TECH WRESTLERS MEET MILTON NEXT TUESDAY

Another Victory Expected—Novice Meet with Harvard Planned.

The date of the wrestling meet with the Cunningham Gymnasium team of East Milton has been changed from Wednesday, March 26th, to Tuesday, March 25th, at 8.30 p.m. Captain Trager has been pulling his men through some stiff practice and feels confident of adding another victory to the list. Six events are sure to be run off and possibly more, all classes being represented except the heavyweight. The lineup has not been decided as yet, but only four or five will be used in each class. Kelly and Sayer are always sure winners, and if the men get over their sickness in time to round into shape they will also win in all probability along with the team.

H. C. Moro, a Freshman, is another man who will be in the lineup in the wrestling Meet.

Since his arrival at the Institute, a novitiate in this sport, he has been developing as a rapid rate until now he is recognized as a top-notcher in his class. He has been working hard at the job at every practice, and his instruction is being followed to the letter, with very gratifying results.

Manager Hillyer has arranged a novice meet with Harvard, and if this fails he will try to arrange for a meet in the Gymnasium with all those men who have been fortunate enough to have taken any trips with the Varsity team.

OUTDOOR TRACK BEGUN.

Started Monday, Although Track Was Soft—Bill Hines Goes.

Monday afternoon the members of the track team, and the candidates for the same started the outdoor work routine. A week ago the track was very soft and totally unfit for use, so the majority of the men ran on the practice course round the latter in the afternoon. A week ago a steam roller will be run over the track, and the day after will then get down to the hard spring training. The weather is so bad that it is really too cold for outdoor work, but as this condition cannot last long, the practices will be held all the more pleasant.

The men will welcome the presence of a clacker track instead of the hard board track, with its sharp and slippery turns, to which they have been hardening themselves during the past winter.

Several of the tennis enthusiasts have suggested that the steam roller be given a trial spin over the courts at the Field, which will be done, for it must be confessed that they are greatly in need of such a rolling.

FRESHMAN MEETING.

The Freshman Board of Governors will meet this noon in Room 21 Rogers. The proposed amendment to the Class Constitution will probably be considered at this meeting.

ATTENDANCE POOR AT SHOW REHEARSALS.

Management Not to Retain Candidates Who Do Not Appear Regularly.

The rehearsal of the Tech Show cast which was held yesterday afternoon was marred by the absence of these three members. Many were not present, and the director, Mr. S. C. A. Putnam, has written to the manager that he is not able to accept the required amount of the part.

The whole cast, including the understudies, are to present this afternoon for the rehearsal of the third act. The Show management announces that those who do not come to this meeting will imperil their chances of making the team. The absences are the result of the weather conditions. The warm-weathered cast are very anxious to get the final result of the production which has been delayed for three weeks.

T. C. A. DISCUSSION.

"The Christian Employer of Labor" Is Subject for This Week.

This week the discussion classes held under the auspices of the Revolutionary Christian Association will consider the moral duties of "The Christian Employer of Labor," as set forth in the Code of 1842. The subject is of particular interest to all technology students, for in the future they will become employers, or close connection with establishments engaged in manufacturing. The discussion will be an excellent opportunity for men to learn what is the moral duty of the employer. Among several of the discussion topics to be presented at the bulletin boards are: "What should the Christian wage for women?" "Do you believe in a maximum wage for women?" "Do you believe in the eight-hour day?" "Do you believe in the workman's compensation laws?" "If you were owner of a workman, have you a right to one day's work?" "Do you believe in the proper ratio of labor and the proper ratio of labor to the product of the factory?" "Do you propitiate the labor of the workers?" "Do you believe in the right of the workers to organize labor unions?" "Do you believe in the right of the workers to organize labor unions?"

FOOTBALL. Football is sure to be run off and possibly more, all classes being represented except the heavyweight. The competition will be held in Copley Hall, and following the precedent set by the Wyoming and the C. A. Building of last year. This is the last week of practice for the inter-course race, which is the last week before the Inter-Course race.

Yosemite Survey.

Twillar, at 5 o'clock, Mr. Francis Thayer, "95, will speak before the class in Strataigraphic Geology in 11 East. The subject, "The Topogrophyal Survey of the Yosemite Valley," is one of the popular subjects of discussion. Mr. Thayer is well known to be a great admirer of the Yosemite Valley, and is one of the men who have been to Europe and to many of the places of interest in Europe.

Spring Concert.

T. C. A. of the Tech will present a spring concert at the Field. The concert will be held at 7 o'clock on Friday, and will be followed by a dinner at the Field. The concert will be held at the Field. Tickets are limited, so that only a few tickets will be sold. Those who desire to attend should come to the Field on Friday, and purchase the tickets.

Soviet Union.

The Soviet Union is a country which has been founded under the leadership of the Communist Party. The country is divided into several parts, each of which is governed by a soviet. The soviet of the city of Moscow is the largest and most important, and has a population of over a million. The government of the Soviet Union is based on the principles of social democracy, and the main object of the soviets is to secure the right to life, liberty, and equality for all its members.

PHILADELPHIA DEPTS.
REFORMED BY TECH MEN

Technology Men Hold Prominent Engineering Positions in Public Works Department.

The Institute may well be proud of the fact that five of its graduates are practically running the Public Works Department of the city of Philadelphia. These men have been employed to reorganize the Department which, unfortunately, have not always been run with the best interests of the people in view.

The Mayor of Philadelphia, Hon. Rudolph Blankenburg, is carrying on a campaign in local government in which "Efficiency" is the watchword. Accordingly he has asked various experts to tell him about the practical conditions attending the city work of that city. The most important of the positions which the Mayor has asked the Tech men to fill is that of Commissioner of Gas. This post has been given to Assistant Naval Constructor James Reed, U. S. N., who graduated from the Institute in 1907. Mr. Reed is in charge of the important department which has been purposely made short to meet the unfairness of our reports and the attempts of the gas companies to usurp the field by too great an extent, a field which seem somehow to disregard the importance of the same system.

The next most important of these positions which the Mayor has asked the Tech men to fill is that of Commissioner of Water. This position has been given to Assistant Naval Constructor James Reed, U. S. N., who graduated from the Institute in 1907. Mr. Reed is in charge of the important department which has been purposely made short to meet the unfairness of our reports and the attempts of the gas companies to usurp the field by too great an extent, a field which seem somehow to disregard the importance of the same system.

The third of the group of Tech- men who have been promised to the City Hall he expects to return to his naval duties. He is one of the latter men who work in the fundamental, and on which standards may be established to govern future proceedings in the department.

The most important of these positions is that held by Carlston E. Davis, '93, Chief of the Bureau of Water Affairs. Mr. Davis has attracted considerable attention by the way he and his subordinates handled a recent break in the water supply pipes of the city. As a result of a break of a similar nature in the same system a great many people died of typhoid fever. A recurrence of these conditions was prevented by an exceedingly active publicity campaign about the way to prepare the water, which had to be rushed from the Schuylkill River for the purpose. Mr. Davis has worked on the water problems of Manchester, N. H., New Bedford, Mass., Newark, N. J., New York and the Panama Canal.

HOLY WEEK SERVICES.

The Technology Chapter of the Brotherhood of St. Andrew is holding services every night this week at 7.15 in the Trinity Church Parish House on Clarendon street. These services, which begin at 7 p.m., are attended by those who are engaged in thinking of writing plots for next year's pageant which would be difficult to find in text books.

The Preachers at drill last month fully realized that spring had come when a shower of glass and a breeze blew through the skylight of the Armory.
LYNN HIGH SCHOOL CLUB ORGANIZES

Committee Appointed to Draw Up Constitution — Large Attendance.

Today, at 7:30, a meeting of Tech men who are graduates of the Lynn High Schools was held in Room 250. The purpose of the meeting was to draw up a constitution for the formation of a Lynn Club at Technology. This club will make the fifth High School organization at the Institute, the others being the Boston High School Club, the Boston English High School Club, the Chaucer and High School Club and the Trolldkane High School.

Practically all the graduates of the Lynn High Schools were present at the meeting. Leon Cowles, '14, Theodore Pearson, '15, and Gilbert L. Peake, '15, were appointed a committee to draw up a constitution and lay it before the individual members of the club. As soon as the constitution is drawn up the club will elect its officers and take its place among the other organizations of the Institute.

JOINT SMOKER TONIGHT.

Electricals and Mechanicals to Hear Prof. Smith.

The Mechanical and Electrical Engineering Societies are to hold a joint smoker tonight in the Union at 8 o'clock. At this meeting Professor H. W. Bill, of the Electrical Department of the Institute, will give a talk on "Journey Among the Royal and Kaysha of Sarawak, Borneo." Professor Smith spent a considerable portion of last year on the Island of Sarawak studying the manners, customs and history of the natives.

RUNNING PHILADELPHIA (Continued from Page 2).

policy to exchange the old flat burners for mantle burners. By following out this policy the illumination of the city has been increased at least one hundred per cent. Dr. Reed is well known in Boston and vicinity as he has been principal of the Needham High School, and a teacher in the East Boston High School and in the High School of Practical Arts.

Mr. Van Kemenen, '96 bridge engineer, who is the most recent addition to the Tech force at the Quaker City, has not been there long enough for figures of results to be available. His department has charge of property which is valued at $3,000,000.

The fifth member of the Technology force is Clayton W. Pils, '94, M. Eng., who is the chief of the Electrical Bureau. This department is affiliated with the police and fire bureaus in the great Department of Public Safety. It includes in its scope all the matters pertaining to city functions, electric lighting, fire and police signalling, and the telephone system, together with various minor duties, like licensing the operators of passenger elevators.

It will be seen that these men hold very important positions in the municipal government of a great city, and their records are indeed worthy of consideration. They reflect credit upon the Institute, and it may well be proud of them.

The janitor got three barrels of clinkers and cigarette ashes off the Union floor Saturday. Some smoking, eh?

Even if the Faculty can show us how to do Math and Applied Mechanics they have got to go some before they can teach us how to bowl.

There seems to be a sort of vacuum around the Gym now that the Field has been opened.

THE WINDSOR CAFE

78 HUNTINGTON AVENUE

Rock Bay's latest and most up-to-date acquisition.

The restaurant for the discriminating Resident, Business Public and Students. Excellent cuisine and moderate prices. Properly lighted and ventilated. DIRECTLY OPPOSITE TECHNICAL BUILDINGS.

Fully prepared to satisfactorily fulfill the demands of the Student body.
