VARSITY RIFLE TEAM SECURES NEW RANGE

Systematic Instruction for New Candidates to Begin Next Monday.

J. E. Williams, assistant in the Military Science Department, and James Rudolph, President of the M. I. T. Rifle Club, are going to run a sub-course in military science, with the object of bringing out new material for the Varsity Rifle Team, by holding trials on Monday and Wednesday afternoons in the armory of the First Corps Cadets on Columbus avenue.

Major Cole's target practice has shown that the Freshman class contains much promising material, some of the most prominent men being Haslam, Fessenden, Lyons, Dalton, Livermore, Connors, Cardwell, Mitchell and Brown. Such of the members of last year's team as are still in the Institute are coming out and will bring valuable experience to the support of the team.

The terms for the use of the range in the South Armory were not very favorable, but through the kindness of Lieutenant Simmonds, I. S. R. P., Mr. Williams has secured the use of the Cadets' range. The range has seven targets and is equipped with all the latest appliances, including telescopes.

The candidates are to be instructed in firing offhand, sitting and prone, corresponding to 200, 300 and 500 yards, respectively. A one-inch bull's-eye is to be used, with 22 sub-calibre rifles. The men are to be given sighting practice and theory, and are to be instructed in the theory of windage, light and temperature corrections in the field.

The Varsity team is to compete in the national intercollegiate championship matches in June. This meet was won last year by the Massachusetts Aggies. Sergeant-Major Huddleston and Private E. C. Lincoln of the Massachusetts State team will assist the M. I. T. men at the match.

SECOND TEAM SCHEDULE.

Five Games Already Arranged and Several Others Pending.

Manager Sampson of the Second Basketball team has just announced his completed schedule, which includes a game with the Dartmouth Freshmen on February 24th. The official line-up of the team has also been announced by Captain Capen, and is as follows: Dalton and Reed, forwards; Sampson, center; Capen and Metcalf, backs.

The schedule is as follows:
Feb. 7.—Newton Y. M. C. A., at Newton.

Feb. 14.—Cushing Academy, at Ashburnham, Mass.

Feb. 16.—Waltham Ramblers, at Waltham.

Feb. 22.—Boylston Five, at Roxbury Y. M. C. A.

Feb. 24.—Dartmouth Freshmen, at Hanover.

The manager has also games pending with a few other schools, including Allen School and Dean Academy.

A boy whose leg was repaired in New York by grafting some skin from a dog complained that his shin barks easily.

SENIOR PORTFOLIO MUST HAVE MATERIAL

Men Are Asked to Have Pictures Taken—History Blanks Out This Week.

The Senior Portfolio Committee wishes to urge upon every Senior who has not as yet had his picture taken for the Portfolio the importance of attending to it as soon as possible. It is only necessary for him to go to Hearn's studio at 727A Boylston street, between Exeter and Fairfield, and make an appointment. This, however, must be attended to before February 20th, for after this date it will be impossible to include any pictures or histories in the publication.

The attention as well of those men who have already had their pictures taken is called to the fact that the proofs must be returned as quickly as possible to Mr. Hearn, in order that no delay will arise in the publication of this year's annual.

History blanks are now being printed and will be ready for distribution during the present week. Each man is asked to use great care in filling out these blanks, in order that the committee will not have to sort a large amount of unnecessary material. Perhaps the most important part of the blank in which the greatest care is necessary is in the filling out of the years in which the men have participated in the Institute activities. After each activity named the number of the year must be stated in numbers so that no mistake can be made. These blanks must be returned to the committee as soon as possible.

TECHNIQUE BALLOTS.

Electoral Committee to Be Chosen for 1914 Annual.

Early next week the ballots for the 1914 Technique Electoral Committee will be out. In order that the names of all men who are taking a majority of subjects with the class may be on the ballots, it is desired that all unclassified students who have not yet paid their dues leave their names at the Cage on or before Wednesday noon.

Twenty-five men are to be elected to this committee, but only those who have paid their dues are eligible to serve. Dues may be paid to the treasurer or any of the directors of the class.

COURSE II SOPHOMORES!

All members of the Sophomore class who are now eligible for membership to the Mechanical Engineering Society should leave their names at the "Cage" for R. M. Ferry. The list of members is now being made up for the Technique, and all names must be sent in soon in order to be included.

MUSICAL CLUB CONCERT.

The Musical Club men must report at the North Station at seven o'clock on Wednesday for the trip to Melrose Highlands without fail, as this is to be an important concert. There is to be no dance and the affair will probably be short.

CATHOLICS HAVE BEST DANCE EVER LAST NIGHT

Big Crowd of Beautiful Women and Distinguished Men Enjoy Club's Hospitality.

Five hundred people gathered in the large ball room of the Hotel Somerset last evening at the invitation of the Technology Catholic Club to enjoy their annual formal dance. The room was beautifully decorated in cardinal and gray, with clinging vines, which served only to make the Institute colors stand out more strongly in their beauty. The gowns of the ladies were exquisite in the extreme, and with the severe black and white of the gentlemen's evening clothes made a striking picture painted in everchanging color.

The occasion of the best dance ever held by the Institute Catholics was marked by the breaking of one record, for all of the matrons and patronesses were present. The club enjoyed fine refreshments in the large dining room at intermission, and during the eleventh dance they distributed favors to the ladies.

There were many extra features of interest to those who were in attendance at different times during the evening that lent much to the enjoyment of the guests. Poole's Orchestra furnished the music for the festive occasion, but no Tech man needs to be told that it was good, for everyone knows the music that makes Tech proms famous throughout the country.

M. E. SOCIETY TRIP.

Men Will Visit Stanley Steamer Plant Friday Afternoon.

The Mechanical Engineering Society has planned an excursion for Friday afternoon, February 9th, which should be one of the most interesting and instructive trips taken by any Institute society during the year.

The Stanley automobile works will be visited in Newton, and the entire process of manufacture and testing will be inspected by the students. The opportunity will be given the men to see the general make-up of the motor and the assembling of the parts, which will be most interesting, and they will be taken through the plant in such a way that the finished product will be seen last, having visited all of the departments in their proper order.

The train for Newton will leave Trinity Place Station at 2.09 P. M. Friday, and it is hoped that a majority of the members will be able to go.

MANDOLINS! UNION!

There will be a special rehearsal of the Mandolin Club in the Union this afternoon, at which time trials will be held so that some new pieces may be secured. All the men who wish to enter the trials should report to Manager E. C. Taylor at 4 o'clock, in the living room of the Union.

The longest standing ski jump, 144 feet, this winter, in the American Ski Association, was made on January 31st by Sigurd Hansen, a professional, from Fergus Falls, Minn.

Any more additions to the Newbury street menagerie?

VARSITY HOCKEY GOES AGAINST AMHERST

Squad All in the Best of Condition—Expect Fairly Easy Game in Amherst.

Manager Ranney of the Hockey team announces his next game on Saturday, the 10th, at Amherst, with Amherst, which means another trip for the team which has proven itself such a fine bunch of travellers.

This game will in some degree take the place of the one which was scheduled with the up-State college men last season and which had to be called off because there was no ice in Amherst. They expect to take the ten members of the varsity squad on the trip, and they will all probably get a chance to get into the game.

The Amherst boys have played a number of hard games this season and have shown themselves a fairly strong team, although they were decisively defeated by Williams. They have some very good skaters and will probably depend more on this than their team work, for they have no very great amount of practice, since they are without a rink.

TECHNOLOGY CLUB.

Ladies' Night and Talk by Prof. C. E. Fay.

Professor Charles E. Fay of Tufts College will give a talk at 8 o'clock tonight before the Technology Club on "Mountaineering in a New Switzerland." Professor Fay is well known as a mountaineer, and many of the members no doubt remember his delightful talk of last year. The talk tonight will be on the Canadian Rockies and, as it is illustrated, it should be very interesting.

As this is ladies' night at the club, members are privileged to invite ladies to the talk and to the dinner which will follow later in the evening.

It Sounded Serious.

Husband—"I tell you, my dear, I don't have any kind of success in business. I'm afraid I have a Nemesis."

Wife—"Well, Why don't you see a doctor about it?"—(Tid-Bits.)

CALENDAR.

In Charge of S. H. Taylor, 1914.

Tuesday, February 6.

4.15—Mandolin Club Rehearsal—Union.

5.00—Basketball Practice—Gym.

Wednesday, February 7.

5.00—Track Practice—Gym.

6.00—Hockey Practice—Arena.

8.00—Musical Clubs—North Station—7.05.

8.00—2nd Basketball Team vs. Newton Y. M. C. A.—Newton.

Thursday, February 8.

3.00—Track Practice—Oval.

4.00—Basketball Practice—Gym.

8.00—Roger Babson on "Business Conditions"—Huntington Hall.

Friday, February 9.

2.00—M. E. Society—Trinity Station—Trip to Newton.

4.15—Glee Club—Union.

4.15—Mandolin Club—26 Lowell.

5.00—Basketball Practice—Gym.

6.00—Hockey Practice—Arena.

8.00—Victrola Concert—Union.

We regret to revive the THEORETICALLY DEAD classification that we inaugurated last term. Yet to properly describe what we wish to condemn, the title is handy and not too offensive. It concerns activities this time rather than individuals.

Some men have said THE TECH misses half the news. This is a slander. Yet we must acknowledge that there are things that slip our notice until after they are public property. The reason for this is again a case of interest. Recently (so we now hear) the Southern Club held a dance. THE TECH contained no news item to that effect. Likewise Cleofan held a tea or reception, whereof we were ignorant. Now, how in the name of common sense was THE TECH to know of either of these events if those activities did not show sufficient interest in it to at least notify us?

This all boils down to the fact that the paper needs and desires co-operation among the other activities. We are alert for news, and we find it difficult to get everything with our necessarily limited time and numbers. Even in the simple matter of handing in dates for the calendar many activities are notably lax. Yet if the society desires to be brought before the public the first assistance sought is that of THE TECH. We trust the THEORETICALLY DEAD ones will wake up from their somnolence.

INSTITUTE COMMITTEE.

The Institute Committee will hold a regular meeting Wednesday afternoon at 4.15 in 3 Engineering C. Many matters of importance will come up at this meeting, and it is hoped that every member will attend.

Due to the resignation of G. M. Keith, it will be necessary to elect a new editor-in-chief of "Concerning M. I. T."

A new short yell is to be presented by each member, and it is hoped that some good ones will be offered to choose from. The matter of an appropriation for the use of the Athletic Association will be brought up. Another proposition which will be considered is the replacing of the regulation enameled Technology button with a similar button of silk.

The members are urged to bring before this meeting any and all matters which may tend to the betterment of student conditions at the Institute.

PRESIDENT'S IDEAS ON COLLEGE BUILDINGS

Notes Their Deplorable Character When Compared to the Best Commercial Designs.

One of the strong points noted by the President on his recent trip through the West is that of the great superiority of arrangement, both for lighting and efficiency of the commercial type of building over that in use in the colleges and universities.

This is something that is very deplorable, for the seats of learning should be showing the way and not following in the footsteps of capital and labor. The men who are being turned out from the various schools of architecture are not getting all that they should from their courses, for the reason that they are not surrounded by conditions which are examples of the most perfect type of building design. The industrial buildings, of course, have one advantage which can never be overcome by the educational architect, and that is the fact that they must be constantly enlarging and rebuilding, while the university buildings, once built, remain for years. In the constant change to compete with trade they are obliged to use the newest and best type of design. This, however, does not excuse the newer buildings of a college for being away behind, and neither does it give a new institution or one that has moved any chance to find excuse for its old style of halls and type of arrangement.

President MacLaurin noted particularly the fact that the Institute must be very careful to solve correctly the problem of putting up the best type of building for the purpose demanded. This must be as good and a little bit better than those used by commercial corporations.

CHANGE IN COMPANIES.

Companies Reorganized as Result of Changes in Drill.

Major Cole has, for the time being, departed from the usual custom of having the Battalion drill two hours in succession on one day. He did this because he realized that it was very tiring on the fellows to have to do this, for as he expressed it, it is "no joke" to drill two solid hours on a hard armory floor. However, when the weather gets more suitable he proposes to return to the old regime, but to have it out of doors, where it will be more pleasant.

As a result of this the arrangement of the men in the companies has had to be changed completely. With the partial division of the class into courses the sections have naturally become changed a great deal. This difference in sections has made a complete change in the halves of the class which drill the same days. The companies have all had to be entirely reorganized, even including the officers. Two of the companies, "A" and "B," have six too many corporals, while the other two have just as many too few, owing to the rearrangement.

In a short while everything ought to be satisfactorily arranged and the race will be on for the dinner after the prize drill.

CHANGE IN PRACTICE.

Since the rearrangement of the Freshman gymnasium classes a considerable change has been made in the times for practice of the various athletic teams. The track team has had to work on different days, which in turn put the Varsity basketball team out of its regular days. The team will now practice on Tuesday and Friday at five o'clock and on Thursday at four o'clock. Members of the basketball squad will all please take notice of this change.

ONE PIECE HAMMER IN THE NEW MODEL Ithaca

IF you see more than one hole in a hammer you know that extra parts are fastened to the hammer whether shown or not. Our hammer is all one piece, only one hole, no toggles or stirrups attached. WE have cut out all cocking levers, bars, push rods, and hammer stirrups, and cock the gun direct from toe of hammer. OUR hammer travels less than half an inch, taking only 1-625 of a second to operate. STOCKS are not cut away for hammers or lock plates and are dovetailed into frame to prevent pitting and spreading. THE speed of our lock will increase your score at traps and kills in the field; the simple scientific construction of the gun makes it practically fool-proof, and will last you a lifetime if you take care of it and a good many years if you don't. CATALOG Free; 18 grades, \$17.75 net to \$400 list. JUR 5-4 lb. 20 bore is a hummer—be down-to-date and shoot one.

BIG DELEGATION OF MARYLANDERS ARRIVE

Flying Trip Brings Distinguished Men From the South to Inspect the Institute.

Yesterday morning the committee from John Hopkins University of Baltimore, consisting of President J. D. Price of the Senate, Senators C. D. Benson, E. M. Hammond, S. Emmert, W. J. Beck, P. J. Campbell, Speaker of the House, J. M. Trippe, Delegates T. G. Campbell, J. E. Taylor, W. H. Mattbie, P. L. Hargett, O. Merbury, Attorney-General Allan Poe, Secretary of State Robert P. Graham, R. B. Keyser, president of the Board of Trustees of the University, and Messrs. Rendell, White and Griswold of the board, President of the University Ira Remsen, Professors Ames, Welch and Clark of the faculty, inspected the Institute and had a long conference with the members of the Institute Faculty.

The object of this inspection was to get material which can be used in founding a new technical school in the university. John Hopkins, like the Institute, is about to move to a new location, and at the time of making the change they propose establishing the new department of practical science. They have already found the new site, and the Legislature is to make a grant of some million and a half of dollars toward the new buildings and the new department. The university will have its new home on the historic Carrollton estate, which is about three miles out from the business centre of Baltimore.

The trip which brought the large committee to the Institute included an inspection of the Universities of Pennsylvania, Columbia, Yale, Harvard and Technology, and was financed by a man who suggested that it was the only way that they could obtain the information which they desired.

CITY ATHLETIC LEAGUE.

Major Briggs Elected Chairman of Municipal A. A. Committee.

The City Council has voted to start the municipal outdoor athletic season on March 18. Major Frank H. Briggs has been elected chairman of the Games Committee.

There will be two main competitions. One on March 18 and the other on April 19. Major Briggs has arranged to have a ten-mile cross-country race on both of these days, the prize being a cup presented by Mayor John F. Fitzgerald. Besides the competitions in March and April, a varsity of outdoor events have been planned to take place in the Spring and Summer. They will be competitive in part, but there will be games for different ages. It is the hope of the major that some of the local Tech talent will compete.

THE STRIKE DISCUSSION.

Yesterday afternoon the first of the second term series of the Christian Association Bible classes for practical discussions met in one of the smaller rooms of the Union. The discussion took in the subject of strikes and whether or not the militia should be called out to quell the disorders which sometimes accompany them. A large number of men were present and a lively discussion took place. The views of the different sides were well expressed, but no definite conclusion was reached.

Another class will be held today at the T. C. A. office, and the Secretary hopes that it will be even better attended than the meeting of today.
