DARLIMBLE ELECTED M. I. T. A. A. PRESIDENT

Athletic Association Organizes for the Year at the First Meeting Yesterday

At a meeting this afternoon in the Athletic office the M. I. T. A. A. organized for the year by the election of officers and the appointment of the representatives to the Advisory Council.

Philip W. Darlumple, 1912, the Varsity track captain, was elected president of the Association, according to the custom which is prevalent in the Association. The second in line was made captain of the men's basketball team, and Walter Bylund becomes the new secretary-treasurer.

As senior members of the Advisory Council, Earl and Ralph Fowley were chosen, and as Junior Class representative, the secretary-treasurer, Bylund, was elected. These elections to the Advisory Council are very important, for the Council takes complete control of the athletic activities of the Sophomore Class.

The nomination of Roger Freeman as new president was ratified by the Association, and they also elected a new president for the indoor track meet, as arranged by the track management.

"POPS WILL BE SUCCESSFUL"

Much Interest in Concert—Men Should Buy Tickets Early

A great deal of interest has been taken in the "Pop Concert" which is to be held at 8 o'clock Friday, December 8th, in, the Union, and as the Orchestra has promised its best efforts, which was evident in the program yesterday, it is hoped that this particular concert will be one of the feature events of the year. Many of its members areCFAHIGMINDFORTTHDAY, and it is believed that every man who can possibly attend will make an effort to do so, and thus bring to fruition the success of the first Pop Concert.

CONSERVATION OF BIRDS

Germany has a bird conserving experiment station where artificial nests, foods and other instrumentalities for the birds are prepared. The station is already in operation, and the students will be trained in the work, which is under the direction of Dr. Rosenau, who has devoted his estate at Strockow to this purpose.

From the fact that birds are becoming such an important factor in the food supply as well as the field of sanitary engineering, it is evident that the knowledge and skill required at this station will be invaluable, particularly to the next generation of engineers.

DR. ROSENNA TALKS ON MILK QUESTION

Harvard Professor Begins Course of Lectures in Huntington Hall

The first of a course of six lectures on Milk, which will be given at 8 o'clock on Tuesday and Friday afternoons by Professor Milton J. Rosenau, was delivered yesterday. Doctor Rosenau, a member of the "Milk Question," the subject of which he chose for his first talk, and he has given earnest attention and consideration to the prevention of the diseases which result from the use of improper milk.

The problem of clean milk is the most important branch of the pure food question. It is no exaggeration to say that milk rules the destinies of our life, and it is the only animal food that is extensively used and which is eaten raw. It has been proved that more harmful matter is disposed of in the cooking process of foods than by any other means, and it can therefore be readily seen that the care with which milk is handled is of the utmost importance to the safety of the consumer.

The man has some very interesting caricatures which he showed on the screen. Proper and improper cow milking was depicted graphically. Methods of storing milk and means of transporting it were shown. A direct contrast was striking. Photographs of model dairies, from which our best milk comes, were shown, with dairies whose milk sells for two cents a pint.

Professor Rosenau was very optimistic in his views concerning the "Milk Question." While he realized that the obstacles which stand in the way of any such detailed study are immeasurable and seem overwhelming, he was optimistic that the time would come when only that milk which is of the maximum purity will be sold. An encouraging law has been passed recently which states that milk bottles must be properly labeled, and that they must be washed before they are filled. This is a big step in connection a milk bottle which had been allowed to remain on the window-sill or in the street was shown on the screen, and the evidence was conclusive that the gossamer grew in a milk bottle like flowers in a hot bed.

Doctor Rosenau proceeded with the help of slides to explain the manufacture of milk in the cow. The products in the milk are obtained from the blood and the condition of the lungs of the animal is very important, for the purity of the blood determines the quality of the milk. The water which the cow drinks has a very definite effect on the cleanliness of the product also.

Professor Rosenau will discuss the milk and milk products of various countries this week, and anyone who attends the course will find it the most interesting and instructive.

FACTS OF INHERITANCE

Dr. Johannsen of Copenhagen Will Deliver Four Lectures

This evening another Lowell Institute lecture course opens. The subject for this course is "Facts and Theories of Inheritance," and it will be delivered by Dr. W. Johannsen, Professor of Genetics in the University of Copenhagen, Denmark. These lectures are to be delivered Wednesdays and Saturdays at 8 o'clock in the evening.

LITTLE INTEREST IN SWIMMING TEAM

Opportunity for Making the Team as Early Success Is Notegasus

The swimming team has made only a small beginning this year, and there is little possibility of the men coming together to form a successful team. The first swim meet is to be held this week, and the results of the first trials could not be taken in any way final or even considered on account of the small number of men. The only result which was noticeable was that the men are beginning to see the need of regular practice. The only reward is the opportunity to practice which is given, and the men have not seen the necessity of getting the men together to form a team.

It is true that this new sport seems to have interested very little interest at the Institute. The main idea concerning it seems to encompass the importance of the competition. There is the possibility that there is still a great deal of suspicion by the other members of the team, but the reward, if any, is the opportunity to practice which is given, and the men have not seen the necessity of getting the men together to form a team.

MEET THE MISSIONARIES

Meet the missionaries of the world at the Mission Hall of the Christian Science Church, on Saturday, December 2nd, at 8:30. There will be a meeting of the Missionary Committee with the missionaries of the world and the local committee will meet also.

The meeting will be held at the Mission Hall of the Christian Science Church, 107 Tremont Street, Boston. The meeting will be opened by the President of the Missionary Committee, Rev. E. G. Goodwin, who will read the report of the committee for the past year.

The meeting will then be opened to the public, and the missionaries will be introduced and their work in the missions of the world will be explained.

A large number of the missionaries will be present, and their work will be explained in detail. The missionaries will be available for questions and discussion.

The meeting will conclude with a prayer by Rev. E. G. Goodwin, and the meeting will be adjourned.

The Mission Hall of the Christian Science Church is located at 107 Tremont Street, Boston. The meeting will be held at 8:30 on Saturday, December 2nd, and the meeting will be open to the public.

Calendar

Wednesday, December 6th.
4.00-1400 Basketball Practice.
4.15-1400 Chemistry Lecture.
6.00-Hockey Practice—Arena.

8.00-Lovell Lecture. "Photos and Theories of Inheritance."-Huntington Hall.

Thursday, December 7th.
1.15-1400 Dean Hodges, "The Busy Day."—Union.
4.15-1400 Maj. Cole Talks on Rapid-fire Surveying—Surveying Hall.
6.00-Civil Engineering Society Meeting—Lowell.
8.00-Ministerial Societies.
6.00—Senior Portfolio Nominations

MAJOR COLE EXPLAINS "RAPID FIRE SURVEYING"

Lecture Before Civil Engineers Tomorrow Afternoon at 4, in Surveying Hall.

To survey and completely map the topography of twenty-five square miles in one day is a feat even the most ardent of maps would make most classes in surveying stand aghast. Yet this is what the military topographers of the United States Army service turn off with as little effort as some of our nation would manifest in running a transit line across Boylston street, and Maj. Cole of the Department of Military Science is going to tell the Civil Engineering Society how it is done. He will talk a bit before its members at 4 o'clock tomorrow afternoon, in the Union.

Major Cole has had a wide and varied experience in army life and has at his command a fund of authorita-

tive, practical knowledge of how field engineering should be carried out. He came to the Institute this year from the University of the West Point, and has been a member of the engineering department's staff, and has been attached to this work for some time. He has been of the greatest value in giving lectures to the engineering students and in helping them to understand the practical side of the subject.

Calendar

Wednesday, December 6th.
4.00-1400 Basketball Practice.
4.15-1400 Chemistry Lecture.
6.00-Hockey Practice—Arena.
6.30-Catholic Club Dinner—Union.
8.00-Lovell Lecture. "Photos and Theories of Inheritance."-Huntington Hall.

Thursday, December 7th.
1.00-1400 Dean Hodges, "The Busy Day."—Union.
4.15-1400 Maj. Cole Talks on Rapid-fire Surveying—Surveying Hall.
6.00—Civil Engineering Society Meeting—Lowell.
8.00—Ministerial Societies.
6.00—Senior Portfolio Nominations

Maj. Cole has many interesting stories of how things are done in army life, and the details of military topographic surveying has been chosen to talk about the Civil. His military experience has been of the greatest value in giving lectures to the engineering students and in helping them to understand the practical side of the subject.

Wednesday, December 6th.
4.00-1400 Basketball Practice.
4.15-1400 Chemistry Lecture.
6.00-Hockey Practice—Arena.
6.30-Catholic Club Dinner—Union.

Are you going to Pop Night? If not, you are missing one of the best chances of your life. This year the committee has worked hard to make the evening a success, and has arranged for the newly recognized Orchestra present to officiate on the musical end. The refreshments will be liquid, but further than that we can not say anything in regard to that matter, as good time is promised all who attend.

M. A. C. PLAYS TONIGHT.

With Seven Veterans Back, Prospects Look Bright.

The Massachusetts Aggie hockey team will start their season tonight when they meet Providence in the Arena. The Ambler College is particularly fortunate this year in having the services of seven veterans, a year's team back. Last year they won from the Tec and Trinity, and therefore they are expected to rank with the leaders this year.

In this good condition the men have had almost no practice; the team and the first stringers have not had an opportunity to prove dangerous to the crack B. A. A. team, which has already had an easy victory over the Tec and Stanford, and has already won from the Tec and the St. Nicholas team.

DR. MANN TO TALK TO ST. ANDREW'S MEETING

All Technology Episcopalians Invited to Meeting in Parish House.

Tonight, at 8 o'clock, the Technology Chapter of the Trinity parishioner of St. Andrew will hold a reception at the Trinity Parish House, 23 St. James Avenue, to which all Episcopalians attending the Leaders' Convention are very cordially invited. The occasion is to be entirely informal, and it is hoped that a large number of Technology men will be present for the evening. The Reverend Dr. Mann, Rector of Trinity Church, will say a few words of welcome to the men, and let every one know that he will always be a welcome in Trinity itself as he is in a meeting in Trinity Parish House this evening.

After Dr. Mann's talk there will be refreshments, and to meet all older members of the Chapter. The gathering will be informal, and it is hoped that a large number of Technology men will be present for the evening. The meeting in Trinity Parish House will be open to all who attend.

HARVARD HOCKEY.

Practice Begins in Earnest—Football Men Out.

The Harvard hockey team is being developed in earnest now since the fall by the new coach. With all the new men, Gardner and Willetts are beginning to report for regular practice.

The forwards left after Clifford and Hopkins had been declared ineligible. Wilson, Dunlee, Palmer and Ford will, so far as we can learn, still be present at least to be outlined, although there is some talk of shifting Huntington up from the wing. The pruning of the defence is still doubtful, for some of the strongest men have not yet come out. Smart and O'Connor are at goal, and Houston at cover point have done work in the tournaments against the B. A. A. team.

CATHOLICS WILL MEET.

Select Committee to Arrange for Dance in February.

The Catholic Club will have a dinner and meeting in the Union this evening at 6 o'clock. Arrangements are being made to secure a speaker of note who will talk to the men on some interesting topic. This is an important gathering because business pertaining to the dance to be held the first of February will be taken up and a committee of five chosen for the purpose of completing the plans and attending to the details. The secretary will also make a complete report of last year's dance for the especial benefit of the new committee. As this is the last meeting of the club before Christmas, it is to be expected that a large number of Technology men will be present for the evening.

THE TECH, BOSTON, MASS., DECEMBER 6, 1911

ALUMNI B' SKETBALL

MEN PLAY VARSITY

Regular Team Has Chance for Good Test Against Old Men.

Varsity basketball practice was held in the gymnasium Monday afternoon, and the squad was given some good, hard work. After the shooting practice the men were given a fifteen-minute scrimmage with Capt. Schar as coach and referee. He is pulling a fast team into shape, and the interest of the material is no easter now than it did three weeks ago. Following the scrimmage and after a short rest the men were lined up against a number of the alumni, with Schats of their own squad playing with the Grads to make up the game. The game was fast and hard fought throughout, with the alumni leading a tribe on account of their experience. The Tech men played well, with plenty of life and wind throughout the two periods. Keeping the alumni going all the time, Schats proved a great help to the alumni team and showed very clever dodging and shooting ability. Schar and Freedman did the best work for the regulars. The new men were all given a chance at first with the older men taking their places later in the game. Things were more even after the experienced men took a hand, as evidenced by the number of goals which were shot in the second period.

The final score was: Varsity 16, Alumni 19.

The lineup was: Varsity.

Reed, Schar, f. .... f. Ellis, McCarthy, f. .... f. Schatz, Mowry, c. .... c. Parker, Dalton, Freedman, g. .... g. Green, Moyer, Capan, Hudson, g. .... g. Darling, Lager, J. .... J. Lodders.

Mr. H. P. Berlage of Amsterdam will lecture on December 8 in Huntington Hall.

On Friday evening, December 9th, Mr. H. P. Berlage of Amsterdam, Holland, will lecture in Huntington Hall on "The Foundation and Development of Architecture." The lecture will be supplemented by views as well as by an exhibition of Mr. Berlage's work, which can be seen on December 7, 8 and 9 in Rooms 16 and 18.

Mr. Berlage is a very prominent European architect and one whose work is considered among the best. He has published many books in which he sets forth his architectural principles and the end toward which he is working. As an architect he has studied the trend and seen the architect for years and has endeavored to make real progress in construction without limiting constantly the old models which are excellent in themselves, but which when imitated to too great a degree are apt to stop the advancement of a great art.

Mr. Berlage's only object in giving these lectures is to attempt to throw the ideas of architecture, and his lecture for this reason will be of such a nature that all can readily understand it. It will be found most interesting and instructive, and it is hoped that many institute men will attend.

The Deutsches Verein of Harvard gave its 15th annual play, entitled "Der Unglückliche Thomas," last evening in Jordan Hall.

Germany has a bird conserving experiment station, where artificial nests, foods and other instrumentalities for attracting birds are "tried out." Lectures are given and students from all parts of Europe come to be trained in the work, which is under the direction of Baron von Berlepsch, who has devoted his estate at Beebach to this purpose.
