

THE TECH

VOL. XXXI. NO. 87

BOSTON, MASS., WEDNESDAY, JANUARY 31, 1912

PRICE TWO CENTS

SOPHOMORES PICKED TO WIN CLASS MEET

Although the 1914 Men Will Get First Places, Freshmen Will Push Them.

While the Sophomores are depending on their good showing in the interclass meet to win the meet next Saturday, the Freshmen have been putting in some strenuous practice and are sure to spring some surprises on the Sophs. The 1915 men have shown much more interest in track and already have a meet arranged with Lowell High at Lowell.

The Sophomores should win the meet in spite of the efforts of the lower classmen. Wilkins and Wilson are two sure winners in the dash, and the Freshmen will be lucky to get a third place. The first two places in the quarter-mile will also undoubtedly go to the Sophomores. Bolton and Guething have shown themselves to be faster than any of the other men in this run.

Nye and Shedd are the fastest half-mile men in the Sophomore class, and Spencer is the only Freshman who can keep anywhere near in their company; 1914 has a chance to get all four places in the mile, but Wall may get some of the points. The Freshmen have several good high jumpers and they may get several points in this event.

JUNIOR PICTURES.

First Order Ready For Delivery at Cage Next Monday.

The first installment of Junior pictures have been ordered and will be ready for delivery at the Cage on Monday, the 5th, at which time there will be another order sent down to Notman for finishing up the second lot of pictures. The picture is very good this year and makes a very valuable wall ornament, as well as being a reminder in the years to come of the days at Tech.

There is still time to turn in those little snapshots of interesting men and incidents around the 'Stute which have been collected during the year. They are much needed additions to the book, and will be gratefully accepted by Photograph Editor Freeman at any time.

PRACTICAL DISCUSSIONS.

Meetings Will Be Held to Suit Convenience of Men.

This term the "Practical Discussions" started in the fall by the Technology Association will be continued in a more orderly form, according to the subject schedules that may be found outside the office and on the table devoted to the Association's use in the "General Library" in Rogers.

Meeting times, places and leaders will be arranged to suit any group that is interested in a series of discussions based on Bible study. It will not be necessary that a class follow the printed program exactly, so long as the variation is kept within reasonable limits.

With Kiviat, Hedlund and John Paul Jones in the Hunter Mile, it should be the feature event of the B. A. A. meeting.

ROBERT W. WEEKS IS BUSINESS MANAGER

Has Filled Many Positions in Institute Activities and in Prep School.

Robert W. Weeks, 1913, Business Manager of this year's Tech Show, is a native of Washington, D. C. He prepared for Technology at the Western High School in the above city, and during this period of his life was very active in school affairs. Like in many schpols, the students at Western High were required to drill, and Weeks acted in the capacity of first lieutenant. In his Junior and Senior years he was a member of the board which edited the school paper, and was also a member of the Debating team. All through his High School career Weeks was intensely interested in electricity, and often arranged interesting performances, with electricity as their basis, for the students.

Weeks is a Course 6 man, and has been quite active in student affairs during his three years' connection with the Institute. He played on the

ROBERT W. WEEKS.

1913 football team, was a member of the election committee, and ran on the cross-country squad. During the last year he has been acting on the Institute Finance Committee.

The department of which Weeks is manager is one of many duties. Its work commences early in November, nearly six months before the Show is produced; this early work consisting of obtaining advertisements for the Show Program. The Program is a great source of revenue to the Show, and the work of compiling and editing it is one which requires a great

(Continued on Page 2, Col. 2.)

TECHNOLOGY FIELD.

The Technology Athletic Field will be sold to Brookline if a satisfactory price can be agreed upon. Negotiations for the land were opened recently by the Board of Selectmen in that town. The field lies within the boundaries of Brookline and has been used on several occasions by pupils of the High School. There is no other athletic field in the town suitable for school purposes, and it is very probable that it will be sold in the near future.

1903 ARCHITECTS HAVE GOOD DINNER

Mr. Frank A. Borne, 1895, Told of European City Planning.

The architects of the Class of 1903 held one of the most enjoyable dinners last evening in the Union that has been given since their graduation, nine years ago, and had as the speaker a man who is eminently well fitted to tell much of interest and value to the young architect. After the dinner had been served the tables were removed and Mr. Frank A. Borne was introduced with the statement that his subject would be "Streets and Squares, Water-Fronts and Bridges," a subject which today, in the light of the fact that so much is being done toward improvement and general advancement in these directions, is of utmost importance to any who are apt to have the completion of such projects under their control. Mr. Borne, as a member of the Chamber of Commerce party from Boston, has recently spent several months in Europe studying conditions of cities and the progress made in the erection of better tenements, the establishment of city squares and more beautiful streets and the improvement of water-fronts, and from the fact that the entire party had gone for the express purpose of making this study they were enabled to meet many of the city architects and officials who have been most instrumental in bringing about the wonderful advancement which is so very apparent in the photographs of a large majority of European cities.

Liverpool was the first city considered, and the new tenements which have been built by the municipal government for the poor, to replace the horrible structures that have been used for so many years with little or no repairs. Next, Manchester houses were shown and the remarkable dwellings that can be had for almost unheard-of amounts of money as yearly rentals. In general the buildings are constructed as garden cities in the suburbs of the larger

(Continued on Page 3, Col. 2.)

NEW RECORD BOOKS.

The Finance Committee held a meeting last evening and books were given to the treasurers of the different class activities in which they are to keep their records, in order that uniformity might be had in keeping the accounts of the various departments of the underclassmen. A book-keeper told the men how to use these new books, which consist of a ledger and cash book in one volume. There is a slip in the front of each book as well which explains the way in which these books are to be used.

AMHERST SCHEDULE.

The Amherst College Swimming Team schedule for the season has been given out, and includes a meet with the Institute team. The schedule is as follows:

February 10—M. I. T. at Amherst.
February 16—Cornell at Amherst.
February 23—Columbia at New York.
March 2—Brown at Providence.
March 9—Triangular meet with Brown and Williams at the Pratt Natatorium.

CATHOLICS TO HOLD DANCE AT SOMERSET

Arrangements Complete For Great Social Success to Be Held Monday.

The annual dance of the Catholic Club is to be held on next Monday evening, February 5th. The committee in charge of the affair have been working very diligently and faithfully for weeks in order that this dance should be one of the greatest social successes of the season. The committee have been most fortunate in securing the ball-room of the Somerset Hotel for the affair, and everything points to a great success.

Everyone who wishes to have invitations sent out should leave their names and addresses at the "Cage" by noon Saturday at the latest. The price of the tickets is \$1.50, and every member of the Club should consider it his duty to attend.

The dance this year promises to be a greater success than ever before. The committee have made all arrangements except sending out the invitations. A full account of these will appear in THE TECH some time this week.

NEW FEATURES AT UNION.

Fireplace to Be Lighted Every Noon in the Living Room.

The new Victrola which the Union is to receive through the kindness of E. M. Berliner, '06, will arrive in about a week or ten days. The Friday night after its arrival all of the 50 records, which will be presented with it, will be played for the approval of the student body. The Victrola will be at the disposal of all societies which hold dinners in the Union, and it will be moved from room to room as the occasion demands. Once in a while one of the members of the House Committee will play at noon in the dining room as well as upstairs. It is possible that the privilege of playing it will be extended to responsible parties frequently. The machine is one of the best types made, finished in mission oak and is one of the \$200 models.

Another new feature in the Union will be that the fire will be lighted in the fireplace every noon. This will add greatly to the comfort of those who assemble there during the noon hours.

CALENDAR.

Wednesday, January 31.

1.30—Institute Committee Picture—Notman's.

6.00—Hockey Practice—Arena.

Thursday, February 1.

1.30—T. C. A.—Pres. Hamilton of Tufts—Union.

5.00—News Board Meeting—Upper Office.

Friday, February 2.

4.15—Glee Club—Union.

6.00—Hockey Practice—Arena.

8.00—Civil and Electrical Societies—Union.

Saturday, February 3.

Varsity Basketball vs. R. I. State—Kingston.

2.15—Musical Clubs' Picture—Notman's.

Sophomore Basketball vs. Rock Ridge—Wellesley.

THE TECH

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

WEDNESDAY, JAN. 31, 1912

Early in November we heard that the Freshmen had won Field Day, and we believe the report was true. It is far from our intention to induce the young idea to smoke, yet we observe that the unfortunate habit is already prevalent among some of the members of the class.

A class winning Field Day has a right to have pipes having on them the class numerals during its under-class years, and it has been a custom for each class to have them. It appears as though the Freshman President either felt it incumbent on him to break this custom, or did not know of its existence. There are, however, a number of men who have expressed their desire to have class pipes, and if these men are in a majority they should have them. To this end the class President should call a meeting, at which a committee might be elected or appointed after the class has considered the matter. It is not well to break up an established custom, unless it be derogatory to the students' interest.

The Victor Victrola that will soon be among our possessions in the Union, and the fire that the House Committee proposes to build in the fireplace daily at noon will lend a more homelike air than we have known for some time. A cheery fire is always grateful in winter, and the fireplace in the Union is large enough for a number of men to gather around.

When the Union was new a fire was lighted in the place for the first couple of winter months, that is, during the fall of 1908. We cannot say why it was discontinued, but we trust that it will prove comforting now and will be maintained.

TUNGSTEN.

Owing to the decrease in the market for tool steels there was a falling off in the production of tungsten ores last year. Less than two-thirds the output for 1910 was marketed during 1911. Colorado gave the largest returns, 740 tons, and California came next with the second largest.

Too bad that Bolton had to fall down so close to the finish in the C. A. C. meet.

"BOSTON'S PROPOSED BELT LINE" LECTURE

Mr. Long to Talk Before Joint Meeting of Civils and Electricals.

The joint meeting of the Civil and Electrical Engineering Societies which was postponed last term on account of exams, is to be held Friday evening in the Union. The talk on "The Proposed Belt Line for Boston" which Mr. Henry C. Long is to give is on a subject with which he is thoroughly familiar, for he is the originator of the plan. Mr. Long was also sponsor to the Boston Port Bill which secured improvements as important as this plan outlines.

Mr. Long's idea is to have a belt line starting at one side of the harbor and almost completely encircling the city at a ten-mile radius, at which distance it will pass through many of the surrounding towns. By establishing an extensive system of free transfers this line will greatly reduce the time taken to get from one suburb to another. Even if this line is not used for carrying freight, it will be a great factor in aiding the development of the towns surrounding Boston. Within a year a plan similar to this has been put in operation in Cleveland, and has proved very successful. Systems like these have been working successfully for years in Berlin and some other foreign cities, and Mr. Long's plan cannot be said to be an experiment.

DEATH OF GREELEY, '76.

Loss of an Institute Graduate Greatly Felt in Chicago.

The death of Mr. Frederick Greeley, '76, of Chicago, means a great loss to the various civic organizations of Chicago, especially to the City Plan Commission, of which he was secretary, and to the City Club, of which he was an indefatigable member. He was also a member of the Special Parks Commission, the playground associations and similar organizations.

Mr. Greeley demonstrated an unusual capacity for sincere devotion and thoughtful constructive work; he was close to the heart of those activities by which our ways are made clean and our children's lives more full and free. He will be missed not only by his friends, and the great city where he made his home, but his loss will be felt the country over.

TECH SHOW MANAGER.

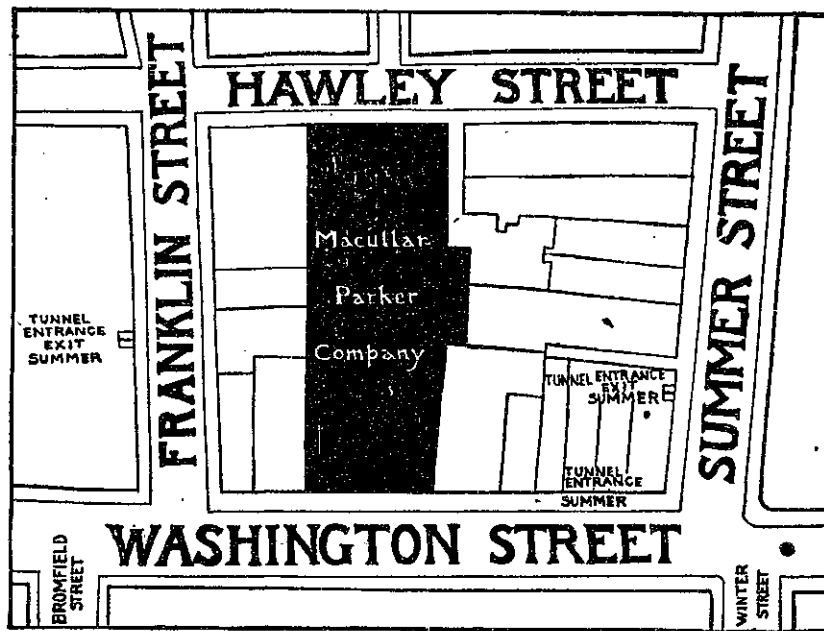

(Continued from Page 1, Col. 2.) amount of care and time. In addition to this the business department attends to the drawing up and signing of all contracts, the hiring of the coach, the renting of the theatres, the arranging of trips, and many other items.

Work in the business department has been under way now for nearly a month, and has started with a rush. Advertisements are coming in with a rate which already spells success for the Show in a financial way; negotiations are being made for a trip to Northampton, and indications point to the fact that under the direction of Weeks, the business department is going to have a most successful year. AN OUNCE OF PREVENTION.

The Adolph S. Lundin scientific system of Turkish Baths is the only natural and hygienic way to prevent that on-coming cold. Established nearly twenty years ago under the Tremont Theatre. Special rates to a party of six, five dollars.

So that proposed Harvard-Minnesota football game has fallen through after all.

T. C. A. PRES. RESIGNS.

Nominations For This Office
Must Be in by Next Tuesday.

The Cabinet of the Christian Association is sorry to announce to the Association and to the Institute at large that its President, Gerald M. Keith, has had to resign from office, and that an election will be held in the near future to choose a new man for the position. The precise date can not yet be announced, but the meeting for the purpose will be held some time within a couple of weeks in the Union.

Nominations are now open. Proposals must be signed by at least five members of the Association and given to any Cabinet member, or else left at the office in Engineering B, or, if more convenient, at the Cage, addressed to "The T. C. A. Nominations Committee," before Tuesday, February 6, at 5 o'clock.

MUSICAL CLUBS MEET.

Partial Program Given Out. Pictures to Be Taken Monday.

The Combined Musical Clubs held a meeting yesterday in the Union, at which many of the dates for the ensuing season were announced. As far as is known now they are: Wednesday, February 7, a concert at Melrose Highlands; Saturday, March 17, a dance at Wellesley; March 6, a dance at the Young People's Club at Melrose, and some time in March a dinner will be given at Roxbury, which will be followed by a concert and a dance.

All of the men must assemble at Notman's Saturday, at 2.15 P. M., for the picture. They must have their full dress with them.

The rehearsals of the Glee Club will be Monday and Friday, at 4.15, and the Mandolin Club on Tuesday and Friday, at the same hour.

1903 ARCHITECTS DINE.

(Continued from Page 1, Col. 3.)

places, and it is remarkable to see what wonderful results have been obtained in the very few number of years that they have been under consideration.

Slides taken from the houses of both London and Paris were shown, with their excellently planned and beautified streets and squares. A sharp contrast was drawn when several pictures from American cities were shown, with no apparent thought for the beauty of the general appearance of a long street, or any means of breaking the monotony of its sameness.

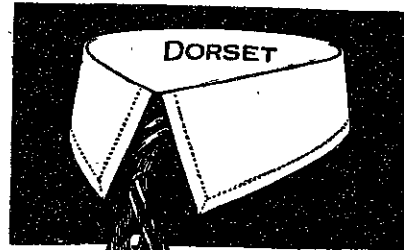

The cities of Belgium and Germany were then considered and the great advantages of using the water-fronts for both pleasure and business purposes by means of raising the parkways and drives to the general level of the streets and keeping the business and traffic of the wharves on a level much nearer the surface of the water were made clear. With this unique idea neither the use of the water-front as a business place is lost, nor the charm of having parks and drives near the water.

Mr. Borne's talk was of great value from an architectural point of view, as well as an economic, and the men were all able to see in brief what great advances have been made.

NOTICE.

Poster Competition for Tech Show, 1912, closes Thursday, February 1st. All posters must be in the hands of the publicity manager before 5 o'clock on that day. (87-2t)

Princeton has the hockey championship about nailed after beating Yale Saturday. We should have a game arranged with them at an early date.
