened, the Tech men knew exactly what was in the air with whom, what strings were holding them, and more important, who were against them and why.

Ignoring for the time being the fish they happened to catch, they started after those in the pool. There were followed out of all accessible computations was reached through his brother-in-law who worked under a Tech man in a certain business. Another man was reached on the grounds that an 8-year-old son and years before had been given a Tech examination, though he did not materialize. It had been a smooth business all the time.

The result is that they are attacking the legislative campaign this year, and even if Governor Peabody should stir up they are ready to meet that criticism. Talk about business in politics, or business methods in legislation, these gentlemen have put in operation a system that would be worth hundreds of thousands of dollars to the big corporations who have to do with legislation. It is true, of course, that this has been a thing of only very narrow things which lobbying could be done right and left without fear of very harsh laws, but the methods of keeping track of what has been done can be as costly as turned into other channels, which provided a card index could be kept in a safe where no person could look at those so entitled could look it over—Practical Politics, April 15.
