

THE TECH

VOL. XXXII. NO. 1010

BOSTON, MASS., FRIDAY, MARCH 14, 1913

PRICE TWO CENTS

RIFLE TEAM VICTOR OVER DARTMOUTH

Now Tied With Mass. Aggies
For Second Place—Meet
Harvard Next.

The Technology rifle team has just won its eighth victory in a meet in which they defeated the Dartmouth team by a score of 947 to 907. The following are the individual scores of the Tech team: Capt. Stewart, 196; Haslam, 194; Simmons, 186; Dunn, 187 and Casselman, 184.

The remaining matches are with Harvard, Lehigh, Mass. Aggies and Pennsylvania University.

At present Technology is tied for second place with the team from Mass. Aggies, both of these teams having met with one defeat. Harvard holds first place, having defeated Mass. Aggies last week. Technology meets Harvard next Monday, and hopes to win first place from them. Princeton is the only team that has won over Tech, while the Institute men have defeated Cornell, Gleason, Clemson, Norwich, North Georgia, Columbia, Dartmouth, Rhode Island State and the University of Vermont.

SOCIALIST CLUB.

Speaker Promised For Meeting
in Union Monday.

At the Union, next Monday noon, under the auspices of the Political Engineering Club, Mr. Harry W. Laidler, of New York, will speak briefly on "The Ideals and Achievements of Socialism." Mr. Laidler is the speaker whom the Intercollegiate Socialist Society promised to the Political Club earlier in the week, and is the National Organizer for the society in the United States. He is at present on an organizing trip through northern New England and will visit Technology on his way back to New York.

Mr. Laidler is a man who has had an unusually broad experience in presenting the subject of Socialism for the consideration of collegiate audiences. While a student at Wesleyan University he was distinguished for his ability as a speaker, and served on the intercollegiate debating team of that institution. Upon graduation from Wesleyan he pursued the study of law at St. Lawrence University, taking there an advanced degree. He is at present a member of the New York Bar. Some two years ago he was appointed National Organizer for the Intercollegiate Socialist Society, and has subsequently had much experience with collegiate and popular audiences in all parts of the United States. He has succeeded in founding many chapters, both graduate and undergraduate, of the society for which he works.

The object of the society is to promote an intelligent interest in Socialism among college men and women, and all who are desirous of securing a knowledge of the real meaning of the Socialist movement are eligible to membership.

It is announced that no further meetings of the club will be held until after the coming of the New York speaker. An open meeting will be arranged for some afternoon next week, at which a permanent constitution will be more definitely outlined.

Have you noticed that the extra lockers have been removed from the Gym?

PLACES ON THE TECH STILL OPEN TO MEN

Circulation and Advertising De-
partments Want Your
Help.

The Business Department of THE TECH is in need of more men. Some have already shown up but it will require more to carry on the work. Positions are open both in the Advertising and Circulation Departments. Here is a rare opportunity for Tech men to get out and cultivate their business ability. The work of the Advertising Department consists largely of chasing ads. This gives the man a chance to come in contact with the principal business men of the city, possibly at times with men who will be future employers of Tech students. Moreover, there is a chance to learn to converse fluently, which is of vital importance in seeking employment, as well as in being able to meet the demands which will be made upon an engineer in his subsequent career. In the Circulation Department the work is of a slightly different character but just as stimulating to a man's business ability. The work here consists of collecting bills and seeing that the paper is delivered promptly and regularly to subscribers. The experience obtained in collecting bills is particularly valuable, for this is a requirement which everyone has to meet.

A successful engineer has to be an all-round man. He must possess business and executive ability, as well as a thorough knowledge of his profession. Come out for the business department of THE TECH now and gain some of this necessary knowledge. The Business Manager may be seen in the upper office of THE TECH every afternoon from 5 to 6 o'clock.

MASONIC CLUB DINNER.

Mr. A. A. Gleason Will Address
Members in Union.

The speaker who will address the Masonic Club at the dinner which is to be held in the Union at 6 o'clock this evening is Mr. A. A. Gleason, a noted Mason. The officers of the club promise a good time and a fine talk, and wish all members to be present. All men who intend to go to the dinner are requested to give their names to Secretary Downing.

TRIANGULAR DEBATE.

Tonight, at the Sanders Theatre, the Harvard Varsity debating teams will fight it out with the Yale and Princeton cohorts. While one Harvard team will speak against the Yale debaters, the other will clash with the Tiger talkers.

The subject for this year's debate is especially interesting and vital in that it deals primarily with a subject concerning the United States, namely, Resolved: That the United States should exempt our coastwise trade from Panama Canal tolls.

Unlike previous years, when all were admitted free to these annual debates, all undergraduates who wish to hear the debate must pay for admission tonight. The Institute class in Argumentation and Debating, which took up that same subject in their class discussion, are going to hear this debate. Prof. Pearson, who is in charge of this class, will accompany them to the debate tonight.

BIG TECH BOWLING LEAGUE ORGANIZED

Faculty to Play Lane's Team To-
night—Six Teams Now in
Field.

With the encouragement of the Trinity Court Bowling Alleys, a bowling league of Technology students has been formed. Six teams are already in the field, and it is hoped that several more will be made up within a short time. Good prizes are offered by Mr. Thrasher, manager of the alleys. Fifteen dollars is to go to the team winning the largest number of games, and ten dollars to the team winning the next largest number. Individual prizes will also be awarded to the men. For instance, the man getting the highest average for the tournament will receive fifteen dollars, and the man with the highest single string will get seven and a half. Furthermore, the contestant making the highest three-string total gets seven and a half dollars. Only one condition is imposed on the students who enter the contest, namely, a man must roll thirty out of the forty-five strings in order to be eligible for any of the prizes.

Up to the present time the teams are divided as follows: Team No. 1: Pung, Newcomb, Lovely, Schneider, Sumner. Team No. 2: Mangan, Mann, Vose, Nason, Chandler. Team No. 3: Drummey, Duff, Yeh, Hall, Lewis. Team No. 4: Sinnicks, Higgins, Belcher, Huber. Team No. 5: Lane, Pendleton, Mahoney, Williams. Team No. 6: M. C. Mackenzie of the Mechanical Engineering Department, Prof. W. H. James of the Mechanical Engineering Department, Prof. H. K. Burrison of the Mechanical Drawing Department. (Continued to Page 2.)

SOUTHERN CLUB DANCE.

Among Most Enjoyable Affairs
at the Institute.

Among the most enjoyable and most delightful functions at the Institute is the Southern Club dance, which is to take place on Saturday, March 15, from 8 to 12, at Hotel Tuileries. Unlike previous dances, this one is not to be limited to club members only, but all students wishing to attend this popular affair should see some member of the club for invitations. The subscription price is two dollars and a half per couple, including refreshments.

The matrons for the dance are: Mrs. George H. Raney, Mrs. Alfred E. Burton, Mrs. Charles M. Spofford and Mrs. G. Gay.

SOPHOMORE BASEBALL.

The second practice of the 1913 baseball team was held yesterday afternoon at the Gym. The work consisted mainly of general loosening up, while the battery men got in some preliminary practice. Several of last year's team showed up, as well as a number of new men.

If the weather permits, batting and fielding practice will be held at the field next Tuesday. The squad is to be divided into two teams for scrub games, Team A to be composed of last year's men, and Team B of the new men out.

Among those who were out yesterday were: Quirk, McDewitt, Morse, Thomas, Holway, Franks, Murphy, Delano, MacIntyre and Colby.

T. C. A. HEARS POPULAR SPEAKER IN UNION

Dr. O. P. Gifford Addresses Men
On Subject of "God's
Building."

Attracted by the reputation that Dr. O. P. Gifford has made as T. C. A. speaker, a large audience was present in the Union yesterday to hear him. The subject of his talk was "God's Building," but he spoke for the most part on the foundations of the Christian spirit.

He likened the Christian religion to God's building, and said that uniformity of structure was essential. The denominations into which the religion of today is divided are built up around certain men. A unity of church effort and work is needed and looked forward to.

On the cornerstone of God's building is inscribed two words: Love and Life. Civilization is built on the love of God. It is only when a man can learn the love of God that he really can enjoy life. Life of God is the spirit that allows men to repent their sins and live virtuous and upright lives. Dr. Gifford's talk made a lasting impression upon his hearers, and all went away feeling that they had spent a profitable half hour.

CATHOLIC CLUB DANCE.

Arrangements For Affair Well
Under Way.

After the dinner and talk on "Evolution" by Rev. Father Cusick, Wednesday evening, the Catholic Club held a business meeting, at which some important business was transacted. This was concerned with the dancing party which the club is going to hold April first, at Hotel Somerset.

R. Murphy, chairman of the Dance Committee, reported that 800 invitations had already been sent out and that the club expects to issue about 200 more. The committee desires more men to send in the names of their friends so that the latter can be provided with invitations. These names may be left at the Cage, in Box 32.

An announcement which will meet with considerable approval on the part of the members of the club was the fact that the price of tickets for the dance has been reduced from \$2.00 to \$1.50 to club members. Furthermore, it was stated that any men who will offer their services as aides and will not dance until after the supper, will be admitted for \$1.00. The matrons were also announced. They are: Mrs. Michael M. Cunniff, Mrs. Henry V. (Continued to Page 2.)

WEATHER.

Forecast for Boston and vicinity:
Rain Friday; increasing easterly winds.

CALENDAR.

Friday, March 14, 1913.
4.15—Tech Show, Cast Rehearsal, Second Act.

5.00—Technique, 1915, Electoral Committee—21 Rogers.

7.30—Bowling League, Trinity Court Bowling Alleys.

Saturday, March 15, 1913.

2.00—Hare and Hound Run—Meet at Trinity Place Station.

8.00—Wrestling—M. I. T. vs. Boston Y. M. C. A.

FRIDAY, MARCH, 14, 1913

The showing which our Rifle Team has been making is indeed a creditable one. To be tied for second place with eight victories out of nine meets is indeed a creditable record, and one of which Technology should be proud. We sincerely hope that they will continue successful throughout the remainder of their season and place the name of Technology in the foremost ranks of the league.

WRESTLING TEAM.

We heartily agree with Mr. Bousquet, whose communication appears in today's issue, regarding the Wrestling Team. They have truly shown themselves capable of upholding the good name of the Institute in this sport and should receive full recognition as a branch of Institute athletics. We sincerely hope the Advisory Council will consider it wise and practical to take the team under its wing within the very near future.

With the proximity of the spring and summer months we naturally think of the long vacation, with its possibilities for outdoor life. Why should we not begin to consider now how we shall use these long months?

Most of us at Technology have come for a serious purpose, to fit ourselves for some life work. We realize that the training we receive here is only a beginning, that we must spend years after graduation rubbing off the rough edges and acquiring a practical knowledge of our profession before we will be fitted for big jobs. By using our summers to start on our practical work we can get "the jump" on the next man and start the race with a one or two years' handicap.

Go out and get a job; outdoors if possible, where you will learn the rudiments of the practical side of your work. Start in now, for summer work of the right kind is none too plentiful, and make up your mind that before the middle of April you will have a position waiting for you when you leave in June.

The Lehigh wrestling team has defeated Cornell, Columbia and the Navy. A victory over the University of Pennsylvania is anticipated, and Lehigh followers are sanguine that their team will win the Inter-Collegiate championship.

SCIENTIFIC MANAGEMENT PROF. PASSANO'S SUBJECT

Will Discuss Its Application to
Chemical Engineering
Tonight.

This evening, at 7.45, Prof. Passano will speak at the March social meeting of the Chemical Society. The subject of his talk is "Scientific Management," which he has thoroughly investigated during the last four years. Although his investigations are not yet completed, he has consented to present some of his most important results before the society. His special object is to show the chemists how they can apply this knowledge to their profession.

Although Prof. Passano is well known as an instructor of mathematics in the Institute, and has also written a history of Maryland, which is his native State, this new phase of his work is a surprise to many. This is a subject which we hear spoken of frequently, but about which no series of correlated facts has ever before been collected, consequently the members of the society are assured of a rare treat. Tonight is practically the first time Prof. Passano has made known the results of his study, and there will probably be many points open to discussion.

BOWLING LEAGUE.

(Continued from Page 1.)

ment, and Dr. B. L. Armes of the Biological Department.

Team 5 plays Team 6 tonight at the Trinity Court Bowling Alleys. The chances are that the "faculty team" will beat the students of Team 5.

Tuesday night's scores show some remarkable bowling. Team 1, led by Captain Pung, fought gamely, only to be defeated at the hands of Team 2, in charge of Captain Nason. The competition was very keen and the final game was in doubt until the last box was rolled. Team 3, led by Captain Yeh, had difficulty in defeating Team 4, winning finally with the score of 1119 to 1086. Captain Sinnicks and his team fought valiantly and contested the two games hotly. The scores were as follows:

	Teams	1	2	3	4
1st string...		349	403	364	361
2nd string..		407	408	406	365
3rd string..		414	421	369	360
Total ...		1170	1232	1119	1086

CATHOLIC CLUB.

(Continued from Page 1.)

Mrs. Richard C. Maclaurin, Mrs. John Martin, Mrs. James M. Morrison and Cunningham, Mrs. John F. Fitzgerald, Mrs. James A. Walsh.

The committee which was appointed to consider the donation of Catholic books relating to science to the General Library in Rogers Building reported that the first book the club will give is a Catholic Encyclopedia. Nothing definite was reported by the Insignia Committee excepting that several men in the Architectural Department were working on various designs for the club pin.

Next Sunday the Catholic Club will attend the 8 o'clock mass at the Cathedral to receive the Holy Communion. All members are especially urged to attend.

Weather forecast for Saturday: Deep gloom among our youngest; they receive their first U. S. marks.

At a recent college meeting the students of Lehigh University voted to raise their annual fee toward the support of athletics, from \$7 to \$9.

HARVARD PROFESSOR TO ADDRESS MECHANICALS

Boiler Construction Will Be Subject of Lecture Monday.

"The History of Steam Boiler Construction" is the subject of an illustrated lecture to be given next Monday afternoon by Professor I. N. Hollis of Harvard. The talk will be given under the auspices of the Mechanical Engineering Society and will be at the usual time and place—4.10 P. M., 11 Engineering B. The officers of the society not only wish all Course II men to be present, but also invite anyone interested in this phase of mechanical engineering to attend. Besides being of interest to all members of the M. E. Society, Prof. Hollis's talk will be unusually so to the Juniors, supplementing, as it does, their course in Boiler Design. It will be given by a man who is a well known authority on steam engineering, and who has made a thorough study of all its branches. Prof. Hollis has recently collected a large number of slides which have never been shown before, illustrating the older and more modern methods of boiler construction and design, and it is expected that these will add greatly to the interest of his lecture.

Prof. Hollis holds several prominent positions in engineering as well as collegiate circles and is now Professor of Steam Engineering at Harvard. For some time past he has been connected with naval work, and is an active member of the American Society of Mechanical Engineers, with which the Institute society is affiliated. In all ways he is thoroughly competent to discuss "The History of Steam Boiler Construction," and the next meeting of the M. E. Society promises to furnish a most enjoyable hour for its members.

COMMUNICATION.

To the Editor of THE TECH: There appeared in THE TECH a statement that at a recent meeting of the Advisory Committee the matter of making wrestling a Varsity sport was considered. It was decided that wrestling should be a recognized sport. The question of awarding an insignia was also considered, but no conclusion was reached.

Undoubtedly this news was a surprise to a great number of students. That there is a wrestling team at the Institute is by no means a widely known fact. For this and other reasons, wrestling seems to have had a pretty hard time. It has not, until recently, received much financial support. Nor has it been fully recognized. Yet, in spite of these odds, wrestling has come to the front. A mighty good team has been turned out. Of the four meets in which the team has so far participated it has made a clean sweep of three, and, according to collegiate wrestling precedent, won the fourth by a close margin. It is interesting to note that the last meet in question was no other than that with Harvard. Besides these four meets there are definite arrangements for four more, with a number of others yet unsettled.

Doesn't it seem that a sport that has come to the front under such adverse conditions should be properly recognized? Surely, the Institute cannot afford to allow interest to flag in any sport now active. We are not overcrowded in athletics at Tech. I believe that it would be well in this instance to recognize wrestling properly. It seems to me that giving the wrestling team such an insignia as a W would be a mighty good thing. This would not only serve to reward the men who have worked hard to put this sport where it is, but it would also serve to make wrestling a permanent one at the Institute.

L. R. G. Bousquet, '16.

PRINCIPLES OF PLAY WRITING EXPLAINED

Mr. Baker's Lectures Interest Men Who Write For Tech Show.

The Lowell Institute lectures on the subject of the drama, which are being given by Mr. George P. Baker, are proving of particular interest to Tech men who are expecting to do any work in the way of writing for Tech Show. In this series Mr. Baker is explaining certain features of the mechanism of plays which might be quite overlooked by the average play-goer, but which are of vital importance to the would-be author.

Yesterday afternoon the third of this series of lectures was delivered in Huntington Hall. Mr. Baker spoke on the "illustrative incidents" of the play, the value of surprise and climax in holding the interest of an audience, principles of securing proper progress of the action, and the necessity of clearly impressing the author's ideas upon the audience.

In the first act of every play the characters must be "introduced" to the audience. Certain necessary facts about their previous history and relations to each other must be made plain, and the devices used to effect this are called the illustrative incidents. Different devices are employed, one plan being to arrange dialogues between the players, but it is very important that the facts be brought out in a perfectly natural way. The audience should not be allowed to perceive the mechanical details, but retain the ideas the author wishes to convey.

Surprise is a means often used to maintain interest, and it is valuable if used in moderation. An audience enjoys unexpected or mystifying situations, but a play should not depend on these alone. A long series of mystifying and perplexing incidents puzzle and confuse the spectator to such an extent that he gives up trying to solve them and loses interest. For this reason an attempt to keep the audience in suspense by leaving everything unexplained until the last act defeats its own purpose.

A proper use of climax is one of the best ways of holding interest and maintaining suspense. The author's lesson is impressed very strongly through the emotional incidents—and emotional effects depend largely on climax. True climax is that which produces the effect desired by the author, no matter what the mechanism.

Care must be given to the progress of the play. All the acts and scenes should have a close relation to each other. Common violations of this principle are: inserting a scene which has no logical place in the development of the main theme, omitting a scene which is necessary for a complete understanding of the plot, and adding a superfluous act which is merely an anti-climax.

Mr. Baker, in closing, emphasized the importance of giving an audience a clear idea of the author's purpose in writing his play. Too frequently the points which teach a moral are not sufficiently driven home in the mind of the spectator.

The next lecture is to be held Monday at 5 P. M. It will be along the same general lines as the last one.

CHESS CLUB MEETING.

This noon, in the Union, there will be a meeting of the Executive Committee of the Chess Club, to make definite arrangements about future games. The date of the return match with Harvard has been undecided for some time, but it is hoped to settle it at the meeting this noon.
