LATIN AMERICAN NIGHT OF COSMOPOLITAN CLUB WELL ATTENDED

Many Interesting Talks Given on Recent Mexican Revolution—Pres. and Mrs. Maclaurin Were Present

Last Saturday evening the Latin-American section of the Cosmopolitan Club met in the Union. The program was announced in advance, and a number of guests, including President and Mrs. Maclaurin and relatives, Dean and Mrs. Burton and several Latin-Americans in Boston. The large attendance of the Union was used, and was very nearly filled.

President Montg of the club made the opening address and very nicely introduced Mr. Manuel A. Hernandez, who told the audience about the rest of the evening. Mr. Guillermo Uribe, who studied music at the New England Conservatory, presented at this time an interesting and rare selection, which was widely enjoyed, the singing of a group of the Spanish students being quite novel and interesting as well as most beautifully rendered.

Mr. Robert Strugis, who is the President of the Spanish Club of Boston, spoke for a few minutes on "Spain, the Alma Mater of Latin America." Mr. Strugis' talk was quite interesting and covered many of the ideas that the people of America have towards the Spaniard. The substance of the talk was that the Spaniard was polite, hospitable, genial and kind in nature. Also the most important thing, Mr. Strugis illustrated that the Spaniard in the recent war clearly showed that they were quite fearless and brave, and the manner in which some of them went into battle against the Americans. Dr. Ralph J. Jeans, Henry W. Parker and Ames Clapp, members of the Spanish Club, next gave some fine examples of the way the Spaniards can handle the mandolin and guitar. Their selections were quite classical, and were very nicely executed, carrying for a heavy applause.

The next speaker of the evening was Mr. H. Colley, both members of the Spanish Club and Consul, and as they never come back, Mr. Colley's talk was quite amusing. He said that he had a little idea of what the war was but he was not the same by reading the newspapers. He said that the papers at one time that his father had led in a battle in which nine hundred of a small battle and galloping. Their selections were quite classical, and were very nicely executed, carrying for a heavy applause. The next speaker was Mr. Manuel Hernandez's interesting talk, which was illustrated with slides. Mr. Hernandez is the son of the leader of the revolutionists in the north of the country, and was very well informed by his folks on the results of the fighting. He said that most of the newspapers of the country had greatly exaggerated the results, but the matter was true. Also that many of the pictures that were obtained in it were lies and not at all true. Also that most of the facts contained in the story became the true, and said that most of the pictures were labeled wrong.

One of the interesting things that Mr. Hernandez said was about Mexico from the French government. He said that he had done before he acquired the presidency, and that most of the facts contained in the story became the true, and said that most of the pictures were labeled wrong.

Another interesting talks was that Mr. Hernandez was talking across the border and taking part in the battles. His folks told him, and in fact he had pictures to prove it, that the Americans were watching the battles as if they were football games and were enjoying them immensely.

He scored the write up that appeared a while ago in the American magazine entitled Barbarous Mexico, and said that most of the facts contained in the story became the true, and said that most of the pictures were labeled wrong.

COMMUNICATION.

(We invite communications from all men in the Institute or in industry and special events. We take no responsibility for their correctness and do so some may appear in (whether they are signed or not.)

To the Editor of THE TECH:

In view of the discussion concerning the establishment of Sigma Xi I should like to say a few words in favor of it. There are a good many of us who reside within twenty-five to forty miles of Boston, who lose anywhere from two to four hours a day in riding to and from the Institute. This loss of time leaves little or no opportunities for us to take up institutes activities and the result is that we are considered as "grids" or that we are held as a necessary evil of Institute life and something to be considered only when our votes are desired, class elections or the like. As no time is left for athletics, which is one of the qualifications for a frat, and as most of us lack a rating in Dunn and Bradstreet's, which is the other qualification, about the only evidence of our connection with the Institute at the end of our four years, is our diploma.

Now we fellows are at heart just as much Tech men and have just as much loyalty to the M. I. T. as the men who live in the shadow of the Institute. It seems that we might have some reward for our conscientious work, just as resident students are rewarded for athletic prowess and society.

As near as I can find out the chief objection of this society is that we are not a part of any we have not a very brilliant future, and it may be just as possible that they do not wish to have their societies opposed in any way. As for the Almasi, I think that they should have a chance to vote on this subject, but the time is rather short for many of us to do so and as an extension of time might be advisable. The spirit should be to have this society, membership in which is to the scientific student what Beta Kappa is to the chemical student, assume the same dignity as Beta Kappa, where little key affords its lucky possessors a certain distinction. Irrespective of his Alma Mater. Let us, then, establish this fraternity here and strive to have it stand for ability rather than social and financial power. At present we have such fraternity and it should be established. A step toward a better Technology, rather than becoming, as has been the case, a refinement of the social time between the students.

10 TO 14 SCHOOL ST.
TERM CLOSES JAN. 13. EXAMS BEGIN FOLLOWING MONDAY—LAST TEN DAYS. SECOND TERM OPENS JANUARY 29TH.

(owing to the fact that the entire issue was sold out Saturday we print again the exam schedule for the benefit of those who could not get a copy Saturday).

Below is published the provisional mid-year examination schedule as sent out to members of the faculty for correction and additions. So far as possible this is the schedule that will be presented to the students. Additional conditions may be found by the professors on looking it over. Judging from past years, the number of changes will be small. The examination period extends over ten days, closing the 24th, only four days before the opening of the second term. The schedule was sent to the students through their exams on Saturday, the 20th, thus having one week's vacation. With two exceptions, the last second-year examinations occur also on Saturday, the exceptions being General Geology and Organic Chemistry, and not many men will take these exams. The last week in January, room numbers, etc., will all be held until the final day.

The method of the presentation of the exams below is as follows: First, the subject, followed by the subject number in the catalogue; then the problems within the exam is given, and finally the hours. Room numbers, etc., found in regards to conflicts, etc., will be found on the Registrar's copies when they come out.

Monday, January 15.
Architectural History 491, 2, 9-11.
Descriptive Geometry 413, 2, 9-11.
Electric Light and Tr. Power 664, 3, 9-11.
