Mandolin and Guitar Club trials held.

The Mandolin and Guitar Club promises to be a big success this year. Yesterday afternoon twenty-five new men responded to the call of Manager Allman. The trials were held in the Union, where each candidate for the club was examined by Leader E. C. Taylor and Coach C. G. Lansing. From the new candidates and the entire membership present, who have reported this year, about sixty-five new members were held. Rehearsals will begin next Wednesday evening.

Leader Taylor expressed himself as being very much satisfied with the ability of the candidates. The club will make a number of trips to parts of this vicinity, this winter. He will give the members who come from other parts of the city a chance to become acquainted with this violin.

Show book discussed.

Mr. Carb talks with prospective writers and gives ideas.

The Tech show office was crowded yesterday at the informal talk given by Mr. Carb to the prospective Tech Show writers. Great interest was shown by Mr. Carb’s practical counsel and suggestions. He emphasized the importance of keeping the interest up, and advised subordinating the numerical members to the commercial, with especial attention to the principles of classics in the latter. He strongly recommended the use of satire and horsemanship and political topics on matters purely to Tech students.

This raised the question of whether the Show should be restricted, as it was last year, to things outside of Tech, in order to interest audiences of outsiders. Mr. Carb was opposed to this policy, on the ground that people who come to Tech Show come with the idea of seeing something of the inside workings of Tech society, that this will interest (Continued on Page 2, Col. 2.)

1914 Executives meet.

Class Pipe and Ballot committee appointed—Does $7.50.

A meeting of the Executive Committee of the Junior class was held yesterday. A committee to get class pipe was appointed. The following were nominated: A. B. De Witt, H. G. Stotler, H. F. Merrill, L. A. Long, and L. L. Wilson were appointed as a committee to be in charge of the class election. Nominations for class officers were made at this meeting. The names must be left at the cage or with one of the members of the committee before 4 o’clock on that day.

A motion was passed that the class officers hold a special meeting on October 15. The meeting adjourned at 3 P. M.

Here you are!! Three of them!!

Professors Spoield, Burton and Russell captured by C. E. Society.

The Civil Engineering Society is putting up the tent for the grand opening, Friday evening, October 11, at 8 o’clock. Professors Burton, Spoield and Russell will speak of the financial and general aspect of the C. E. Show. Camp will be divided at the rate of $50 that everybody was contributing to last spring. Many suggestions slipped into that fund, not through any philanthropic motive but for some special event. It became the tradition. Heart warming.

Dean Burton and Prof. C. E. Russel will still remain on the last sum- mer’s staff. Mr. Burton is known throughout the State as a man in his good health. In the second scene, every camp is part of the community in which it is placed, and over a greater part of the community the miraculous elements of sanitary precautions. The last, and most selfish reason, is that the life of the architect himself is endangered in the brick of sanitation.

Dean Russell distinguished three classes of camps—transient, temporary and permanent. The first is the least troublesome, but the other two require considerable care in the prevention of epidemics.

He also enumerated several cardinal principles that should be kept in mind. The first and most important is to obey common sense to solve problems. This second prin- ciple was the protection of the sources of water, which by far the most important. Sanitation is also a part of the protection of the water. For the prevention of typhoid epide- mics he said that the proper dis- tance from the loading of the water was essential. He described several recent inventions that are at the disposal of the engi- neer to aid him in solving this prob- lem.

Until the present time not much stress has been laid on the matter of proper housing and proper sanitation of both-houses. He said that the sewer lines have proved a great suc- cess in inducing the men to observe the rules of personal cleanliness. The stories of any system of sanita- tion rests in the daily observance of the rules, the conservation of sanita- ry responsibility being absolutely necessary.

Dean then described a plan for a construction camp that embodies the spirit of the Progressive principles. All the members are expected to be ac- quainted with the inside workings of the camp, and the members expected to work in the camps.

The Show will be accompanied by the Phi Alpha Band on its return and while in Boston it will have 21 players at each performance.

Orchestra plans.

To provide for Tech Orchestra this year.

Contrary to past custom, the Tech Orchestra has been placed this year under the direct supervision of the manager of the Tech Show. All men who would like to try for the Tech Orchestra are requested to report to C. E. Society Tent, at 12.30 to-morrow morning, in the Union.

In the show this year include concerts which are to be given every two weeks by the Orchestra in nearby society halls in Auburndale. The Orchestra will also furnish the music for the Tech Show in this way making it entirely a product of the students. The re- hearsals are to be in direct charge of a coach who will be secured later by the show.

The show will be accompanied by the Phi Alpha Band on its return and while in Boston it will have 21 players at each performance.

Course xiv society.

A meeting is to be held in the Union this afternoon at 2 o’clock, to organize a new special society. The preliminary meeting a week ago was a very enthusiastic one, and a special organization is expected; but this cannot be accomplished unless the candidates are up to the mark.

The meeting will discuss the nature and purposes of the society, and ideas from any member will be welcome.

This afternoon the Varsity Cross Country team will run over the Harvard course and finish at the Field.

Progressive Club elects officers.

Club also decides that every member must wear a bull moose pin.

Yesterday the Progressive Club held its first meeting since it was re-organized. At half past one the dozen men present in the Union listened to the report of the nominating committee, and at the report of the last thee. After it had been ac- cepted the report of the nominating committee was read. The club voted that the men selected by the committee should be the officers for the coming year. The president of the club is A. H. Waitt, 1914. The other officers are G. A. Palmer, 1915, vice-president; R. B. Kenton, 1914, treasurer, and Mr. Tolstoi, Z. Crocker, J. R., 1914, and A. Oetinger, member of the Executive Committee.

The club instructed the president to appoint a committee to draw up a constitution for the club for the next season, to be presented at the next meeting.

The meeting then discussed the matter of a distinctive emblem for club members, and finally it was decided to leave it to the committee which is at work on the constitution. The meeting voted to require every member in which he can get little or some kind of unit meal ticket, and all are expected to get their pins from the treasurer of the club. These pins will be sold above face value, and the money raised will go into the campaign funds of the Progressive Club. This sale of the pins will furnish the club such money as will aid in the coming election.

The members who were present expressed themselves as being in favor of having the pins, but that the club might more readily accomplish its primary purpose of uniting all men of the Institute who are interested in Progressive principles. All the members are expected to be ac- quainted with the inside workings of the campus.

UNION—BANJO CLUB—TRIALS—5 O’CLOCK
PRESIDENT MURLIN
TO SPEAK IN UNION

Address by Boston University
Heal on "Living One's Own Life."

This afternoon, in the Union, at 1:30 P.M., the Christian Association
will hold the first of its regular Thursday meetings. The principal speaker
will be President Murlin, of Boston University, who also addressed the
Association last year. His subject will be "Living One's Own Life."

President Murlin is a comparatively young man, who was chosen about
two years ago as the head of a small University, after having achieved an
great reputation for them in the educational field. Before coming to
Boston he was president of Baker University in Kansas, and under
his leadership the University of Boston has shown marked developments in all
branches. President Murlin is a speaker who is in demand everywhere,
and the Association deserves much credit for having secured him to address their first meeting.

TRACK MEET OFF.

Postponed From Columbus Day - Cross-Country Meet Out

The weekly track meet scheduled for Saturday has been called off, owing to
the fact that so many of the fellows will be out of town. There is no
reason to make any change in the awarding of the medal for the largest number of
points scored, as the totals will be carried over to next week's meet.

Several members of the cross-country team went over the Tech
course yesterday afternoon, and considering the weather, the time
made was fairly good. Nye finished first but was given a hard race by C. T. Gouging, who promises to be a
strong addition to the team. Several freshmen, who were not
enrolled in the cross-country team, later went over the course.

MR. CARB TALKS.

(Continued from Page 1, Col. 1.)

More than the things they can see at any regular musical comedy, he
even urged an departure from the
of the methods of previous years, and an
and distinctive by making it more in-

APPOINTMENTS ARE CONFIRMED

Forty Appointments in Instructing Staff Confirmed by Corporation

The Corporation of the Institute yesterday afternoon confirmed the following appointments and changes in the instructing staff:

Promotions.

The promotions are: Associate Professor Charles M. Warren to be Professor of Mineralogy; Assistant Professor Horace W. Balch to be Associate Professor of Paleobotany; Assistant Gordon R. Wilkes to be Instructor in Heat Measurements for two years, and Professor W. H. Walker to be in charge of the course in Chemical Engineering.

New Appointments.

The new appointments are: Herbert W. Smith, instructor in English for two years, replacing Mr. Gunn; F. H. Lahee to be instructor in geology, replacing Dr. Loughlin; and Orrie William Long and Paul Robert Lederer, each for one year as instructors in German, in place of Mr. Mackenzie, on leave of absence. W. R. Staun is appointed instructor in physics for two years, replacing H. E. Smirne; E. R. Morrow is appointed full-time instructor in architecture, replacing Mr. Cory, half-time, and Randall Cremer, E. C. Hoobrock, W. R. Richardson, W. L. Collins and C. R. Sawyer are to be assistants in civil and sanitary engineering for one year, replacing Means, Houston, Ireland, Manly, Morrison and Parker. James D. MacKenzie becomes instructor in geology for one year, in place of Mr. Godspeed; Paul M. Taylor is assistant on analytical chemistry for one year, and Eugene T. N. Norris the same position, replacing J. V. Mac Dondale.

In mining engineering and metallurgy, Ralph L. Bartlett, assistant for one year, replaces T. G. Chapman, instructor in theoretical chemistry; Bertrand F. Brann is appointed assistant for one year, and Barlow V. Reeves, research assistant in applied chemistry for eight months, Charles D. Howell is appointed assistant in heat measurements for one year, replacing Mr. Wilkes, promoted. In mechanical engineering, there are a number of changes; D. J. McLaughlin, Kenneth C. Robinson and D. M. Taylor being appointed assistants for one year, replacing Mr. Sunnar, A. L. Gardner, C. A. Robb and H. W. Vaterfield, respectively. Louis G. Gonzalez is appointed assistant in physics for one year, replacing J. F. Maxfield, promoted, and James H. Ellis becomes assistant, replacing R. D. Fernstrom.

Professor James Knox Taylor was appointed professor in the department of physics, and becomes head of the department, and Professor Wilderman Lindgren is appointed William Barton Rogers professor of economic geology, and in charge of the department of geology.

Reappointments.

The following were reappointed for one year, being assistants in the several departments: Breast C. Bent, professor's assistant in chemistry; N. H. Barlow, electrical engineering; H. A. Blumberg, drafting and drafting; Harry G. Davies, wood and foundry work; Arthur B. English and James T. Shurlock, machine tool work; T. H. Haines, R. G. Adams and J. S. Leman, mechanical engineering; L. A. Salinger (half-time) foundry analysis, and Mine Ruth M. Thomas, research assistant in organic chemistry.
