

THE TECH

VOL. XXXII. NO. 119

BOSTON, MASS., TUESDAY, MARCH 25, 1913

PRICE TWO CENTS

DRAWINGS ARE SENT TO PHILADELPHIA

Plans Made by Members of Architectural Course Show Much Thought.

The drawings submitted by the students of the Department of Architecture in the Prize Contest in Philadelphia have been forwarded to Philadelphia. They will be judged by a committee made up of representatives each of the contesting colleges. The drawings are particularly good and show much conscientious work. The announcement of the winners will be made in a couple of weeks.

Before the drawings were sent they were submitted to the students of the department for discussion, a vote being taken on the merits of the drawings. The student vote resulted as follows: Class I. G. I. Edgerton, 34 votes; C. Rosenberg, 33 votes; A. Corrubia, 25 votes; T. H. Mace, Jr., 23 votes; W. J. Mooney, 17 votes; F. N. Breed, 16 votes. The Faculty decided to send the drawings of F. N. Breed, G. I. Edgerton, A. Corrubia, T. H. Mace, Jr., W. J. Mooney and L. C. Rosenberg.

The contestants in the second class received the following number of votes: F. S. Wheaty, 39; U. C. Schiess, 27; F. A. Chandler, 24; E. L. Williams, 24; Whitten, 23, and J. A. Root, 21.

The Faculty has sent the drawings of the following men of this class to Philadelphia: F. A. Chandler, J. A. Root, U. C. Schiess, F. S. Wheaty, E. L. Williams and P. S. Howas.

The competition was founded by Mr. Lloyd Warren of New York. The purpose is to promote intercollegiate competition, and thereby raise the standard of student work. This year the competition for Class I is to draw plans for a museum of fine arts, and for Class II a plan of a college library.

COMMUNICATION.

To the Editor of THE TECH:

Dear Sir:—We understand that space will be given on the ballots of the Undergraduate Association Constitution for every man to express his disapproval of any specific clause therein. The only objection we can see in the substance of the Constitution is that the membership of the Institute Committee seems to be radically wrong as to representation. The fact that such societies as, for example, the Wireless Club and the Course Societies, have the same voice on the Committee as the major Institute activities, such as the M. I. T. A. A., Tech Show, THE TECH and Technique, seems absurd. Practically no action is taken affecting the minor activities as organizations. Every man in the Institute is already represented by three Class Representatives. Since the Institute Committee is primarily for the supervision of all activities, the representation should be in proportion to the interests which they have at stake. Since the Institute Committee would decrease in efficiency with increasing size, would it not be wise to do away with the rating power of the several minor activities. Institute Committee meetings would still be open to any man wishing to bring special matters to its attention. Some Interested Students.

JUNIORS WILL HAVE NOVEL ENTERTAINMENT

Vaudeville Performance Given By Members Is Exciting Much Interest.

Great enthusiasm reigns just now among the haughty Juniors over the coming Smoker. The entertainment is to be held Thursday evening, at 7.45, in the Union, and bids fair to rival any other meeting ever held in that place in fun and merriment. The vaudeville acts, which are to last for one hour, are to be the main feature of the evening. The amusing part of the vaudeville performance is that all stunts will be done by the class members, and from the length of time allowed for these surprise stunts it is expected that the performance will be of quite a varying nature. The free "smokes" will, no doubt, keep every one busy, since the committee in charge of this entertainment has provided a good supply of them.

Members of the Faculty are invited, and it is expected that the "elders" will add immensely to the "fun" of the affair, for unlike other meetings to which Faculty members are usually invited to address the audience, they will this time deliberately participate in the fun of the evening. The committee in charge of the Smoker are: W. H. Brotherton, chairman; R. D. Salisbury and P. E. Morrill.

SHOW REHEARSALS.

Important Meetings This Week—New Instructor in Dancing.

Work on the Tech Show is progressing very satisfactorily and it will not be long before the production is ready. Following is the program of rehearsals for this week:

Tuesday, at 4.15, the cast and chorus will rehearse the book and music under direction of Mr. Sanger, starting at the beginning and going as far as possible.

Wednesday, at the same time, Mrs. Adams, who has been recommended by Miss Kellogg, will instruct the chorus in their steps.

Thursday afternoon Mrs. Adams will again have charge of the chorus dancing, and Mr. McConathy will conduct a complete song rehearsal with the cast, chorus and orchestra.

Friday, at 4.15, the cast and chorus will go through everything in conjunction with the Orchestra, starting with the first of the book and going as far as the time allows.

Saturday, Mr. McConathy will have everyone in a song rehearsal from 2 until 3 o'clock, after which Mr. Sanger will take charge until 6 o'clock.

Rehearsals are now very important and it is necessary that attendance be prompt and regular, for it is on the attendance that much of the success of the Show depends.

POSSE GYM WEAKENING.

Anyone who uses the alleyway between the Mechanical Engineering Laboratories and the Posse Gymnasium, which was recently gutted by a bad fire, does so at a risk, because the walls of the latter building are declared to be weak and liable to fall at any time.

INTERCOURSE RUN SATURDAY AFTERNOON

Course II is the Favorite—All Other Courses Are to Combine.

Saturday afternoon the annual inter-course cross-country race will be pulled off. This spring event has in past years aroused a large amount of enthusiasm among the non-athletic men of the Institute as well as the regular track men. This run has always brought out a large number who are not taking track work. Last year the courses were combined, as will also be the case this year. Courses II and VI won the race last year, and this year the same two Courses will probably be combined. The remainder of the Courses will be split up in groups of three or four to the team. Course II is regarded as the strongest team as it has Benson and two or three other regulars on whom it can rely to take first place, and probably third or fourth. Where the others of that Course will come in is what will decide the result of the race. If the other Courses can get their men in between the first man to finish and the last man on the Mechanical Engineers' team that counts, they stand a good show of coming off with the honors.

Captain Nye of the cross-country team is not going to run in the race as he is at present working upon the two-mile distance run. Nye's loss to Course IV in this race will be keenly felt as he is one of the strongest cross-country men in the Institute.

The inter-class cross-country race is not to be held this year. As the Freshman-Sophomore run is to be held a week from Saturday it was thought better not to hold another run that would give the two lower classes an opportunity to compete twice over the same course within a week.

CHESS TOURNAMENT.

Preliminary Games Have Been Played—Semi-Finals Now.

The preliminaries in the chess tournament which has been going on during the last week have now been played. The results between the eight men who entered are as follows: W. E. Merrill won two games from D. C. Dunning; C. E. Norwood defeated I. Paris twice; R. D. Brown won two and a half out of four games with P. F. Jones, and D. E. Woodbridge got two games out of three from C. M. Woodcock.

Two weeks will be allowed for the games in the semi-finals between W. E. Merrill and C. E. Norwood, and R. D. Brown and D. E. Woodbridge. The winners in these matches will then compete in the finals.

PROM INVITATIONS.

The Junior Prom invitations are now ready and will be distributed in the Union today and tomorrow, from 1 to 2 o'clock, by members of the committee. These men who have already signed up, but are not on the waiting list, are entitled to an invitation. A deposit will not have to be made.

WORK IN TESTING LAB. PHOTOGRAPHED

Professor Hayward Starts Series of Valuable Records of Materials Tests.

Professor Harrison W. Hayward, of the Mechanical Engineering Department is just now having a series of pictures taken of the work in the testing laboratories of the Institute. To date, only six have been taken out, but by the time the year is over there will probably be about twenty. These are to include many pictures of special thesis work being carried on by this year's Seniors.

The work in the laboratory at present is being done by the Course I men, and consists of strength tests of various building materials. Eight pictures will be taken of this part of the work in order to have an exact record of the methods used in these laboratories, rather than to show their equipment. The four already finished include pictures of a compression test on an I beam, of a tension test, of a compression test of a wooden beam on the large 300,000 pound horizontal Emery machine, and a scene in the cement testing laboratories.

Later in the year about a dozen pictures will be taken of the thesis work. These, too, will form a record of all the methods used in that particular kind of work, and will show more of the real nature of the tests than could be gained in a much greater time spent in reading any written report. The whole series will also form material for lantern slides or illustrations for the use of future lecturers, both here at the Institute and elsewhere.

Although many pictures have been previously taken they were primarily for advertising purposes, while this series is for the reference of the engineering departments of Technology in general, and those of the Course I work for the use of the Civil Engineering Department. By the end of the year Professor Hayward will have some very interesting as well as valuable pictures, and deserves commendation for adding them to the extensive records of the laboratory work at the Institute.

WEATHER.

Forecast for Boston and vicinity: Tuesday, unsettled, with showers during the forenoon; somewhat colder in the afternoon and night; high west winds.

CALENDAR.

Tuesday, March 25, 1913.
4.15—Crew Practice—B. A. A. Boat Club.

TUESDAY, MARCH, 25, 1913

Every effort is being made to make TAG DAY a great success. The students are beginning to awaken to the fact that something must be done if our athletic teams are to be maintained. While a great majority are already anxious to do what they can toward making TAG DAY a great success, nevertheless there are those who, even now, do not realize the importance of this undertaking. These fellows must ask themselves: "Wouldn't we feel ashamed to have it known that our athletic teams had to be disbanded, owing to lack of student support and encouragement?" "Think of the new Institute across the river, and all its plans for fine athletic facilities, and think of how ridiculous it would be if we could not have teams under these conditions that could cope successfully with the strongest teams in the country.

The present Athletic Association is making every effort possible to convince the Corporation of the fact that way down in their hearts the students are really very anxious to have teams capable of making them feel proud of their college in ways other than its already well-known ability to turn out clever engineers. Is there any light more awakening to college spirit than that of seeing our athletes come in first after a hard, gritty race and months of well-directed training.

It is to make all this possible that this TAG DAY is being held, and these are the reasons why every student is so earnestly asked to join in this movement. As most of us know, the athletic situation is facing the crisis, and if this crisis can be met and successfully handled, there is no question whatever but that the way will be much clearer in succeeding years.

Now, fellows, jump right in and help. One tag will cost you only ten cents, five tags will cost you fifty cents, ten tags will cost you one dollar. How many of you are going to buy? Friday is the day, and the Institute will be flooded with tag sellers. Are we going to have every single man who is a Tech man tagged? Yes, of course we are. There isn't any doubt of it. We all know the spirit that is down deep in our hearts and we are all prepared to assist in the work by meeting this crisis.

WRESTLING MEET AT MILTON TONIGHT

Tech Team Wrestles With Cunningham Gym—Last Meet of Season.

Tonight the Tech wrestling team goes to Milton for a meet with the Cunningham Gymnasium wrestling team. There will be six events, and as this is the last big meet of the season the team wants a good bunch of rooters to go along and make some noise. The Tech men who are entered are as follows: In the 115-pound class, Sayer; in the 125-pound class, Means; in the 135-pound class, Kelly; in the 145-pound class, Morse and Alexander; in the 158-pound class, Treat. All of the men are fast wrestlers and the bouts promise to be full of interest all the way through. The train leaves the South Station at 6.22 o'clock. The admission is twenty-five cents.

MECHANIC ARTS TO MEET.

Members of Club to Hold Second Smoker of Year Tonight.

Tonight the Mechanic Arts High School Club will hold its second smoker of the year at 7.30, in the Union. There will be a short business meeting first, after which the rest of the evening will be turned over to entertainments.

These smokers have been signally successful in the past, and tonight's meeting promises to be one of the most successful ever held. The entertainment will consist of card playing and music, with refreshments served as usual. Handsome prizes have been provided, which will be awarded to the more fortunate contestants. There is quite a little musical talent in the club and the members are looking forward to this part of the program with great expectancy. The purpose of the business meeting is to make arrangements for the final banquet of the year. It has always been the custom to invite all the members of the Senior class of the Mechanic Arts High School who intend to come to Technology, and as many others as the club wishes to invite.

CREW STARTS WORK.

Practice on the Basin Every Afternoon at Four O'clock.

The first outdoor practice of the Crew was held yesterday afternoon from the B. A. A. Boat Club. On account of the heavy sea that was running but few of the men reported. Commodore E. C. Gere took charge of the men and practice was started immediately.

As the shell which belongs to the M. I. T. Boat Club is undergoing repairs, the men used one of the B. A. A. four-oared shells. The men made a very good showing as far as could be judged by their first workout under unfavorable weather conditions. The following men rowed: Berkowitz, stroke; Macy, 3; Gere, 2; MacRae, 1, and Marion, cox.

Practice will be held every afternoon this week at 4.15 o'clock, and all men interested in Crew are urged to report. The men will continue to use four-oared shells this week until the Crew's boat is ready.

HARE AND HOUNDS.

The Hare and Hound Club will have regular practice Wednesday afternoon over the Tech course. The men are to leave the Trinity Place Station at 4.20 sharp. The cross-country race this coming Saturday will be held on the Tech course, so that the practice Wednesday afternoon gives the men a chance to become acquainted with the way.

MUCH RIVALRY IN TECH BOWLING LEAGUE

Standing For Last Week—Faculty Team Defeated Team No. 3 Yesterday.

The Trinity Court Bowling Alleys was well patronized by Tech men last week. The standing of the several teams on Saturday night follows: Team No. 2 is ahead with 2475 pin-falls; Team No. 3 comes next with a score of 2335; Team No. 5 is third with 2385; the No. 6 Team has the fourth highest per cent. in the contest with 2254 pinfalls; the score of Team No. 4 is 2253; and Team No. 1, with eight defeats, has made 2340 pin-falls. The individual average of the highest men is: Hall, 91; Nason, 89; Yeh, 86; Lovely, 85; Vose, 85.

Yesterday afternoon Team No. 5, the "Faculty Team," defeated Team No. 3 by a score of 1267 to 1231. The score:

Faculty Team.	Totals
Burrison	258
James	226
Hall	256
Arms	253
Mackenzie	269
Total	1267
Team No. 3.	Totals
Sloan	226
Lewis	229
Hall	273
Lockenburg	246
Yeh	263
Totals	1231

RIFLE CLUB SHOOT.

Tech Team Breaks Its Record in Match Against Lehigh.

Yesterday the Rifle Club shot against the Lehigh College team and made an excellent showing. The score of the Lehigh men is not yet known, but the Technology men are confident of having won. Their scores are as follows:

	Offhand	Prone	To.
J. S. Stewart (Capt.)...	95	100	195
G. Haslam	96	100	196
W. S. Chandler.....	96	98	194
E. J. Casselman.....	90	99	189
C. T. Dunn	95	92	187
A. Simmons	86	91	177

961
This score is 13 better than any score the club ever made, and is four better than the score made by the Harvard Rifle Club when they shot against the Tech Club. Next week the club shoots its final match of the year, which is against the Mass. Agricultural College team. The Tech men are quite confident of making an excellent showing and hope to win the match.

H SOPHOMORE BASEBALL.

The Sophomore baseball practice will be held this afternoon at the field. A short practice will be held, after which a scrub game will be held between the Oleanders and Starfish Giants. But very few more chances will be available for any working out before the first game, so that it is very essential that all those that are coming out for the team must show up today. Those that have not come out as yet but intend to must report this week at the very latest.
