

THE TECH

VOL. XXXII. NO. 120

BOSTON, MASS., WEDNESDAY, MARCH 26, 1913

PRICE TWO CENTS

INTEREST IN TAG DAY GROWING FAST

This Means of Giving Encouragement to Tech Athletics Well Received.

So many men have volunteered to sell tags and seem so enthusiastic in their attitude that the committee feels assured of TAG DAY'S entire success. While the committee's first rather venturesome estimate of the financial gain was \$150, it is now felt that the amount will very easily total \$250, which means the sale of 2500 tags at ten cents a tag.

The Athletic Association will require from \$1000 to \$1100 to complete the season. So far the prospects for meeting this are as follows: the Institute Committee has awarded practically all they had, \$260; there is a possibility of Technique giving all of their profits, \$250; TAG DAY, \$250; making a total of \$760. The remaining \$250 to \$300 will be made largely by gate receipts at the games to be held this spring. Another possible source of income is Tech Show, 1913, which, if the Athletic Association is pinched, will make it some return the latter part of May. This is exactly the way the situation stands, and it shows the importance of the \$250 receipt expected on TAG DAY.

FRENCH CLUB TO MEET.

Members Will Give Sketch of Life of Pailleron.

Tomorrow afternoon, at 5 o'clock, the Cercle Francais will hold its regular meeting in Room 29, Lowell. Owing to the fact that so few members were able to attend when the club held its meetings on Wednesday afternoons, it was decided to meet on Thursday.

The reading of the French play, "La Monde ou l'on S'Ennuie," will be continued. One of the members will first give a resumé of the part already gone over for the benefit of those who were unable to attend the last meeting. Great interest was shown last time by those taking part, and it is hoped that even more men will attend tomorrow and enjoy the reading.

A short sketch of the author, Pailleron, will be given, and anyone who knows anything further about him and his works will be able to add to the remarks. As usual, the meeting will be carried on entirely in French.

HARE AND HOUND RUN.

The Hare and Hound Club will hold practice run over the Tech course today. This run is held to give the distance men a chance to become acquainted with the route in preparation for the Inter-course cross-country race to be held between teams representing the different courses of the Institute Saturday afternoon. This is the last opportunity for regular practice before Saturday. All men going out to the run this afternoon are to take the 4.31 train from the Back Bay Station.

The Trinity Court Bowling Alleys must be a busy place when the Tech teams are over there.

TECH WRESTLERS AGAIN VICTORIOUS LAST NIGHT

Three Out of Four Bouts Go to Technology at Cunningham Gymnasium.

Last night the Technology wrestling team gained a decisive victory over the Cunningham team at their gymnasium in East Milton. There were only four bouts, as the man who was to oppose Captain Treat of the Tech team failed to show up at the appointed time. All the men did very good work throughout the meet.

In the first bout Loo won from Innis of the Cunningham Gym team on a fall, their weights being 117 and 104 pounds, respectively, for which Innis was given a slight handicap. Hern, 121 pounds won from Sayer, 117 pounds, of the Tech team, on a decision, after a hard fight of eighteen minutes, three minutes more than the usual time. In the third bout Kelly threw Hall in 4 minutes and 31 seconds, both weighing 135 pounds. Morse, of Tech, won from Peterson on a fall in the remarkably short time of thirty seconds. Morse, who is in the 145-pound class, is a Freshman and has done unusually good work ever since taking up the sport at the beginning of the year, and deserves credit for his victory last night, especially as his opponent was almost the same weight as himself.

This meet closes the work of the Tech team for the season. It has won the great majority of its meets, and in thus upholding the athletic standards of the Institute, has shown that it should have the enthusiastic support of the student body as a whole.

REHEARSALS IMPROVE.

Coach Sanger to Go Over Second Act of Show This Afternoon.

Yesterday afternoon Mr. Sanger conducted a rehearsal of the cast and chorus up to the finale of the first act. The rehearsal was somewhat better than those of last week, but there is still room for improvement.

Today Mr. Sanger will again have charge of the cast and chorus. Beginning with the finale of the first act he will go through the second act as far as possible. Mrs. Adams will be present to coach the chorus in dancing, and all songs will be sung in the order in which they will occur in the public performances of the Show.

A complete and prompt attendance is required and every man must know his part thoroughly. All men who are not in the last part of the first act, or all of the second act, need not be present at the rehearsal this afternoon.

"FLIERS" TWO DOLLARS.

The attention of all activities and class officers is called to the fact that THE TECH has raised its charge for "Fliers," the large type advertising line which appears at the bottom of the front page, from one dollar to two dollars. This ruling took effect at the beginning of the second term, and was passed for the reason the Managing Board felt that as an advertising medium these fliers were losing their importance, owing to the too frequent use of the privilege.

M. A. H. S. MEN SPEND PLEASANT EVENING

Second Smoker of the Year Is Big Success—Plans for Banquet Discussed.

Last evening, at 7.30 P. M., the Mechanic Arts High School Club held a smoker in the Union. There was a short business meeting, at which the subject of the final banquet was discussed at some length. The date was not definitely fixed, but it will be about the first of May, on the evening most convenient to the members. Arrangements will be made by the Executive Committee to secure at least two speakers from the Mechanic Arts High School, and at least one from the Institute. As has been the custom in previous years, the members of the Senior Class of the High School will be invited to attend, so that they may get a better idea of the Institute, to which many of them hope to come, than has been possible from outside sources. The price of the tickets will be fifty cents, the same as in former years.

After the business was closed cards were brought out and an enjoyable hour was spent with them. J. J. Hickey won the first prize, which was a Tech banner. The booby prize a package of chocolates, went to Homer Rogers. Following the announcement of the winners refreshments were served and the meeting broke up about 10.30, after a very enjoyable evening.

LIGHT MEN SELECTED.

Competition Very Close—Four More Men to Be Chosen.

The stage manager of Tech Show Mr. G. R. Thayer, '13, has announced the selection of men to run the spot lights in the Show. The competition was very close and the examiners announce that every man who took the examination was considered in the final selection.

The two men who will run the spot lights are Littlefield and Warren. Desmond, Wright and C. W. Brown will be on the stage lights, with three or four other men to be selected from among Bristow, Horton, Brown, Randolph, Lewis and Waitt, who were practically tied in the competition. The stage manager will make another appointment with these men for some afternoon before the final selections are made.

GOLF CLUB MEETING.

Question of Links to Be Discussed Today.

At 1 o'clock, Thursday, in 21 Rogers, will be held an important meeting of the Golf Club. The officers request that all of last year's members be present, and they also invite all other men interested in the sport to attend the meeting. The question of links will be taken up and discussed. It is stated that the Albermarle links will probably be used, but in case a number of new men join the club it will be necessary to procure other grounds or which to play.

WELL-KNOWN SPEAKER TO ADDRESS T. C. A.

"The Real Dynamic Behind Civic Betterment," Subject For Next Talk.

The regular T. C. A. talk for this week is to be delivered by Rev. James A. Francis, D. D., pastor of the Clarendon Street Baptist Church. His subject will be: "The Real Dynamic Behind Civic Betterment," and, judging from his reputation as a public speaker, the talk ought to be interesting and instructive.

Doctor Francis has been much in demand as a speaker on vital problems of the day. He served last year on the teams which talked for the "Men and Religion Forward Movement." Besides being well known to the public at large, his name is also familiar to Tech men. Last year he delivered a very successful T. C. A. talk. Those who heard it declared it one of the best given that year, and were anxious to hear Doctor Francis again. A short time ago he agreed to speak again, but the date first arranged had to be postponed, on account of a trip he made to speak at Minneapolis, Minn.

The attendance at the recent T. C. A. talks has been quite small, and unless there are more men at weekly meetings they may have to be abandoned. If Tech men are really interested in the work of the T. C. A. they should make a strong effort to be present tomorrow noon.

T. C. A. ENTERTAINMENT.

Social to Be Held Next Friday Evening in the Union.

The Technology Christian Association will entertain its members at a social gathering to be held at 7.30 Friday evening, March 24, in the Union. As this is the date of the annual election of officers there will be a short business meeting, in which it is hoped to have a discussion on the needs of the Association at the New Technology. Announcement will be made of the successful candidates in the election.

The details of the entertainment have not yet been learned, but it is certain that the members will be assured of an enjoyable evening.

Everybody turn out and help support athletics next Friday—it's TAG DAY.

WEATHER.

Forecast for Boston and vicinity: Wednesday, colder; brisk to high northerly winds.

CALENDAR.

Wednesday, March 26, 1913.
4.00—Freshman Baseball Practice—Field.
4.20—Hare and Hounds—Back Bay Station.
Thursday, March 27, 1913.
3.00—Sophomore Baseball Practice—Field.
5.00—Cercle Francais—29 Lowell.
1.00—Meeting of Golf Club—Union.

WEDNESDAY, MARCH, 26, 1913

THE TECH has not as yet expressed its opinion on any particular points in the new Constitution, except in a general way, stating that we have felt that there should be a definite and well organized association under which the Institute Committee has real power to act.

In considering the membership of the Institute Committee as provided for in the new Constitution—the point which has seemed to cause the most discussion and criticism, we heartily agree that perhaps the most satisfactory provisions have not been made.

The matter of an executive committee has been suggested by many with various methods of procedure and many degrees of power. An upper house of government, or what would amount to the same if a strong executive committee were created, would have an effect which seems to us would alleviate much of the criticism concerning the present membership and that which is suggested. One idea has been to give only the major activities seats on this committee with a strong executive power; another that representation on both the lower and the upper committees should be copied, more or less directly, after the Senate and House of the United States Government. We feel that neither would meet absolutely the needs of the association, unless it be the former, when membership could be established automatically by the amount of funds handled by an activity. The latter would doubtless be too unwieldy under any conditions as a purely representative body. There should be various checks, modeled somewhat after the English system, with, however, the bulk of the power placed in the upper committee.

We sincerely hope that any men who have been giving this matter their attention will come forward now with further suggestions and criticisms.

THE TECH SHOW.

With the appearance of the application cards for "Money in Sight" tickets, the Undergraduate support of this year's TECH SHOW becomes a question of the day. That the support will be as good as usual is unquestioned, but the SHOW faces a situation this year calling for a record

TECHNIQUE BASEBALL MEN DEFY THE TECH

Managers of Team Send Letter Boasting of Their Prowess.

The following letter has been received from the managers of the Technique baseball team. We will not endeavor to make any comments thereon, but will abide by the results of the game to be played April 16. Sic semper Techniquis!

Boston, March 26.—TECHNIQUE has completed its spring practice. With half a night of work under the careful eye of its eminent coach, Charliworth Cafe, the team showed such brilliant proclivities among themselves that they feel fully confident of handling any ball which the ink-slingers' slab artist may desire to pass up to them. It is assured that the sweet young hopes of many a curve and spitball to snuggle comfortably within the cheering embrace of the catcher's mit will be blighted, and instead, the sudden impingment upon the willow wands of the TECHNIQUE'S HUSKIES will destine them for a new career to soar through the etheral vastnesses of the cerulian hued heavens. TECHNIQUE'S batting average is today slightly over 1.000. In answer to a request for a practice game with the RED SOX, Jake Stahl replies that he cannot stand the humiliation of such a decisive defeat and possible injury to his players so early in the season. All other requests for games have been met with the same answer. TECHNIQUE is too strong for them. They know who is training us. However, ye worthy scribes, be not dismayed. Proper disposition of your remains will be made and your descendants given the best of care and comfort in the future.

TECHNIQUE.

CREW PRACTICE.

Interest is increasing in the crew as was evidenced by the presence of twelve men at practice last night. These men made three trips up and down the Basin and acquitted themselves creditably. The prospects appear to be bright for a good crew this year, and the officers hope to see more men out for practice as the weather becomes more settled. Practice is held every day at 4.15 P. M., from the B. A. A. boathouse on the Charles River Basin.

breaking financial success.

TECH SHOW was started in 1893 to pay off a deficit in athletics. Today our own Athletic Association faces a similar but even greater deficit, due to the small support given them. To put athletics on a sound basis again this year's SHOW must be insured a tremendous success, a result which can only come through the co-operation of the Undergraduate body. Not only should you buy as many tickets as possible, but each and every one should consider himself a specially appointed "advertising agent" of "Money in Sight."

APPEARANCE OF THE UNION.

A very marked improvement was noticeable about the Union a short time ago. Nearly every man did his part in maintaining the attractive appearance of the rooms. At present, however, this interest seems to be somewhat lacking on the part of a few students. Notwithstanding the endeavors of the Union Committee, the lounging rooms are beginning to look almost slovenly on some days. Cigarette stubs and paper have been strewn carelessly about the floor instead of being placed in the proper receptacles. Also many of the books have been thrown around and mutilated.

It is a difficult matter for the Union House Committee to keep the rooms in a neat condition unless every man in Technology does his part and uses the same consideration that he would in his own home.

A FRIEND IN NEED

is a friend indeed. Our plan not only makes you save money, but furnishes ready money when needed.

TECH BOWLING LEAGUE.

Two Games Yesterday—Several Men Failed to Show Up.

Two hotly contested games were witnessed last evening at the Trinity Court Bowling Alleys, where four teams of the Technology Bowling League engaged themselves in fierce combat. Team No. 2 defeated Team No. 4 by a score of 1284 to 1155. Owing to the loss of two of their men, Team No. 4 was seriously weakened and the handicap proved too much for them. Team No. 2 is still ahead with 3759 points to their credit. Team No. 6 won over Team No. 3 by a score of 1184 to 1102, the latter being short one man.

MECHANICALS TO HEAR PROF. PEABODY

Will Give Illustrated Lecture on "Oil Burning" Next Friday.

Professor C. H. Peabody, head of the Naval Architectural Course at the Institute, will speak before the Mechanical Engineering Society at its meeting in Eng. B next Friday afternoon at 4 o'clock. Professor Peabody will talk on "Oil Burning," and his lecture will be illustrated by lantern slides. Some of the pictures to be shown are cuts from the book "Steam Boilers," which was written by Professors Peabody and Miller, and which was only recently published. The talk will be of considerable interest, and the officers of the society extend their invitation to attend this meeting to men of all courses.

The officers have several good speakers scheduled to talk at the society's meetings during the remaining year. The speakers are well known engineers throughout the country, and they will speak on subjects of interest to mechanical engineers. They include two power plant experts, one mill engineer and one boiler expert. The annual banquet of the Mechanical Engineers will be held toward the end of next month.

New officers for next year will be elected soon, and the nominations will take place in the near future, followed by the election. The officers now have the society's pins on hand and any member wishing one can obtain his pin from these men. Subscriptions for the A. S. M. E. Journal will be received by the officers also.

The Sophomores who are now eligible to membership are requested to hand in their names to the officers or to drop them in the box under the society bulletin board in Engineering B.

FRESHMAN BASEBALL.

Candidates Make an Excellent Showing at Practice.

This is the second week of practice for the Freshman baseball men, and more candidates are expected to come out this week than were out during last week. It has been decided that practice will be held on Monday, Wednesday and Friday afternoons. A large number of men reported last week, most of whom were infield candidates. This means that there is plenty of chance for outfielders, and it is hoped that many will take advantage of this opportunity and come out. Last Monday afternoon about twenty men reported and made an excellent showing. After a short time spent in fielding two scrub teams were organized and the men were given a chance to bring out their batting qualities. Prospective candidates are asked to keep in mind the fact that those who come out for baseball and report regularly for practice will be excused from Gym.

CHEMICAL SOCIETY.

Talk to be Given by Head of Large Holyoke Paper Mill.

The Chemical Society will be given an opportunity to hear a lecture on "The Problems of a Paper Mill Chemist" next Friday evening, when Mr. H. P. Carruth, a graduate of the Institute and head of the Holyoke plant of the American Paper Company, will address them.

The officers of the society state that Mr. Carruth has many interesting things to say and they are desirous of having as many members present as possible. The meeting will be held in the Union at 7.45 on the evening of March 28, and promises to be one of the most interesting and instructive meetings ever held under the auspices of the society.
