REGULAR INSTITUTE COMMITTEE MEETING

Elections to The Tech Staffs Approved—Discussion of Walker Memorial.

At the regular meeting of the Institute Committee, yesterday afternoon, the following business was taken up:

The report of the Advisory Council of THE TECH was acted upon and a few matters concerning the plans for the productions of the week were discussed.

The recommendations made by the Advisory Council of THE TECH for pointsmen,Backenders, and Business Staffs were approved, W. H. Barker was elected to the News Board as Asst. Editor, T. J. A. Pi, and J. F. C. L. were elected to the News Board as Staff Assistants.

The committee discussed the matter of setting up a committee to consider arrangements for an All-Technology smoker. H. D. Peck made a motion to appoint a committee to consider arrangements for a Walker Memorial smoker, and together with frequent allusions to the speaker's own experiences, they made the talk a very interesting one.

Mr. Millman began his talk by describing the region in which the abundant coal deposits are found. He found it in veins varying in thickness from a few feet to fifty feet, and scattered in the vicinity of Scranton in Pennsylvania. The veins are worked by foreign speaking families, mostly every race being represented.

He then mentioned the blast furnaces which are scattered through the area, and the foundries as well. He took for example any blast furnace, and showed how the coal is received by the furnaces, where it is mixed with the iron ore, and finally leaves the furnace as pig iron, to be sent to the mills for finishing.

On the other side, he illustrated the long and winding tunnels, the passages and the "chambers," in which the miners work individually. After such a furnace has received its blast of air, it is then ready for the blast furnace, where it is heated to a high temperature in order to change the iron into iron oxide. The materials are then collected and sent off. After this has occurred, the coal is received and the miners enter the tunnel, with the exception of the slates, into the small cars. At this point the coal is carried into the mine and the miners must know their part by that time as each one must know his part by that time as the coal is brought out as an exception to the old method of handling.

COMMUNICATION.

Dr. Millman spoke before the Mining Engineering Society at a meeting in 123 Walker. The meeting was attended by students from the other colleges in the area, and together with frequent allusions to the speaker's own experiences, they made the talk a very interesting one.

Yesterday afternoon, at 4 o'clock, Dr. Millman spoke before the Mining Engineering Society at a meeting in 123 Walker. The meeting was attended by students from the other colleges in the area, and together with frequent allusions to the speaker's own experiences, they made the talk a very interesting one.

This afternoon, at 8 o'clock, the Executive Committee of the New England Intercollegiate Athletic Association will meet in the Coppler Square to decide where the annual meet will be held this year. The attempt at track management is making a bid to have the meet held at this track, and the chances are that such a bid will be the case from the outlook at present. Circular letters have been sent out to all the managers of the colleges in the Association stating reasons why the meet should be held here.

CHEMICAL MEETING.

The Society Discusses Revision of Constitution.

Yesterday afternoon, in 23 Walker, the Chemical Society discussed the revision of their constitution. It was voted to abolish the associate membership and to admit the Sophomores as active members in the future. It was also voted to increase the dues to $2.00 per member. The society is to meet again in the near future to further discuss the revision of the constitution. It was announced that on May 1, 1913, the Undergraduate Professor Panama will address the Chemical Society on "Scientific Management."

SHOW PROGRESSING.

Coach Sanger to Take Charge of Rehearsals Monday.

This afternoon every man who is not a part of the cast or chorus of the Show, and has not yet been dismissed by Stage Manager Pike, must be in the auditorium by 2 P.M. The men at this time are to be measured for costumes which will have to be made up immediately because of the Show's progress, and which are to be taken in the near future.

The entire past week has been taken up with rehearsals, and although they have been more or less fundamental, they have proved most important. At all of the cast rehearsals the men have gone through their parts as best they could and have so far made considerable progress towards a final result. The presence of Coach Sanger has been the only thing lacking, but he will take charge, beginning Monday morning, when the harder work will begin. Every man must know his part by that time as Mr. Sanger has said that he will have no patience with delinquents in this respect.

SOPHOMORE BASKETBALL.

The Sophomore basketball team will play the Milton High School at Cun-

HARVARD CHESS MATCH.

The Harvard team will play against the Chess Club of the New England Intercollegiate Athletic Association at the Coppler Square this afternoon, at 2:30 o'clock. A large number of students are expected to attend.

FRESHMEN CLASH WITH RIVALS IN GYM TODAY

Annual Indoor Meet Between Lower Classes—Teams Closely Matched.

This afternoon, at the Gym, the Freshmen will meet the Sophomores in the cross-country meet of the indoor season. The meet will commence promptly at 2:30, and admission will be free. Victory in this meet is to be held and the second and third places will be hard fought, especially as the result of the meet will depend upon them. Each side will win four firsts, thus making the seconds and thirds decide the meet. The Sophomores have shown a greater interest in track teams, but the Freshmen are expected to hold their own.

The dash will be very close, but the second and third places will be decided by the Freshmen. The Sophomores have shown a great interest in the Sophomore. In this respect the Freshmen are expected to hold their own.

The dash will be very close, but the second and third places will be decided by the Freshmen. The Sophomores have shown a great interest in the Sophomore. In this respect the Freshmen are expected to hold their own.

C: C. A. MEETING TO BE HELD TONIGHT

Executive Committee to Decide Place for Annual Meet—Other Business.

This evening, at 8 o'clock, the Executive Committee of the New England Intercollegiate Athletic Association will meet in the Coppler Square to decide where the annual meet will be held this year. The attempt at track management is making a bid to have the meet held at this track, and the chances are that such a bid will be the case from the outlook at present. Circular letters have been sent out to all the managers of the colleges in the Association stating reasons why the meet should be held here.

CALFORD.

Saturday, March 8, 1913.

1:00—Meet in Union for Tuna to Milton—Basketball, 1915 vs. Milton High School.

2:00—Union Show Recreation, Cast - Suspense in the Rose Garden.

8:00—M. I. T. Chess Club vs. Harvard.

Last Day for Sittings for Pictures to be Placed in the Senior Porch—Entrance.

TECH NEWS, SATURDAY, MARCH 8, 1913. PRICE TWO CENTS.
TO ORGANIZE HEALTH SAFEGUARD WORK HERE

Prof. E. B. Phelps to Extend Service With Assistance of Others.

A co-operative health service, originated by Prof. E. B. Phelps of the Department of Public Health and Biology at M. I. T., for the purpose of assisting the authorities of any town within 15 miles of Boston to safeguard public health, is now in process of extended organization.

The system is being operated in Weymouth and is about to be tried in Belmont. The advisability of adopting it will be discussed by the boards of Plymouth and Weston this month.

Interested with Prof. Phelps in the development of the work are Prof. W. T. Moulton and Prof. E. H. Taylor of the same departments, and Robert N. Hoyt, a graduate of the Institute and health officer of Wellesley, who has the laboratory of the service is situated.

Among the things the service is now doing at a minimum cost and will continue a complete laboratory analysis of all the milk sold in a town for service as well as to conduct regular dairy inspections. Milkmen will be instructed in accordance with the grade of milk they sell. Cultures in cases of infectious diseases will be examined and chemical tests made of infected horses or cattle.

The service also plans to wage a campaign of extermination against mosquitoes.

COMMUNICATION.

(Continued from Page 1.)

Further as an interest in the work of the service is now on our counters, and exceed in quality, beauty and variety of design anything we have ever shown.

SUNDAY, MARCH 3, 1913

We are more than glad to announce the following changes in the News Board and are pleased to introduce:

J. W. Austin, M. I. T. Class of 1912, as an associate member of the News Board.

We are also glad to introduce:

William H. Spooner, M. I. T. Class of 1912, as a member of the News Board.

Both of these gentlemen have been active in the work of the Institute and are well known to the students. The file is in good hands and we are confident that these changes will greatly improve the work of the Board.

The Institute has made a number of changes in its organization this year. Among the most important are the creation of the Graduate Student Association and the appointment of a Student Council. These changes are intended to give the students more voice in the affairs of the Institute and to make the administration more responsive to the needs of the students.

The Graduate Student Association is composed of all graduate students in the Institute and meets regularly to discuss the problems of graduate study. The Student Council is composed of representatives from each class and meets regularly to discuss the problems of undergraduate study.

These changes are intended to give the students more voice in the affairs of the Institute and to make the administration more responsive to the needs of the students.
At the meeting of the Boat Club, which was held Wednesday, a permanent constitution and by-laws were adopted. This organisation will be known as the M. I. T. Boat Club, and membership is open to all members of the student body. The dues of the members will be three dollars a year, payable semi-annually. The money raised in this way will go to buy and maintain suitable shells for the use of the crew and the club members.

One of the fundamental purposes of the Boat Club is the advancement of the interests at Tech, and it is the Boat Club's wish to do its part to help toward maintaining suitable shells for the use of the crew. The money raised in this way will go to buy and maintain suitable shells for the use of the crew and the club members.

The first meeting of the 1915 Tech-Technique Electoral Committee will be held at 5 o'clock, room 21, Rogers, from then on meetings will be held Tuesday afternoon at 5 o'clock, room 21, Rogers, from then on meetings will be held.

CERCLE FRANCAIS TO HOLD MEETING

To Start Reading of French Play at Regular Meeting Wednesday.

Next Wednesday afternoon, the Cercle Francais will hold the second of its regular meetings. It will take place at 5 o'clock, Room 28, Lowell building, and all the members are urged to be present as some important business is to be disposed of at first; in addition, the club will start the regular program as originally planned.

The Constitution, which has beenDrawn up and approved by a special committee, will be read as a whole for the final ratification by all the members. A number of new members are also to be voted upon. When this business is concluded the reading of a French play will be begun. The next meeting of the Cercle Francais' will hold the second of its regular meetings. It will take place at 5 o'clock, Room 28, Lowell building, and all the members are urged to be present as some important business is to be disposed of at first; in addition, the club will start the regular program as originally planned.
