DEAN BURTON AND DR. ROCKWELL TO SPEAK

Will Tell Students About Hockey Team at Meeting Today.

Every man in the Institute is expected to come to the Mass meeting which is to be held in Huntington Hall this noon in the interest of the hockey team. Dean Burton, Dr. Rockwell and several men interested in the team are to speak to the crowd and a crowd it must be.

It is to play their first intercollegiate game Thursday evening at the Arena. The team which they hope to defeat at this and other contests is a select group of well-trained athletes from Cambridge, who represent Harvard. Harvard has a strong team, but we have no weak one, and if our boys get the support which they need, they will give the Crimson team a hard fight.

The meeting at the Arena has made it pretty clear that it is necessary that the Tech teams will be supported before they can gain the same rights on the ice as the other teams of the country. It is the chance to show them that we can support a team as well as any one else. Furthermore, the Arena management have conceded us a point by giving us the privilege of delivering the hockey team a bunch of tickets in the center of the audience, and we are willing to give the M. T. I. A. A. a per cent. on all the seats that are sold by us. The Tech teams have been distributed among the classes, and every man in the Institute will have a chance to get one, or two, and if every man in the Institute who has never seen a Tech team show our colleagues from Cambridge how to play hockey buys a ticket we can certainly show the Arena owners that we can produce a cheering crowd to help Tech Technique.

CIVILS, SMOKE AND CIDER IN THE UNION

Gathering Shows Advantages of New Summer School—Every One Favorites Project.

A crowd of over one hundred enthusiastic Civics groaned at the speakers at the Civil Engineering smoker last evening and were well repaid for their efforts to attend. The occasion was one that will long be remembered as a banner gathering in the history of the society; the speakers were cheered to the echo and the whole affair overflowed with good fellowship.

Professor Spofford was the first speaker and was introduced as the chairman of the evening. He began by talking about the need of a summer school and under what difficulties field work had been carried on in Boston. The department began to push the matter before the corporation five years ago but nothing could be done at that time. There was, however, an Alumni committee appointed which finally brought about the purchase of the hundred acre plot last winter.

Mr. Metcalf, '92, was then introduced and described the efforts of the committee in selecting the campus, the ways and means of so doing. There was a strong argument against several schemes for co-operation or combination and finally settled on a camp for E. R. work solely. Members of the Faculty examined various sites and visited one of the summer schools at East Machias.

The next speaker, Mr. Bemis, '93, said that he was taken by surprise when he was asked to speak, but he continued, saying that the training and intuitions formed at a summer camp were of more value than technical knowledge.

Mr. Fay, '93, the third speaker for the evening, indulged in a little philosophy. He said that the civil engineer is not the man of facts and figures, but a master of men. To be able to handle men one must be a good handler of facts and figures, but he said that the training and intuitions formed at a summer camp were of more value than technical knowledge.

The meeting will begin at 7:45 P. M. The entrance to the hall is just south of the Trenton Temple entrance. It is hoped that a large number will take advantage of the opportunity of attending this meeting as the subject is surely one of vital interest.

TheCosmopolitan Dinner

Will Be Given New Year’s Day in the Technology Club

The Cosmopolitan Club will follow its usual custom of holding a New Year’s dinner, which will be up to the standard. All members will attend and we have made arrangements to be a great help to the committee if all members wishing to attend do attend. The nomenclature names at the Cane for the Secretary.

RAMBLES OF A DAM BUILDER BY COBURN

Or Travels of Tech Club During Smoker—Most Enjoyable Talk Illustrated.

A crowd which more than filled the cage for Tech, has developed for the last night “rambled” with H. L. “Pa” Coburn, ’89, from the royal palaces and connote grounds of tropical Porto Rico all over the country to the northern extremities, both in the East and West. His remarks were for the most part descriptive of the series of most beautiful and interesting landscapes which he showed from his own negatives.

Starting with a prospective site in Northern Mexico, he carried the audience through Cuba north to Wyoming; then south again down the Snake River in Idaho, to Porto Rico; then up to Oregon, back to Baltimore, Northern Vermont, Canada, and New England, from the man to the last.

He has driven with a running fire of anecdotes, story and word picture of the humorous side of things, he held the closest attention for an hour and a half, making the “Hambles of a Dam Builder” one of the most enjoyable and most interesting of occupations.

The Cosmopolitan Club has been an invitation project in the Far West, and of his work and the country he gave a strong impression in so far as anyone can take the greatest personal interest. Of the work of the Savannah, and the interior country he spoke rather disparagingly, and one rarely would never settle there on the strength of his talk and pictures. The country is not only wild and difficult of cultivation, but it is raged and hopeless in the extreme. The farms as they are called are little favored bits of lowland in the most inaccessible country

Of Porto Rico, on the other hand, he spoke in a very encouraging manner, merely saying that he thought he would go back there some day for a better accumulation of data. The country of most beautiful scenery, the kind of great development, certain of which money paid for a few acres of cocomos will support one in luxury, with nothing to do but collect pay from the purchaser of the nuts.

MASS MEETING HUNT HALL TODAY

RELAY TRIALS

First Tryouts for Both Teams to Be Held Saturday in Gym.

The preliminary trials for the Relay relay teams will be held in the Gym Saturday afternoon. The pressure of the team is too good and the competition is too strong for one to pick even a possible team.

The men have been showing up in pretty good shape, and if they keep it up they can do the track team will be very strong.

The meeting will begin at 2:45 P. M. and will consist of sprints, hurdles over the beam, and the changeover to the middle-distance and long-distance men.

CHRISTMAS REUNION
OF 1911 GRADUATES

Notification Sent by Secretary Denison for Meeting in Boston.

With characteristic life and energy the Class of 1911 is to hold the first of their reunions at this early date, only six months since the day of their graduation. This will take the form of a jollification to be held in the Copley Square Hotel the day following Christmas, the principal feature of which will be one of the features for which the hospitality is famous.

The following postal has been sent out by the secretary to all the members of the class:

"I am planning this for Christmas week, particularly for those whose homes are near Boston, or who have business near here."

"Please reply on attached card before Saturday, December 26."

"OTHELLO B. DENISON, Secretary, 1911."

Secretary Denison writes that he has already more than fifty replies, but he feels that there should be a large number of men who may answer at the last minute. These are requested to fill out and send in their cards just as soon as convenient.

PROF. SWAIN'S LECTURES.

Professor George F. "Pop" Swain, '77, late of the Institute Civil Engineering Department, and now at Harvard, gave a very interesting lecture on "The Relation of Forests to the Flow of Streams," and also one on "The Quebec Bridge Disaster," before the Washington University Chapter of Sigma Xi, in St. Louis, during his recent trip through the Middle West.

AN OUNCE OF PREVENTION.

The Adolph S. Lundin scientific system of Turkish Baths is the only natural and hygienic way to prevent that on-coming cold. Established nearly thirty years ago under the Tremont Theatre. Special rates to a party of six, five dollars.

HOCKEY GAME.
