LIFE MEMBERS OF CORPORATION CHOSEN

Everett Morris, William Reddick and Theodore N. Vail now Life Members.

Yesterday afternoon the Corporation of the Institute held a meeting to fill certain vacancies in its membership. Three men were elected for life terms, and three for five-year terms. A new office in the Corporation was created, and a man elected to fill it.

The man chosen for life is Henry M. T. Jl; William Reddick and Theodore N. Vail. Mr. Morris has just completed a five-year term on the Corporation. He is of the firm of Morris & White Co., president of the Simplex Electric Co., and is on the Board of Directors of the National Association. Mr. Reddick is a member of the firm of Ridger, Peabody & Co. It is a curious fact that Mr. Reddick's father is also a life member of the Corporation. Mr. Vail is president of the American Telephone and Telegraph Co., and is known to be interested in the development of the telephone and other electrical inventions, and has promised another fund for electrical research. These men fill the places of A. Lawrence, deceased; C. C. Jackson, resigned, and Senator Metcalf, resigned.

Those who are to serve five years are H. C. Bidwell, Small, Coldwell, Charles T. Main, '76, is engaged in the Shawmut Bank, and director of a number of important industrial plants. He has served in all the past decade as a director.

TRACK TEAM DINNER

Kanagy to Give Talk on Outdoor Season Tuesday Night.

The M. I. T. A.'s will hold a dinner at Kanagy's on Tuesday, March 15, at 6.15. In the Union Dining Room, Kanagy. Capt. Kerwin and two other prominent men will outline the work of the outdoor season and their expectations of the meets. The one purpose of this dinner is to arouse enthusiasm among Tech men in track athletics and to get them to come out and join the team. A fine time is expected, and the cost will be five cents.

AUDITING COMMITTEE

Treasurers to Meet in Tech Show Office Tonight.

This evening the members of the Auditing Committee of the Finance Committee will meet all the treasurers of the various organizations who have not yet had their account books audited. The meeting will be held in the Finance Committee's office. The treasurers should be prepared to show all their financial records, receipts, bills, bank books, statements of income, checks and receipts books.
CERCLE FRANÇAIS
STARTS PROGRAM

Reading of French Drama Began
Yesterday.

The Cercle Francais started on its regular program for the year with its meeting held yesterday afternoon in 29 Lowell. Only twelve members were present, but it is expected that new men will attend the next meeting, which is to be held Wednesday, March 15, at 8 P.M., in 29 Lowell.

After the meeting was called to order the President Lancia welcomed the new men who were given membership in the society. H. L. Rutherford, J. Britton, B. W. Hett, M. F. Friend, J. H. Duff, J. A. H. G. H. T. P. S. B. V. were admitted as members.

The constitution, which had been previously drawn up by a special committee was read in French and was formally ratified by the members. The club then started its social activity for the year. Parties in Palliser's "Le Monde," "Les Alouettes," and the reading of the works of the "Society" are very grateful for the society may feel gratified that the members of the club have selected promises to be extremely interesting, and all are urged by the officers of the club to attend the meetings regularly so that they can obtain full benefit from the readings and discussions.

The next meeting will be held next Wednesday. The club has increased its membership nearly fifty per cent since its organization last month, and now is the time for all those interested in keeping up their French and improving it to join as they will not have any initiations for this year.

PASSANO TO SPEAK.

Chemical Society to Have Talk on "Scientific Management."

Tomorrow, at 7:45, the Chemical Society will hold its March social meeting, with Professor Passano of the Mathematics Department as speaker. Professor Passano will discuss "Scientific Management," laying especial emphasis on how chemistry and the chemical professions may use it in their professional work.

Professor Passano has been at the Institute since 1892. He is thoroughly familiar with the history of chemistry in this country, and has written several books about his state. He has also made a study of the problems of scientific management for the last four years, and this talk tomorrow night will be probably the first presentation of the results of his study, and the members of the society may feel gratified that Professor Passano has concluded to make known to them the most important of his conclusions.

CORPORATION MEETS.

(Continued from Page 1, Col. 1.)

The officers of the Alumni Association, except President Morin, are as follows: Secretary-treasurer, John B. H. Clapp, 1905; Assistant Secretary-treasurer, William E. Knowles, 1902; Treasurer, H. H. Rand, 1904; Secretary, W. B. Thurber, 1906.

The next meeting of the Corporation will be held March 15th in the company's rooms.

**WRESTLING TEAM TO MEET B. Y. M. C. A.**

Bouts to Take Place Saturday Night at the B. Y. M. C. A. Union.

Next Saturday night the Tech wrestling team meets the fast B. Y. M. C. A. team at the Y. M. C. A., 45 Boylston Street, Boston. The members of the opposing team are three champions who won their bouts in an open meet last month at the Tech. Wrestling is fast becoming a major sport at the Institute, and the combats meet is a good chance to show some school spirit and aid the combats meet next Saturday night. The admission will be twenty-five cents, which is within the pockets of most Tech men.

The entries of the Tech team are as follows: 115-pound class, Sawyer; 125-pound class, Mean and Smyth; 135-pound class, Kelly; 145-pound class, Alexander and Bindignt, or McEre; 155-pound class, Walters and Captain Treat; heavyweight, Crowell.

**DESPRADELE EXHIBIT.**

Many Extraordinary Drawings Shown in Copley Hall.

The exhibition now being held in Copley Hall of the late Professor Despradelle's work is well worth visiting, not only on account of its architectural value, but also because of the opportunity it affords of comparing the methods of the Beaux Arts with those of our similar schools in this country. The drawings and perspectives are, in many cases, of magnificent size. The plans are on the same large scale, many being almost as large as the plans of a small room. The most striking drawings are those of the "Beacon of Progress." This is an immense monument, intended for the "Glorification of the American Nation." It is of somewhat the same form as the Washington Monument, but much more elaborate and far larger, the total height above the ground being fifteen hundred feet. The color drawing of this great obelisk is the first object that strikes the eye of one entering the hall.

Of particular interest to Tech men are the studies for the New Technology. There is a great number of these, dating from one made sixty years ago, when the land was from the tree tops. Later plans show plants adapted to the different sites which were considered. Groups are shown on both sides of the Charles, and especially active in preparing Copley Hall for the exhibition. Though it was a task of love, it was none the less a difficult thing to do. The arrangement of so many large elements must have required much thought and care. Professor Despradelle's work is well worth a visit. He has been specifically active in preparing Copley Hall for the exhibition. **OPPORTUNITY FOR BUSINESS MEN OPEN.**

Advertising Department of The Tech Has Opened Competition For New Men.

The competition for the Advertising Department of The Tech has been held last Tuesday, is still going on. There are surely some men in the office who after having gone out for an activity, have found they lacked the necessary qualifications. The Tech offers these men opportunities to come and form themselves as one of the biggest activities at the Institute. If they are willing to work for the Advertising Department at the present time offers the best opportunity for any one who is intending to do work for the paper. Men beginning work will be eligible for advantages at the Spring elections. A man will not only get some valuable experience, but he also gains the views of a business man on various subjects.

If any one desires to take advantage of this opportunity, or would like further information as the subject, the advertising manager can be seen in THE TECH office any day from 9 to 5 o'clock.

**CATHOLIC CLUB.**

(Continued from Page I, Col. 3)

Father Cusick went on to say that this theory was made favorably received and accepted. First, he showed that the Catholic Church did not oppose the theory of evolution as opposed to the theory of constancy. This theory states that the species of the animal and vegetable kingdoms of today were gradually evolved and that they did not exist in early times as they do at the present time.

Father Cusick went on to show that this theory was made favorably received and accepted. First, he showed that the Catholic Church did not oppose the theory of evolution as opposed to the theory of constancy. This theory states that the species of the animal and vegetable kingdoms of today were gradually evolved and that they did not exist in early times as they do at the present time.

Father Cusick concluded by saying that Catholicism believed this theory because it is the only one that is consistent with the teachings of the Church. He emphasized, was a particular form of the present theory of evolution, and not a general one.
