

THE TECH

VOL. XXXII. NO. 121

BOSTON, MASS., THURSDAY, MARCH 27, 1913

PRICE TWO CENTS

EV. J. A. FRANCIS TO ADDRESS T. C. A.

The Real Dynamic Behind Civic Betterment," Subject of the Talk.

The regular Thursday noon talk of T. C. A. is to be given by Rev. J. A. Francis, D. D., pastor of the Tremont Street Baptist Church. One who heard Dr. Francis speak one of the T. C. A. talks last year said that he is well worth hearing. His subject, "The Real Dynamic Behind Civic Betterment," is one which promises to be both interesting and educational.

Dr. Francis served last year on one of the teams of speakers for the Men's Religion Forward Movement. This organization was composed of men of the Protestant Churches who were trying to get more men to come to regular church worshippers. It was not a recent trip to Minneapolis which convinced us we should have had the pleasure of hearing Dr. Francis earlier in the year. He is much in demand as a speaker on vital problems of the day.

The attendance at the T. C. A. meetings has been small lately, and the members of the Association feel that if it is not increased they will be obliged to discontinue the talks since they can ask prominent people like those who speak here to give up valuable time so few men.

COMMUNICATION.

To the Editor-in-Chief of THE TECH: Dear Sir:—I desire to raise three objections to the proposed Constitution for the Undergraduates:

First: There is no necessity for a governing body with such powers as is proposed to give the Institute Committee. Never, to my knowledge, has any society or organization in the world done or attempted to do anything but what it had a perfect right to do, or attempted to exercise any power which did not rightfully belong to it.

Second: It might endanger the welfare of the very existence of organized undergraduate institutions. Only with the personnel of the proposed Institute Committee would not be able to judge as well as the men selected with an organization what would be the best policy for it to pursue, but it would be utterly impossible for all of the twenty-eight members of the committee to have a clear knowledge of the various organizations. Without this they could not make just or valuable decisions. It would be taking the right to make the decision out of the hands of some red-headed men who have had wide experience in their particular activities and putting it in the hands of twenty-eight men who, during their brief term of office, could gain only superficial knowledge of all activities.

Take the case of an organization which has a graduate advisory board; which decision would be the reliable, that of a body of businessmen, the majority of whom have actively associated with either some organization or a similar one in their own college days, or that of a hasty, half-informed committee? (Continued on Page 2.)

BIG JUNIOR SMOKER IN UNION TONIGHT

Free Smokes, Free Vaudeville— Discussion of Junior Week Plans.

Tonight, at 7.45, the much heralded Junior Smoker will start and not a Junior will be seen outside of the Union. Free smokes, free vaudeville, free speeches in fact, free everything will be the rule, and the committee promises all who attend the time of their lives. An excellent program is reported to be arranged, unique in the fact that it will be entirely the work of members of the class, and for this same reason it should prove exceptionally interesting.

The Faculty, although invited, will be allowed absolutely no other parts than those of listeners and partakers of the free smokes; this great departure from the usual custom will probably be hugely delight not only the Juniors, but the Faculty as well.

A discussion of the affairs of Junior Week will also be held, so that all members of the class will have a chance to express their opinions concerning this important event.

COMMUNICATION.

To the Editor-in-Chief of THE TECH: Dear Sir:—Replying to the communication regarding the proposed Constitution in your issue of March 25, we would say that any man believing in the general idea of the document but objecting to any particular article or section, may note on the back of the ballot the portion of the Constitution to which he takes exception.

This is more fair than to vote down the whole scheme for one or two points that do not suit.

In the particular case of representation it will be noted that article IV, section 5, provides for a change in the representatives by vote of the Institute Committee. This matter of changing representation will be brought up at the next Institute Committee meeting, and any man interested who is not a member of the Institute Committee should be present and give his opinions on the subject. In the event of the Committee deciding to keep the number of representatives as at present, the power of referendum could be brought into play (providing the Constitution is adopted) and the matter settled satisfactorily by the majority.

We trust that every man will vote in favor of adoption if he agrees with the main ideas of the Constitution, and will note on the back of the ballot his objections to specific parts of the document.

Respectfully yours,
Com. on Const. and By-Laws.
H. D. Peck, Chairman.

JUNIOR BOARD.

There will be a special meeting of the 1914 Executive Committee this afternoon, at 5 P. M., in 27 Rogers. The following men are expected to be present: Wyman, Taylor, Duffield, Waitt, Chase, Morrill, Whitwell and Mayer.

Don't forget what our wrestling team is doing.

ATHLETIC ASSOCIATION MAKES FREE OFFER

Ten Tags Admit to All Spring Inter-Class Meets at Tech Field.

The Athletic Association has decided to admit to all inter-class events at Tech Field this spring any student who has ten or more tags. This will undoubtedly help to bring a good many to the field who, under other conditions, would not be there.

At the Junior Class Smoker and at the fraternity houses tags will be on sale this evening. The committee is particularly anxious to have all fraternity men and all Juniors appear at the Institute Friday morning tagged, and it is also hoped that most of those so tagged will be wearing at least five of these attractive little souvenirs.

The price of the tags will, as previously announced, be only ten cents, but anyone so desiring may buy more; there is no limit; everyone can go as far as he likes. Anyone tagged, however, will be considered as having entirely and to the extent of his means done his duty and will not be expected or asked to contribute further. As all know, the proceeds of Tag Day will go toward the maintenance of athletics for the remainder of the season.

GLEE CLUB REHEARSAL.

Concert to Be Given in Everett April 9.

Today, at 5.15, there will be a Glee Club rehearsal. As the Spring Concert is only three weeks distant, the management is very anxious to have a full attendance, for the success of the concert depends upon good rehearsals. Mr. Hunt, the coach, will be on hand today, and all men not present at 5.15 will be "doubly fined."

A concert will be given in Everett on Wednesday, April 9. As this is to be followed by a dance the men are looking forward to a good time. It would be well to note that only those men who regularly attend rehearsals from now on will be taken on this trip or allowed to sing in the Spring Concert.

CLASS DAY COMMITTEE.

Today, at 5 P. M. there will be a regular meeting of the Senior Class Day Committee in 8 Eng. C. In the future there will be no announcement of these meetings, as they will be held regularly on Thursdays, at 5 P. M., in the same room.

TECH SHOW REHEARSAL.

This afternoon Mr. Sanger will continue with the rehearsal of the Show from the point where he stopped yesterday. Mrs. Adams will be present to coach the Pony Ballet. All those connected with the remainder of the second and all of the third acts, together with the Pony Ballet, must be present.

Think of it! The Freshmen stayed in Tuesday night to study for a U. S. exam.

Friday is Tag Day.

HARE AND HOUND RUN OVER TECH COURSE

Trials For Saturday's Race Held In Spite of Mud and Rain.

In spite of the elements the Hare and Hound run was held yesterday afternoon over the Tech course. Wilkins, Best and C. T. Guething finished first, with the others pretty well strung along in the rear. The course, which starts at the Highlands and ends at the Field, was over fields and roads which were, for the most part, ankle deep with mud. The following men also took part in the run: Murdough, Lee, Gray, Mastie, A. J. Goldstein, Page and Roper. Benson, the speedy Freshman, was unable to run on account of a weak ankle, but he will be in shape for the race Saturday.

From the way the men have been showing up lately Course II has been picked as the winner in the Inter-Course race. Guething, Lee and Benson will run for the Mechanicals, and all are expected to finish well up. Benson has been picked for first place, while Best, Hill, C. T. Guething and Wall will fight it out for second. The only chance any of the other Courses have of winning is by bunching their men in along about fourth, fifth and sixth places before all the Course men can finish.

GOLF MEETING.

The first meeting of the year of the Golf Club will be held today at 1 P. M., in the Union, to settle the questions of the coming spring. The choice of links will be considered and a tournament arranged to take the place of that which was to have been held last Fall. The officers of the club are hoping for a full attendance and an increased membership, as they wish to put the club on a firm basis.

Have you seen the music score of the popular musical comedies that are in the Union?

Isn't Infantry a good name for the Freshman Regiment?

Of course you are going to vote for the new Constitution.

WEATHER.

Forecast for Boston and vicinity: Thursday, colder, after-noon and night; brisk to high shifting winds.

CALENDAR.

Thursday, March 27, 1913.

NEW CONSTITUTION.

Mr. Peck's communication, which appears today, brings up a point which should be kept in mind very clearly in voting on the new Constitution. It is evidence of the advantage of having this Constitution adopted, for, under it, there is every possibility of changing unsatisfactory features as they introduce themselves.

The question of membership should, however, be well thought over and considered at this time in order that intelligent criticisms may be made on the reverse side of the ballots when they are placed in the hands of the student body. Although the matter resolves itself now into a question of whether the constitution shall or shall not be accepted, the more suggestions and criticisms offered the better will be the ultimate result.

1914 SMOKER.

Cannot every man of 1914 attend the Smoker which takes place tonight. There will be much good fun of an informal sort and an excellent opportunity for every man to get better acquainted with his classmates. Many members of the Faculty will be present but not in their official capacities.

It is at such functions as this that a wholesome Technology spirit is born and fostered into undying life, and it should be felt as the duty of every man to give his share towards its success.

COMMUNICATION.

Continued from Page 1.)

of undergraduates? Whose word would be final?

Third: The principle upon which the representation is based is extremely unfair. The class organizations, which play such a small part in the student life and activities and transact so little business, are each given three representatives, while each of the following organizations are given one representative, regardless of its size or relative importance. A glance at the following statistics will make clear this point:

Are you going to THE TECH-technique Ball Game?

How many tags are you going to buy?

SOPHOMORE BASEBALL TEAM IS IMPROVING

First Game to Be Played April 12—Many New Men Out for Practice.

The Sophomore baseball squad began its second week of practice at the Field Tuesday with a showing of twenty-three men. Each time the squad goes out for practice a larger number of men turn out, with an increased showing of last year's veterans. Tuesday the squad was divided into two teams, one of last year's men and one of the new candidates, as far as it was possible to make this division. Both teams "swatted the pill" considerably, but the veterans seemed to have the best of it in this department of the game as well as in the others.

The first game on the Sophomore schedule is on April 12, and between now and that date a good team should be formed with the material now at hand. A practice game with the Juniors before that date is under consideration. This will help to get the men used to real playing and abate the feeling of nervousness that is usually felt by even the most seasoned players at the first game. Those who turned up yesterday were Delano, Hall, Bauer, Place, Caffrey, Franks, Morse, McIntyre, Thomas, Waterman, Colby, Sears, Wolley, Wirt, Heffler, Spencer, Marconi, D. J. Murphy, H. J. Murphy, Pinkham, Halway, Anderson and Hyneman.

COMMUNICATION.

To the Editor-in-Chief of THE TECH:
Dear Sir:—Because of financial conditions, last fall, it became necessary for the Cross-Country Team to pay back the majority of the expenses incurred by the Ithaca trip. Accordingly a picture of the team was printed on post cards and these cards sold to the supporters of athletics here at the Institute. In connection with this a watch was to be given to the student who happened to buy the lucky post card. Last Monday Mr. Kanaly, with the members of the Cross-Country Team, decided which number should be the lucky one. The particular number happens to be H 10. If the person holding the card will kindly present it at the Cage, for the time being, the watch will be presented to him. The Cross-Country Team wishes to thank the men of the Institute for their support.

Alfred F. Nye.

COMMUNICATION.

To the Editor of THE TECH:
Dear Sir:—Quite recently Professor Lawrence has started the custom of locking the door to his lectures to fourth year, Course VI men, at five minutes past the hour, which seems very unjust, as he is not only treating the Seniors as children, but a man who may be delayed a few moments while talking to some professor about thesis work, or whose train may be a few minutes late, is deprived of a full hour's instruction rather than a few minutes. The students do not object to men coming in late, quietly, and it seems to me that they are the ones to object, as they, in a sense, hire the professors and are paying the money for the purpose of receiving instruction. Professor Lawrence is quite frequently, himself, late to recitations anywhere from five to ten minutes, and no one objects as all realize that he has many important things to attend to.

It is, therefore, the wish of many of the Seniors that this "lock out system" be discontinued.

Student.

LOWELL INSTITUTE SEASON CLOSES

Last of Successful Series of Public Lectures to Be Given Today.

This afternoon, at 5 P. M., the last Lowell Institute lecture for this year will be given. This lecture, which will be held in Huntington Hall, as usual, is the end of Prof. George P. Baker's series on Dramatic Composition. Prof. Baker's previous talks have been very interesting to all those who attended, and many who desired to hear him were unable to secure seats. This afternoon, Prof. Baker, speaking on "The Total Effect," will give a summary of the points previously covered and for this reason the talk should be interesting to all respective play writers, and invaluable to those who have heard the earlier numbers of the series.

The season of Lowell Institute lecture courses which closes today has been very successful. The first course, "The Discovery of the Gases of the Atmosphere," by Sir William Ramsay, as attended by a great many people, was especially interesting to students at Technology, who were not only taking advantage of the opportunity of hearing so famous a scientist. Subsequent courses have dealt with a large variety of cultural subjects, and have attracted considerable attention.

CHEMICAL SOCIETY.

Interesting Talk on Paper Mills Expected.

Tomorrow night the Chemical Society will hold its second meeting of the month in the Union at 7.45, with Mr. H. P. Carruth of the American Paper Company as speaker. Mr. Carruth has decided to discuss the problems which the chemist of a paper mill has to meet in his daily work. Mr. Carruth is particularly fitted to discuss this topic, for since his graduation from the Institute he has worked his way up in the paper industry, until he is now in charge of the paper mill at Holyoke. He is known as an able and interesting speaker, and the officers of the society expect him to attract a large attendance. At this meeting the committee on the revision of the constitution will probably make its final report.

(Continued from Page 2.)

Name	Active Membership	Business Transacted

Thus a committee which has but a few members and handles no money being equally represented with organizations which have many times as large a membership and handle thousands of dollars yearly. Is this fair? This equal representation?

David M. Hughs.

CORRECTION.

The following correction should be made in the account of the wrestling event which was published in yesterday's TECH: Smythe-Martin appeared in the 145-pound class, Morse not taking part in the meet at all.

A. MUTT'S OPINIONS OF TECHNIQUE GIVEN

Sees Something on Bulletin Board Which Arouses His Wrathful Muse.

(As reported by A. Mutt.)

When walking through Rogers' corridor the other day I nearly split my sides laughing (poor Jeff wasn't there to hold onto them for me) at something I saw adorning the wall. (It makes me roar so now I can hardly write). I'll grant the thing was quite a work of art, but oh! some of the things it said and the language that was used! From the ignorance displayed. It is a wonder that the writer of the hopeless mess is now in the Institute. I hope neither Professor Arlo Bates nor Professor Currier has taken a close look at the thing. Yes, technique will probably think that Lincoln crossed the Delaware after their remains are removed from the field of carnage on the eventful 16th. Also, I agree with the writer that the sun will rise out of the West after the 16th the poor little innocents won't be able to tell East from West then. Better consult Prof. Hosmer and get straightened out in the Right Ascension of your Mean Local Sidereal Time, my children.

Somewhere on that slip of paper it mentions something about two men representing technique, but for the life of me I can't see how they make it that many for I can see only one man amongst them unless they intend to Buck up and scrape up a few. As far as paying for the beer is concerned the writer's logic seems to be way off the track. My friend Jeff told me that that Dr. MacLaurin would decide, after reading the account of the game as published in the columns of THE TECH, who was the winner of the game and would then compel the loser cough up the price of the booze. Beware technique!

Maybe I didn't get sore when I saw the lines at the bottom of that drip on the bulletin board; the nerve of some people's children! The kids who are trying to run that year book probably can't read, for THE TECH issued a formal challenge in its issue of Monday. Then what do those kids do but stick up that line of bull and dare to say THE TECH "must" accept by such and such a day, for the love of Mike technique, show some brains!

Gee, I wish Bud Fisher and Jeff could have been around when I got a squint at that paper in Rogers, for I pulled off some stunts that beat any I have ever been in before. Why, Bud would have had enough dope to fill the "American" for a week and a half. This certainly makes up for my having missed that train the other fellows took for Nusite. I suppose I'd better stop now and hook a train for Nusite so I can help little Jeff write up a couple of stories on the doings of the "Typewriter Ticklers." All aboard for Alabam!

TALK ON "OIL BURNING."

Mechanicals to Hear Mr. Peabody of Wilcox Co.

Mr. E. H. Peabody, of the Babcock Wilcox Co. a large boiler manufacturing concern of this city, will give a talk before the meeting of the Mechanical Engineering Society next Friday, at 4.10 P. M., in 11 Engineering B. The subject of the talk is "Oil Burning." The lecture is to be illustrated with lantern slides, some of which have been taken from "Steam Boilers," a book written by Professors Peabody and Miller. Owing to a misunderstanding Prof. C. H. Peabody was announced as the speaker at this meeting in yesterday's issue of THE TECH.
