VOL. XXXII. NO. 111

BOSTON, MASS., SATURDAY, MARCH 15, 1913

PRICE TWO CENTS

TECH SHOW CAST AND CHORUS TO REHEARSE

Coach Sanger Will Go Through the Book—Mr. McConathy to Lead Chorus.

This afternoon, at 2 o'clock, both cast and chorus will rehearse in the Union. Mr. Sanger will go over the entire book and the management announces that everyone in the Show must be present.

Mr. Osborne McConathy will conduct the chorus in conjunction with the orchestra, the latter playing the Tech Show songs. Mr. McConathy is quite prominent in musical circles in and around Boston. Just recently he had charge of the orchestration in the production of the Mikado given in Chelsea by the Mendelsohn Club of that place. He is in charge of the high school vocal work in that town besides being connected with numerous societies around Boston. He has done extensive band work and now is leader of the Show orchestra.

The orchestra has improved immensely since Mr. McConathy took charge, and with him and Mr. Sanger as coaches, the prospects of this year's Show are excellent.

Ex-Stage Manager G. R. Thayer would like to see all who wish to try out for light men in the Show office on Tuesday, at 4.30 o'clock.

HARE AND HOUND RUN.

Train Leaves Trinity Place at 2.04 This Afternoon.

This afternoon the Hare and Hound Club will hold its first run of the spring. A bunch of about thirty fellows are expected to show up at Trinity Place for the 2.04 train. The club's to hold the run at Newton, the distance being about four or five miles. As this is the first time out the pace will not be very fast, the idea being to give the squad a start in practice work in preparation for the spring meet. After the run the Newton Y. M. C. A. swimming pool will be open for the use of the fellows. This pool is one of the finest Y. M. C. A. pools around Greater Boston, and the prospect of a good swim after the run ought to be quite an inducement to everyone that can to come out.

DATE SET FOR TECHNIQUE RUSH

Rush to Be Held April 15 in Old Stand in Rear of Copley Plaza.

Through the courtesy of the management of the Copley Plaza Hotel the vacant lot in the rear of the hotel will be available this year for the Technique Rush. This will make it possible for a large number of people to witness this spectacular event most advantageously from the windows of Pierce Building and Engineering B. The elevated position of the sidewalk surrounding the lot will make it possible for spectators to see the contest well from the sidewalk.

The date decided upon for the time of the rush is April 15, at 1.30 o'clock. After careful consideration the Managing Board of Technique has decided that this time will be the most convenient for the greatest number of men.

The management promises that plans are in the making which will make the rush for Technique, 1914, a memorial contest for both spectators and contestants. This, coupled with the fact that the rush is to take place on the same ground that the first rush was held on should be a great incentive for every undergraduate to make a strong try for one of the coveted volumes bearing the signature of President MacLaurin.

CHESS TEAM CHOSEN.

Men to Meet Brown in Tournament on March 22 Picked.

At a meeting of the Executive Committee of the Chess Club further arrangements for the coming meet with Brown were discussed and four men chosen to play. These men are: L. B. Hoyt, '13; C. E. Norwood, '14; O. F. Jones, '14, and W. Grant. Although three ballots were taken, a draw resulted between Merrill and Chandler for the final man on the team.

The Brown men will be here to participate in the tournament on Saturday, March 22, and it is expected that they will have a hard time to win, because the men which have been chosen to represent the Tech Club are considered strong men.

FRESHMAN BASEBALL.

Practice at Tech Field Monday—All Candidates Report.

The Freshman baseball team will hold its first outdoor practice Monday afternoon at Tech Field. So far only a few men have signified their intention of coming out for the team, but it is hoped that a large number will report for practice Monday.

Tech Field is in very good shape, and with favorable weather the diamond should soon be in fine condition. Manager C. H. Woolley has been working hard on a good schedule for this season, and has already succeeded in arranging for several very good games.

Practice Monday will start as soon after four as possible, and all the fellows should report on time with baseball clothes.

The Pilgrim A. A. hockey team surprised the talent by defeating an all-star team from Canada at the Arena Thursday evening.

PROFESSOR SMITH TO TELL OF BORNEO TRIP

Will Give Talk at Joint Meeting of M. E. and E. E. Societies Next Thursday.

On Thursday, March 20, Prof. H. W. Smith will give a talk at the joint meeting of the Mechanical Engineering Societies. Prof. Smith, who is well known as an instructor in the Electrical Engineering department spent six or seven months last year in North Borneo and several other islands of the South Pacific collecting specimens and studying the manners and customs of the natives.

About a month ago Prof. Smith told about his travels at a Technology Club meeting, and aroused so much interest that he has been secured to give another talk at a combined meeting of the Mechanical and Electrical Engineering Societies. He has some wonderful lantern slides which were taken from his own photographs showing the various types of the uncivilized and half-civilized natives of

(Continued on Page 3.)

FREE TOWELS AT GYM.

Beginning Monday there will be no charge made to the students for the use of towels in the Gym. It has always been the custom to charge a small fee for the use of these towels, and the Institute authorities hope that the students will appreciate the cessation of this custom and not abuse the privilege. No towels are supposed to be kept in the lockers, and if the men obey this rule and give the towels proper treatment, there is no reason to believe that the former custom will be reinstated.

M. E. SOCIETY MEETING.

Harvard Professor to Speak On Boiler Construction.

On next Monday afternoon, in 11 Eng. B, the Mechanical Engineering Society will hold a meeting at 4 P. M. The officers have secured as a speaker at this meeting Professor I. N. Hollis, of Harvard, who will give an illustrated talk on "The History of Steam Boiler Construction."

Professor Hollis, who is a Professor of Steam Engineering at Harvard, is widely known and is a recognized authority on all branches of steam engineering work. In the past he has been connected with naval engineering work, and is today a prominent member of the American Society of Mechanical Engineers, with which the Mechanical Engineering Society of the Institute is affiliated.

The lecture, which will cover the whole history of the steam boiler, will be illustrated throughout; and he promises to show a large collection of slides which he has never shown before. This lecture will be of especial interest to the third-year men of Course II, as they are now engaged in boiler design, a subject very close to that of the lecture. A large attendance of Course II men is expected, and the officers extend a cordial invitation to any other men who may be interested in this subject.

JUNIOR PROM ORDERS.

Preliminary Orders for the Prom will be obtainable at the Union on Monday, March 17, after 9 A. M., at the Cage.

WRESTLING MEET WITH B. Y. M. C. U. TONIGHT

Tech Team in Fine Trim For Meet at Norcross Hall Tonight.

Tonight the wrestling team is going up against one of the strongest teams in New England, namely, the B. Y. M. C. U. team. The meet is to take place at 8 o'clock, in Norcross Hall, 48 Boylston street. There will be eight bouts and also some exhibition weight lifting by a professional strong man. The Tech team wants a good bunch of rooters to go along with them and make some noise. Both teams are in excellent trim and the meet promises to be a close contest.

In the 115-pound class, Sayer of Tech is entered against W. R. Fleming of the Y. M. C. U. Sayer has wrestled in four meets for Tech, and each time he has secured a fall in remarkably short time. In the 125-pound class, Smyth-Martin of Tech is entered against Thomas O'Hara of the Y. M. C. U. Smyth-Martin has been taking off weight in the past month

(Continued on Page 3.)

C. E. SOCIETY TO MEET.

Mr. John Howard Will Address Society On Costa Rica.

There will be a meeting of the Civil Engineering Society next Tuesday, in 11 Engineering B. Mr. John Howard of the Civil Engineering Department will tell the society of his experiences in Costa Rica while there during a leave of absence from the Institute. He will illustrate his talk with slides reproduced from pictures taken by himself. His business in Costa Rica was to take several surveys that would settle boundary disputes. There will be a brief business meeting preceding the talk. The purpose of the meeting is to elect a new vice-president to take the place of Miles E. Langley, the present holder of the office.

Shingles of the society will be on sale at the meeting.

EXHIBITION TICKETS.

Through the generosity of Mr. F. Nathaniel Perkins, a member of the Advisory Board of the Technology Christian Association, the secretary of the Association has about 250 free tickets for the exhibition of the Water Color Club, to be held at the Boston Art Club. He will be glad to distribute these tickets among Tech men who are interested. Tickets may be obtained at the Cage and at the T. C. A. office, Room 5, Engineering B. The exhibition will continue till next Saturday evening, March 22.

WEATHER.

Forecast for Boston and vicinity: Probable showers today. Cooler towards evening. Sunday fair.

CALENDAR.

Saturday, March 15, 1913.
2.00—Hare and Hound Run—Meet at Trinity Place Station.
Monday, March 17, 1913.
4.00—Freshman Baseball Practice at Tech Field.
4.00—Meeting of M. E. Society in 11 Eng. B.
5.00—Senior Class Day Ballots Due.

THE TECH

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

SATURDAY, MARCH, 15, 1913

Another innovation will soon be adopted in the fact that free towels will now be given out in the Gym. This is indeed a great improvement over the past arrangement, whereby each towel was rented to the users. With this added privilege, which will be greatly appreciated, there comes the question of abuse which must always be carefully watched. It should be distinctly understood that the towels cannot be placed in the lockers under these conditions, and it must be kept well in mind that the overstepping of this rule, as well as many others which enter into the regulation of the new scheme, will mean an immediate return to the old way.

SENIOR PORTFOLIO.

It is imperative that every Senior get his picture and personal history in the Portfolio, for this is a book which every man will be more than glad to have after he has left his undergraduate life. It is, perhaps, hard to realize now just how much we shall prize such a book when we are cut off absolutely from all the ties that have meant so much throughout four years of the close personal contact which we all have had here in getting our start toward professional life.

Names cannot be received after 4 o'clock on Monday, the 17th of March, and we sincerely hope that every Senior will make it possible to have his picture printed this year.

SOCIALISTS TO MEET.

Political Engineering Club to Hear Mr. Laidler.

The Political Engineering Club, whose purpose is to stimulate interest in Socialism on the part of college men and women, will have for its first public speaker Mr. Harry W. Laidler. He will address the club in the Union March 17.

It would seem that Mr. Laidler is peculiarly fitted to speak to college men on the subject of Socialism. He is a college man himself, and since graduation has been an ardent follower of Socialism, and is now the official organizer of the Intercollegiate Socialist Society.

The club has not yet made any definite progress because of its very recent organization. Steps are being taken to put the club on the basis of an active organization. An open meeting will be held next week on a date to be settled upon later. The temporary officers invite all Technology men interested in the subject of Socialism to be present.

PORTFOLIO HISTORY BLANKS DUE AT CAGE

Next Monday Is the Last Day That Forms Will Be Received.

Monday, March 17, is the last day upon which Seniors may hand in their history blanks for this year's Portfolio. These blanks have been out for a month and the management has decided that the men have had ample time to fill out their blanks and hand them in. No date was set for the handing in of the blanks because of the uncertainty of some of the men concerning the titles of their thesis. The management feels that it is imperative that the histories be all in by next Monday, and all those delayed beyond this date will not be included in the books.

It is planned that the Portfolio be out the first week in May. It is to avoid all possible delay in its publication that the committee has decided not to receive the blanks after Monday. A new lot of history forms have been left at the Cage so that any man who has not secured one still has an opportunity to do so.

It should be known that the edition is to be a limited one, and there is no chance of enlarging the order unless the committee is absolutely forced to do so.

PRAISES DESPRADELLE.

Doctor Maclaurin Pays Tribute to Noted Architect.

At the Despradelle Memorial meeting, held last Monday in Copley Hall, the speeches were highly eulogistic, as was reported in THE TECH. A large portion of President Maclaurin's speech has already been published, but the following tribute to the late Professor, which was paid by the President, has not appeared before.

"His special qualifications as a teacher were due in part to training, but to a still larger extent to temperament. He realized the full value to the teacher of scholarly foundations, and I need not remind you that he was trained in the best and most rigorous of schools. France is a country to which architects always look with respect, if not because of their admiration for its architecture, at least because it has devoted itself more seriously and more successfully than has any other country to the problem of teaching architecture. Despradelle was thoroughly conversant with the methods of the French schools and was wonderfully apt in applying them to the conditions that exist in this country. Here it was that his temperament so greatly aided him. He was not superficial, but profoundly sympathetic, and he set himself to learn as speedily as possible to understand and to sympathize with the American people. He would have done this in any case, but his natural sympathy was stimulated by the professional feeling that he could not make a great teacher of American architects unless he sympathized with the aspirations of their countrymen."

COMMUNICATION.

Editor of THE TECH:

In my communication in your issue of the 12th, the first word in the twelfth line should be COMBINED, not COMPARED.

It puts quite a different construction on the sentence, as the Hockey, Boat Club, etc., are a part of the M. I. T. A. A. I wish you would make such a notice as will dispose of any idea on the part of the Hockey, Boat Club, Golf and Lawn Tennis interests that they were not thus included (through the M. I. T. A. A.) in the major activities.

Yours truly,
F. H. Briggs.

**MASONIC CLUB OF
TECH HOLDS DINNER**

Mr. A. A. Gleason and Major Briggs Speak at Banquet Held in Union.

The Masonic Club held a very successful dinner last evening at the Tech Union, over which H. R. Worsley, president of the Masonic club at Tech, presided. There were over twenty-five members present and all enjoyed the exceptionally good banquet which Steward Colton prepared. Among those present were Professors Smith and Bradley of the Institute Faculty, and Major Briggs. The latter made a very interesting speech on the benefits derived from being a Mason.

Mr. A. A. Gleason, a prominent Boston attorney, addressed the meeting on the Acadia Fraternity, an organization composed of Masons established at many of the larger colleges and institutions throughout the country.

WRESTLING TEAM.
(Continued from Page 1.)

and is now just a trifle over weight. However, he is in fine form and the bout should be a close contest. O'Hara is the present N. E. champion in the 125-pound class. Kelly of Tech is entered against J. B. Green. Kelly has won all of his bouts this year, and he is also the Western Intercollegiate champion in the 135-pound class. In the 145-pound class there will be two bouts, and the men entered are Alexander and Morse of Tech, and W. R. Goodling and D. Sewall of the Y. M. C. U. Morse is a Freshman, and this is his first bout. He has been showing fine form in practice, and if he shows as good form in the bout tonight he will have an even chance of winning his match. The 158-pound class bouts promise to be interesting. Captain Treat of Tech is entered against Dr. W. F. Provan and Walters of Tech is entered against A. P. Innis. Treat has won all but one of his bouts this year, and he is in excellent trim. Dr. Provan is a former 145-pound champion and is a fast all-round wrestler. Last year Dr. Provan and Treat were entered against each other and Dr. Provan won on decision. The heavyweights are Crowell of Tech and G. J. Benson of the B. Y. C. U. Arthur G. Mann, a former heavyweight champion, will referee.

The Tech squad has been coached in practice by "Cracker-jack" Butler, and he has put them in the way of many tricks for which he is famous. Remember, a good bunch of rooters is wanted tonight at Norcross Hall, 48 Boylston street, at 8 o'clock, and the admission is twenty-five cents.

JOINT MEETING.
(Continued from Page 1.)

the South Sea Islands. The pictures of the primitive dwellings, costumes and war dances are very realistic. He was also able to procure some excellent phonographic records of conversations between the natives, as well as war songs and medicine pow-wows. The idea of carrying a phonograph into the wilds is something new, and those who are going to hear Prof. Smith are looking forward with great expectation to this part of the entertainment. Prof. Smith also obtained a large number of valuable specimens from some of the islands. These specimens he has presented to the Harvard Museum.

ELECTROLYSIS COURSE.

Monday, March 17, Professor H. M. Goodwin will commence his series of six experimental lectures on Principles and Applications of Electrolysis. The lectures will be given in Room 23, Walker, at 4.05 in the afternoon. No examination is required. The course is elective, and open to students in all but the first year.

**PRIZE ARCHITECTURAL
CONTEST UNDERWAY**

Outline of Lloyd Warren Prize Competition—M. I. T. Among Contestants.

The Intercollegiate Architectural contest is now in full swing. This is a contest in which the students from six of the largest Universities and professional schools are entered. The colleges entered are Pennsylvania, Cornell, Syracuse, Harvard, McGill and Massachusetts Institute of Technology.

The competition was founded by Mr. Lloyd Warren of New York, and \$150 in prizes was given by him. The prizes distributed are: \$90 for the best piece of work in Class 1, and \$60 for the best work in Class 2. The candidates in Class 1 are required to make a preliminary sketch and present a final drawing of a Museum of Fine Arts. Only regular students in their final year before a professional degree is given are eligible for Class 1. Class 2 is open to competitors not yet eligible for Class 1. The subject for Class 2 is a College Library.

Under the regulations of the contest the students must present themselves at a definite time and place and must make the preliminary sketch for their final design. The time allowed for making this design is nine hours, and during this time the students must neither leave the room, nor receive help from, nor consult book, instructor, or fellow students. The preliminary sketches were submitted on February 17. After handing in the preliminary sketches the students are to complete and submit the plans by March 19. The final plans are to conform strictly to the preliminary sketch and the final award is to be based on how well they are made to conform.

The six best plans in each class are to be forwarded to Philadelphia, where the jury will decide the winning drawings. At Philadelphia the drawings are placed on exhibition for a few days. They are then sent to each one of the colleges to be placed on exhibition for three days. The jury consists of one representative of each school, not in any way connected with the faculty. The representative from Massachusetts Institute of Technology is Allen H. Cox, of the firm of Putnam & Cox.

Last year the candidates from the Institute did not win the awards. This year the candidates are working doubly hard to bring the prizes back to Boston.

CHEMICAL SOCIETY.

Professor Passano Talks About Scientific Management.

Last night the Chemical Society held its regular March social meeting in the Union, with Prof. Passano of the Mathematics Department as speaker. Professor Passano gave a very interesting and able discussion of "Scientific Management," and outlined many points that have been neglected by previous investigators in treating this subject. The sixty men who were present found the talk valuable, and showed their appreciation by very hearty applause.

Then A. W. Carpenter, of the committee on the revision of the constitution, outlined the proposed changes in the constitution, mentioning the abolition of associate membership, the provision for compulsory institute representation, the installation of the nomination paper system in the annual elections, the probable raising of the dues and the provision for regular business meetings.

Then Mr. Forrester, of the Program Committee, announced that a speaker had been promised for a meeting on the 28th. The speaker is the chemist in charge of the American Writing Paper Co. Mills, and he will talk on the relation of the paper expert to the mill.

**MEN'S SMART AND
DISTINCTIVE
Spring Suits AND Overcoats**

The discriminating man who avoids the common place in style, design and fabric will find the utmost satisfaction in garments of our production.

Aside from the important question of style good cloths are made of WOOL FABRICS and TAILORING, a little of the former and a great deal of the latter.

Our clothing is made by good tailors, every one a SPECIALIST, who is fit to make garments for particular men, it COSTS more, but it shows in a hundred suits or overcoats as well as in a single one of either, and it means infinitely more satisfaction to the wearer.

Other clothing may look ours, but you will not find the same amount of GOODNESS in it.

This season's offering is composed wholly of garments that fully justify the discriminating man's standard of correct style and good taste.
