LASTING AND FITTING TRIBUTE
TO OUR FORMER PRESIDENT.

New Memorial is Outcome of Work Begun by President Walker in the Latter Part of His Administration.

FRANCIS A. WALKER.

Francis Amasa Walker was born in Boston in 1850 and spent the early part of his life in North Bridgton, Maine. He graduated with scholarship honors at Amherst College and then studied law for a short time. In 1875 he was granted a law degree from Harvard University, and entered the practice of law in Boston. He later became a professor at Harvard University, and in 1908 he was appointed President of the Massachusetts Institute of Technology.

In memory of the late Professor Constant Despradelle, the Boston Society of Architects, the Massachusetts Institute of Technology, and the students of the Institute, have decided to build a memorial to the memory of President Walker, who died in 1912. The memorial will be a lasting tribute to the memory of President Walker, and will serve as a place of remembrance for the students of the Institute.

The memorial will be a lasting tribute to the memory of President Walker, and will serve as a place of remembrance for the students of the Institute.

MEMORIAL WILL BE UNDERGRADUATE CLUB
Responsibility for Management to Fall Largeiy on Students.

The development of the scope of the Walker Memorial so that it may cover the social needs of the students has been one of the most important tasks of the Walker Memorial Committee. The first steps in this direction were taken by the student body of the Institute in the spring of 1912. The committee, which consisted of the faculty and students of the Institute, was formed to study the problem of the Walker Memorial.

The committee decided to build a memorial to the memory of President Walker, and to make it a permanent memorial to the late President. The committee also decided to make the memorial a permanent club for the students of the Institute.

The Walker Memorial is to be a place where students can come together to study and to socialize. The committee has decided to make the memorial a permanent club for the students of the Institute, and to make it a place where they can come together to study and to socialize.

THE WALKER MEMORIAL AS AN ALUMNI CLUB
Graduates of the Institute to be Acceded Associate Privileges.

The Walker Memorial is to be a place where students can come together to study and to socialize. The committee has decided to make the memorial a permanent club for the students of the Institute, and to make it a place where they can come together to study and to socialize.

PROPOSED PLANS FOR DORMITORIES

Many Things to Be Considered in Student Housing Problem.

One of the most important problems presented to the builders of the New Technology is that of providing suitable accommodations for the large number of Institute students who will live on their own homes during the school year. The solution of this problem is unusually difficult for Technology, both because there has been no previous experience with regard to student housing, and because there is no ready reliance on the solutions made by other colleges where, for the most part, conditions are entirely different from those which will prevail here. In working out the present problem, the general character of the Institute whatever and faculty may as well as the more constructive features, are what will exist on the campus.

The logical location for the fraternity houses at the New Technology will be on the campus. Unfortunately, the campus is not large enough to accommodate the fraternities in the numbers which will be most satisfactory to their members. Will not the result probably be that each society build and hold at great expense distance from the Institute site? The most attractive available property in that vicinity is that held by the Board of the Trustees, just above Massachusetts Avenue and beyond the Riverbank. These fraternity houses have already purchased sites in this location, and, without doubt, more will follow in their footsteps. Some few fraternity constitutions have already expressed their intention of remaining on this side of the river, but these will probably be in the minority.

The Institute seeks the collaboration of the experienced givers from colleges whose conditions are similar, and will have to adapt themselves to conditions as they will exist at Cambridge. A few important differences between student homes and dormitories at other large schools. The principle adopted by

FRATERNITIES TO RELOCATE NEAR SITE

Three Chapters Intend to Build New Houses on the Esplanade.

The logical location for the fraternity houses at the New Technology will be on the campus. Unfortunately, the campus is not large enough to accommodate the fraternities in the numbers which will be most satisfactory to their members. Will not the result probably be that each society build and hold at great expense distance from the Institute site? These fraternity houses have already purchased sites in this location, and, without doubt, more will follow in their footsteps. Some few fraternity constitutions have already expressed their intention of remaining on this side of the river, but these will probably be in the minority.

As far as the location and architectural features of the dormitories, they will be few or five stories in height and built closely surrounding yards or "quads" much as the same in English universities. They will be of essentially fireproof constitution, and will be so arranged as to be of conform to that of the other Institute buildings. The "stairways" will be furnished with every thing necessary for the comfort of the students, and will be of the same plan the building of the rooms will be encouraged in the students. The "stairways" will be furnished with every thing necessary for the comfort of the students, and will be of the same plan the building of the rooms will be encouraged in the students. A PLAN FOR THE WALKER MEMORIAL
(These Plans Are Only Tentative.)

SUGGESTIONS FOR DINING HALL.
(These Plans Are Only Tentative.)
Announces the arrival of his complete variety of Spring and Summer Woolens and cordially invites you to inspect the line.

Many of the best dressers of "TECH" have already selected their Spring Suits. Why don't you?

Prices moderate. Styles the latest.

WORKMANSHIP THE BEST.

L. PINKOS
To Contain Cinder Track, Trophy Room, Swimming Pool, and Gymnasium.

It has always been the policy of the Institute to give a course in physical education which will develop the physical fitness of the students. It is now proposed to have a gymnasium and pool for this purpose, and it is hoped that the students will make good use of these facilities.

New Site Offers Opportunity for Great Development of Sports.

With the building of the new Technology Gymnasium, there will be an opportunity for the development of all branches of athletics. The new gymnasium will be located on the east side of the campus, and will be accessible to all branches of the student body.

Dr. Millman to Speak to Miners Friday.

Dr. Millman is well known for his contributions to the field of education and has been a leader in the development of physical education programs. He will be speaking on Friday afternoon at 4 o'clock in the Union Hall.

At the meeting of the Mining Engineering Society, which is to be held on Friday afternoon, Dr. Millman will give an illustrated lecture on "The Black Diamond." This lecture will be of great interest to many.

The coming of the new gymnasium and pool will be a signal for the development of all branches of athletics. It is hoped that the students will make good use of this opportunity.

The Dining Room.

The dining room will be located on the east side of the campus, and will be accessible to all branches of the student body. It is hoped that the students will make good use of this facility.

SPECIAL DINING PRIVILEGES TO BE GIVEN TO MEMBERS OF THE MINE ENGINEERING SOCIETY.

In order to encourage the members of the Mine Engineering Society to use the new gymnasium and pool, special dining privileges will be given to them.

The conditions for the special dining privileges are as follows:

1. Members of the Mine Engineering Society must be in good standing with the society.
2. Members must be enrolled in the Institute.
3. Members must be in good health.

These provisions are necessary to ensure the health and safety of the members of the society.

should be published. The committee also desires that the men who have not yet handed in their history blanks blanks will do so at once. Delay in handing in these blanks will cause delay in the publishing of the book, and may possibly be the cause of their not being put in at all.

The committee intends at present to publish the book about May 1. There are twenty sign up books out, and ample opportunity is afforded those who wish a copy of the book to sign up. These sign up books will be out only three weeks longer, so it is wise to sign up at once if one wishes a copy of the book.
