by the Board. To the man having the largest number of votes, who has been accepted, we will present an edition of Technique. We will also give a De Luxe Edition to the man in each class who writes the best class history. The competition for the Assistant Business Managers is open to all members of the class of 1913. This competition offers fine business experiences to all the competitors, and the two men securing the largest number of advertisements before December 1, 1911, will be chosen as members of the business staff. All members of the Junior class who have the time to devote to this work should get out and show some spirit and enthusiasm by hustling for "ads." Any man desiring to do so may obtain full information and directions by reporting to Business Manager Calmes at once.

Are you a "Grind"? No "Well, at least you are a Freshman, Sophomore, Junior, Senior or Irregular, and this applies to you. A fine edition of Technique will be given to the man having the largest number of "Grinds" accepted. This is a plan which has never been tried before, and the fact is the contribution of material to the Year Book from members of the class (especially the Irregular Freshman). All jokes, cartoons, etc., which are not "Technique" material are included in this department. All articles must be typed or handwritten and addressed to Wm. de Katzenberger at the Cape.

OUT FIRST PLANS

Usual Prizes For Good Work in Various Departments—Routine Business.

The work on the 1913 Technique has been under way for a week and everything is now in good running order. All the members of the board have been on their separate departments and much is being accomplished at the start. It now remains for the school, as a whole, to cooperate with the board, in making the Year Book for the season of 1911-12 a success. We want the 1913 Technique to represent the entire school and not simply the Junior class. In order to accomplish this we need the help and support of every individual member of the Institute. This support can be given principally in the Art, Grind and Class History Departments. We ask for contributions to our Art Department from members of all four classes, and all work will be highly appreciated.

REV. A. A. STOCKDALE TO SPEAK AT UNION
First of a Series of Talks to Be Conducted by the T. C. A.

The Technology Christian Association has secured Rev. Allen A. Stockdale, D. D., of the Congregational Church, on Columbia avenue and West Newton street to speak to Tech men at the Union tomorrow at 1:30. His subject will be: "The Road to Evangelism." It has been arranged at this hour so that every man can have a chance to attend. The meeting will be promptly at 2 o'clock.

The T. C. A. is particularly fortunate in obtaining Rev. Dr. Stockdale because he is extremely busy at this time. On October 15 he is to address a large mass meeting in the American League Grounds. Surely one who can fill a place with such an encouraging seating capacity is well worth hearing, and should fill the Union to overflowing.

This is the first of a series of talks by prominent professional and business men to be given at the Union. Violins of Light T. C. A. promises to have many Tech graduates that have no special work yet to be done, and one can expect results very soon also. This will be of great interest to Tech men. It is an application of the Institute. Secretary Talbot says: "All of the talks will be practical talks by practitio-ners. They are seen in the practical side of life." Last year the T. C. A. had been most actively opposed to the adoption of the system by the students; but was the result of..."

CLIPPINGS FROM THE COLLEGIATE WORLD

The Latest News From All Around—See How They Live at Yale

Yale.

A long felt want has at last been fulfilled at Yale by the purchase of additional land for athletics. The track is directly opposite the present Yale Field and affords suf- ficient acreage for all outdoor athletics. Walter Camp states that the new field may be used as a site for the Stadium.

Gym practice has been going on at New Haven for two weeks, though the academic year commenced only on September 19th. Twelve men reported for work on September 19th, when the call was issued, and have been taking daily spins in the harbor since that time. This is the first start ever made in rowing practice at Yale. The crews are being coached this year by "Pin" Robinson, who succeeded John Nevins a short time ago.

Friends of the late ex-President Noah Porter have raised $12,000.00 for the erection of Porter gates between East Emerson and West Division Stalls in Minnesota.

A new group of engineering buildings has been opened this year at Minnesota, and classes are now being held in the experimental building. The installation of the machinery, which is the latest design, is practically complete. A travelling crane of ten tons capacity traverses the entire length of the laboratory, which is 235 feet long, and is the longest moving crane in any engineering school in the country.

The ventilation of the entire group of buildings is worthy of notice. Thirty cubic feet of air will be pro- vided every minute for each occupant of the buildings. The air will be changed every ten minutes.

Pennsylvania entered upon the one hundred and sixty-second year of its corporate existence on September 28th.

Especially significant to the Pennsylvanians is the fact that the present year is the new anti-hazing rule promul- gated by the Undergraduate Commit- tee. Hazing of any sort will not be tolerated, and a hazing regulation committee has been appointed to see that the edict is rigidly enforced. The committee will have a secondary duty of making freshmen live up to college traditions.

The erection of the Henry Phipps Institute was recently commenced. When finished the Institute will be one of the most thoroughly equipped research laboratories for tuberculosis in the country. An endowment of $60,000 a year will provide for a faculty of the highest order.

WINCHESTER

.351 CALIBER

Self-Loading Rifle.

As its name indicates, this rifle reloads itself, the recoil of the exploded cartridge doing the work. This places the complete control of the rifle under the trigger finger, which permits rapid shooting with great ease and accuracy. The .351 Caliber High-Power cartridge, has tremendous killing power, making it heavy enough for the largest game.

Catalogue fully describing this rifle, "The Gun that shoots Through Steel," sent upon request.
