

THE TECH

VOL. XXXII. NO. 108

BOSTON, MASS., WEDNESDAY, MARCH 12, 1913

PRICE TWO CENTS

MEN WANTED FOR ADVERTISING WORK

Competition For Candidates For "The Tech" Business Staff Still Open.

The competition for candidates in the Advertising Department of THE TECH opened yesterday, and a number of men reported to the Advertising Manager in the office. The management is pleased with the showing made, but there is still a chance for more men in this competition. As the elections for the Staff and Board which is to manage next year's paper will take place early in April, there is a good opportunity for any one to make the Staff by coming out now.

In this department of THE TECH there is a particularly fine chance for Institute men to get some valuable business experience. In the first place men learn to meet business men in a business way. Incidentally they learn how business is conducted and what a business man's view is on various subjects. The advertising agent can learn values at first hand and see opportunities in these values.

If there are any who would like to take advantage of this opportunity, or would like further information, the advertising manager will meet them in THE TECH office any day from 5 to 6 o'clock.

COMMUNICATION.

To the Editor of THE TECH:

Referring to Mr. Peck's communication in the issue of March 8th, he agrees with me theoretically, but not practically, as to minimizing the Board of Directors under the new Undergraduate Constitution, and since he occasionally strikes out directly by advising me personally (and not through your humble medium), might I state, my dear Mr. Peck it seems to me you have laid your defence (?) open in suggesting that the board of directors in industrial or railroad corporations depend on paid department superintendents, etc. What on earth have you provided for representation from institute activities particularly if such representations are not for the purpose of bringing in just such reports, and conversant of the matters they represent? It's not necessary that every man or "six or a dozen men have enough of that spare time" to study up all student questions so as to properly and wisely legislate for the entire student body—(I am quoting you, dear friend). Neither can the members of a board of directors of an industrial or railroad corporation. Such men must depend upon the reports of the department heads and in our own particular case on the Technique, THE TECH, the M. I. T. A. A., etc., members.

Now Mr. Peck's collaboration of the number of men represented in the "so-called major" activities is apparently "a killing for him," but he has probably taken only the names as shown in Technique, 1913. Does he dare to repeat that the Tech Show, 1913 (approximately eighty); THE TECH (probably thirty or forty during the year); Technique (last year's board eighteen), and lastly, the M. I. T. A. A., do not aggregate a representation of "but two hundred and sixty men?" Why there's not a man in the Institute but would allow the M. I. T.

(Continued to Page 2.)

FRESHMAN MEETING A VERY LIVELY AFFAIR

Placing of Athletic Committee On Governing Board Discussed.

A meeting of the Freshman Class was held yesterday at 1 o'clock, in Huntington Hall. The first subject discussed was the proposed class dinner. Some of the Freshmen were in favor of a smoker. An argument advanced against this was that all do not smoke but every one eats. A vote was taken which carried the motion to hold the dinner. The president then appointed the following committee on arrangements: K. M. Sully, chairman; R. E. Desmond and O. C. Norris.

Wm. Shakespeare, the treasurer, reported that there would be a balance of \$47.97 in the treasury after the present bills are paid. The baseball supplies are yet to be bought from this balance. However, the new system of bulletin boards will, in all probability, not only provide the necessary money, but also leave a surplus.

Mr. DeMerritt, after being granted the floor, moved that "the two representatives of the Freshman class be made not only class officers, but also be admitted to the Governing Board. Furthermore, the class officers should be instructed to draw up an amendment to the constitution which shall embody this motion and present it to the class for its approval not later than April 11."

In the discussion of this motion the argument was advanced that the members of the Athletic Committee represented the class in the committee and saw that the Freshmen had fair play. In a similar manner the members of the Institute Committee represent the class in that body. Therefore if the representatives in the Institute Com-

(Continued to Page 3.)

COMPETITIVE EXAMS.

Fourteen Vacant Lieutenancies to Be Filled in Navy.

The Registrar has just received a letter from General W. P. Biddle announcing a competitive examination of young men between the ages of twenty-one and twenty-seven years, for the grade of Second Lieutenant in the U. S. Marine Corps. The officers of the Marine Corps are on the same basis for pay, allowances, retirement and so forth, as the officers of the Infantry, U. S. Army. The salary is \$1700 per year, with 10 per cent. increase for each five years' service.

At present there are fourteen vacancies in the service, and ninety is the number required. The officers are required to serve at sea on vessels of the Navy, and on shore at the naval stations in the United States or in any of its foreign possessions.

If any of the Institute men are interested in obtaining commissions for themselves or for others, particulars will be furnished on application to the Major General Commandant, U. S. Marine Corps, Washington, D. C. The necessary blanks will be supplied to those who make application. Information can also be obtained at the local recruiting office at No. 68 Hanover street.

FRESHMEN WIN FIRST CLASS CHAMPIONSHIP

Win Basketball Series by Taking Second Game From Sophs—Merritt Stars.

Yesterday afternoon the Freshman class, represented by its basketball team, succeeded in winning its first class championship in any branch of athletics. The Sophomores bested their lower class rivals in the tug-of-war, football, relay race and the indoor track meet, but were completely dazzled and bewildered by the fast passing, team work and accurate shooting of the 1913 team. One game of the series had already been played, and had resulted in a victory for the Freshman team by a very close score. In yesterday's game, however, the result was never in doubt, and the score of 24 to 8 indicates the ease with which the game was won.

For the first few minutes the Freshmen were very well covered by their opponents and no score resulted. Then Lewis was withdrawn from the forward position, and Merritt, a regular, took his place. The lower classmen soon began to outplay their opponents in passing, and after Ziner had made a spectacular goal from the middle of the floor the Freshmen could not be stopped. The little fellows were flying about the floor madly, yet method was in their madness. For in about five minutes the score was 8 to 0, the Freshmen leading. Captain Morse of the Sophomores revived hope among his men by two clever shots from the floor, but the lack of team work was so great that no individual playing could overcome it. The Freshman team now settled down, and by fast passing succeeded in getting up near the basket many times, and consequently tallied several more goals. Ross and Ziner did well. Toward the end of the half Reycroft was substituted for Ziner by the Freshman captain. McBride showed a flash of his old form for a few minutes and tallied a clean goal for his team. The half ended with the score 15 to 6.

The Freshmen had the Sophomores even more at their mercy during the second period, and by swift, concerted playing, scored five more goals. The Sophomores again relied upon individual effort and the result was fatal to their chances. They scored but one goal during the second half. Merritt

CERCLE FRANCAIS.

Short Modern French Drama to Be Discussed at Meeting.

This afternoon, at 5 o'clock, the Cercle Francais will hold its second regular meeting in 29, Lowell Building. All members are urged to be on time, since the important business, such as the ratification of the constitution and the voting on new members will be disposed of first.

Pailleron's "La Monde ou l'on s'ennui," which is considered one of the best of the modern French short dramas, will be read and generally discussed. As is already known, members must come prepared with the idea of "Ici on parle Francais;" and all those who have signified their intention of joining the "Cercle" are invited to be present at the meeting.

CHAUNCY HALL CLUB HAS ANNUAL DINNER

New Officers Elected—Plans Discussed For the Coming Year.

Last evening, in the Union, the Chauncy Hall Club held its annual dinner. Among the thirty-seven men present were Mr. Franklin T. Kurt, Principal of the Chauncy Hall School, and a number of Chauncy Hall students. Both the excellent dinner and the plentiful supply of beer and cigars added to the congenial spirit that prevailed during the entire evening. A photograph of the 1913 Class baby, which was passed around the table, occasioned many expressions of admiration.

After giving a regular "M. I. T." for Chauncy Hall the men adjourned to one of the rooms upstairs, where a short business meeting was held. The following officers were unanimously elected for the coming year: President, A. V. Swift; vice-president, C. W. Harvey; secretary-treasurer, O. R. Freeman. The new officers immediately took charge of the meeting and an open discussion followed concerning the number of social functions which the club should hold during the year. An assistant secretary was appointed from each class, who, together with the officers of the club, are to take charge of all smokers and dinners held in the future. Former President True mentioned the matter of the Technique insert. He said that the names of all members were to be published, and urged each man to pay his dues promptly so that no special assessment would be necessary.

The sympathies of the members were extended to W. A. Ready, '13, who, owing to the serious illness of his young daughter, was not able to be present.

Mr. F. T. Kurt gave a talk, in which he outlined the policies of Chauncy Hall, telling many interesting facts concerning the early history of the school, and the principles for which it has stood. He laid much emphasis on the fact that although Chauncy Hall is essentially a preparatory school for Tech, its primary object is to instruct the men in the principles of real manhood rather than to get

(Continued to Page 2.)

BOAT CLUB MEETING.

At a meeting of the Boat Club in the Union, yesterday, the officers for the coming year were elected in the persons of E. C. Gere, '13, Commodore; H. A. Sweet, '13, Vice-Commodore, and C. E. Sifton, '15, Purser.

Plans were discussed with regard to renovating the shell for use in the near future. According to Commodore Gere the club expects to be out on the river as soon as the ice is gone.

CALENDAR.

Wednesday March 12, 1913.

4.00—1913 Track Team vs. Boston College High—Gym.

4.00—E. E. Trip.

5.00—Cercle Francais—29 Lowell.

6.00—Catholic Club—Union.

Thursday, March 13, 1913.

1.30—T. C. A. Talk—Union.

7.30—Auditing Committee of Finance Committee Meeting—Tech Show Office.

TECH MEN AS SPEAKERS.

The three prime requisites of a successful engineer are a thorough knowledge of his profession, the ability to handle the men under him, and the power to reach the men above him,—to talk to them and convince them that he is right. The first of these the Technology graduate is assumed to have; the second comes only through actual experience; the third, while also a matter of experience, is one which should be cultivated now.

The municipal engineer must often appear before various boards, councils, etc., and defend his plans. The man working for a corporation faces the same problem in the board of directors. They all have to be convinced, and to do this one must be a good talker, not as a conversationalist, but as a public speaker. How many of us can get up now before a class of twenty men and put forth a convincing argument?

We have here, as a third-year option, a course in Public Speaking. It is a small course; very few men choose it. Is it not worthy of more notice? Have we not more need for it than this small enrollment would indicate? A considerable fund has just been left Cornell to further this very cause. If it merits that much consideration there, why not more here?

CHESS CLUB NOTES.

As a result of Harvard winning the chess match last Saturday evening, another contest will have to be held in the near future. Each club has now won a match apiece, and a third will have to be played in order to determine which team is to have the supremacy. A date, which will be announced later, has been set and is now awaiting the approval of the Harvard Chess Club.

The tournament which was held this week gave a victory to Dunning. Gustin won from Johnson by default, while Johnson defeated Newman by a score of two to nothing. The matches will continue throughout the week between the rest of the club members, the winners to play each other next week.

FRESHMEN TO MEET BOSTON COLLEGE HIGH

Result of Last Indoor Meet of Season Uncertain—Close Contest Expected.

The Freshman track team will close its indoor season this afternoon with a meet against Boston College High School. The meet will be held in the Tech Gym at 4 o'clock, immediately after drill. Boston College High has a strong team this year and will give the Freshmen a hard fight.

At the last moment Coach Kanaly decided not to restrict the entries, but let in anybody who wished to compete. There will be no admission fee. In the sprints, the High School has a good man in McCarthy. He is likely to place either second or third against Adams, '16, and Loomis '16. In the quarter, Boston College High may win first and second with McCarthy and Reilly. W. Reed, '16, will probably get third. Guething, '16, looks good for first, with Captain Deane, '16, for second place in the 880. Benson, '16, is sure of winning the mile, with a close race for second between White '16, and Reed, '16. Fallon of the visiting team will fight for third place. The results of the hurdles look uncertain.

In the field events, Boston College High ought to score heavily. The result of the high jump will probably be favorable to the visiting team. Harrigan is expected to get first, with Ober, '16, good for second place. In the shot-put, all places will be evenly contested.

COMMUNICATION.

(Continued from Page 1.)

A. A. a representation twice this! Take Field Day practise of each class: Football, thirty; relay race twenty; tug-of-war, forty or fifty—easily two hundred men from these Freshman and Sophomore classes. Add to this twenty or thirty cross-country and have and hound men, the Musical Clubs, the Technology Christian Association and the Cosmopolitan Club. I certainly consider "MAJOR" activities compared (and I am not casting any disparagement or criticism on their work), with the hockey, Boat Club, lawn tennis, golf interests, every one of which the Advisory Council on Athletics is supporting, do not aggregate almost twice the number suggested by Mr. Peck—one thousand would not exaggerate the incidental membership and interests of the aforesaid activities. Mr. Peck may say many of these men are "duplicated"—equally many of the Course Society men are interested in some (and I hope more than one) of the major interests.

His communication allows I am right in another line, and that is, "that the new constitution will supercede all other documents." Just what he means by "documents" is a question. He stated (I am quoting from memory) that certain by-laws of the Institute Committee would still be paramount (or at least accessory to) the "New Constitution and By-Laws." Let's know just where this fits. Not have subsequent "recourse to the referendum," etc.

If the proposed Constitution and By-Laws are not to be the finality as to the future give us the whole truth now and avoid complications in the future incident to the ideas of the fine Italian editorial hand which instituted the proposed changes.

Yours truly,

Frank H. Briggs,
Critic at Large.

**ELECTORAL COMMITTEE
HOLDS FIRST MEETING**

**L. C. Hart Explains Details of
Work—To Meet Again Next
Friday.**

The first meeting of the 1915 Technique Electoral Committee was held yesterday afternoon in 21 Rogers, but no definite business was transacted. L. C. Hart, Editor-in-Chief of Technique, 1913, and chairman of the 1913 Technique Electoral Committee, explained to the members of the committee what their work was and what was expected of them. H. R. Crowell was elected vice-chairman of the committee, and T. F. Spear secretary-treasurer.

Mr. Hart explained in detail the work the committee had to do and the qualifications each man should have for the different positions on the Technique Board. He advised that the committee should hold frequent meetings, as he said that owing to the length of time it takes to elect some of the men meetings will run along into June if they do not do so. The men cannot be too careful in considering the nominees, he said; his scholastic standing should be looked up and also whatever business experience he may have had in the particular line of work for which he may be a candidate.

T. A. D. Fessenden was appointed a committee to look up the standings of all the nominees. A committee, consisting of H. R. Crowell, M. E. Hill and T. F. Spear, was appointed to look up the Constitution and suggest any amendments to it. The next meeting of the committee will be held next Friday, at 5 P. M., in 21 Rogers.

CHEMICAL SOCIETY.

**Talk on "Scientific Management"
to Be Given by Prof. Passano.**

Next Friday, at 7.45, the members of the Chemical Society are to be given an unusual treat. Professor Passano, who for about four years has been making a study of scientific management, has consented to present to the society some of the results he has obtained. He is very well known to the Institute men as a teacher of mathematics, and the announcement of this other phase of his work will be a surprise to many.

A talk of this kind will give the chemists and chemical engineers an opportunity to correlate the facts concerning scientific management which they have heard from time to time. The subject is a thoroughly modern one and is still open to discussion as to its details. Professor Passano has made a study of the practical applications of present time theories, and will probably be willing to discuss these points with the members of the Chemical Society after his talk.

FRESHMAN MEETING.

(Continued from Page 1.)
mittee are members of the Board, the members of the Athletic Committee, whose duties are of a similar nature, and of like importance, should be members of the Board also. This argument was met by the objection that the Institute Committee was more important than the Athletic Committee, because it is not only more active, but also deals with business which is of more importance to the class. After considerable discussion of a similar nature the motion was passed.

Before the meeting adjourned President Guething called attention to the proposed "All-Technology Smoker" to be given by the Institute Committee, to the need of Freshmen for the class team which is to meet the Sophomores in the Spring, and to the basketball game between the Freshmen and the Sophomores yesterday afternoon.

**M. E. SOCIETY TO HOLD
MEETING NEXT MONDAY**

**Lecture by Professor I. N. Hollis
of Harvard Will Be
Feature.**

Next Monday afternoon, at 4.10 o'clock, the Mechanical Engineering Society will hold a meeting in Room 11, Eng. B. The feature of this meeting will be an illustrated lecture by Professor I. N. Hollis, of Harvard, on "The History of Steam Boiler Construction."

Professor Hollis is Professor of Steam Engineering at Harvard, and he is well qualified to talk on this subject as he is very widely known and is a recognized authority on the various branches of Steam Engineering. He has been connected with naval work, and at present is a prominent member of the American Society of Mechanical Engineers, with which the M. E. Society of the Institute is affiliated.

The Professor's talk will be illustrated throughout and he promises to show a large collection of slides which have never been shown before. The slides, as well as the lecture, will undoubtedly be interesting to all Course I men, and the officers extend their welcome to anyone interested in this particular line of work. The third-year men of Course II are especially urged to attend this lecture as it will be closely allied to the work in boiler design which they are doing just now.

TALK ON "EVOLUTION."

**Fr. Cusick to Address Students
at Catholic Club Dinner.**

Tonight, at 6 o'clock, the Catholic Club will hold its regular monthly dinner in the dining room of the Union. Father Cusick, as speaker for the evening, will give another talk on "Evolution." This is to be his third and last talk on this subject, and is expected to be even more interesting than either of his other two. The officers of the society cordially invite any men who are interested to attend, especially those who have heard his two previous talks. Tickets may be obtained from the officers of the society, the price being twenty-five cents, in order to help pay for the cost of the dinner.

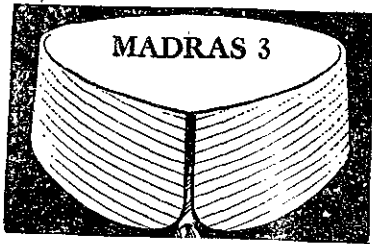

A business meeting will be held after the dinner concerning the coming annual dance at the Hotel Somerset.

CLASS BASKETBALL.

(Continued from Page 1.)

Merritt showed up well and scored two more goals, besides one goal from a foul. Reyeroft did some good passing, as did Dewson, but succeeded in shooting only one goal. Hauman was substituted for Wyld at guard, but did nothing to make up for his lapse of memory in the previous game, when he distinguished himself by tallying a goal for the Sophs. Scully succeeded in getting alone with the ball near the Sophomore basket, and corraled it in the net. When the whistle blew the score was 24 to 8, and the Freshmen had won their first championship from the Sophomores.

The summary:
Freshmen. Lewis (Merritt) 1. f. r. b. Parsons Ziner (Reyeroft) r. f. l. b. McBride Dewson, c. c. Neuman Ross, r. b. l. f. Morse Wyld (Hauman) l. b. r. f. Scully
The score: Freshmen 24. Sophomores 8. Goals from floor: Merritt 4, Ziner 2, Ross 3, Reyeroft 1, Wyld 1, Morse 2, Scully 1, McBride 1. Goals from fouls: Merritt 2. Referee, McCarthy. Time, 20 and 15 minute halves.
