VOL. XXXII. NO. 115

BOSTON, MASS., THURSDAY, MARCH 20, 1913

PRICE TWO CENTS

TECH WRESTLERS MEET MILTON NEXT TUESDAY

Another Victory Expected—
Novice Meet with Harvard
Planned.

The date of the wrestling meet with the Cunningham Gymnasium team of East Milton has been changed from Wednesday, March 26th, to Tuesday, March 25th, at 8 P. M. Captain Treat has been putting his men through some stiff practice and feels confident of adding another victory to the list. Six events are sure to be run off and possibly more, all classes being represented except the heavyweight. The lineup has not been decided as yet, but only one man will be entered in each class. Kelly and Sayer are almost sure of competing, and if Means gets over his sickness in time to round into shape he also will in all probability go along with the team. H. G. Morse, a Freshman, is another man who may represent the Institute in this meet. Since his arrival at the Institute, a novice in this sport, he has been developing at a rapid rate until now he is recognized as a top-notch. Coach Butler is right "on the job" at every practice, and his instruction is being followed to the letter, with very gratifying results. Manager Blodgett is trying to arrange a novice meet with Harvard, and if this fails he will try to arrange for a meet in the Gym between all those men who have been fortunate enough to have taken any trips with the Varsity team.

OUTDOOR TRACK BEGUN.

Started Monday, Although Track
Was Soft—Bill Hines Gone.

Monday afternoon the members of the track team, and the candidates for the same started the outdoor work at the Field. The track was very soft and totally unfit for use, so the majority of the men ran on the grass around the track. Later in the week a steam roller will be run over the track, and the men will then get down to the hard spring training. The weather Monday afternoon was really too cold for outdoor work, but as this condition cannot last long, the practice will soon become more pleasant. The men will welcome the presence of a cinder track instead of the hard board track, with its sharp and slippery turns, to which they have been hardening themselves during the past winter.

Many of the candidates will be shocked and grieved to hear that their old, tried and true friend, "Bill" Hines, has severed his connection with the Institute, and that his beaming, chubby face will no longer be seen at the field.

Several of the tennis enthusiasts have suggested that the steam roller be given a trial spin over the courts at the Field, and it is hoped that this will be done, for it must be confessed that they are greatly in need of such a rolling.

FRESHMAN MEETING.

The Freshman Board of Governors will meet in Room 21 Rogers, today, at 1 o'clock. The proposed amendment to the Class Constitution will probably be considered at this meeting.

ATTENDANCE POOR AT SHOW REHEARSALS

Management Not to Retain Candidates Who Do Not Appear Regularly.

The rehearsal of the Tech Show cast which was held yesterday afternoon was unsatisfactory to these in charge. Many were not present, and those who were knew but little of the required amount of their parts.

The whole cast, including the understudies, are to be present this afternoon for the rehearsal of the third act. The Show management announces that those who do not come to this meeting will imperil their chances of making the cast, or of holding any longer the parts they now occupy.

The management needs the co-operation of all the men out for the Show in order to have it ready for its first production, which is but three weeks away.

G. R. Thayer last year's Stage Manager, will meet the student light men at 5 o'clock on Friday. All candidates should be present, as the final selection of the men will be made at that time.

T. C. A. DISCUSSION.

"The Christian Employer of Labor" Is Subject for This Week.

This week the discussion classes held under the auspices of the Technology Christian Association will consider the moral duties of "The Christian Employer of Labor." The subject is of particular interest to all Technology men, for in the future they will become employers, or closely connected with establishments employing many men and women. It will be an excellent opportunity for men to learn what, in the opinion of his fellows, is the moral duty of the employer. Among several of the topics for discussion which have been posted on the bulletin boards are: "What should be the minimum wage for women?" "Do you believe in Henry Abraham's \$5 a day, 5 hours a day, 5 days a week?" "Do you believe in workmen's compensation laws? If so, why?" "Do you believe that a workman has a right to one day off in seven?" "Do you believe that proprietors of factories ought to be obliged to keep their factories in a sanitary condition, and to protect their employees from dangerous machinery?"

These and other questions of current comment and present-day importance are mentioned for discussion. It is hoped that the attendance will be larger than usual. One group meets on Friday, at 1.30, in Room 5, Engineering B. Another group will meet on Friday at 6.30 o'clock, at No. 40 Rutland square.

SOPHOMORE BASEBALL.

The Sophomore baseball squad will have their second outdoor practice today at the Field. Nineteen men reported for practice Tuesday, most of whom were new men. To judge by this showing the class of 1915 will have a first-class ball team when the season begins. Practice will be held twice a week Tuesday and Thursday afternoons. Manager Thomas has arranged a good schedule and he hopes that all the men will continue to come out for practice.

DATE FOR SPRING CONCERT DECIDED

Tickets Limited—Those Going to Junior Prom Have Preference.

The committee in charge of the Spring Concert of the Musical Clubs has fixed April 16th as the date. The concert will be held in Copley Hall, and following the precedent set by the Junior Prom Committee, the number of tickets will be limited, to make real dancing possible. Only two hundred tickets, allowing for one hundred couples, will be sold. These will be offered first to Seniors, Juniors and those Sophomores who have signed up for the Prom. Cards will be sent these men asking them to signify whether or not they will come. After April 1 the tickets will be open to the public.

The management of the clubs are looking forward to one of the finest concerts of recent years. The concert in Lynn last Monday was a decided success, and another will be given in a few days, offering an opportunity for even further improvement.

The dance, which will be held after the concert, and which will last until 2 o'clock, ought to be particularly enjoyable because of the limited numbers. Dance orders will be given out with the application cards.

HARE AND HOUND RUN.

Last Practice Before the Big Inter-Course Race.

The weekly Hare and Hound race is to be run off this coming Saturday. The competitors will start from Hyde Park promptly at 2.14 P. M., and finish at the Y. M. C. A. Building of that town. This is the last Hare and Hound run before the Inter-Course cross-country race, which comes the 30th of this month. A. F. Peaslee, '14, the Chase Captain, urges all candidates to come out this Saturday, since it will be the last time for practice before the big race. The time and place of departure of the team will be announced before Saturday.

YOSEMITE SURVEY.

Today, at 12 o'clock, Mr. Francoise Matthes, '95, will speak before the class in Stratigraphic Geology in 11 Eng. B. The subject, "The Topographical Survey of the Yosemite Valley," is one which the speaker is particularly well fitted to handle, as he is at present Topographical Inspector in the U. S. Geological Survey at Washington, and is one of the most skillful topographers in the country.

This meeting will not be restricted to members of this class, but will be open to the student body. The talk will be especially interesting to Course I and XI men, and they are particularly urged to attend.

Many entries have already been made for the Pennsylvania Relay Carnival, and it promises to be a great success.

There was a strange mixture of tears and laughter amongst the children the other day. Why? History Reports!

Keep your eyes on the Tech wrestling team.

REV. G. C. HAMILTON T. C. A. SPEAKER

Speaker a Well Known Social Worker, Philanthropist and Traveler.

The Rev. George C. Hamilton, D. D., of the Everett Universalist Church, is to speak today at the noon talk of the Technology Christian Association. This talk for the students will be held, as usual, at 1.30, in the Union.

Dr. Hamilton, who is one of the best liked clergymen in Everett, has been at work there longer than any of the other clergymen in that city. Calls upon him to speak are many, for he is not only a philanthropist and active in civic work, but he is also a traveler, having been to Europe and to many of the places of interest in the United States.

The results of Dr. Hamilton's travels will probably be seen in his talk, the subject of which is "The Christian Ideal in the Social Life of Today." Judging from the number of requests from the men to have Dr. Hamilton speak the talk promises to be well worth hearing.

CERCLE FRANCAIS.

Good Progress Made in Reading of French Play.

The reading of the first act of Pailleron's "Le Monde ou l'on S'Ennuie" was finished at the regular weekly meeting of the Cercle Francais, which was held yesterday afternoon in 29 Lowell. No business was transacted and the time was given up entirely to the reading.

As only nine members attended the meeting, the day for the next meeting has been changed to Thursday, in hope that more can attend. The play has proved extremely interesting and amusing up to the present time. At the next meeting one of the members will present a résumé of the first act, and another will give a short sketch of the author. The membership of the Cercle now numbers about thirty, and when a more convenient day can be arranged it is hoped that all will attend. The secretary will send out cards to all the members in order to ascertain the best time they can come. He requests that each member reply at the earliest possible date.

SENIOR PORTFOLIO.

Today, at 5 o'clock, is absolutely the final time limit for handing in the pictures and histories for the Senior Portfolio. The committee is very anxious that all Seniors turn these in, as the book to be of greatest value must include the pictures of all the men.

CALENDAR.

Thursday, March 20, 1913.
1.00—Meeting of 1916 Governing Board—21 Rogers.
2.00—Story of Yosemite Valley Survey—11 B.
3.00—Sophomore Baseball Practice at Field.
4.15—Cast Rehearsal—Union.
5.00—Proofs and Histories for Senior Portfolio Due.
7.15—Meeting of Brotherhood of St. Andrew—Trinity House.
8.00—Lowell Institute Lecture, "The Drama"—Huntington Hall.

THE TECH

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

THURSDAY, MARCH, 19, 1913

The action of the Musical Clubs regarding the limitation of the number that can attend the Spring Concert, and the preference given to the men who have signed for the Prom in making up the sign-up lists, is very commendable. It will do away with the unwieldy crowds that have heretofore been the rule at this concert, thereby making the occasion much more enjoyable for those who do go, and at the same time it will give a man going to the Prom a better chance to attend another of the functions of Junior Week. We feel that this is not an unfair preference, for the Spring Concert is a very popular one, and if any limitation in numbers is made, a man may find himself unable to attend under any conditions although he may have invited a girl from some distance for the entire week.

We have understood that many challenges are floating through the air of the fraternal domains for games of baseball to be played in the near future, when each fraternity have picked their Ty Cobbs and Hans Wagners. THE TECH most humbly suggests that the fraternities do not usurp, to too great an extent, a field that has been, heretofore, so ably and satisfactorily—for THE TECH—overshadowed by the importance of the Technique-TECH baseball game which, despite the various tales put forward by many Technique Boards, regarding the unfairness of our reports and the exigencies of newspaper English which seem somehow to disregard the adverse statements of fact, has always resulted in an overwhelming defeat for Technique.

LOWELL LECTURE.

The sixth of the series of Lowell Institute lectures on "Dramatic Composition" will be given this afternoon at 5 o'clock, in Huntington Hall. The subject for this afternoon is: "Dialogue, the Monologue, the Aside," etc.

This course is being given by George P. Baker, Professor of Dramatic Literature at Harvard. It affords information to those who are thinking of writing plots for next year's Show which would be difficult to find in text books.

The Freshmen at drill last Monday fully realized that spring had come when a shower of glass and a baseball came down through the skylight of the Armory.

PHILADELPHIA DEPTS. REFORMED BY TECH MEN

Technology Men Hold Prominent Engineering Positions in Public Works Department.

The Institute may well be proud of the fact that five of its graduates are practically running the Public Works Department of the city of Philadelphia. These men have been employed to reorganize departments which, unfortunately, have not always been run with the best interests of the people in view.

The Mayor of Philadelphia, Hon. Rudolph Blankenburg, is carrying on a campaign in local government in which "Efficiency" is the watchword. Accordingly he has asked various experts to tell him about the practical conditions attending the city work of that city. The most important of the positions which the Mayor has asked the Tech men to fill is that of assistant director of public works. This post has been given to Assistant Naval Constructor James Reed, U. S. N., who graduated from the Institute in 1907. Mr. Reed is in charge of the important details, a matter which has helped to eliminate politics from the department. His training has been a remarkable one, well fitting him for this kind of work. He came from the United States Naval Academy to the Institute, finishing with the degree of S. M., and for practical training was in the navy yards at Boston and New York, with the Westinghouse and General Electric companies and in various steel mills in Pennsylvania. Besides four years of service in the navy he became the naval attaché of the United States Legations in Santiago, Buenos Ayres, and Montevideo. On the request of the Philadelphia authorities he was given leave of absence in February, 1912, and after six months more at the City Hall he expects to return to his naval duties. He is one of the men whose work is intended to be fundamental, and on which standards may be established to govern future proceedings in the department.

The next most important of these positions is that held by Carleton E. Davis, '93, Chief of the Bureau of Water. Mr. Davis has attracted considerable attention by the way he and his colleagues handled a recent break in the water supply pipes of the city. As a result of a break of a similar nature in the same system a good many people died of typhoid fever. A recurrence of these conditions was prevented by an exceedingly active publicity campaign about the way to prepare the water, which had to be pumped from the Schuylkill River for drinking. Mr. Davis has worked on the water problems of Manchester, N. H., New Bedford, Mass., Newark, N. J., New York and the Panama Canal.

The third of the group of Technology men is Dr. Hollis Godfrey, '98, Ph.D., Sc.D., who is chief of the Bureau of Gas. His position, like that of Mr. Reed, is frankly temporary. One of the tasks successfully accomplished by Dr. Godfrey is that of convincing the company which furnishes the street lighting that it is good
(Continued on Page 3.)

HOLY WEEK SERVICES.

The Technology Chapter of the Brotherhood of St. Andrew is holding services every night this week, at 7.15, in the Trinity Church Parish House on Clarendon street. These services, which last but half an hour, have been purposely made short to meet the needs of Tech men. Mr. F. R. Kneeland, of the Chemistry Department, conducts these meetings.

A special service will be held Saturday evening in preparation for Easter. All Tech Episcopalians are heartily invited to attend these meetings and are especially urged to be present Saturday.

**LYNN HIGH SCHOOL
 CLUB ORGANIZES**

Committee Appointed to Draw
 Up Constitution—Large
 Attendance.

Today, at 1.30, a meeting of Tech
 men who are graduates of the Lynn
 High Schools was held in 26 Rogers.
 The purpose of the meeting was to
 draw up a constitution for the for-
 mation of a Lynn Club at Technology.
 This will make the fifth High School
 organization at the Institute, the
 other four being the Mechanic Arts
 High School Club, the Boston English
 High School Club, the Chauncy Hall
 Club and the Brookline High School.
 Practically all the graduates of the
 Lynn High Schools were present at
 the meeting. Leon Cowles, '14, Theo-
 dore Parsons, '15, and Gilbert L.
 Peakes, '15, were appointed a com-
 mittee to draw up a constitution and
 lay it before the individual members
 of the club. As soon as the constitu-
 tion is drawn up the club will elect
 its officers and take its place among
 the other organizations of the In-
 stitute.

JOINT SMOKER TONIGHT.

Electricals and Mechanicals to
 Hear Prof. Smith.

The Mechanical and Electrical
 Engineering Societies are to hold a
 joint smoker tonight in the Union at
 8 o'clock. At this meeting Professor
 H. W. Smith, of the Electrical Depart-
 ment of the Institute, will give a talk
 on "Journeys Among the Dayaks and
 Kayaks of Sarawak, Borneo." Pro-
 fessor Smith spent a considerable por-
 tion of last year on the Island of Sara-
 wak studying the manners, customs
 and history of the natives.

RUNNING PHILADELPHIA
 (Continued from Page 2.)

policy to exchange the old flat burn-
 ers for mantle burners. By following
 out this policy the illumination of
 the city has been increased at least
 one hundred per cent. Dr. Reed is
 well known in Boston and vicinity as
 he has been principal of the Needham
 High School, and a teacher in the
 East Boston High School and in the
 High School of Practical Arts.

Mr. Van Keuren, '06 bridge engi-
 neer, who is the most recent addition
 to the Tech force at the Quaker City,
 has not been there long enough for
 figures of results to be available. His
 department has charge of property
 which is valued at \$21,000,000.

The fifth member of the Technology
 force is Clayton W. Pike, '89, B. S.,
 who is the chief of the Electrical
 Bureau. This department is affiliated
 with the police and fire bureaus in the
 great Department of Public Safety. It
 includes in its scope all the matters
 pertaining to city functions, electric
 lighting, fire and police signalling,
 and the telephone system, together
 with various minor duties. Like
 licensing the operators of passenger
 elevators.

It will be seen that these men hold
 very important positions in the mu-
 nicipal government of a great city,
 and their records are indeed worthy
 of Technology. They reflect consider-
 able credit upon the Institute, and it
 may well be proud of them.

The janitor got three barrels of
 cigar and cigarette ashes off the
 Union floor Saturday. Some showing,
 eh?

Even if the Faculty can show us
 how to do Math. and Applied Mechan-
 ics they have got to go some before
 they can teach us how to bowl.

There seems to be a sort of
 vacuum around the Gym now that the
 Field has been opened.

**MEN'S SMART AND
 DISTINCTIVE
 Spring Suits, ^A/_N Overcoats**

The discriminating man who avoids the common
 place in style, design and fabric will find the utmost
 satisfaction in garments of our production.

Aside from the important question of style good
 cloths are made of WOOL FABRICS and TAILOR-
 ING, a little of the former and a great deal of the latter.

Our clothing is made by good tailors, every one a
SPECIALIST, who is fit to make garments for par-
 ticular men, it **COSTS** more, but it shows in a hun-
 dred suits or overcoats as well as in a single one of
 either, and it means infinitely more satisfaction to
 the wearer.

Other clothing may look ours, but you will not
 find the same amount of **GOODNESS** in it.

This season's offering is composed wholly of gar-
 ments that fully justify the discriminating man's
 standard of correct style and good taste.

Men's Suits, \$25 to \$45
Spring Coats, \$30 to \$50
