

THE TECH

VOL. XXXI. NO. 93

BOSTON, MASS., WEDNESDAY, FEBRUARY 7, 1912

PRICE TWO CENTS

DR. ALEXANDER MANN WILL SPEAK IN UNION

"The Tech Chaplain" Will Talk at Christian Association Meeting.

This week's speaker at the Christian Association Thursday meeting, Dr. Alexander Mann, is a person who has always shown great interest in Technology ever since he took the office made famous the world over by his predecessor, Phillips Brooks. Years ago, at the time of the Boston fire, the old Trinity Church building was destroyed and the Institute offered Huntington, then called "Technological" Hall, to the church, and the congregation used it until their new home, built by Richardson, was completed, almost across the street from Rogers.

Since that time, instead of the Rector of Trinity coming to a Tech building to talk, it has become necessary for us to go to him. Tomorrow, however, a semblance of the days before our Union was dreamed of will be revived when Dr. Mann comes over to Tech and speaks to the crowd assembled there at half-past one tomorrow.

Do not forget that Dr. Mann has earned his title, "The Tech Chaplain," by his interest in the Institute, his many Baccalaureate sermons, and his generosity in opening "Trinity House," 22 St. James avenue, to the use of any Tech man who would like to go there.

NEW "L" CARS TESTED.

Five Course VI Men Investigating Cambridge Subway Cars.

In the new Cambridge Subway, five Course VI men, H. M. Foley, J. C. Freeman, P. E. Golsam, H. D. Kemp and T. B. Lawler, have been testing the cars that are to be run there for the Boston Elevated. Preparations for these tests were made during the week before exams, and at the present time a large part of the testing at the Cambridge end has been done, but as the Park street end is not ready for testing, the men have not been able to complete the work.

They are testing out a new type of car made by the Westinghouse people expressly for this subway, and are comparing with the theoretical behavior of the cars and the actual behavior on the rails. One important matter that is being investigated is the time required to accelerate a car from a stop to a speed of forty miles an hour. Another equally important matter is the efficiency of the brakes.

From these data the "L" will be able to judge how closely the contract specifications are covered, and will be able to cure the most noticeable faults before the public uses the tunnel.

An annual athletic tax of five dollars has been added to the regular entrance fee at the University of Michigan. This fee will admit all students to every game and contest and will be imposed on the women as well as the men. Three-fifths of the tax paid by the women will be credited to the improvement fund for the girls' outdoor playground. A permanent fund will be established for the maintenance of Ferry Field, the regular university athletic grounds.

BABSON WILL SPEAK TO SOCIETY OF ARTS

Explains "Anticipating Business Conditions by the Study of Statistics."

Tonight, at 8 P. M., Roger W. Babson will deliver an illustrated lecture on "Anticipating Business Conditions by the Study of Statistics," before the Society of Arts, in Huntington Hall, to which the public is invited. Mr. Babson is a well-known writer on economics, and his recent financial articles for the guidance of the amateur in the field have gained large prominence.

In its announcement of the lecture the society says that Mr. Babson has, since his graduation from the Institute, fourteen years ago, developed the greatest statistical organization in the world, and will explain fundamental business conditions which are kept track of by means of maps and other records. In addition to his facts of present business he will show how it is possible to forecast future conditions.

The subject will be treated popularly, and will be accompanied by wholly new lantern slides and promises to be interesting.

COLLEGES GROWING.

Many Institutions Find Larger Quarters Necessary.

The Institute is not the only large institution of learning which is in need of larger quarters, as a careful consideration of the problem finds that a large number of them are looking around either for additional land or a different location. Among these which come readily in mind are: the University of Pittsburgh, John Hopkins University, North Western University, University of Minnesota; because they were visited by the President on his recent trip through the West.

At the University of Minnesota they have purchased about fifty acres to add to the campus and are having a large number of buildings constructed both for additional room and also to replace some of those already in use for many years. The work of design is being done wholly by a Technology graduate, Cass Gilbert, '78, and he has a number of other Institute men working with him in charge of the different departments of construction. This is a work that speaks volumes of praise for the architectural department of the Institute as well as for the graduate himself, for Mr. Gilbert was chosen as the best man for the place.

VICTROLA CONCERT.

The Union House Committee are planning to give a demonstration of the capabilities of their new Victrola on Friday evening of this week. About twenty-six of the fifty records provided in the gift have already arrived, and this will afford a pleasant evening's entertainment to all that care to attend. The best way that the student body can thank Mr. Berliner for his gift is to turn out in large numbers to this concert and entertainment and accord him a rising vote of thanks for his interest in Tech men and their welfare.

WRESTLING AT "STUTE" HAS COME TO STAY

Squad of Twenty Men Reporting Regularly for Practice at Gym.

Wrestling at the Institute has grown remarkably during the present season. The team has grown from five men to a squad of almost twenty, and more are coming all the time. Captain Smythe-Martin has shown that he is very capable in the management of this class of sport and has developed a team such as the "Stute" has never seen before.

This has been helped greatly by the fact that the Freshmen who are working out for it are excused from the Gym, as they are for doing track work. Although none of the candidates have shown what would be called championship material all are in good shape and are adept enough at the art to make the team noticeable. Plans are under way for a tournament among the candidates, and it is hoped that medals will be given to the winners of the different classes. There will be five classes ranging in weights from 115 to 185, and being evenly divided the spectators will have plenty of chance to view all kinds of bouts.

As is usual in wrestling, there have been fatalities, although with the Tech men they have been remarkably few. Deble, '12, broke his big toe about two weeks ago and will be out of the game for some time. Duff, a promising Freshman, dislocated his collar bone, which laid him up for a couple of weeks, but withal these men are anxious to get back and try to find another soft place on the mat, for they are sure there are some left.

SOPHOMORES UNBEATEN.

Freshman Series Nearby—Odds Taken by 1914 Players.

Few teams are able to boast of the record that the Sophomore basketball team has made this season in preparing for the series of games with the Freshmen, beginning February 21st. The team, composed of Comber, Tyrill, Ruoff, Williams, Bryant and Price, with Henderson and Fox as substitutes, have succeeded in winning all the games that they have played. Teams with such fine records as the Bridgewater Normal School squad, unbeaten by but one other Bay State team, fell by a close score; Salem Normal and Haverhill High were both defeated in fast, close games, and Andover succumbed by a score of 19-16.

Williams leads the men in number of baskets shot from the floor and has showed good, consistent playing. Tyrill, at forward, and Price at back, have proved themselves capable in offense and defense. Captain Comber and Bryant are to have their share of the credit also. Of these men and the substitutes it is thought that all will play in the coming interclass games but Price, who is at present convalescing from typhoid at his home. These contests are sure to be interesting, though the odds seem to lie heavily toward the Sophomores. They play another game on the seventeenth of this month, just before the Freshman game, with Allen School. If the five succeeds in landing this game they will have paved a worthy path for interclass honors.

T. C. A. MEMBERS TO ELECT NEW PRESIDENT

Will Meet Friday Night in the Union for Social and Business Affairs.

Friday night, at 8 o'clock, in the Union, the members of the Technology Christian Association will gather for the first social and business meeting of the year. All the members have been sent reply post cards and it is hoped that they will send word to the Secretary immediately whether or not they expect to come, so that it will be possible to estimate for refreshments.

The principal business to come before the meeting will be the election of a new president to take the place of Gerald M. Keith, who has resigned his position. It is hoped that all the members will make an especial effort to be present for at least part of the evening.

MUSICAL CLUBS' CONCERT.

Men Will be Taken to Melrose in Special Car.

The Mandolin and Glee Clubs will give a concert this evening at the Congregational Church in Melrose Highlands. The fellows are to leave the North Station on the 7.05 train, track eight, and will have a special car. The program will be practically the same as that given at the winter concert, and in addition the Glee Club will probably sing "Take Me Back to Tech," accompanied by the stringed instruments.

This will be the first regular appearance since the winter concert and will give the men an excellent opportunity to bring themselves back into the spirit of the clubs, making a good start for the best spring concert which has yet been given.

NEW BUILDING FOR HARVARD.

It is likely that the Harvard Music Department will soon have a new building as an alumnus has offered the sum necessary for the erection of the edifice, conditional upon the raising of a fund for maintaining it. The plans for the building are now being prepared and estimates will soon be called for, so that the department will not have to wait long before occupying its new quarters. Besides serving as a home for the Music Department the new building will offer accommodations for some of the undergraduate musical organizations.

CALENDAR.

In Charge of S. H. Taylor, 1914.

Wednesday, February 7.

5.00—Track Practice—Gym.
6.00—Hockey Practice—Arena.
8.00—Musical Clubs—North Station—7.05.

8.00—Roger Babson before the Society of Arts—Huntington Hall.

8.00—2nd Basketball Team vs. Newton Y. M. C. A.—Newton.

Thursday, February 8.

3.00—Track Practice—Oval.
4.00—Basketball Practice—Gym.
8.00—Roger Babson on "Business Conditions"—Huntington Hall.

WEDNESDAY, FEB. 7, 1912

This afternoon the Institute Committee has to consider the substitution of a silk red and gray button for the present common enameled one. It seems as if some standard style should be adopted; one that is simple and neat in appearance, and less of a badge than the usual (and varied) enameled one.

The style to be considered is one that has been suggested by Major Cole (who since his arrival has shown most active interest in the Institute and its students). It consists of a small button, over the rim of which is wound a red and gray silk ribbon. Except for the difference in color it is similar to the one used by all graduates from West Point, by whom it is regarded with the utmost respect.

The adoption of a uniform insignia which could be worn on practically all occasions by both undergraduates and Alumni would be a long step toward increasing the prestige of the Institute. It would also be of material benefit to students and former students as it would afford a common means of recognition. To see men of importance wearing these buttons would create first a curiosity, then an interest in the cause. This would mean that eventually the button would mark the wearer with a distinction, and one whereof the wearer might be proud. We hope that its adoption will receive serious consideration, and if adopted will be well presented to the student body.

During the President's recent trip he was particularly struck by the familiarity of the Alumni with the news of the Institute. More than this, however, is the remarkable feeling which the older graduates have for Rogers Steps. To these men Rogers is the Institute from which they graduated. The President said: "Not a few of them (the Alumni) hoped that it might be moved to the new site."

This is a surprising example of the loyalty of the Alumni. The old custom of sitting and smoking "on Rogers Steps," as the song says, still sticks in their minds as one of the worth while souvenirs of their college days. The Union, of course, has had much to do with the lessening of this feeling, yet it is well to recall it to mind. It will prevent the reverence we should have for such customs from dying away.

RELAY TEAM MUST DECIDE UPON STARTER

Does Time Count More Than Experience is the Issue.

At the relay trials Bolton, 1914, Munch, 1913, Benson, 1913, and Guething, 1914, were chosen for the team. Thompson, 1913, was the starter last year and proved very efficient at that position. At the trials Benson tied him, and the second time Thompson had to drop out. After the first practice Benson, who took the position as starter, realized that he could not fill that place as well as his predecessor, so he decided to drop out and allow Thompson to take his place. Thompson, on the other hand, thought that time counted more than anything else and did not care to deprive his colleague of the position. They left it to Mr. Kanaly to decide. Naturally this was a step of great importance to take and required much delicacy to handle. Mr. Kanaly does not feel that he should take the responsibility of making the decision because it might cause comment about favoritism when the issue would not be on that account at all. Today a decision is expected to be made by the men themselves. Mr. Kanaly will, of course, have to decide if the men do not come to an understanding among themselves today at the trials. He feels that they have in Benson a man who is fast becoming one of the fastest, yet he thinks that Thompson would be a desirable asset to the team.

COMMUNICATION.

(We invite communications from all men in the Institute on important subjects. We take no responsibility for their sentiments and do not agree to print any that may come in, whether they are signed or not.)

To the Editor of THE TECH:

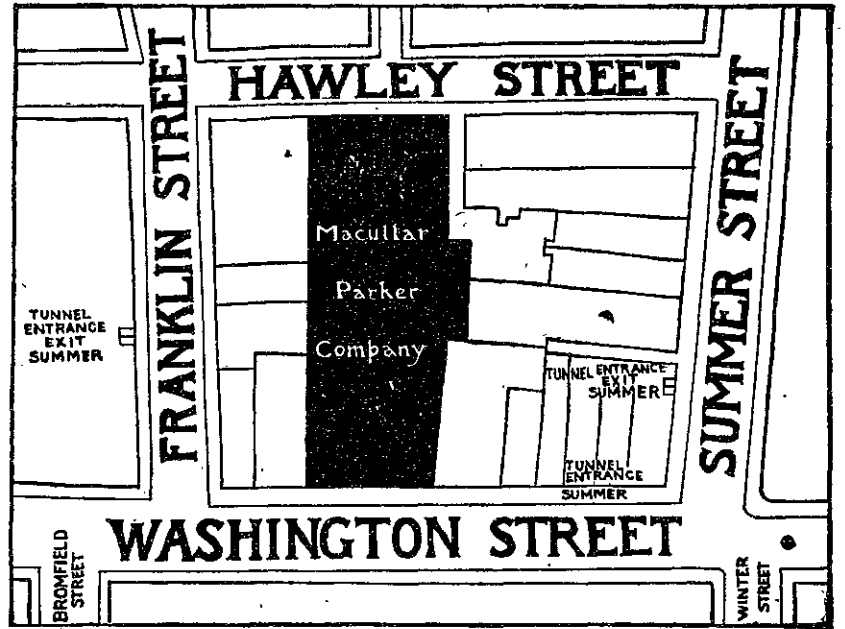

Morrison I. Smith, who still believes the pen mightier than the sword, has written a letter to the president of Harvard College, examining him on the question of whether he knows that 19 of the students are serving with the National Guard in Lawrence, whether he is interested financially in the stock of the Lawrence mills, whether any of the Harvard funds are so invested, and a number of other rather pertinent inquiries. In commenting upon this in an editorial, the Lowell Courier-Citizen says: "Mr. Smith appears to hold the misguided opinion of certain other gentlemen relative to the State militia. He believes that nothing could be done that would intensify class hatred more than to send college students to quell a riot. On the other hand, neither Mr. Swift, nor any other labor leader will agree that a working man should serve in the ranks of a volunteer militia. Just what class of citizens is held to be eligible to the service?"

"As a matter of fact, the ranks of volunteer regiments are filled with young men who feel a personal loyalty to their regiments and the State they serve. Far from setting class against class, the service of a college student with his troop or his company in Lawrence is pretty certain to impress him with the problems that our industrial centres are facing, and teach him the grave responsibility of preserving law and order with equal justice to both parties involved in the strife.

"The unexpected call upon the militia of the State during the past few weeks ought to attract many serious minded men to the ranks; men who recognize the importance of competent service to the State at such a time, and who feel enough patriotism to assist the officers of the Commonwealth in preserving peace even at some personal sacrifice. The higher the standard of intelligence in the National Guard of a State the less likely it will be to lose its patience when performing the difficult service of strike duty."

**BIG INDOOR MEET
NEXT SATURDAY**

Nearly all Noted Track Stars in the East to be Entered in B. A. A. Meet.

Nearly all the track team, with the exception of the Freshmen, will be entered in the B. A. A. meet, to be held in the Mechanics Building Saturday night. The Freshmen will have a meet with Lowell High, at Lowell, the same night.

The B. A. A. meet promises to be better this year than any previous meet. Nearly all of the prominent athletes in this section have entered, among them John Paul Jones of Cornell, the intercollegiate mile champion.

No handicaps will be given in the 35-yard dash, thus eliminating all but the best from this event. This will shorten the meet considerably and make it less tedious for the spectators. It will also lessen the confusion at the finals which has always characterized the dash.

All entries in the three-mile will show a record of 16 minutes or better, and the high jump and shot-put limit has been raised. The banner attraction of the meet will be the Hunter mile, in which such stars as Jones of Cornell, Taber of Brown, Hedlund and Kiviat are entered.

The list of relay races is very large as usual. Among these Technology will race Dartmouth, Harvard will meet Princeton and Yale, Brown will run Williams, Georgetown will meet W. P. I., and Bates will run the University of Maine.

JUDGE LINDSEY TALKS.

Asks College Men for Justice—Says They Are Crooks.

A prominent member of the bar, Judge Ben Lindsey, of the Denver Juvenile Court, recently stated that college men are the biggest crooks, but he modifies this statement by saying that some of the best men that he has found have been college men. He can really see no difference between the man who steals a purse and the man who puts through a franchise which is clearly meant not to benefit the public at large, but for the specific purpose of fattening the pockets of those "on the inside"—the former being illegal larceny and the latter legal larceny.

"Go to college," said he, "not for the express purpose of loafing away your time in cafes and club rooms, but with the fixed intention of working earnestly, broadening your mind, and making yourself an honor to the community in which you live and to the country which it is your duty to serve."

MOUNTAIN CLIMBING.

Prof. Fay Shows Picturesque Slides at Tech Club.

In a very interesting though rather peculiar manner, Professor Charles E. Fay of Tufts College, and the Appalachian Club carried the members of the Technology Club from Boston through Montreal, the Great Lakes and Manitoba into the Selkirks—the "New Switzerland."

His slides were made from his own negatives and showed some of the wildest as well as the most beautiful scenery of the country. He brought out the contrast between the Selkirk region and that of the Canadian Rockies as lying in the noticeable absence of lakes in the former. His talk was livened up by some hair-raising tales of experience called to mind by the pictures on the screen, and was highly enjoyed.
