

THE TECH

VOL. XXXII. NO. 109

BOSTON, MASS., THURSDAY, MARCH 13, 1913

PRICE TWO CENTS

LIFE MEMBERS OF CORPORATION CHOSEN

Everett Morss, William Endicott and Theodore N. Vail Now Life Members.

Yesterday afternoon the Corporation of the Institute held a meeting to fill certain vacancies in its membership. Three men were elected for life terms, and three for five-year terms. A new office in the Corporation was created, and a man elected to fill it.

The men chosen for life are: Everett Morss, M. I. T., '85; William Endicott and Theodore N. Vail. Mr. Morss has just completed a five-year term on the Corporation. He is of the firm of Morss & White Co., president of the Simplex Electric Co., and is on the Fund Committee of the Alumni Association. Mr. Endicott is a member of the firm of Kidder, Peabody & Co. It is a curious fact that Mr. Endicott's father is also a life member of the Corporation. Mr. Vail is president of the American Telephone and Telegraph Co., which has given \$25,000 to Technology, and has promised another fund for electrical research. These men fill the places of A. Lawrence, deceased; C. C. Jackson, resigned, and Senator Crane, resigned.

Those who are to serve five years are all Tech Alumni. Cass Gilbert, '80, is former president of the American Institute of Architects, a member of the Council of the National Academy of Design, and Honorary Corresponding Member of the Royal Institute of British Architects. Charles Hayden, '90, is of the firm of Banker, Hayden, Stone & Co., a director of the Shawmut Bank, and director of a number of other important companies. Charles T. Main, '76, is engaged in the design and construction of industrial plants. He has served in all the

(Continued on Page 2.)

TRACK TEAM DINNER.

Kanaly to Give Talk on Outdoor Season Tuesday Night.

The M. I. T. A. A. will hold a dinner on Tuesday, March 18, at 6.15, in the Union dining room. Coach Kanaly, Capt. Germain and two other prominent men will outline the work of the outdoor season and give the dates of the meets. The one purpose of this dinner is to arouse enthusiasm among Tech men in track athletics and to get them to come out and do their part in winning the New England Inter-Collegiate. All those interested in track athletics are urged to attend. Tickets may be obtained from the members of the track management at a cost of fifty cents.

AUDITING COMMITTEE.

Treasurers to Meet in Tech Show Office Tonight.

This evening the members of the Auditing Committee of the Finance Committee will meet all the treasurers of the various activities who have not yet had their account books audited. The meeting will be held in the Show office and the men should come prepared to show all their financial papers, receipted bills, bank books, bank statements to date, check and receipt books.

SANGER MAKES CUT IN TECH SHOW CHORUS

Costuming Begun—Show Music Tried Out by Members of Cast and Chorus.

Yesterday afternoon quite a little excitement was caused at the Show rehearsal by the appearance of a young lady from the costumer. She came up to measure the men for wigs, and the actors found it exceedingly difficult to stand in line and await their turn.

Beside the costumer's work, Coach Sanger made another cut in the chorus. Following is the list of those retained:

Policemen: Buxton, Harvey, Morrison, Stetson, McDougal, Leeb, Stockman Besly, Hohl, Parsons. Students, Lieber, Foster, Moulton, King, Pinkham, Huber, Crosby, Thrasher, Blakely, Livermore, Guernsey, Camp, Wentworth, Currier, Kingsbury, De Merritt, Hill. Pony Ballet, Sanburg, Karns, Higgins, Hauser, Chadwick, Putnam, Fessenden, Shabacker, Polly. Society Girls, Norris, Hilton, Foote, Fulton, Stafford, Loveland, Achard, Tapley, Bidwell, Small, Coldwell.

Musical Director McConathy also conducted a rehearsal of the cast in singing. He put the principals to work on their songs for the first time since this year's Show started. Mr. McConathy will hold a rehearsal of the Show Orchestra, together with the chorus, on Saturday, from 2 until 5 o'clock.

A cast rehearsal of the first and second acts will be held today at 4.15. Also, all men in the cast and chorus who were not measured for wigs yesterday must be on hand at this time today.

MASONIC MEETING.

Club Will Hold Dinner in Union Friday Night.

Tomorrow evening, at 6 P. M., the Technology Masonic Club will hold a dinner in the Union. The officers of the club desire a full attendance at this meeting and invite any Masons who are at the Institute to be present.

The speaker of the evening is Mr. A. A. Gleason, a well known Mason. He is a man whom it is believed every Mason will be anxious to hear.

The secretary, Mr. L. L. Downing, requests those who intend to attend to let him know immediately so that the proper arrangements can be made for the dinner.

HOCKEY TEAM DINNER.

The members of the hockey team are to hold a dinner tonight at 6, at the American House, to elect officers. After the meeting the team will attend the performance of "Ready Money."

The three hundredth anniversary of the invention of logarithms, by John Napier, a Scotchman, will soon be celebrated by all mathematicians. It was not until 1614 that his book treating of the theory of logarithms was published, but a paper was recently found, dated three hundred years ago, in which Napier outlined his scheme for the use of logarithms.

How about the clock with the ball-bearing feet?

FATHER CUSICK CONCLUDES TALKS

Discussion of "Evolution" Finished at Catholic Club Dinner Last Night.

Last evening the Catholic Club had its usual monthly dinner, after which Rev. Father Cusick concluded his series of talks on "Evolution." A very large number attended this meeting and enjoyed not only the dinner, but also the interesting conclusions made by Father Cusick.

In his introductory remarks, Father Cusick told how, in his previous talks, he had assigned four meanings to the word "Evolution," and how three of these had been rejected. The first of these, known as Darwinism, or the theory of natural selection, was not accepted by Catholicism because it was opposed to facts, and that in itself it was insufficient. Haeckel's Monism, the second interpretation was condemned for the reason that it was immoral and that it outrightly denied the existence of God. The third translation of the word "Evolution," as found in literature, was that of man's descent from animal. This theory was not supported because it was based on facts which were proved by science to be no facts at all. A certain skull, together with a few other bones, was supposed to supply the missing link between man and his supposed ancestor, the ape, but modern science has easily proved that these bones are not those of a form intermediate between man and the ape.

The fourth meaning, improperly

(Continued on Page 3.)

SOPH. BASEBALL.

Practice This Afternoon in Gym—All Out.

The Sophomore baseball team will hold its second practice of the season this afternoon in the Gym, at 3 P. M. Nineteen men reported last Tuesday for the first practice and the outlook is good for turning out a championship nine. Only four of last year's squad showed up, and it is hoped that the rest will come out for practice today.

With the present streak of good weather Captain Caffrey hopes to start practice at the Field next week. Manager Thomas wants to see all of last year's team out, and it will then be possible to divide the squad into two scrub teams. Practice will be held regularly every Tuesday and Thursday at 3 o'clock, and work will take place at the Field when the weather permits. Six battery candidates reported and other good material for these positions is known to exist in the class.

NO MEET YESTERDAY.

Boston College High Fails to Appear at the Gym.

The Boston College High School track team failed to show up at the Gym yesterday afternoon, and consequently there was no meet. All of the 1916 men were on hand, and were greatly disappointed at the failure of their opponents to appear. This is the second time this season that the Freshmen have been treated in this manner.

"GOD'S BUILDING," BY DOCTOR GIFFORD

Brookline Pastor to Speak Once More For T. C. A.—Today in Union.

The T. C. A. speaker for today is Dr. O. P. Gifford, pastor of the Brookline Baptist Church. This selection is a fortunate one indeed, and the talk is likely to be one of the most interesting of the year. Dr. Gifford is reputed to be one of the most gifted ministers in Massachusetts, and has also won great renown through his strenuous opposition to the appropriation of State money for the support of church schools.

Dr. Gifford is already well known to the regular attendants at the T. C. A. talks, as he has spoken previously this year. His first talk, "A City Without a Church," was highly praised by all those who were present. Indeed, the fellows were so well pleased that numerous requests were received to have Dr. Gifford speak once more at one of the regular Thursday noon meetings. Consequently he was asked to give several more talks, two more of which have already been delivered. Both were well prepared, and were highly appreciated by the audience. The officers of the T. C. A. confidently expect this talk to be up to the same high standard as the previous ones. The subject taken by the Doctor is "God's Building," which is a very broad subject, and one which can be treated in a number of ways. However, Dr. Gifford has shown by his previous talks that his treatment will be one well worth hearing. Many surprises are expected, and also a large number of epigrams, as the Doctor is famous for the latter. The talk will begin promptly at 1.30, in the Union.

HARE AND HOUNDS' RUN.

First Spring Chase to Be Held Saturday at Newton.

The Hare and Hound Club will hold their first Spring run Saturday afternoon of this week, starting at the Newton Y. M. C. A. It is expected that a large number of men will be out as it is important that the men begin to get into condition immediately, since the annual Inter-class run is only two weeks off. The run Saturday will be an easy one, about five miles in length. Chase Captain A. F. Peaslee will be in charge and promises the men a good time. The Newton Y. M. C. A. swimming pool will be open to the use of the fellows after the run.

The train for Newton will leave the Trinity Place Station at 2.09. All men who expect to run are requested to take this train.

WEATHER.

Forecast for Boston and vicinity: Thursday probably fair; slight change in temperature; moderate variable winds.

CALENDAR.

Thursday, March 13, 1913.
3.00—Sophomore Baseball Practice—Gym.
6.00—Hockey Team Dinner—American House.

THURSDAY, MARCH, 13, 1913

We sincerely hope that a large number of men will enter as candidates for the business staff of THE TECH at this time. There is every opportunity for advancement as fast as a man proves himself capable of carrying on the work of the department.

Final elections to the staff will be made about the first of April.

These elections are considered as the first of Volume thirty-two, the staff of which takes charge at that time and continues until April 1st, 1914. The Business, Circulation and Advertising Managers will be glad to meet any candidates between five and six o'clock any afternoon.

While we are talking about ourselves, we should also like to call the attention of the men to the trade advertisements which are for sale to any Institute man at a good discount. The Business Manager will be glad to talk with any man about this advertising as well.

E. E. SOCIETY'S TRIP.

About Twenty Members Visit the South Boston Power Plant.

Yesterday afternoon a party, consisting of about twenty members of the Electrical Engineering Society, took a trip to the South Boston Power Plant of the Boston Elevated Railway Co. A complete tour of the plant, which was made in about two hours, was conducted by an employee of the "L."

The tour began in the boiler rooms, where a careful examination was given concerning the firing of the boilers. From here they were conducted into the engine room of the plant, where the electricity is generated for about one-third the "L" system of Greater Boston. Details that were not quite clear about the powerful turbines and dynamos were explained, and the operation of the immense switch board was demonstrated, as well as the workings of the new oil switch which transfers all the power from the plant. While the party was there another unit was introduced, and a practical demonstration of the synchronizing of the system was given.

The careful explanations of the conductor of the party, who seemed untiring in his desire to answer the many questions which were asked, made the

CERCLE FRANCAIS STARTS PROGRAM

Reading of French Drama Begun at Meeting Held Yesterday.

The Cercle Francais started on its regular program for the year with its meeting held yesterday afternoon in 29 Lowell. Only twelve members were present, but it is expected that more men will attend the next meeting, which is to be held Wednesday, March 19, at 5 P. M., in 29 Lowell.

After the meeting was called to order by President Lucas the following new men were given membership in the Cercle: F. H. Achar, V. Enebuske, J. Fahri, O. R. Freeman, C. W. Fry, D. des Granges, K. F. Hawley, R. Richard, J. P. Uhlinger and P. G. Vignal. The constitution, which had been previously drawn up by a special committee was read in French and was formally ratified by the club. The club then started its social activity for the year. Parts in Pailleron's "Le Monde ou l'on S'Ennuie," were assigned to those present, and the reading of the play was begun. No formal discussion took place this time, but it is planned in the future to hold them at the close of each day's reading. After the men had been assigned different parts for the reading next week the meeting adjourned. The play which the club has selected promises to be extremely interesting, and all are urged by the officers of the club to attend the meetings regularly so that they can obtain full benefit from the readings and discussions.

The next meeting will be held next Wednesday. The club has increased its membership nearly fifty per cent, since its organization last month, and now is the time for all those interested in keeping up their French and improving it to join as they will not have to pay any initiation fee this year.

PASSANO TO SPEAK.

Chemical Society to Have Talk on "Scientific Management."

Tomorrow night, at 7.45, the Chemical Society will hold its March social meeting, with Professor Passano of the Mathematics Department as speaker. Professor Passano will discuss "Scientific Management," laying especial emphasis on how chemists and chemical engineers may use it in their professional work.

Professor Passano has been at the Institute since 1892. He is thoroughly conversant with the history of Maryland, and has written several books about his State. He has also made a study of the problems of scientific management for the last four years. His talk tomorrow night will be practically the first presentation of the result of his study, and the members of the society may feel gratified that Professor Passano has consented to make known to them the most important of his conclusions.

CORPORATION MEETS.

THE OLIVER TYPEWRITER COMPANY

WRESTLING TEAM TO MEET B. Y. M. C. U.

Bouts to Take Place Saturday Night at the B. Y. M. C. Union.

Next Saturday night the Tech wrestling team meets the fast B. Y. M. C. U. team at the Y. M. C. U., 42 Boylston street. Among the members of the opponents' team are three champions who won their bouts in an open meet held recently at East Weymouth. Wrestling is fast becoming a major sport at the Institute, and the coming meet is a good chance to show some school spirit and to root for the team next Saturday night. The admission will be twenty-five cents, which is within the pockets of most Tech men.

The entries of the Tech team are as follows: 115-pound class, Sayer; 125-pound class, Means and Smythe-Martin; 135-pound class, Kelly; 145-pound class, Alexander and Blodgett, or Morse; 158-pound class, Walters and Captain Treat; heavyweight, Crowell.

DESPRADALLE EXHIBIT.

Many Extraordinary Drawings Shown in Copley Hall.

The exhibition now being held in Copley Hall of the late Professor Despradalle's work is well worth visiting, not only on account of its architectural value, but also because of the opportunity it affords of comparing the methods of the Beaux Arts with those of similar schools in this country. The drawings and perspectives are, in many cases, of magnificent size. The plans are on the same large scale, many being almost as large as the floor of a small room.

The most striking drawings are those for the "Beacon of Progress." This is an immense monument, intended for the "Glorification of the American Nation." It is of somewhat the same form as the Washington Monument, but much more elaborate and far larger, the total height above the ground level being fifteen hundred feet. The color drawing of this great obelisk is the first object that strikes the eye of one entering the hall.

Of particular interest to Tech men are the studies for the New Technology. There is a great number of these, beginning with one made eight years ago, when the land was from the river basin. Later plans show ideas adapted to the different sites which were considered. Groups are shown adapted to locations at Forest Hills, at the Golf Links, and finally on the Embankment.

Professor Despradalle's ideas as to the height of buildings have been confirmed by later experience. Some of his designs for sky-scrapers which are shown were made twenty years ago, yet they bear close resemblance to some of our modern structures. Many other drawings and plans are shown, a scheme for the development of Copley Square being prominent.

Credit for the exhibition, as well as for the memorial meeting, is largely due to Guy Lowell, Thomas Hastings and D. Duquesne, who were fellow students of Professor Despradalle at the Beaux Arts. As the four studied under the same master, Louis Pascal, it is very appropriate that the three survivors should unite in paying tribute to their lost friend. Professor Duquesne, of Harvard, has been especially active in preparing Copley Hall for the exhibition. Though it was a labor of love, it was none the less a difficult thing to do. The arrangements of so many large elements must have required much thought and care, and Professor Duquesne is to be congratulated on his success.

Cross-country men have been glad to see Captain Ferry of last year's team around the Union this week.

OPPORTUNITY FOR BUSINESS MEN OPEN

Advertising Department of Paper Has Opened Competition For New Men.

The competition for the Advertising Department of THE TECH, which began last Tuesday, is still going on. There are surely some men at the Institute who after having gone out for an activity, have found they lacked some necessary qualification. THE TECH offers these men an opportunity to connect themselves with one of the biggest activities at the Institute if they are willing to try. The Advertising Department at the present time offers the best opportunities for one who is intending to do work for the paper. Men beginning work will be eligible for advancement at the Spring elections. A man will not only get some valuable experience, but he will also learn to meet business men in a business way. He can learn how business is conducted, as well as the views of a business man on various subjects.

If any one desires to take advantage of this opportunity, or would like further information on the subject, the advertising manager can be seen in THE TECH office any day from 5 to 6 o'clock.

CATHOLIC CLUB.

(Continued from Page 1, Col. 3.)

called Darwinism by some, implies the theory of evolution as opposed to the theory of constancy. This theory states that the species of the animal and vegetable kingdom of today were gradually evolved and that they did not exist in early times as they do at the present time.

Father Cusick went on to show that this theory was quite favorably received and accepted. First, he showed that the Catholic Faith did not oppose it because of the various interpretations of the scriptural writings. These translations imply that God did create species, for it states that He created each animal or plant after their kind.

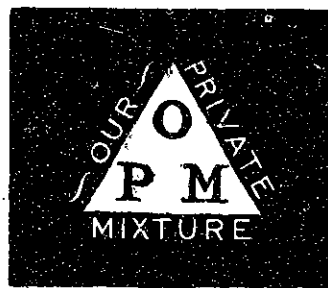

Furthermore, reason is not opposed to this theory, but it rather favors it. Reason demands for every effect its cause, and in this case it assigns an adequate cause for the origin of new species. The certain species produced by the Creator were endowed with a power to make and develop new species, not by chance but by this directive power of the original species.

The arguments that science has to offer are theories, and one of these is that spontaneous generation of life is impossible, and that life must come from life. Therefore, science, as well as religion, demands that there must be a God to start life. Father Cusick also cited several experiments performed by eminent scientists which can be explained only by applying this theory of evolution as opposed to the theory of constancy. One of these experiments which substantiate the theory is the following one: During the course of twelve years, and by a series of transplantations, 50,000 individual plants were obtained from nine plants as a nucleus. The plant used was the Evening Primrose, and of this large number 450 were found to have formed different species. These facts are better explained by the theory of evolution than by the theory of constancy or any other theory.

Father Cusick concluded by saying that Catholicism believed this theory of evolution, and not in the theory of constancy. The theory of evolution, he emphasized, was a particular form of evolution, and not a general one.

Earl E. Ferret, '12, formerly a member of the Institute cross-country team, has been visiting friends here.
