PRICE TWO CENTS

T. C. A. SPEAKER TALKS ON CHRISTIAN IDEALS

**Reverend Hamilton Says Men
Are Treated Unfairly in
Business.**

Yesterday afternoon, in the Union, Reverend George C. Hamilton, of the Everett Universalist Church, spoke on the "Christian Ideal in the Social Life of Today." His audience was unusually small, but those who were present heard a talk worth remembering. Although he did not mention any new topics, he stated a number of vital facts that are of concern to every man of today.

Reverend Hamilton started to study mechanical engineering in college, but soon switched from that and went into the ministry. His experience in engineering lines enabled him to emphasize his points by allusions to engineering work. He spoke on the responsibilities of a man of power and of his temptations to abuse that power. He said that the business world is inclined to be unfair and deprecate the fact that the men who made up the majority of the population did not get their share of this world's goods.

He expanded on this topic and his talk was replete with familiar incidents and allusions to illustrate his points.

GOVERNING BOARD

**Discusses Amendment to the
Freshman Constitution.**

The Freshman Governing Board met in 21 Rogers at 1 P. M. yesterday. The assignment of collectors of class dues in each section was begun. The completed list will be printed in THE TECH in a few days.

No satisfactory decision was reached with regard to the amendment of Article III of the Constitution, making the Freshman members of the Athletic Committee members of the Governing Board. This amendment will be drawn up in final form at the next meeting, which will be held in 21 Rogers, Friday, March 28, at 1 P. M.

HARE AND HOUNDS.

The regular Hare and Hound race will be run this afternoon, the competitors leaving from the Back Bay Station at 2.14 for Hyde Park. The chase will start and end at the Y. M. C. A. Building of that town. Since the Hare and Hound run this afternoon is the last one of the series, it is expected that most of the cross-country men will compete.

The cross-country captain reminds the men that the annual Inter-course cross-country race comes a week from today, so that today's race will be the last opportunity for practice.

SENIOR PORTFOLIO.

Fifteen per cent. of the Seniors have not yet handed in their proofs at Hearn's, and are thereby holding up the publication of the Portfolio. If these proofs are not handed in immediately the book will be delayed in its final issue. Furthermore, unless proofs are in by Saturday, at 5 P. M., the pictures of the tardy men are not to be put in the book.

FRESHMAN BASEBALL PRACTICE TO START

**Candidates to Report to Mgr.
Woolley at the Field This
Afternoon.**

The Freshman baseball squad started practice Wednesday at Tech Field. Manager Woolley wishes all men who are going out for the team to be at the Field this afternoon if the weather is favorable, and to bring their suits, as training will be commenced in earnest. Quite a number of men have already announced their intention of coming out for the team, and the competition for positions will probably result in the class of 1916 being represented by a first-class ball team. Practice will be held three times a week: Monday, Wednesday and Friday afternoons.

An excellent schedule is now being arranged. Games with Gloucester High, Thayer Academy and Powder Point Prep are contemplated. Rock Rindge, English High, Boston Latin, Roxbury High and Brighton High will probably be on the schedule as Manager Woolley has communicated with these schools and is waiting for their replies. Such an attractive schedule as this should be an incentive to the men of the class, and it is hoped that a large number will come out for practice.

All candidates for the team will be excused from Gym work and so may substitute pleasant outdoor work for the indoor Gym drill for the rest of the season. All such men will be required however, to attend practice regularly, and it is important that they report at the Field this afternoon in order that their names may be sent in to Mr. Kanaly and that practice may begin in earnest.

MANY NOVEL STUNTS.

**Junior Smoker Will Have
Numerous Attractions.**

Juniors, the men in charge of your coming smoker request you to be sure to keep the date of the twenty-seventh open, for on that evening the Class of 1914 keeps "open house" in the Union. The affair is to be one big time and will consist of nothing less than a jovial combination of free smokes, talking pictures, which, the officers say, have kinemacolor tied to a post, skits and musical stunts. The Faculty will be invited but the affair is to be strictly a student night, and, however much the members of the Faculty may be inspired to speak, they will be compelled to restrain their oratorical tendencies.

Definite plans for the affair have not yet been announced, but they will appear shortly in the columns of THE TECH.

JUNIOR PICTURES.

The following Juniors have not yet called at the Cage for their Class pictures: C. J. Callahan, C. Brown, Covitz, D. H. Mayo, M. Paris, Navison, Randall. These pictures have already been at the Cage two months, and if they are not called for by April 1 they will be sold and no allowance made for the deposit.

Been around to find out about those U. S. History marks yet?

INSTITUTE COMMITTEE WILL MEET TODAY

**Athletic Financial Situation and
Tech Show Trip to Be
Discussed.**

Today, at 4.15, in Room F, Eng. C, a very important business meeting of the Institute Committee will be held, and it is urgently requested that all the members make a special effort to be present. The business to be brought before the committee deals especially with the Tech Show and its proposed trip to New York, as several very important matters have come up since the Institute Committee, at its last meeting voted approval of such a plan. Another subject which will be considered is the Point System rating with regard to those who have prominent parts in both the Tech Show and the Musical Clubs. Under the present ruling such men are over points and some radical changes are contemplated which will prevent both activities from being handicapped by the loss of members. All those who desire to express their views on this subject, whether they are members of the committee or not, are requested to attend the meeting and make known their ideas to the committee.

The athletic situation is another important subject which will be thoroughly discussed. It is generally known that the athletic financial situation is critical, and the Institute Committee wishes to adopt some means to relieve the present state of affairs.

Because of these three subjects, which are evidently of interest to the whole student body, it is important that that body and the various activities be represented fully. The Executive Committee requests a full attendance of the members and cordially invite all those directly interested to be present.

T. C. A. ELECTIONS.

Nomination blanks for the coming election of officers of the Technology Christian Association must be filed with the secretary not later than Monday noon, March 24th. The election is of great importance as it decides upon the holders of the offices of President, Vice-President and Treasurer for the year 1913-1914. As Secretary L. R. Talbot announced yesterday that no nominations had been received to date, the urgency of the early filing is self-evident. Each nomination blank must be endorsed by at least five members.

The election will take place March 28th, and on the same evening the Association plans to hold a social gathering for all of its members in the Union. Entertainment will be provided and an enjoyable evening is assured.

The Secretary has mailed to all members who have not subscribed letters requesting contributions to the T. C. A. There are many, however, who are deeply interested in the Association and its work who are not members, and the opportunity is presented to these as well to contribute to the funds for the support of the organization.

Those that went on the Hare and Hound run last Saturday not only had a good swim, but also had a fine opportunity to take a good mud bath.

TECH SHOW CHORUS REHEARSAL TODAY

**Miss Kellogg Will Be Present
to Take Charge of
Dancing.**

At 4.15, today, will be held a rehearsal of the entire Tech Show Chorus. Miss Kellogg, who had charge of the dancing last year, will be present and will take the chorus in hand and show them their steps. As Miss Kellogg's time is valuable the chorus "girls" are expected to be prompt and all are expected to be present.

The principals who have singing parts will also meet today with Mr. McConathy. This is for the purpose of going over the songs and getting them in good shape as soon as possible.

ENJOYABLE SMOKER.

**Combined Societies Hear an In-
teresting Talk.**

A combined smoker of the Mechanical and Electrical Engineering Societies was held last night at 8.30, in the Union. Professor Smith, of the Electrical Engineering Department, gave an illustrated talk on the visit he made to Borneo last year.

The greater part of his trip was confined to the principality of Sarawak, which lies along the northern coast of Borneo. Sarawak, about two centuries ago, was a prosperous, self-governing state, but it declined to such an extent during the first part of the nineteenth century that it was only after a hard struggle of ten years that a merchant from India, by the name of James Brooke, succeeded in organizing a good government. A nephew of James Brooke is ruler of the principality today.

Although the natives of this country were formerly notorious head hunters, such a heavy fine has been placed on this offense that travel is perfectly safe. The natives' huts are still decorated, however, with numerous skulls of former victims. Prof. Smith's pictures of the various fashions among the women were particularly interesting. One picture showed a woman with the lobes of her ears stretched out until they hung down on her shoulders. Beauty is reckoned by the length of these ear-lobes. Another interesting custom is the way in which a young man makes love. When he calls on his sweetheart he allows her to pull out the hairs of his eyebrows. When this job is done they are ready to be married.

Prof. Smith also had some very realistic phonograph records of the native toasts and war songs. The talk was very well received and everybody left for home feeling as if they had actually been in the wilds of Borneo during the evening.

CALENDAR.

Friday, March 21, 1913.

4.00—Freshman Baseball Practice—Field.
4.15—Tech Show—Rehearsal of Chorus and Principals Who Have Singing Parts.
5.00—Light Men for Tech Show—Downstairs in Union.

Regimental Drill every Wednesday at 3 o'clock.

THE TECH

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter, Sept. 16, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

FRIDAY, MARCH 20, 1913

Among the recommendations of the Walker Memorial Committee which were published in Wednesday's TECH was the statement that the athletic field should have a temporary position along Vassar street, but that this land would be available for buildings when the Institute needed the space. That the Institute will continue to expand is beyond question, but that the "powers that be" should deliberately plan to make this expansion at the expense of the field, which we have so long needed, seems totally unjust.

Athletics at Tech have been struggling along for a good many years under adverse conditions, the men wasting two hours a day of valuable time getting out to Brookline and back. We have had poor teams, there has been little interest among the students, and the financing has been difficult, all largely due to the distance of the field.

On top of all this the Committee has the "nerve" to say that they think the athletic field should be available for athletic purposes when the expected expansion comes. If they see their way clear to another field in the immediate vicinity which will be available when the time comes, all well and good, we apologize. But if not, we fail to see the justice of it and cannot state our disapproval too strongly.

TECH FIELD NOW OPEN.

The Technology Field is now open for track and field men. The track is now being put in condition, and the baseball diamond and tennis court will be marked off and put in shape as soon as the frost gets out of the ground.

CHESS CLUB MEET.

The Technology Chess Club will meet the Brown University team on Saturday of this week in the Tech Union. The details of the arrangements have not as yet been settled, but it is expected that they will be completed today. Hoyt, Grant, Norwood and Jones, with either Chandler or Merrill as the fifth man, have been selected by the Executive Committee to represent Technology.

LOWELL LECTURES AROUSE INTEREST

G. P. Baker's Talks on Drama Give Valuable Points For Play Writers.

Yesterday afternoon Prof. George P. Baker of Harvard gave the sixth of his series of Lowell Institute lectures on dramatic composition. The subject of this speech was "Dialogue: the Monologue, the Aside."

Prof. Baker emphasized particularly the necessity of the author's having a perfect knowledge of his characters. The old Greek saying is, "Know yourself," but the maxim of dramatic technique is "Know your characters." If the playwright is to succeed he must be able to put himself in the place of his people, to feel their emotions, and to see everything from their point of view.

The use of dialogue is of the utmost importance in a play, as it is through dialogue that the author develops his plot and interprets his characters to the audience. In earlier plays the problem of making the dialogues perform these functions was simplified by the frequent use of long speeches, soliloquies, and asides. By these devices the characters could express anything that was desired, but their speeches did not seem natural.

Soliloquies are especially unnatural. We do not often think aloud and still less often in long, coherent speeches, such as are common in Shakespeare's plays, hence the long soliloquies have been abandoned in modern practice. Some nervous people have the habit of talking to themselves, and if such are introduced they may be given soliloquies, but care must be taken to have the dialogue always true to life.

Much the same rule applies to the aside. Formerly it was not unusual to have one of the actors come to the footlights and talk confidentially to the audience for some time, while the other characters went calmly on with their conversation, but nothing of that kind is done on the modern stage. Asides, if introduced at all must be in the nature of private conversations between two characters who are not engaged in the main dialogue. These conversations have their parallel in real life, and for this reason are perfectly permissible.

Professor Baker explained that, though these mechanical principles must be considered in writing dialogue, the ideas conveyed by the actors and the material of their speeches is of first importance. As plays are largely concerned with the exposition of human character the words must be so written that each speaker characterizes himself to the audience. This may often be done in a few lines, but the lack of such characterization should not be tolerated.

A dialogue might conform to all the rules that have been given and yet be far from perfect. It must never be lacking in exposition. It may be well constructed, it may be perfectly natural and give a clear interpretation of character, but, as Prof. Baker says, "it must expound." The plot must be developed logically and distinctly. In closing, Prof. Baker laid particular stress on the principle that the author must "live" his characters. Unless he has a thorough understanding of, and sympathy with, the people of his brain, his work will not be truly successful.

Cheer up! Only four more weeks of Gym for the Freshmen.

HOCKEY TEAM HAS HAD SUCCESSFUL SEASON

Many Obstacles Have Been Overcome—All Men Have Played Well.

From the point of view of games won and lost, the hockey season of 1912-13 might not be considered highly successful, but to judge fairly of what has been accomplished by the team one must take into account the insurmountable difficulties which confront our men, as in the past two years the team has been dependent upon the Arena ice for practice. This year the Arena management was besieged by every team in Boston for practice hours because of the lack of outdoor ice, with the result that the hours allotted Technology was very infrequent. Another factor which made team work impossible was the absence of a coach. The condition of the Athletic Association's finances made it impossible for the team to secure the right kind of a man to take charge of the coaching.

Taking into account these two difficulties, the work of the season may not seem altogether without merit. The individual work of the men was excellent. This was particularly true of the defence. Captain Ranney's work at goal was consistent throughout the season. He showed a marked improvement over his work of the previous years, particularly in leaving the "Cage" to block a man. His place will be difficult to fill next season.

Eichorn, at point, was one of the most aggressive men on the squad. He used his weight to good advantage in checking the opposing forwards. A slight tendency to leave his position too often was his only fault.

Stucklen, ex-Dartmouth, has played the position of coverpoint for two years most capably. Previous to his work on the Tech team, Stucklen had always played center, which accounted for his tendency to play too near the forward line. His offensive work compared favorably with that of any of the college coverpoints who were on the ice this season.

Foote, at left wing, played this year for the first time on the Tech team. In justice to him it might be said that his work was not as good as it might have been, because of the continual change of position which he was forced to undergo. His stick-work was his best asset. This was particularly noticeable in the Syracuse games.

Fletcher, playing on the team for the second year, showed better form this year than last. His work at right wing was aggressive and full of snap. He followed the puck well and always came back with his opponent.

MacLeod, at center, was one of the strongest skaters on the ice. His shooting and passing showed marked improvement over that of last year.

Manager Hurlbutt played the position of rover for the third season. His speed and brilliant head work were the features of every game.

Rogers played in a majority of games at various positions on the forward line. His skating and passing were all that could be desired, and with improvement in his shooting he should make a valuable man for next year.

Nine games were played, of which four resulted in victories and five in defeats for the Tech team. The season opened on December 4 with a 4-3 victory for Tech over the Pilgrim A. A. On December 7 Tech again won from the Pilgrims by the same score. The next game, on December 11, resulted in a 7-1 victory for the strong B. A. A. team. Harvard turned the tables on us this year by defeating us by a score of 4-0, while Dartmouth, contrary to general expectation, won from Technology in a listless game, 5-1.

On the Western trip, at Mid-Year's,

RESULTS OF SENIOR CLASS DAY ELECTIONS

Members of Sub-Committee Are Elected—H. D. Peck, '13, Heads List.

The results of the election of men to the Senior Class Day Sub-Committee have been announced. The list of Seniors elected follows, the names being given in the order of number of votes cast for each man:

1. H. D. Peck.
2. S. C. Hart.
3. A. G. Ranney.
4. F. D. Murdock.
5. E. B. Germain.
6. E. W. Brewster.
7. G. R. Thayer.
8. L. H. Lehmaier.
9. R. B. Nichols.
10. M. E. Langly.
11. W. R. Bylund.
12. W. N. Holmes.
13. J. J. Strachan.
14. E. L. Macdonald.
15. R. W. Weeks.
16. H. M. Rand.
17. R. B. Bonney.
18. W. L. Waterman.
19. H. K. Franzheim.
20. H. O. Glidden.
21. R. B. Haynes.
22. R. C. Thompson.
23. J. M. Cadenas.
24. C. W. Brett.
25. A. F. Brewer.

No important business has been transacted as yet, but the men expect to get busy soon and put in some hard work for the class.

COMMUNICATION.

To the Editor of THE TECH:

Dear Sir:—In last week's issue an impression was given that it was difficult to raise the fund of \$1000 for the recent reunion in New York.

In justice to the generous contributors a correction should be made.

This sum was raised without personal request and came in from two letters to about two hundred New York Alumni. The Reunion Committee agreed to underwrite any deficit, but they were not called upon to put up anything, in fact, several checks were returned and the whole affair was closed up with a slight surplus.

L. D. Gardner, '98.

New York City, March 18, 1913.

SHOW LIGHT MEN.

The last call for Tech Show light men has been issued and all candidates for these positions are to meet downstairs in the Union at 5 P. M. This scheme of having students run the lights for the Show is a new one and a good chance is offered men who are not actors, but who know how to run spot-lights, to receive some good experience and incidentally to have a lot of fun in connection with the Show.

E. E. SOCIETY TRIP.

The Electrical Engineering Society is planning to conduct another trip to the "L" Street power station this afternoon. As yet only a few men have signed up for the trip, and, although the party is limited to twenty-five, any students who are not members of the society are invited to join the party if they would like to visit a large electric power house. The men will leave from the Union at 2 o'clock this afternoon.

Tech won a decided victory over Syracuse University, but lost to the Syracuse Arena team, 6-2. The latter game was marred by poor sportsmanship on the part of the Arena men. In the game with West Point Tech awakened to her possibilities and took the soldiers into camp by a score of 8-0. The game with Williams broke Tech's string of previous victories over the Purple, Williams winning in a very close game, 4-3. This game closed the season.

Next year the team will suffer by the loss of Ranney, Stucklen and Foote, all of whom played very fast hockey. New material will have to be relied on to fill their places.

Does anybody know of anything that Peck hasn't been actively interested in?
